Where act provided for city planning and zoning in cities of the first and second class, such powers were in addition to, and did not supersede, the powers given cities of the first class by the act conferring on cities of the first class power of regulating the character of buildings. Ark.—*Arnold v. City of Jonesboro*, 302 S.W.2d 91.

Statutes held not repealed

(1) Statute authorizing cities of the first class to regulate building or removing of houses was not repealed by the statute authorizing cities of first and second class to provide for city zoning and planning through creation of a planning commission.

Ark.—*City of Stuttgart v. Strait*, 205 S.W.2d 35, 212 Ark. 126.

(2) Public health law provision authorizing establishment in towns of hospitals for tuberculosis was not abrogated by statute authorizing town to enact zoning ordinances so as to permit town to prohibit establishment of tubercular hospital.

N.Y.—*Jewish Consumptives' Relief Soc. v. Town of Woodbury*, 243 N.Y.S. 686, 230 App.Div. 228, affirmed 177 N.E. 165, 256 N.Y. 619.

Planning commission not created

When a community establishes a zoning commission under statute, but fails to take any action under statute to create a planning commission, the zoning commission necessarily has the power to set up a comprehensive zoning plan of its own.

Conn.—*Couch v. Zoning Commission of Town of Washington*, 106 A.2d 173, 141 Conn. 349.

General and special statutes

(1) Where legislature had enacted a special enabling act vesting zoning board of particular town with power to enact zoning ordinance, general statute, which provided for establishment of the zoning boards generally, was inapplicable.

R.I.—*Baker v. Zoning Bd. of Review of Town of North Kingstown*, 111 A.2d 353, 82 R.I. 432.

(2) Where special law authorizing Town of West Hartford to create zoning districts provided that if another statute imposes other and high-

er standards, that statute shall govern, and higher standards referred to in special law were concerned with size of yards, number of stories, and the like, general law covering municipal zoning and planning, which imposed no higher standards of this type, did not supersede special law. Absence of provision for notice and hearing

(1) Statute relating to organization of port districts held unconstitutional in so far as it attempted to confer authority to zone property within boundaries of port district

where no provision was made for adequate notice and hearing of proposed zoning ordinances.

Cal.—*Gilbert v. Stockton Port Dist.*, 60 P.2d 847, 7 C.2d 384.

(2) Notice and hearing generally see *infra* § 11 b.

Election limited to resident freeholders

(1) Statute limiting to resident freeholders the right to vote at election to form county zoning district was in conflict with constitutional provision whereby legislature could limit eligibility to vote to taxpayers only on questions of levying special taxes or issuing public bonds, and election held pursuant to statute was void, and purported county zoning district was without validity, notwithstanding statutory provision authorizing district to levy taxes.

Or.—*J. Peterkort & Co. v. East Washington County Zoning Dist.*, 313 P. 2d 773, rehearing denied 314 P.2d 912.

(2) Where an election to form a county zoning district was attempted to be held pursuant to an unconstitutional law, neither the notice of the election given in accordance with its terms nor the election itself could have any legal efficacy, and therefore election could not be sustained on theory that there was no reason to believe that the result of the election would have been different had nonfreeholders been permitted to vote.

Improvement of road

Provision requiring that road giving access to proposed structure be suitably improved before building permit may be issued is within police power, and is not objectionable as compelling construction of roads on land at owner's expense without compensation from town, and, since the requirements of the statute may be

relaxed, the statute does not deprive owner unreasonably of property if it is properly administered.

General grant of power

Constitutional provision, giving legislature power to grant certain municipalities authority to pass zoning and planning laws, authorizes general grant of power to pass such laws and does not limit such power to passage of single ordinance establishing one complete and comprehensive scheme of planning and zoning for entire area of municipality.

Ga.—*Schofield v. Bishop*, 16 S.E.2d 714, 192 Ga. 732.

Purpose of constitutional provisions

(1) Constitutional provisions relating to zoning were designed to remedy judicial denials of fullness of zoning power and to regulate its use so as to accommodate essential common and individual rights in fulfillment of zoning principle.

N.J.—*Roselle v. Wright*, 122 A.2d 506, 21 N.J. 400.

(2) Constitutional provision authorizing the legislature to enact general laws under which municipalities may adopt zoning ordinances was designed to reaffirm and define the basic sovereign power and to bring its operation within certain definite standards and principles in keeping with its essential nature.

N.J.—*Schmidt v. Board of Adjustment of City of Newark*, 88 A.2d 607, 9 N.J. 405.

Conformity to constitution

ing power to counties,⁵⁶ and they have been upheld as against the objection that they were violative of the federal⁵⁷ or state⁵⁸ constitution. A constitutional provision authorizing the legislature to grant to certain cities the authority to pass zon-

ing ordinances does not authorize the grant of such power to the governing authorities of a county.⁵⁹

The state, in delegating zoning power to a municipality, may determine the extent of the power granted,⁶⁰ prescribe the terms and conditions under which

Police power set forth in constitutional authorization

Zoning power of municipalities rests not merely on the police power of the state, but on the police power as set forth in express constitutional authorization to the legislature to enact statutes giving municipalities the power to enact zoning ordinances. N.J.—Fischer v. Bedminster Tp., 93 A.2d 378, 11 N.J. 194.

Amendment not constituting new grant of power

The 1927 Amendment to 1844 Constitution, authorizing legislature to enact general laws under which municipalities may adopt zoning ordinances in exercise of state's police power, did not constitute new grant of power previously beyond legislature's domain, and neither such amendment nor similar provision of 1947 constitution invoked any residuum of sovereign power, apart from police power, for enlargement of general legislative function laid down in organic law.

Amendment; single subject in title

Where zoning law amendment enlarged class of plaintiffs who might bring actions and increased allowable costs in those actions, fact that amendatory act was entitled an act to amend specified act satisfied constitutional requirement that amendments embrace not more than one subject and that subject be mentioned in title.

Ill.—Pasfield v. Donovan, 131 N.E.2d 564, 7 Ill.2d 563.

Single subject matter; subject limited to title

Statute to create and establish county planning commission and board of zoning appeals does not violate constitutional provision that no

law shall pass which refers to more than one subject matter or contains matter different from what is expressed in title thereof.

Ga.—Kirkpatrick v. Candler, 53 S.E.2d 889, 205 Ga. 449.

General or special law

(1) Amendment of general law, authorizing enactment of municipal zoning and planning ordinances and regulations, is not a special law for which provision has been made by an existing general law, in violation of constitution, although amendment applies only to municipalities having a population of more than three hundred thousand according to 1950 or any future United States census, since such classification on the basis of population is reasonably germane to the subject matter of legislation, and classification is left open to let in any municipality which by a future census may have the stipulated population.

Ga.—Orr v. Hapeville Realty Investments, 85 S.E.2d 20, 211 Ga. 235.

(2) Act conferring on the county commissioner of Cobb County authority to zone property outside incorporated cities of the county is not unconstitutional for violation of the provision that no special law shall be enacted in any case for which provision has been made by an existing general law, and provision requiring that tribunals for the transaction of county matters shall be uniform throughout the state and of the same jurisdiction and remedies, or on the ground that there is an existing general law with respect to zoning and because the law permits Cobb County to have a particular system different from other systems of zoning throughout the state.

Ga.—Humthlett v. Reeves, 85 S.E.2d 25, 211 Ga. 210.

(3) Public Service Commission Law has nothing to do with zoning, so that statutory authority given Baltimore County commissioners to adopt comprehensive plan of zoning regulations is not unconstitutional as applied to electric power company as being a special law for which provision has been made by general laws.

Conn.—Eden v. Town Plan and Zoning Commission of Town of Bloomfield, 89 A.2d 746, 748, 139 Conn. 59.

Single type of use regulation

Legislature can limit zoning authority conferred on local legislative body to one type of use regulation, leaving open other areas in which business or industrial uses are unregulated.

Md.—Anne Arundel County Com'rs v. Ward, 46 A.2d 684, 186 Md. 330, 165 A.L.R. 816.

Temporary or interim zoning ordinance

(1) Zoning provisions of statute do not carry with them implied or inherent power authorizing city to pass an interim zoning ordinance.

Pa.—Kline v. City of Harrisburg, 68 A.2d 182, 362 Pa. 438.

(2) Legislature has never authorized temporary zoning ordinances which prevent a property use from becoming a nonconforming use while the property is in flight from one municipality to another.

Pa.—Appeal of Rich & Co., 84 Pa. Dist. & Co. 393, 101 Pittsb.Leg.J. 85.

(3) Validity of temporary or emergency ordinance see *infra* §§ 18, 19.

Church or similar purpose

Statute providing that no bylaw or ordinance which prohibits or limits the use of land for any church or other religious purpose, or which prohibits or limits the use of land for any religious, sectarian, or denominational educational purpose shall be valid, was intended to deprive municipalities of all power to limit the use of land for church or

it may be exercised,⁶¹ as by requiring the consent of the majority of the people where the law is to operate,⁶² or designate the manner in, or the method by, which zoning shall be accomplished.⁶³ Where a permissive statute authorizes cities to establish building zones, it is not further required, to permit action by the city, that its charter be amended.⁶⁴

A statute designating the violation of a zoning ordinance as a nuisance has been held not invalid.⁶⁵

It has been held that statutes conferring on the municipal corporations the power to enact zoning regulations should be liberally construed⁶⁶ and that they should be interpreted in keeping with their evident reason and spirit.⁶⁷

other religious purposes or for religious, sectarian or denominational educational purposes, and applied both prospectively and retroactively. *Mass.—Attorney General v. Inhabitants of Town of Dover*, 100 N.E. 2d 1, 327 Mass. 601.

Fence as "structure"

Statute providing that township board of trustees may regulate use of land with reference to buildings and other structures contemplates that erection of fences can be controlled by a zoning resolution adopted by a township; a fence is a "structure" within such statute.

Ohio.—State v. Zumpano, App., 146 N.E.2d 871.

Area subject to zoning

(1) In statute defining municipal area which may be zoned by city as surrounding territory which "bears relation to planning and zoning of city," quoted phrase means territory which is so situated as to have bearing on planning and zoning scheme for city, and a remote, abstract relation to economic, commercial or social interest of city is not enough. *Ky.—American Sign Corp. v. Fowler*, 276 S.W.2d 651.

(2) Since a city of the fourth class has no power to annex land outside city limits in another county than that in which city is located, use of such land is not so reasonably related to city's development as to fall within purposes of statutes authorizing such cities to regulate and restrict use and type of buildings and requiring city planning commission to adopt master plan for physical development of city and municipal area, defined as surrounding territory bearing relation to city planning and zoning.

Ky.—Smeltzer v. Messer, 225 S.W.2d 96, 311 Ky. 692.

Ideal appearance of municipality; inflation of revenue

It is not within the scope of the act enabling cities and towns to enact zoning ordinances, for ordinances to be enacted for purpose of assisting a municipality to retain or assume a general appearance deemed to be ideal, or to inflate its taxable revenue. *Mass.—122 Main St. Corp. v. City of Brockton*, 84 N.E.2d 13, 323 Mass. 446, 8 A.L.R.2d 955.

N.C.—Marren v. Gamble, 75 S.E.2d 880, 237 N.C. 680.

Effect of constitutional provision

Statute prescribing certain conditions for zoning ordinances held not void on ground that constitutional provision authorizing zoning was without any restrictions.

La.—State ex rel. Holcombe v. City of Lake Charles, 144 So. 502, 175 La. 803.

Master plan adopted by planning commission is controlling only as to municipal improvements and regulation of subdivisions of land, and, under the general law, it does not control the zoning commission in enactment of zoning regulations. *Conn.—Levinsky v. Zoning Commission of City of Bridgeport*, 127 A. 2d 822, 144 Conn. 117.

Petition of property owners

The act providing that certain classes of cities may, and on petition of sixty per cent of the property owners within a given area of a city "shall," create a restricted residential district, is not unconstitutional as a delegation of legislative authority to private persons, since the legislation, if any is had, is by the council which is the recognized legislative body of the municipal government. *Iowa.—Des Moines v. Manhattan Oil Co.*, 184 N.W. 323, 188 N.W. 921, 193 Iowa 1096, 23 A.L.R. 1322.

Ky.—City of Somerset v. Weise, 263 S.W.2d 921.

Manner of exercising zoning power see *infra* § 11.

"When the method for exercising that power is prescribed by the statute, such method is the measure of . . . [the commission's] power to act."

Ky.—Louisville & Jefferson County Planning & Zoning Commission v. Ogden, 210 S.W.2d 771, 773, 307 Ky. 362.

Statute guiding zoning process

Zoning statute would, unless repealed or amended by legislature or by referendum or initiative by people, guide zoning process of cities

and direct means by which it was to be accomplished.

Utah.—Dewey v. Doxey-Layton Realty Co., 277 P.2d 805, 3 Utah 2d 1.

Purpose of act authorizing municipalities to enact zoning ordinances is to divide the territory within corporate limits of a city into business, industrial, and residential zones or districts and to provide the kind, character, and use of structures and improvements that may be made or erected therein.

only under such power.⁶⁹ In other words, zoning laws and regulations find, or must find, their justification in some aspect of the police power asserted for the public welfare or in the public interest,⁷⁰ or must be justified by the fact that they have some tendency to promote the public health, public safety,

Cal.—People v. Johnson, 277 P.2d 45, 49, 129 C.A.2d 1.

Aspect of police power

Fla.—Hartnett v. Austin, 93 So.2d 86.

Comprehensive zoning has long been established as being a legitimate exercise of the police power.

Cal.—Beverly Oil Co. v. City of Los Angeles, 251 P.2d 865, 40 C.2d 352.

Rights of individuals

(1) Zoning is exercise of police power which takes away, for public good, some rights of individuals to use their property as they please while giving them rights to restrict injurious uses of others' property.

Md.—Mayor and City Council of Baltimore v. Byrd, 62 A.2d 588, 191 Md. 632.

(2) Right which every property owner has to use his property in his own way and for his own purposes is always subject to exercise of police power by city in the enactment of zoning ordinances.

Ill.—Ronda Realty Corp. v. Lawton, 111 N.E.2d 310, 414 Ill. 313.

Division of property by sales

Even an actual division or subdivision of property by reason of sales thereof would not place it beyond the authority of a city to regulate under zoning ordinance acting under the police power, provided such could be done without undue private hardship or loss, measured in relation to the public benefit of such regulation.

"Zoning is in its essential policy and purpose a component of the reserve element of sovereignty denominated the police power, the sovereign right so to order the affairs of the people as to serve the common social and economic needs, the principle that brought them together in civilized society for their mutual advantage and welfare, to which all property is subject."

"General welfare"

(1) Under statute granting power to zone to cities for purpose of promoting the health, safety, morals, or "general welfare" of the community, quoted phrase includes considerations of public convenience and general prosperity, but means adopted to promote such ends must bear a reasonable relation to the declared purpose.

Constitutional grant of power to enact general laws

In exercise of police power for zoning purposes, legislative action is contained by constitutional grant of power to enact general laws under which municipalities may adopt zoning ordinances, so as to require zoning by districts according to character of lands and structures and their peculiar suitability for particular uses to serve general welfare in given areas of police action, and uniformity and equality of use within each division without invidious distinctions and discriminations not concerned with public purpose rightly in view.

Reason for this rule is that zoning was unknown to the common law and restricts the free use of property and the economic use of land, so that the courts have felt that nothing less than specific language of the legislature gives municipalities the power to zone. Second, the police power of comprehensive zoning is the power to exclude completely harmless and even desirable activities and uses, as well as those harmful to the general public welfare, which is a basic concept far beyond that of the police power generally.

pality's zoning power includes the power to prohibit or restrict the exploration for, and production of, oil and gas in designated urban areas, when reasonably necessary to promote the public health, safety, or general welfare.⁸⁹ Whether such power should be exercised is wholly within the legislative discretion of the governing body of the municipality.⁹⁰ A statute delegating to certain cities the power to restrict the drilling of oil wells within the city for the protection of the public health, morals, safety, and general welfare does not include the power to prevent the waste of natural resources.⁹¹

Land apart from buildings. As a general rule, a municipality may have the power to adopt reasonable zoning regulations restricting the use of vacant land, or of land apart from buildings or other structures thereon,⁹² and in this connection it has been held that, even though a constitutional provision authorizing the establishment of building zones does

not refer to vacant land, a municipality may have the power to regulate the use of such land in particular districts under authority derived from state statutes.⁹³

Density of population. The power to regulate the density of population by zoning regulations is one which must be conferred by constitutional or statutory provision.⁹⁴ In the absence of proper authority conferred on a municipality, it may be without power to prohibit in certain districts the erection of dwellings accommodating more than a certain number of families on a specified area of land,⁹⁵ and it has been held that a statute giving municipalities the power to regulate the height and bulk of buildings and the area of open spaces confers no authority to restrict the number of families that might lawfully be housed on a certain area of land.⁹⁶ On the other hand, a statute empowering municipalities to regulate the density of population in any given area

Law of capture

Laws passed in the exercise of the police power, such as city zoning ordinances restricting the drilling for oil in certain districts, do not abrogate the law of capture and are not self-executing, but merely authorize administrative boards to issue orders that have the effect of regulating or abrogating in a measure the law of capture.

N.Y.—City of Albany v. Anthony, supra.

confers a broad and unrestricted power on each city to regulate such density in the reasonable exercise of its legislative power.⁹⁷

Intoxicating liquors; gaming. The legislature may properly provide by statute that a municipal corporation may, by proper zoning ordinance, establish zones or districts within which state liquor stores may be situated.⁹⁸ However, a municipality may not, in the guise of a zoning ordinance, regulate the business of dispensing liquor;⁹⁹ and legislative recognition of the authority of a town to restrict the use of buildings for the sale of alcoholic liquor to certain towns is not a delegation of authority to limit, in the guise of a zoning ordinance, the number of liquor outlets in the town as a whole.¹

The provisions of a particular statute under which zoning ordinances were passed have been held not repealed by the liquor code.²

The general provisions of a state beverage act reserving the power of cities to regulate liquor establishments and to establish zoning ordinances therefor operate in a field clearly distinct from a special zoning law applicable only to a particular city.³ As used in a statute authorizing municipalities to regulate the sale of liquor by establishing zoning ordinances restricting the location where a licensee may be permitted to conduct his "place of business," the quoted phrase means the entire premises to which the liquor license is issued, and not the particular place, within such premises, where the liquor is actually dispensed.⁴

Removal of sand, gravel, or topsoil. It has been

held to be within the power of the board of trustees of a village to legislate with respect to the removal of sand and gravel from the ground, as a matter of zoning;⁵ and the power of municipalities to regulate the use of land within certain areas includes the power to regulate the removal and stripping of topsoil therefrom.⁶

Riparian rights. To the extent that a municipality may, by zoning regulations, limit the uses to be made of property generally, it may also, by zoning regulations, limit the exercise of riparian rights.⁷

Service stations and garages. Municipalities may prohibit, either entirely or in all but certain specified instances, the issuance of permits for the erection or use of property for service stations or garages.⁸ Where the final decision on the application is to be made by the governing body of the municipality, the power of that body is plenary, since the regulation of service stations is well within its police power, and no standard is required to be laid down for the exercise of its discretion.⁹

Trailer camps or parks. A municipality has the power to prohibit, by zoning ordinance, the establishment of a trailer park or camp within its territorial limits,¹⁰ or to exclude such parks from residential districts.¹¹

The authority to organize or fix zoning districts or boundaries thereof and to fix the limitations on the use of property and the building structures to be permitted therein may be exercised only by the body on which it has been conferred;¹² and such authority may not be unlawfully delegated.¹³ Accordingly, when it is required that the zoning power be exercised by official action of the governing or legislative body of the locality, it cannot be delegated to administrative officers or boards,¹⁴ or to individuals.¹⁵

Under some statutory provisions, the zoning power is ordinarily exercised by the local governing¹⁶ or legislative¹⁷ body, and, while such body sometimes is first required to obtain the recommendation and report of a board or commission, as discussed *infra* § 12, the commission may only make recommendations,¹⁸ being merely advisory,¹⁹ and is not competent to zone any portion of the locality.²⁰

Appointment of zoning commission for town under statute is equivalent to adoption of zoning for town.

Conn.—Town of Madison v. Kimberly, 169 A. 909, 118 Conn. 6.

Continuance of existence

Under statute providing that in any city or town which prior to Oct. 1, 1947, had adopted statute recognizing zoning commissions and which had not abolished its zoning commission by local action, zoning commission could continue to function notwithstanding failure of municipality to act under 1947 Zoning Act, when zoning commission of city, previously constituted under general zoning law, was not abolished by local action, it was in legal existence subsequent to 1947, and its orders were not null and void.

governing body of the locality,²² or to make findings of fact bearing on zoning legislation.²³

The establishing of a zoning commission by a municipality is not conditioned on the exercise of the power to create a planning commission.²⁴

The words "zoning commission" within a statute vesting power in a "zoning commission" constituted in compliance with the provisions thereof include a body which by special law had been previously granted zoning powers, even though it had been designated as a "zoning authority."²⁵

A constitutional prohibition against double-office holding has been held applicable to members of a zoning commission.²⁶

Annexed territory. A local ordinance providing, in effect, that annexed territory shall retain the zoning classification that it possessed under a county zoning regulation until reclassified by the locality has been held not to represent a delegation of authority to a county commission to zone property within the locality.²⁷

Effect of existence of planning commission

Under provision of statute that where city planning commission exists, it shall be zoning commission, when city planning commission came into existence, city zoning commission theretofore created ceased to have any power, and city planning commission became zoning commission with all powers, authority, and duties given to zoning commission by statute.

La.—*Mills v. City of Baton Rouge*, 28 So.2d 447, 210 La. 830.

Function of planning commission is advisory only, and comprehensive plan in accordance with which zoning regulations are adopted is such plan as zoning commission devises.

Park board

Statute giving zoning power in certain area to park board was held not impliedly repealed by statutes which provide for city plan commission and that member of park board shall serve as member of commission and board of zoning appeals.

Ind.—*Goldsmith v. City of Indianapolis*, 136 N.E. 525, 208 Ind. 465.

Statute held not invalid

Fact that statute authorizing town to appoint commission, empowered to adopt zoning regulations permitted, but did not require, town council to pass or approve regulations did not render statute unconstitutional.

Statute relating to nonconforming use

Ordinance cannot interfere with statute authorizing continuance, indefinitely, of nonconforming use existing at time of passage of ordinance.

§ 10. Concurrent and Conflicting Exercise of Power by State and Local Authorities

Local zoning regulations or ordinances may not contravene zoning statutes. Local zoning regulations may be enacted on subjects on which the state has enacted legislation not relating to zoning only if the state has not pre-empted the field of legislation on such subjects.

A zoning statute which supersedes a local zoning regulation or ordinance is paramount and controlling.²⁸ Where the power of the state over the subject of zoning is supreme, local zoning regulations, ordinances, or by-laws may not contravene the statutes or general law of the state,²⁹ and, in the event of conflict between the two, the local regulations must yield.³⁰

Where a field of general legislation is wholly taken over by the state, local zoning regulations or ordinances,³¹ or local officials,³² may not interfere with its supreme authority in that field. So, a local ordinance may not defeat the statutory right of public school authorities to acquire school sites,³³ or

the statutory right of health authorities to fix the location of hospitals.³⁴

The statutory right of a public utility to maintain facilities within a locality may not be contravened by a zoning ordinance.³⁵ Where a utility is required by statute to furnish adequate service and facilities, a zoning ordinance may not properly prevent the building of structures designed to carry out the statutory mandate.³⁶

A statute regulating matters other than zoning, but not pre-empting the field of legislation as to such matters, does not bar the adoption of local zoning ordinances, regulations, or resolutions relating to the subject matter of the statute.³⁷ Where the state has not pre-empted the regulation of an activity or business, the fact that a person has obtained a license from a state agency has been held not to relieve him from complying with a zoning ordinance.³⁸ It has been held that a statute giving a state agency jurisdiction over public utilities does not divest local authorities of the power, conferred by the zoning statute, to enact zoning ordinances.³⁹

Under a zoning statute so providing, where a reg-

ulation, enacted under the authority of that statute, conflicts with another regulation or statute not relating to zoning, the one having the higher standard controls.⁴⁰ Where the zoning statute provides that regulations enacted under it shall prevail when their standards are higher than those established by conflicting laws, the zoning regulations prevail only under such conditions.⁴¹

§ 11. Manner of Exercising Zoning Power

- a. In general

Advertisement before passage

Where city adopted an ordinance zoning a part only of city by setting out zones within which liquor could be sold by state liquor stores, and ordinance was not advertised before passage as required by act authorizing municipalities to establish zoning districts, it was not a "proper zoning ordinance" within statute authorizing municipalities, by "proper zoning ordinance," to establish zones within which state liquor stores may be established.

Sale of alcoholic beverages

(1) In view of fact that when State Beverage Act was enacted there was no general law granting cities power to enact zoning ordinances, legislature could not have intended that authority in such act for cities to establish zoning ordinances relating to sale of alcoholic beverage-

es would be exercised in any way other than that regularly followed by cities in adopting their ordinances.

Fla.—Ellis v. City of Winter Haven, 60 So.2d 620.

(2) In view of provision of statewide zoning law that it should not be construed to repeal, impair, or modify any general or special law granting like or similar powers to municipalities, it must be presumed that language of zoning law was intended to preserve to cities their power to designate areas within their limits wherein alcoholic beverages could not be sold in the manner in which this power had theretofore been exercised under the Beverage Act.

Fla.—Ellis v. City of Winter Haven, *supra*.

(3) In absence of express statement of intent, or of such a diametrical repugnance as to leave court no alternative, a special zoning law applicable only to a particular city did not require city to exercise power of regulating location of liquor establishment in a manner different from that previously followed under State Beverage Act, and, therefore, enactment by city of a zoning ordinance for that purpose was not required to follow procedural requirements of special zoning law.

Amendment of minutes of meetings

Where zoning ordinance was adopted while city was functioning under

to enact zoning ordinances does not outline the mechanics for passing such an ordinance, any clear and formal action by the governing board is sufficient.⁴⁷

Where the use of private property is to be affected by restrictions contained in a zoning plan, there must be a determination by the authorized legislative body that the public welfare will be furthered by the imposition of such restrictions.⁴⁸

The validity of temporary or emergency ordinances adopted without compliance with the procedure fixed by statute is discussed *infra* § 19.

Approval by coordinating committee. It will be conclusively presumed that an ordinance has been approved by a county coordinating committee where it was not disapproved by the committee.⁴⁹

Approval of county ordinance by town board. Under a statute authorizing a county board to enact a county zoning ordinance and requiring the approval of a town board as a condition precedent to

such ordinance being operative in the town, a town board which has approved an ordinance cannot later withdraw its approval.⁵⁰

A plebiscite of the neighborhood does not determine zoning.⁵¹

Resolution or ordinance. Where a statute authorizes the adoption of zoning regulations by means of resolution, the municipality may not act by way of ordinance;⁵² but where the statute requires an ordinance for the attainment of the zoning restriction, a resolution is ineffective to accomplish the desired result.⁵³ A city council may adopt an ordinance complete in itself, or it may adopt one fixing the location of the various districts by a map.⁵⁴

b. Notice and Hearing

A public hearing on a proposed regulation, preceded by adequate notice, may be required.

It is usually required that there be a public hearing on the proposed regulation.⁵⁵ A hearing by a

the "aldermanic" form of government, and the city subsequently changed to the commission form of government, commission had authority to amend minutes of council meetings at which the ordinance was adopted, to speak the truth according to the facts, where no intervening rights of third persons had arisen. Hearing provided by governing body

Proper construction of statute requiring public hearing relating thereto before zoning ordinances become effective required that hearing contemplated therein be provided by governing body of town, rather than by zoning board which was merely advisory body, without legislative power.

Fla.—Town of Hillsboro Beach v. Weaver, 77 So.2d 463.

Opportunity to be heard

A hearing by a zoning commission affords an opportunity for interested persons to be heard in justification or opposition of a proposed action, and their evidence should be received as aiding commission in discharge

ing its duties in a manner consistent with preservation of common interests and general welfare as contemplated by zoning ordinances.

Ky.—Hamilton Co. v. Louisville & Jefferson County Planning and Zoning Commission, 287 S.W.2d 434.

"Effective"

Under statute providing that no zoning regulation shall become effective or be established until after public hearing, "effective" means able to produce and effect, and emphasizes actual production of an effect whose continuance it often suggests, as the law becomes effective at once; "establish" means to enact or ordain for permanence.

Conn.—Jack v. Tarrant, 71 A.2d 705, 136 Conn. 414.

County-wide hearing; town hearing

Under statute relating to county zoning ordinance, only one county-wide hearing is required to be held, and a public hearing is not required to be held in each town as a condition precedent to town board's voting approval of zoning ordinance.

Wis.—Jefferson County v. Timmel, 51 N.W.2d 518, 261 Wis. 39.

Adoption of town plan

Where town adopted, without notice or public hearing, a preliminary town plan as guide for future development and no regulations were adopted to compel landowners' compliance with plan, such plan was no more than a guide to future layout of town's highways and parks and could not curtail rights of private property or limit a landowner in use of his land; and board of zoning appeals was not justified in refusing to approve plan of plaintiff for subdivision of his property on ground that plaintiff did not contemplate construction of a road in location indicated roughly on preliminary town plan; and board acted illegally when it turned down plaintiff's application on ground that its discretion was controlled by existence of town plan.

Constitutional requirements

With respect to the necessity of notice and hearing prior to adoption of zoning regulation, constitutional requirements were satisfied by adequate opportunity given after passage of by-law to contest its validity and its application to property purporting to be affected by it.

Mass.—Town of Lexington v. Bean, supra.

Where notice is required, it must set forth the municipal authorities' intention to adopt the zoning regulation together with the plans setting forth the character of the regulation to be adopted.⁶⁰ It has been held that the notice should sufficiently describe the districts to be affected by the regulation;⁶¹ but it has also been held that, unless otherwise required by statutory provision, the published notice need not contain a map showing the boundaries and limits of the zones to be created by the regulation.⁶² According to one view, where sufficient notice is given prior to the hearing, the municipal zoning body may make changes or amendments to the proposed regulation in the course of its passage without giving further notice,⁶³ or without another public hearing;⁶⁴ under other authority, a zoning ordinance may be void where substantial amendments are made after the public hearing on the proposed ordinance without any new hearing on the changes and amendments.⁶⁵

Action subsequent to hearing. Under the statute, action subsequent to the hearing may be mandatory,⁶⁶ and of the essence of the procedure described,⁶⁷ so that a vote of the zoning commission taken before the hearing cannot be effective.⁶⁸

c. Voting; Initiative and Referendum

Substantial compliance with statutory requirements

with respect to voting and initiative and referendum proposals is necessary and sufficient.

Substantial compliance with the statute providing for the form of ballot to be used for voting on a zoning plan has been held sufficient.⁶⁹ Accordingly, the ballot may contain the theme of the issue rather than its text or a digest thereof.⁷⁰ Only votes registered for or against the proposed regulations will be considered.⁷¹ Under statute, a zoning ordinance becomes the law of a town when the zoning regulations of the selectmen are approved by the vote of the town meeting.⁷²

Adoption of a zoning ordinance under the initiative law must be in accordance with requirements as to public hearings prior to adoption.⁷³ A village ordinance requiring attachment to the zoning ordinance of a plat or map of the territory involved is not a condition precedent to the right of the village electors to initiate zoning legislation.⁷⁴

An ordinance adopting a comprehensive plan for zoning a city may be submitted to the qualified electors of the city in the form of a referendum to determine whether the ordinance shall be approved;⁷⁵ and a zoning ordinance adopted by the legislative body of a city under the general law, without complying with the requirements of the zoning act, has been held subject to referendum.⁷⁶ Under some statutes, in the adoption of a zoning regulation opportunity need not be given for a referendum vote.⁷⁷

Statutes held inapplicable

Statute requiring hearing before enactment of zoning ordinance by "city" was held inapplicable to town; statute that no zoning ordinance or by-law shall be modified or repealed except after reasonable notice and opportunity to objectors to be heard was held inapplicable to original passage of zoning by-law by town. § 12. — Recommendation of Board or Commission

Under some statutes, but not under others, the city governing body must obtain the recommendation of a board or commission as to a proposed zoning regulation before it may promulgate such regulation; but the recommendation is not binding.

Under some statutes, the municipal governing body may exercise the zoning power without first receiving the recommendation of any board or commission.⁷⁸ Under other statutes, a board or commission may be appointed to recommend the boundaries of the various districts and appropriate regulations to be enforced therein,⁷⁹ and it may be provided that the city governing body may not promulgate any zoning regulation before receiving such recommendation.⁸⁰

Such a board or commission holds public meetings,⁸¹ after due notice⁸² to the property owners,⁸³

and thereafter makes its recommendation to the municipal governing body.⁸⁴ The proceedings of such board or commission have been considered as not judicial in character,⁸⁵ but merely advisory, as discussed supra § 9, and the municipal or county governing body is not bound to adopt the plans submitted,⁸⁶ but may adopt or establish different regulations.⁸⁷

A statute providing that no member of the planning board shall be permitted to act on any matter in which he has either directly or indirectly any personal or financial interest is not confined to instances of possible material gain,⁸⁸ but extends to any situation in which the personal interest, direct or indirect, may have the capacity to exert an influence on his action in the matter before the board.⁸⁹ A statute providing that the legislative body shall appoint a commission to be known as the zoning commission does not authorize the creation

§ 13. — Filing, Recording, or Publication of Regulation after Adoption

Statutory requirements as to filing, recording, or publication in connection with zoning ordinances must be followed.

Where a statute requires a municipality enacting a zoning ordinance to file the plan, maps, charts, and descriptive matter thereof in the county clerk's office, this provision of the law must be followed,⁹¹ as must other provisions as to filing;⁹² but other statutory provisions requiring that the ordinance and a plat of the restricted district be recorded have

been held directory only, and not to affect the validity of the ordinance.⁹³ Copying zoning by-laws into the town records has been held not necessary to the legal enactment thereof,⁹⁴ provided they can be identified in some other manner and are embodied in permanent form so that their existence, adoption, and identification are not left uncertain.⁹⁵

A municipality or county must comply with statutory requirements as to publication⁹⁶ or posting⁹⁷ of the regulation after its adoption, and it may be required that a map constituting part of the ordinance be set out in the publication,⁹⁸ or that the publication either contain a copy of the plan or map or state where such plan or map is on file.⁹⁹ It has

been held, under another statute, that publication of the ordinance is not required where compliance has been had with provisions that the proposed ordinance be published before adoption,¹ and that in any case the city council's failure to direct formally the publication of the regulation in a certain issue of a newspaper did not render the publication thereof in such issue ineffective.²

§ 14. Knowledge or Notice of Zoning Regulations or Orders

Property owners are charged with notice of zoning ordinances. Authorities differ as to whether a court will take judicial notice thereof.

Every property owner in a city is charged with notice of the zoning ordinances;³ and even a non-resident who deals with property within the limits of an unincorporated city is charged with knowledge of the zoning ordinance of the city regulating the use of such property.⁴ So, a purchaser of land is presumed to possess knowledge of the restrictions in a zoning ordinance applicable thereto;⁵ and a

purchaser of land has been held charged with knowledge that a hospital may be built in a section classified as a particular type of residential area.⁶ On the other hand, one who, relying on the fraudulent misrepresentations of the vendor, purchases a building containing a kitchen maintained and used in violation of a zoning ordinance has been held not bound by constructive notice of the ordinance.⁷

Judicial notice. It has been held that a court will take judicial notice of a zoning ordinance,⁸ and of the fact that zoning laws and ordinances affect property interests⁹ and that a constitutional amendment was required, in a particular case, to validate them.¹⁰ It has also been declared a matter of common knowledge that many municipalities have passed zoning ordinances prohibiting, within certain districts, industries, commercial enterprises, undertaking establishments, and other businesses which are conducted without noise, dust, or vibration.¹¹

Other authority holds that judicial notice will not be taken of a zoning ordinance or regulation,¹² or of an order of the zoning authorities.¹³

II. VALIDITY OF ZONING REGULATIONS

A. VALIDITY

1. GENERAL CONSIDERATIONS

§ 15. In General

There is no fundamental objection to zoning laws and ordinances as long as they are reasonable in their scope and operation and apply without unnecessary discrimination; they are generally held valid.

Unconstitutionality of a zoning ordinance is illegality of the highest order;¹⁴ accordingly, as shown infra § 17, zoning regulations must not infringe the constitutional guaranties of the state or nation. There is no fundamental objection to zoning laws

and ordinances, however, as long as they are reasonable in their scope and operation and apply without unnecessary discrimination.¹⁵ They will be sustained unless it is shown that there is no substantial relation between them and the furtherance of any of the general objects which justify them,¹⁶ or unless the constitutional objections urged against them are supported by competent evidence or appear on their face.¹⁷ Accordingly, zoning regulations are generally held valid,¹⁸ and they have been upheld

Necessity of conforming with objectives specified in enabling act see infra § 17.

Not lightly invalidated

A zoning ordinance in effect for almost seventeen years without challenge or objection should not be lightly invalidated.

Mich.—Austin v. Older, 278 N.W. 727, 283 Mich. 667.

Held not invalid

(3) Where zoning ordinance provided for establishment of board of adjustment which was never appointed, and town refused permit for trailer camp in zone, application of ordinance to applicant was not illegal because no board of adjustment ex-

isted, since applicant could on proper application to court compel appointment of necessary members to pass on request for variance.

The validity of the regulation usually depends on the surrounding conditions and circumstances,²⁸

that is, on the physical facts and surrounding circumstances,²⁹ not the possible action of unidentified third persons,³⁰ and each case must be determined on its own facts.³¹

tionality of a zoning ordinance, when applied to any particular land, depends on the particular facts applicable thereto notwithstanding the validity of the general zoning ordinance has been determined.³³ There is authority, however, to the effect that where really in a certain area is of the same character, a zoning regulation may not be held valid as to certain property in such area but void as to other property in the area, since the regulation is either valid in its entirety or wholly void.³⁴

Zoning regulations which may be regarded as within the power of one municipal corporation may not be so regarded as to another.³⁵

Change of conditions or circumstances. Zoning under constitutional rights must not be made static;³⁶ but ordinarily, the validity of a zoning regulation depends on the facts existing at the time such validity is questioned,³⁷ and not on speculation on whether future developments, when and if they come into being, may render the zoning unconstitutional as to the changed conditions.³⁸ The confiscatory character of the regulation may be proved by conditions existing when the validity is questioned.³⁹ So, it has been held that a change of cir-

cumstances may be considered in determining the validity of a zoning regulation even though the regulation was reasonable when promulgated,⁴⁰ since a regulation which is valid in its application to a particular area at the time of its adoption may be rendered invalid by a subsequent change in conditions.⁴¹

It has been held, however, that the constitutionality of a zoning ordinance or of its application to particular property must be determined on the basis of the facts and conditions as they existed prior to the time that the complaining property owner proceeded in disregard of the ordinance,⁴² and that the landowner may not, after erecting a building in violation of restrictions, claim that the land is more adaptable for such a building than for the kind of structures for which the area is zoned.⁴³ A zoning ordinance which is a legitimate exercise of the police power will not be declared void because of a mere change of municipal council policy.⁴⁴

§ 16. As Dependent on Police Power

Zoning regulations are valid only when they are fairly within the scope of the police power to enact laws for

Question related in application to particular property

(1) Whether a zoning ordinance is discriminatory is related in its application to the particular property involved.

Facts necessary to show invalidity

Where a zoning ordinance would preclude use of property for any purpose to which it is reasonably adapted, to sustain attack on validity thereof, it must appear that ordinance does not authorize a variation of general rule which would admit of such use or that such variation has been refused by administrative board

in exercise of discretion which ordinance confers on board.

the safety, health, morals, and general welfare of the people.

In general, zoning, or lawful zoning, is within and constitutes a lawful and valid exercise of the police power,⁴⁵ and its validity may be sustained thereunder.⁴⁶ Subject to constitutional and statutory guaranties, limitations, and restrictions, as discussed infra § 17, and to the requirement that they must be

reasonable, infra § 68, the validity of zoning enactments, regulations, and restrictions is dependent on their being within and constituting a valid exercise of the police power,⁴⁷ or on their having a reasonable relation thereto;⁴⁸ and, hence, they must fall as invalid unless they are within and can be supported as a legitimate exercise thereof.⁴⁹

Basis for upholding

Constitutional guaranties of private rights are subject to qualification that they may be cut down by governmental agencies acting under police power of state, and it is under this concept that zoning ordinances are upheld.

- Ill.—Eleopoulos v. City of Chicago, 120 N.E.2d 555, 3 Ill.2d 247.

Foundation of authority

A municipality's authority to enact a zoning ordinance restricting use of privately owned property is founded not in eminent domain but in police power.

The justification for zoning enactments is the greater benefit which accrues therefrom to the public as a whole,⁵⁰ or the paramount interest of the public welfare and the realization that private interests must sometimes be subordinated to the public good,⁵¹ or, as stated supra § 7, it must be found in some aspect of the police power asserted for the public welfare. Such enactments, however, are subject to limitations on the police power,⁵² and cannot validly be extended beyond the accomplishment of purposes rightly within the scope thereof.⁵³

To be valid, they must be for the superior interest and rights of the public,⁵⁴ or they must be predicated on a public interest⁵⁵ and founded on a need of the

community,⁵⁶ and be conducive to, or subserve, the public welfare,⁵⁷ or be for the public good.⁵⁸ They must have a rational relation to the protection of the basic interest of society,⁵⁹ and a public benefit must be derived from them.⁶⁰ They are invalid if they disclose no purpose to prevent some public evil or fill some public need.⁶¹

In order to be valid as a proper exercise of the police power, especially where their application will cause a destruction of property values,⁶² zoning laws, ordinances, by-laws, regulations, and restrictions must advance, promote, or tend or be designed to promote, the public health, safety, morals, or general welfare,⁶³ or be reasonably necessary

Basis of validity

Validity of zoning ordinances rests on the principle that the exercise of rights incident to ownership of private property may be restricted in interest of general welfare of inhabitants of municipality.

Ohio.—State ex rel. Helsel v. Board of Com'rs of Cuyahoga County, Com.Pl., 79 N.E.2d 698, affirmed 78 N.E.2d 694, appeal dismissed 79 N.E.2d 911, 149 Ohio St. 583.

Dominant consideration

When dealing with zoning ordinances with respect to exercise of police power, public welfare is dominant consideration.

held that such enactments must bear the required relation with respect to the particular premises to which they are applied.⁶⁶

To be within the public welfare a zoning regulation must confer on the public a benefit commensurate with its burden on private property.⁶⁷ The fact that zoning provisions may be said to promote the health, safety, or welfare of a few neighboring property owners is no justification for them where they are in derogation of general public welfare.⁶⁸

Zoning regulations may take into consideration factors not bearing on the public health, safety, or morals, but coming within the term "general welfare," and may deal with uses of property which are not harmful.⁶⁹

On the other hand, other questions aside, zoning enactments, regulations, or restrictions, generally are valid where they are fairly within the bounds of the police power,⁷⁰ or where they are properly related to the general welfare,⁷¹ or where they ad-

or are necessary for the preservation thereof,⁷³ or where the interests of the public require such action.⁷⁴ Under such circumstances they are valid, even though private interests are to some extent impaired,⁷⁵ or an owner is deprived of the right to use his property in the specific manner in which he intended.⁷⁶ Unless it clearly appears that zoning enactments have no substantial relation to public health, safety, morals, or the general welfare they will be sustained and not held invalid.⁷⁷

The required relationship of the zoning ordinance or regulation must be real and not feigned.⁷⁸ The law will not tolerate an invasion of the right of property under the guise of a police regulation in the professed interest of the public health or safety when it is manifest that such was not the object of the regulation.⁷⁹ Hence, a restrictive ordinance

which bears no material relation to the public health, safety, morals, or general welfare cannot, under the guise of a zoning regulation, either confiscate property or inflict a substantial injury on the owner thereof.⁸⁰

The question whether a zoning enactment or regulation constitutes a valid exercise of the police power must be determined in each case by the facts and circumstances surrounding it.⁸¹ The line which separates the legitimate from the illegitimate assumption of power is not capable of precise delimitation, but varies with circumstances and conditions.⁸² Each case must be determined on its own particular facts in determining whether the regulation bears a sufficient relation to the public welfare,⁸³ and in determining whether there has been a valid exercise of police power, no one factor is

Any substantial relation

A zoning classification must be upheld if there is any substantial relation to public health, safety, comfort, morals, or welfare.

Factors considered

(1) In determining whether zoning ordinance has real and substantial relation to public health, safety, morals, or general welfare when applied to a particular property, the factors,

controlling.⁸⁴ Under some circumstances and conditions a zoning enactment or regulation may be held conducive to the public welfare and valid, and under other conditions and circumstances it may be considered to exceed the limits of the police power and be invalid.⁸⁵ The public welfare must be considered from the standpoint of the objective of zoning and of all the property within any particular use district.⁸⁶

In general, the validity of zoning enactments and regulations must be determined in the light of existing conditions.⁸⁷ The test of their validity is not whether they may at some future time bear the required relation to the public welfare, but whether they do so now.⁸⁸ In this connection the police power must be responsive, in the interest of common welfare to the changing conditions and developing needs of growing communities,⁸⁹ and zoning regulations which may at one time be regarded as invalid because not within the police power may, at another time, by reason of changed conditions, be

recognized as valid.⁹⁰ The necessity of the exercise of the police power to pass a zoning enactment or regulation may appear from existing conditions or the reasonable expectations of future growth and development of the municipality.⁹¹

Where reasonable minds differ as to whether a zoning law, ordinance, or regulation has a substantial relation to the public health, morals, safety, or general welfare, it must stand as a valid exercise of the police power.⁹²

§ 17. Limits on Exercise of Zoning Power in General

The municipality or other local agency exercising the zoning power has a wide discretion therein, but its power is not unlimited and must be exercised subject to the constitutional guaranties of the federal and state constitutions and subject to the limitations and restrictions imposed by the legislature.

A municipality or other governmental agency has wide discretion in enacting zoning ordinances and regulations,⁹³ and its action in the matter will be

among others, to be considered are: character of neighborhood; zoning classification and use of nearby properties; extent to which property values are diminished by particular restrictions involved; and gain to public as compared to hardship imposed on individual property owner.

within at least one of the particulars specified in the enabling statute.¹⁶ The enumeration in an enabling act of specified purposes for which the use of land may be regulated implies that its use for other purposes is not subject to control.¹⁷

In general, a zoning ordinance or regulation enacted pursuant to an enabling statute is valid,¹⁸ and will be sustained, other questions aside, unless it is shown that there is no substantial relation between it and the furtherance of the general objects and purposes of the enabling act;¹⁹ and it will be set aside as invalid only where it is a mere arbitrary

exercise of power having no substantial relation to the objects and purposes of the enabling act.²⁰

The zoning power, except in so far as discrimination is necessary for the proper establishment of the various kinds of districts permitted,²¹ must be exercised impartially,²² without discrimination,²³ and in a fair manner for the promotion of the common good of a community as a whole.²⁴ Limitations or restrictions in enabling acts may apply to and invalidate prior zoning enactments and regulations.²⁵ The power of the municipality to zone is not limited to the protection of established dis-

Exclusion from district

Zoning bylaw cannot be adopted to set up barrier against influx of thrifty and respectable citizens who desire to live in district in question and who are able and willing to erect homes on lots on which fair and reasonable restrictions have been imposed, or for purpose of protecting large estates already located in the district.

Mass.—Simon v. Town of Needham, 42 N.E.2d 516, 311 Mass. 560, 141 A.L.R. 688.

Reasonable basis

Although a city has wide discretion in enacting zoning ordinances, it has no authority to place restrictions on one person's property and by mere favor remove such restrictions from another's property, but there must be reasonable basis for the discrimination.

tricts,²⁶ but extends to aid in the development of new districts.²⁷ A zoning enactment or regulation, it has been held, must be for the protection of the property restricted and not to give protection to surrounding property.²⁸

Ordinarily, the zoning power does not extend to the complete prohibition of a certain use or structure anywhere within the general limits of the municipality,²⁹ but it has been held that a zoning regulation may exclude from all zones certain structures constituting an increased fire hazard and that the fact that it does not authorize a permit to erect and maintain such a structure does not render it invalid as arbitrary, since the restriction of construction bears a direct relation to the public health and safety.³⁰

A zoning enactment, regulation, or restriction is invalid if it will cause property to be unimproved, or lie idle, for an unforeseeable time.³¹ Zoning enact-

ments may be invalid where the restrictions imposed create a monopoly.³²

Territorial limitations. In the absence of enabling legislation expressly providing otherwise, zoning enactments of a municipality are limited to its territorial boundaries and are invalid to the extent that they seek to impose zoning regulations and restrictions on land outside the city limits.³³

§ 18. Temporary or Emergency Regulation

An emergency regulation to be enforced pending investigation and enactment of a permanent zoning regulation may be valid.

Although a landowner in a zoning district has a right to expect that zoning regulations shall have a fair degree of permanency,³⁴ an emergency ordinance, with respect to building restrictions, to be enforced pending investigation and enactment of a permanent zoning ordinance may be valid,³⁵ and

Plan for future

A city ordinance, zoning land, well within city limits, along two intersecting roads, as part of residential district, pursuant to plan for future, notwithstanding comparatively rural conditions and scattered residences in region, was proper and effective, although much regrading would be necessary to adapt land to use for more closely built residences.

from constructing and maintaining a publicly needed high-tension line through village was invalid.

Interim regulations

(1) Fact that an ordinance is to some extent an interim measure does not make it invalid.

N.J.—Rockaway Estates v. Rockaway Tp., 119 A.2d 461, 38 N.J.Super. 468.

(2) Fact that comprehensive county zoning ordinance recited that it was adopted because of "an emergency in the county" and referred to the regulation as "interim" regulations did not render it void.

Ga.—Taylor v. Shetzen, 90 S.E.2d 572, 212 Ga. 101.

Suspending other laws

Temporary ordinance restricting use of property pending enactment of permanent zoning ordinance was held not invalid as suspending city's building laws.

Ky.—Fowler v. Obier, 7 S.W.2d 219, 224 Ky. 742.

Annexed territory

When citizens' petition for annexation of territory was filed with city and council assented to annexation, potential jurisdiction was then attached to city and such action extended police power to permit city to enact emergency zoning regulation holding area in status quo pending final determination of annexation and zoning, and in the interim, changes made by property owners were made at their peril and they had no vested

such an ordinance may be within the power of a municipality at least where it has set up the machinery for the carrying out of the provisions of the statute dealing with zoning and the intent is merely to maintain the status quo until the general zoning ordinance can become operative.³⁶ On the other hand, an interim zoning ordinance enacted by a municipality having no power to do so is invalid.³⁷

Renewal. An attempt, by a board of county commissioners not expressly authorized by statute to do so, to renew an interim zoning ordinance from year to year is void.³⁸

§ 19. — Procedural Requirements

Although there is some authority holding that a municipality may pass a temporary zoning ordinance without complying with a statutory requirement as to hearing, it has also been held that mandatory statutory provisions as to the procedure to be followed in adopting zoning regulations cannot be disregarded or relaxed in the case of temporary or emergency ordinances.

It has been held that a statute authorizing a municipality to enact a comprehensive zoning ordinance after public hearing does not prevent the passage of

a temporary ordinance without compliance with the requirement as to hearing;³⁹ but it has also been held that the mandatory provisions of the statute with respect to the procedure to be followed in adopting zoning regulations cannot be disregarded or relaxed in the case of temporary or emergency ordinances,⁴⁰ and that a zoning ordinance is invalid even though regarded as an emergency measure, where passed without compliance with mandatory statutory provisions with respect to notice and public hearings,⁴¹ and reports containing recommendations of a zoning commission,⁴² or where not published in accordance with the requirements of law.⁴³

§ 20. Who May Attack Validity of Zoning Regulations

In general, only persons whose rights are injuriously affected by zoning regulations may attack their validity.

As a general rule, persons whose rights are not affected by a zoning ordinance or regulation or a particular provision thereof may not attack its validity.⁴⁴ Thus, the validity of a zoning regulation may not be questioned by a person whose property

right to pursue course of conduct free from lawful exercise of police power.

Invalidity as emergency measure

Where, in attempted enactment of emergency zoning ordinance, city council failed to state reason for emergency, and for that reason ordinance lacked validity as emergency enactment, but no proceeding to institute referendum or other challenge was made during time limited for such attack, ordinance became effective in same manner as any other regular ordinance.

is not within the zoned area⁴⁵ or by a person who has been granted a permit for a nonconforming use of his property.⁴⁶ So, an owner whose property is within the favored boundaries cannot complain of lack of uniformity in a zoning enactment,⁴⁷ and a person will not be heard to complain that the rights of others are adversely affected by the provisions of a zoning ordinance,⁴⁸ or that the nonconforming use of another's property is unduly restricted.⁴⁹

On the other hand, those whose rights are or may be injuriously affected by the application or enforcement of a zoning regulation may attack its validity.⁵⁰ Thus, its validity may be attacked by the owner of property affected,⁵¹ such as the owner of

property within the zoned area and subject to the zoning regulation,⁵² or an owner whose property is in the neighborhood and is so situated that a use permitted other property injuriously affects it,⁵³ or a property owner refused a building permit because of the regulation or restriction.⁵⁴ The fact that an application for a permit under a zoning ordinance was filed by a prospective purchaser of the property, instead of by the owner, has been held not to be detrimental to the owner's action for a judgment declaring the zoning restrictions unconstitutional.⁵⁵

A cotenant in common of property affected by a zoning regulation may attack its validity on his own behalf.⁵⁶ One of several trustees, however, may

not alone maintain an action to test the validity of zoning regulations affecting the trust estate, where the question of whether the action is in the best interests of the trust estate and should be maintained in behalf of it requires the exercise of discretion by the trustees.⁵⁷

An owner of property who chooses to commence an action to have a zoning ordinance declared illegal rather than attempt to have it amended so as to exempt his property is not entitled to complain because the municipality did not appoint a board of appeals.⁵⁸

A municipality cannot question the validity of its own zoning ordinance.⁵⁹

Exhaustion of administrative remedies. In general, a person who has not exhausted the administrative remedies available to him may not attack the validity of a zoning enactment.⁶⁰ As long as there is a possibility of the removal of certain property from alleged detrimental restrictions, the owner thereof has not suffered such injury as to entitle him to attack the restrictions as invalid.⁶¹ Thus, unless it could not be granted,⁶² a property owner who has failed to apply for a variance or permit may not

challenge the validity of a zoning regulation or restriction.⁶³ An owner, however, who believes a zoning enactment or restriction to be invalid in its entirety has been held not required to seek a variance or exemption from its application in order to attack its validity.⁶⁴

Purchase after cure of previously existing defect. An owner who purchased his land after constitutional and statutory changes had cured any previously existing defect in the zoning regulation has been held to have no vested right in the use of the land which would permit him to challenge the validity of the regulation.⁶⁵

Finality of decision of commission

Where it did not appear from the record that property owners had made any objection to another property owner's application to change for use or rezoned certain property to commercial and it did affirmatively

So, a person who has entered into a contractual agreement not to question the validity of a zoning ordinance may be precluded from attacking the ordinance in violation of the agreement.⁶⁸

Delay in attacking validity. Mere delay in attacking the validity of a zoning enactment with nothing to show that prejudice resulted to the town does not constitute laches,⁶⁹ so as to preclude a landowner from attacking its validity as applied to his land.⁷⁰ So, where the granting of relief would not be prejudicial to any inhabitant of the municipality, one who did not know of the invalidity of the ordinance until he instituted proceedings attacking it three years after its adoption is not estopped to bring his suit.⁷¹

A property owner who has entirely acquiesced in a zoning classification for a considerable period of time during which another owner has made large investments in reliance on such classification may be estopped, however, by waiver and laches to assert

that the property is improperly zoned;⁷² and waiver, estoppel, or laches may operate to preclude an attack on the validity of a zoning enactment because of noncompliance with formal requirements in the manner of its enactment, where it has been recognized and its validity relied on for many years.⁷³

Recognition of regulation or acceptance of benefits thereunder. Although compliance with a zoning enactment does not necessarily constitute a waiver of the right to contest its constitutionality,⁷⁴ a property owner who has accepted benefits thereunder is estopped to challenge its validity;⁷⁵ and hence where he has recognized and utilized zoning regulations by proceeding under them, it is not open to him to attack them as invalid.⁷⁶ Thus, he waives the right, or is estopped, to contest their validity, where he has applied for and accepted a special use permit,⁷⁷ or successfully applied for a variance.⁷⁸

An applicant for relief under a zoning enactment,

Nature of agreement

Agreements not to violate or question validity of village building zone ordinance, entered into by parties on behalf of themselves and others with whom they were or might become associated, were not ordinary "restrictive covenants running with the land," but in effect incorporated in the agreements all provisions of the zone ordinance.

regulation, or restriction may not in that proceeding attack its validity,⁷⁹ and hence an applicant for an exception or variance to a zoning enactment⁸⁰ or a person in an appeal taken under the provisions of a zoning regulation⁸¹ cannot question, in that proceeding, the constitutionality or validity of the enactment or regulation.

On the other hand, a test of the constitutionality or validity of a zoning ordinance, regulation, or restriction is not barred by proceedings authorized by the zoning laws.⁸² The fact that a person has exhausted the administrative remedies available to him will not preclude him from later attacking the validity of the zoning regulation or restriction.⁸³ A property owner's right to attack the validity of a zoning regulation or restriction in a subsequent independent proceeding is not waived, nor is he estopped, by the circumstance that he has on a previ-

ous occasion unsuccessfully applied for a variance, exception, or permit,⁸⁴ and failed to present the question of validity in his application therefor,⁸⁵ or that he has unsuccessfully sought the rezoning of his property,⁸⁶ or taken an appeal under the provisions of a zoning regulation.⁸⁷

b. Purchaser of Property

As a general rule, a purchaser of property affected by zoning regulations is not by his act of purchase estopped to attack the validity of the regulations.

A purchaser stands in the place of his grantor and is estopped by acts of his predecessor in title which would have estopped the latter to contest the validity of the zoning enactment,⁹³ as by the vendor's waiver of the right to question its validity by the acceptance of benefits thereunder.⁹⁴ It has been held, however, that a purchaser is not prevented from attacking the validity of the restriction by the failure of his predecessor in title to challenge its validity.⁹⁵

§ 22. Effect of Invalidity

An invalid zoning enactment or regulation is without effect and does not affect the right of an owner of property to use such property in any manner he sees fit.

An invalid zoning enactment or regulation is without effect.⁹⁶ It does not affect the right of an owner of property to use such property in any man-

ner he sees fit,⁹⁷ or in a manner which was proper prior to the enactment of the invalid provision;⁹⁸ and a use authorized by an invalid enactment has been held illegal after the enactment was declared invalid.⁹⁹ A validating act, passed pursuant to a constitutional zoning amendment, has been held not to revive a previously invalid ordinance so as to impair rights then existing.¹

Where a zoning enactment prohibits the use of property in a specified district other than for enumerated uses, the invalidity of a provision that other uses may be permitted as a special exception will give an owner of property in the district no absolute right to use his property for other than the enumerated uses.²

§ 23. — Partial Invalidity

The invalidity of a portion of a zoning regulation will not render the entire regulation invalid where the invalid portion is separable from the rest and the legislative purpose can be made effective by sustaining the ordinance in part.

that the invalidity of any section or provision thereof shall not invalidate any other section or provision.⁴ Under this rule the invalid part of the enactment is not inseparable from the remainder, unless all of the parts are so interdependent that to eliminate the invalid part would destroy the force of the whole.⁵

A zoning regulation which is in accordance with the statute and reasonable in character cannot be overthrown in its entirety even if in it there are instances of spot zoning which might be successfully attacked by a person who could show that his particular interests have been adversely affected.⁶

Regulatory and penal provisions. In the application of the general rule, the regulatory provisions of zoning enactments are separable from the penal

provisions.⁷ The invalidity of a penal provision of a zoning ordinance prohibiting certain uses of property in defined areas does not necessarily render void other provisions of the ordinance constituting a rule of civil conduct, since an act which is insufficient as a penal act may still be valid as a rule of civil conduct.⁸ So, a defective penalty clause, being separable from the balance of the ordinance, does not render such balance invalid so as to be incapable of amendment by the enactment of a valid penalty clause.⁹

Void emergency provision. Where the emergency provision of a zoning ordinance is invalid, the ordinance is not a factor to be considered in determining whether a building permit applied for prior to its enactment should have been granted.¹⁰

2. PARTICULAR MATTERS AFFECTING VALIDITY OF EXERCISE OF POWER

§ 24. In General

The validity of a zoning plan usually depends on whether the scheme of zoning is as a whole sound and whether the scheme of classification and districting ap-

plies fairly and impartially in each instance, taking into consideration public and private interests.

The validity of a zoning plan usually depends on whether the scheme of zoning is as a whole sound,¹¹

Inoperative provision

Where zoning ordinance was invalid with respect to classifying entire town as residential in that some property was not suited for residences, even if section excluding use of any premises within boundaries of residential district as junk or salvage yard were valid, it was inoperative since there was no residential district to which it could apply.

that is to say, whether the method of classification and the districting are reasonably necessary to the public health, safety, morals, or general welfare;¹² and whether the scheme of classification and districting applies fairly and impartially in each instance.¹³

While zoning regulations may involve complicated and conflicting elements and interests,¹⁴ it is generally the rule that such regulations may and should take account of the statutory considerations to be served by zoning,¹⁵ and be designed to achieve the purposes specified in the statute conferring the zoning power.¹⁶ As long as the grounds demanded by

the statute exist for zoning, there is no sound objection to the consideration of cost of municipal services in the establishment of the zones.¹⁷ All questions affecting the public¹⁸ and private¹⁹ interests must be considered. Zoning ordinances are not concerned, however, with the question of the economic rules of supply and demand²⁰ and are not media through which restrictions may be placed on one who may engage in legitimate enterprise.²¹

Although no one factor is controlling,²² zoning regulations may and should take into consideration the character of particular districts,²³ and the restrictions imposed should take account of the nature

Specific considerations

Considerations which may validly apply to influence the way property

in a district may be classified under zoning ordinance are prior existing uses in district, natural contours and topographical features of land, and in some instances the geological strata of the land with particular relation to the effect of drainage and seepage on water and sewage problems.

sideration to the peculiar suitability of property for particular uses,²⁹ the encouragement of the most appropriate use of land throughout the municipality,³⁰ and the conservation of property values.³¹

A zoning regulation, otherwise reasonable and proper, is not to be condemned because of its simplicity³² and it may not be held invalid because it prohibits something which was theretofore permissible under building and fire protection regulations.³³ The validity of a zoning ordinance does not depend on whether the restrictions or limitations imposed thereby on the use of property are phrased in the

affirmative or negative.³⁴ An ordinance is not invalid because it exempts the city, as far as the erection of its own municipal buildings is concerned, from the restrictions as to the character of buildings which may be erected within restricted zones.³⁵

The length of time a property has been vacant as zoned is a fact to be considered in determining the validity of an ordinance.³⁶ Where a review of the findings of a planning commission may be obtained by a writ of certiorari, a zoning ordinance is not invalid because it fails to provide for an appeal from, or review of, the commission's findings.³⁷

As long as an ordinance meets the requisites of validity, the facts that the study of the planners would not be completed for a certain time and that some further revisions or refinements of the ordinance were in contemplation at the time the ordinance became effective do not militate against its legal efficacy.³⁸ The fact that an ordinance is enacted hastily does not make it invalid,³⁹ and neither does the fact that the community wants the regulation, or that its enactment was urged by a minority, by a majority, or by all of the community.⁴⁰

An ordinance which results in the restriction of competition is not unlawful because of such result,⁴¹ but an ordinance has been held invalid as undue burden on interstate commerce.⁴² Particular zoning ordinances have been upheld against the contention that they impair the obligation of contracts,⁴³ or that they violate the constitutional provision prohibiting either the legislative, executive, or judicial department from exercising any power properly belonging

to one of the others.⁴⁴

Traffic conditions. Zoning regulations should take into consideration the relief or avoidance of traffic congestion⁴⁵ and traffic hazards.⁴⁶ The zoning power, however, should not be used to regulate minor traffic problems, but only those in their major aspects as they affect the entire community or major portions thereof.⁴⁷ Moreover, it has been held that increased traffic burdens or hazards are matters which constitute police problems and are not for the zoning authorities.⁴⁸

§ 25. Certainty and Definiteness of Regulation

In order to be valid, a zoning ordinance or regulation should be clear and specific and should describe with certainty the districts within which particular restrictions are applicable.

such a regulation is vague and indefinite it may be held invalid.⁵¹

Description of districts. The authority to zone contemplates fixed areas with defined boundaries,⁵² and the regulation should describe with certainty the district or districts within which particular restrictions are applicable.⁵³ Minor inaccuracies in the description of the boundaries of districts created by a zoning ordinance will not vitiate the ordinance,⁵⁴ and an ordinance is not invalid for uncertainty because the boundary lines of the districts are inaccurate and indefinite, where the boundary described in the ordinance may be determined from a reading of a map and provisions of the ordinance.⁵⁵

Where a zoning map is not attached to, and made a part of, a zoning ordinance as provided in the ordinance, the ordinance may be void for lack of definiteness of description and location of the several

zones.⁵⁶ A zoning ordinance is not invalid, however, for uncertainty on the ground that zones and their boundaries and limits are not defined in the ordinance itself and the map to which reference is had is not expressly made part of the ordinance, where it is clear from the language used that the map is in fact made part of the ordinance by reference,⁵⁷ or where a person is not in ignorance about the location of his property with reference to the pertinent zone lines.⁵⁸

Effect of uncertainty

If it is impossible by enlargement process or otherwise to measure the distances on building zone map declared to be a part of building zone ordinance so as to permit establishment of zoning district boundaries with respect to particular property, the result is that such property is unzoned.

Courts not concerned with wisdom

It is not within judicial function for courts to pass on wisdom of zoning ordinances, and only judicial function is to determine whether ordinance is reasonably comprehensive in its application and has reasonable relation to preservation of public health, safety, and morals, and, where ordinance is so qualified, its enforcement does not constitute taking of property without compensation or without due process of law.

Ohio.—State ex rel. Jack v. Russell, 123 N.E.2d 261, 162 Ohio St. 281.

Due process not judicial process

Fact that municipal zoning ordinance provides for its administration by ministerial board does not deprive property owners of due process of

constitutional, either generally or as applied to particular property, if they bear no substantial relation to public health, safety, morals, or general welfare, or are arbitrary and unreasonable.⁶⁷

A zoning ordinance enacted to promote merely private rights or private comfort, or to satisfy purely aesthetic desires, is unconstitutional and violative of due process;⁶⁸ but the fact that considerations of an aesthetic nature entered into the reasons for the passage of an ordinance, which was other-

wise valid as a reasonable exercise of the police power, will not render it violative of due process.⁶⁹

§ 28. Equal Protection of the Laws

Zoning laws and regulations must satisfy the requirements of the constitutional guaranty of equal protection of the laws.

Zoning laws and regulations must satisfy the requirements of the constitutional guaranty of equal protection of the laws.⁷⁰ The constitutional guar-

law, since due process does not necessarily mean judicial process.

Facts in existence at date of passage of the zoning law have been held in the circumstances of the case before the court to be the only material factors for consideration in de-

anty requires that the law or regulation rest on some rational basis of classification,⁷¹ and bars arbitrary discrimination between persons or property similarly circumstanced.⁷² Classification is consistent with this principle if it is reasonably based on the public policy to be served.⁷³ It is not necessarily fatal that the classification be wanting in purely theoretical or scientific uniformity or mathematical nicety or that there be some inequality in practice.⁷⁴

In accordance with these principles zoning laws and regulations have, in many cases, been held not to deny equal protection of the laws.⁷⁵ A zoning law or regulation is offensive to the guaranty of equal protection, however, where it restricts the classes of persons who may occupy residential property which conforms to all requirements,⁷⁶ or where the areas within the terms of the zoning law are not

clearly and certainly defined,⁷⁷ or where it allows the granting or refusing of permits without the guidance of any standard,⁷⁸ or delegates power to control erection, alteration, or use of particular kinds of buildings, or maintenance of particular businesses, to private citizens.⁷⁹

§ 29. Taking of Property without Compensation

Building or zoning laws and regulations must meet the demands of the constitutional prohibition against the taking of private property for public use without just compensation, and restrictions which are arbitrary or unreasonable or lacking in any substantial relation to the public health, safety, morals, or general welfare come within the constitutional inhibition.

Building or zoning laws and regulations must meet the demands of the constitutional prohibition against the taking of private property for public use without just compensation,⁸⁰ and restrictions which are

termining whether the law operates to deny equal protection.

The protection accorded by this constitutional prohibition is, however, qualified by the police power, and reasonable restrictions, bearing a substantial relation to the public health, safety, morals, or general welfare, imposed in the exercise of the police power, do not fall within the constitutional ban.⁸³ Where premises located in a certain zone can be used for a certain purpose if permission is obtained therefor, the validity of the regulation may not be challenged on the theory that there is a prohibition against using the property for that purpose, thus constituting a taking of property without compensa-

tion.⁸⁴

§ 30. Comprehensive, Well-Considered Plan

Zoning regulations should be in accordance with some well-considered and comprehensive plan, but the extent to which it is necessary to zone the entire municipal boundaries depends on circumstances and on the constitutional or statutory provisions conferring the zoning power.

In order to achieve specified statutory purposes, it is usually required that zoning regulations be in accordance with some well-considered⁸⁵ and comprehensive⁸⁶ plan; and such regulations must adopt

residence district depending on the number of residences and vacant lots found within such block is invalid as not in compliance with the statutory requirement that the designation of zoning districts be in accordance with some comprehensive, well-considered plan.⁸⁹ A zoning plan, however, does not cease to be a comprehensive plan because it looks reasonably to foreseeable potential uses of land which cannot be precisely determined when the zoning is passed,⁹⁰ and a zoning ordinance does not fail to meet the requirements of a comprehensive zoning plan as provided for by the zoning act, because it fails to make specific provisions for all of the restrictions authorized by the act.⁹¹

To what extent it is necessary to zone the entire municipal boundaries often depends on circumstances⁹² and on the constitutional or statutory provisions conferring the zoning power,⁹³ and the rule may vary as to different municipal corporations.⁹⁴ Under some statutes, an entire municipality is not required to be zoned at one time,⁹⁵ and a municipality may create zoning districts of limited area without zoning its entire territory.⁹⁶ Certain portions of the municipality may be restricted and other portions left unrestricted,⁹⁷ and under particular circumstances zoning may be limited to one street only.⁹⁸

On the other hand, when the statute so requires it, zoning regulations should be in accordance with well-considered plans applying within the entire municipal boundaries, and not only to a portion thereof.⁹⁹ Accordingly, it has been held that a zon-

ing ordinance, whatever the source of its authorization, must apply to the city as a whole and not alone to particular streets,¹ and that an ordinance which did not attempt to establish zones in which buildings for business purposes might or might not be constructed, and which, by its terms, referred only to buildings and land in a certain area is invalid.² Likewise, a regulation which provides merely that a section should be zoned for certain uses, and which does not specify which portions of the section may be used for any or all of such purposes and which is not accompanied by a map designating such use areas, is not valid under a statute requiring that there be a comprehensive plan.³

Stability of plan. A zoning plan should be sufficiently stable to protect those who comply with the law, but it should be susceptible to change, so that it can be altered to meet changing conditions not adequately recognized or not possible to foresee when the ordinance is adopted.⁴

§ 31. Zoning by Districts

Although the test of the validity of a zoning ordinance is not the number of districts provided thereby, generally zoning must be by districts and not by individual pieces of property.

It is generally the rule that zoning must be by districts,⁵ and not by individual pieces of property⁶ or by blocks;⁷ and a zoning regulation may and should divide the municipality into districts of such number, shape, and area as may be best suited to carry out the zoning purposes.⁸ The test of the

validity of a zoning ordinance, however, is not the number of districts provided thereby,⁹ and an ordinance is not void because it does not establish more than one zone;¹⁰ but an ordinance is invalid where the creation of districts fails to accomplish the purposes set out in the ordinance.¹¹

§ 32. Boundary Lines

While the municipality has broad discretion in fixing the boundaries of zoning districts, the establishment of boundary lines must rest on some rational basis.

A municipality has broad discretion in fixing the boundaries of zoning districts in which certain restrictions shall apply,¹² but zoning district boundaries must be established by the building zone ordinance itself and not by the application of any written or unwritten rule formulated by an administrative body.¹³ The fact that residential property im-

mediately abutting a boundary line will be of less value than property more remote from the boundary of a commercial zone affords no justification for constant erosion of boundaries.¹⁴

With respect to discretion, it has been held that the boundary line of a zoning district in the nature of things must always be more or less arbitrary in that the property on one side of the line cannot be very different from the property on the other side of the line,¹⁵ and that a zoning regulation is not invalid because the location of such a line may be in some degree arbitrary,¹⁶ or transitional in character.¹⁷ Nevertheless, the establishment of boundary lines must rest on some rational basis,¹⁸ and zoning ordinances are invalid where failing sufficiently to fix areas and define boundaries of the intended use districts created thereby,¹⁹ or

Minimizing inconveniences

Zoning necessarily involves boundary problems and, when spot zoning is permitted in a certain district, the legislative body must determine where boundary is to be placed, attempting as far as possible to minimize resulting inconveniences, and such determination can be attacked only if there is no reasonable basis therefor.

Size of enterprises

Where dividing line between zones was drawn between small and large businesses, zoning authorities could reasonably make line of demarcation depend on size of enterprises involved as measured by number of employees.

§ 33. Propriety of Classification and Uniformity of Operation in General

Constitutional uniformity and equality requires that classification be founded in real and not feigned differences having to do with the purposes for which the classes are formed, and the classification of property for the imposition of different restrictions must be uniform and general.

A municipal corporation has the primary duty to make a zoning classification.²¹ Accordingly, it has broad discretion in classifying different restrictions and different areas of the municipality in which such

restrictions shall apply,²² and each of the criteria enumerated in the enabling act need not be found advantageous to a particular classification before the municipality has authority to make it.²³

In making classifications, a municipality must recognize natural reasons and differences suggested by necessity and circumstances existing in the area with which the ordinance deals,²⁴ and constitutional uniformity and equality requires that classification be founded in real and not feigned differences having to do with the purposes for which the classes are formed.²⁵ The classification, however, must be fair.²⁶ The classification or division of a city into districts by a zoning regulation must be reasonable, uniform, or universal, and nondiscriminatory,²⁷ and bear a reasonable and just relation to the general

(2) Proximity of zoned property to a line of demarcation, such as a street zoned for business and commercial purposes and serving as a barrier or buffer between different zones, is of itself insufficient to show that the ordinance creating the zone for the property involved is invalid or discriminatory as to such property.

object of the legislation²⁸ or to the public health, safety, or welfare.²⁹ Hence, it is usually required that there be reasonable uniformity of restrictions within districts having the same general characteristics,³⁰ that the restrictions imposed operate generally, equally, and uniformly within the particular zones established,³¹ and that lands in like situations be classified alike with respect to the restrictions on use imposed.³²

In determining the validity of a given zoning

classification, the question whether or not it is in conformity with the surrounding existing uses and the zoning classification of nearby property is considered of paramount importance,³³ but a classification as the means for attaining a permissible end is not to be declared invalid if any state of facts reasonably can be conceived that would sustain it.³⁴ Each case must be determined on its own facts,³⁵ and a small area may be zoned specially to meet a special safety or health problem.³⁶

(2) Even though a zoning ordinance of a city be based on proper statutory authority and is reasonably designed to protect public health or safety, it cannot, in such guise, under rights guaranteed by state and federal constitutions, effect an arbitrary discrimination against class on which it operates by omitting from its coverage persons and objects similarly situated.

An absolute identity of treatment of particular parcels of land is not required,³⁷ and it is not necessarily fatal that the classification be wanting in purely theoretical or scientific uniformity or mathematical nicety or that there be some inequality in practice.³⁸ Accordingly, zoning one side of a street for purposes different from those prevailing on the other side is not per se illegal.³⁹ The relative density of population in permissive and restricted districts is not a conclusive test of the validity of a zoning ordinance⁴⁰ and of the classification effected by the zoning plan.⁴¹

§ 34. Spot Zoning

Spot zoning, or zoning of individual pieces of prop-

erty in a manner different from that of surrounding property, primarily for the private interest of the owner of the property so zoned, may be improper, but is not illegal in all cases.

Spot zoning is an attempt to wrench a single lot from its environment and give it a new rating that disturbs the tenor of the neighborhood,⁴² and which affects only the use of a particular piece of property or a small group of adjoining properties and is not related to the general plan for the community as a whole,⁴³ but is primarily for the private interest of the owner of the property so zoned;⁴⁴ and it is the very antithesis of planned zoning.⁴⁵ It has generally been held that spot zoning is improper,⁴⁶ and that one or two building lots may not be marked off

Elements

Two elements must coexist in order to constitute spot zoning in sense of an illegal exercise of power on part of zoning authority; there must be a change of zone applicable only to a small area and, this change must be out of harmony with comprehensive plan for good of community as a whole.

"Less rights"

Implementation of general ordinance

Where city had general zoning ordinance covering entire city, separate ordinance dealing only with annexed property merely implemented the general ordinance, and was not invalid as attempted piecemeal zoning.

Church

Action of city council in permitting church to resubdivide church property and dedicate alleys for sole purpose of allowing church to erect building in conformance with ordinance providing that church could be erected in district zoned for single family residences only on a lot entirely surrounded by streets or alleys did not constitute spot zoning.

Type of "island"

"So-called 'spot' zoning results in the creation of two types of 'islands.' . . . The objectionable type arises when the zoning authority improperly limits the use which may be made of a small parcel located in the

center of an unrestricted area. The second type of 'island' results when most of a large district is devoted to a limited or restricted use, but additional uses are permitted in one or more 'spots' in the district."

Test

An ordinance is not to be labeled "spot zoning" merely because it singles out and affects one parcel of land, and the true test is whether

an ordinance creates numerous small zones indiscriminately scattered throughout the city, frequently consisting of only one lot, does not render it invalid,⁵⁴ and a mere allegation that a certain order constitutes spot zoning does not necessarily make the order illegal.⁵⁵

Whether a zoning ordinance is invalid as an entirety in that it is merely spot zoning depends on more than the size of the "spot",⁵⁶ although the size is an important consideration;⁵⁷ and, where it does not appear that there is a singling out of one lot for treatment different from that accorded to similar surrounding land indistinguishable from it in character, such spot zoning is not illegal.⁵⁸

§ 35. Equitable Application

The limitation on the use of property imposed by a zoning regulation must apply fairly to all and tend to promote the common good of all the people in the community.

The limitation on the use of property imposed by a zoning regulation or ordinance must apply fairly to all,⁵⁹ and some individuals should not be protected to the detriment and hardship of others.⁶⁰ A zoning ordinance may not deprive an individual own-

er of all useful benefits of his property,⁶¹ and impose on him a special hardship unnecessarily and unreasonably.⁶² Zoning restrictions must in some substantial manner tend to promote the common good of all the people in the community rather than to further the desires of a particular class, group, or individual in that community,⁶³ and the power to enact zoning ordinances cannot be invoked to further private interests which conflict with the rights of the public in general.⁶⁴ A restrictive act may not be passed merely because the community wants it,⁶⁵ but the fact that certain zoning action is urged by a minority, majority, or by all of the community neither brings the action within the police power nor prevents it from being valid and constitutional.⁶⁶

§ 36. Aesthetic Considerations

Although aesthetic considerations alone do not justify the enactment of zoning regulations, they may constitute a proper factor in determining whether a zoning regulation is valid.

It has generally been held that aesthetic considerations alone do not justify the enactment of zoning regulations,⁶⁷ and that a zoning ordinance, in so

the change is part of a well considered and comprehensive plan.

far as it is designed merely to preserve the appearance of a designated neighborhood, is invalid.⁶⁸ Causes which may depress highly sensitive persons furnish no basis for restrictions on the use of property by a zoning regulation.⁶⁹

It has also been held, however, that zoning regulations may extend beyond strict considerations of health and safety and include aesthetic considerations,⁷⁰ and that aesthetic considerations may constitute a proper factor in determining whether a zoning regulation is valid.⁷¹ When once it is determined that the regulation tends to promote the public health, public safety, or public welfare, aesthetic

considerations may be considered by the municipality in the enactment of the particular regulation,⁷² and it is not a valid objection to a regulation which can be sustained as promoting the public health and safety that it was induced by reason of aesthetic value.⁷³

§ 37. Hardship, Loss, or Benefit to Particular Persons

In determining the validity of zoning regulations, the public interest must be weighed against the right of individual owners, and while the effect of a regulation on the land values is not controlling, it is a proper element to be considered, since no basis for the exercise of the

zoning power exists if the public gain is small compared with individual hardships and loss.

In determining the validity of zoning regulations the seriousness of the restriction on the private right must be considered in balance with the expediency of the public interest,⁷⁴ since the police power, which is the legal basis for zoning legislation, as discussed supra § 16, must be reconciled with the legitimate use of private property, in harmony with constitutional guaranties.⁷⁵ Ordinarily, where a municipal-

ity acts in the lawful exercise of its police power in enacting zoning regulations, the owners of property not taken have no redress because the value thereof is diminished,⁷⁶ and the fact that the exercise of the zoning power reduces the value of some individual rights does not render it invalid if the restriction is for the greater benefit accruing to the public as a whole.⁷⁷

Generally the effect of a zoning ordinance on land values is not controlling,⁷⁸ and the validity of a zon-

Value of investments

(1) Right of municipal legislative body to pass zoning ordinance is not limited by fact that value of investments made in business prior to any legislative action will be greatly diminished, as business which was entirely unobjectionable when established may become, by growth of population in vicinity, a source of danger to health and comfort of occupants of surrounding territory.

Where a destruction of value occurs, test to be applied is whether such destruction promotes public health, safety, morals, or general welfare.

property without commensurate advantage to other property.⁸³ Likewise, the welfare of the community may not be subordinated to the profit motive of an individual owner,⁸⁴ and the fact alone that the property in question may be more valuable if otherwise zoned is not decisive in determining the validity of an ordinance,⁸⁵ particularly where the proposed zoning would depreciate the value of other property in the area.⁸⁶

The objective effect of an ordinance on the prop-

erty rights of the persons affected thereby should be considered,⁸⁷ and may be persuasive in passing on the validity of an ordinance.⁸⁸ So, it has been held that in determining the validity of a zoning regulation it is proper to consider the hardship and loss imposed on individuals,⁸⁹ and the extent to which the value of property has been diminished by the regulation,⁹⁰ since no basis for the exercise of the zoning power exists if the public gain is small compared with individual hardships and loss.⁹¹

Detriment to public welfare

Profit that would accrue to individual property owners, if zoning restrictions were removed, must be weighed against detriment to public welfare that would ensue, and one property owner should not be permitted to increase value of his property at expense of his neighbors.

strictive ordinance to the public good, such ordinance cannot, under the guise of a zoning regulation, either confiscate the property⁹² or inflict a substantial financial injury on the owner thereof.⁹³ Although zoning laws may inflict severe pecuniary damage on land owners without being confiscatory,⁹⁴ generally, they must not be confiscatory.⁹⁵ Hence, zoning laws that result in relatively little gain or benefit to the public while inflicting serious injury or loss on the property owner may not be sustained,⁹⁶ since they are confiscatory and void.⁹⁷ A municipality is without power so to zone property as to render it worthless,⁹⁸ or almost worthless,⁹⁹ so that the depreciation of the property amounts to a confiscation,¹ and the zoning power may not be used to depress the values of property which the city may in the future desire to take under the power of eminent domain.²

§ 38. Retroactive Operation

As a general rule a zoning ordinance or regulation should be prospective in operation.

As a general rule the restrictions of a zoning ordinance or regulation may not be made retroactive,³ but only prospective.⁴ It has been held, however, that despite their retroactive operation, ordinances which have no adverse effect on vested or substantial rights, or which merely regulate rights or change their form, are not invalid, particularly where such ordinances are in the proper exercise of police power.⁵

the validity of a zoning ordinance,⁶ but a zoning law cannot constitutionally relieve land within a district covered by it from lawful restrictions affecting its use contained in deeds to such land.⁷

§ 40. Racial Status

Zoning restrictions based solely on racial status are invalid.

Zoning restrictions based solely on the racial status or color of the proposed occupant of property within certain districts are invalid.⁸

§ 41. Failure to Provide for, or Appoint, Board or Commission

A zoning ordinance may be invalid where no provision is made for the appointment of a board or commission required by the enabling act, but the mere failure to appoint a board provided for will not invalidate the regulation.

A zoning ordinance or enactment may be invalid where no provision is made for the appointment of a board or commission required by the enabling act,⁹ or where it provides that the membership of the required board or commission shall consist of municipal officials who cannot be appointed thereto under the express provisions of the enabling act.¹⁰ A zoning ordinance, however, will not be invalidated because an appeal board required by the enabling act was not created by the ordinance, where the board was legally created and its members legally appointed before the adoption of the ordinance.¹¹

According to some decisions, the failure of the

municipality to appoint such a board does not invalidate the zoning regulation,¹² at least where the statute is construed as permissive and not mandatory.¹³ So, if provision is made for the establishment and appointment of a required board of adjustment or review, the zoning ordinance will not be considered invalid merely because of delay in fulfilling the provisions as to the selection, organization, and proper functioning of the board;¹⁴ and the failure to appoint the board will not cause the application of the ordinance to be illegal, since the court, on proper application, may compel the appointment of the necessary members of the board.¹⁵ The failure to appoint a proper planning and zoning commission required by the enabling act will not invalidate the zoning ordinance as a whole, and it will take effect in so far as it authorizes the appointment of the commission, subject to the filling of vacancies by subsequent action of the appointing body.¹⁶

Under some statutes it is not mandatory that a zoning commission be appointed prior to the enactment of zoning regulations.¹⁷ A planning board has been held not mandatory in order for a comprehensive zoning plan to be evolved, it being proper for the local governing body to assume the duties and responsibilities of such a board.¹⁸

mission, or administrative officer, but power may be granted to such a board or commission to determine facts on which the application of the zoning enactment depends and to administer the enactment.

In general, zoning enactments, regulations, and restrictions may not validly delegate legislative power with respect to zoning to a local board, commission, or administrative officer, and where they attempt to delegate such power they are void.¹⁹ While, however, the power to make a zoning law cannot be delegated to an administrative officer or board, a delegation of power to determine some fact or state of things on which the law makes or intends to make its own action depend is valid.²⁰ Discretionary powers vested in a zoning commission to

ascertain the necessary facts to justify the granting of a permit under the ordinance or enactment is an exercise of quasi judicial, or perhaps administrative power, and does not amount to an exercise of legislative power.²¹

The administration of zoning ordinances and regulations may validly be committed to subordinate officers.²² Thus zoning statutes and ordinances, provided they furnish a reasonably adequate standard by which to act,²³ are not invalid as in violation of the principle against the delegation of legislative powers, where they grant to an administrative board or officer power to authorize or approve a variance from the terms of a zoning ordinance or other enactment,²⁴ to make certain special

Delegation of blanket authority

R.I.—Flynn v. Zoning Bd. of Review of City of Pawtucket, 73 A.2d 808, 77 R.I. 118.

Matter of policy

Where village planning commission allowed, as a nonconforming use on the ground of undue hardship, the use of "residence A" zone property adjacent to a hospital as a parking lot for hospital, the use for parking purpose was not a minor change authorized under undue hardship provision of zoning ordinance, but was a matter of policy the determination of which could not be delegated by village council to such commission.

Unlawful delegation of legislative authority not established

(1) A zoning ordinance giving city planning and zoning commission the authority to permit in a use district any use in general keeping with authorized uses, subject to confirmation by city council, was authorized by statute and was not a delegation of legislative authority.

Ohio.—McCloud v. Woodmansee, 185 N.E.2d 316, 165 Ohio St. 271.

(2) Zoning ordinance requiring board to perform its duties in manner prescribed by law providing for minutes and records to be kept by the board in all matters before it and hearings to be held after notice given, and providing for complete review of the board's acts by an aggrieved party is not an unlawful delegation of legislative authority.

Ala.—Walls v. City of Guntersville, 45 So.2d 468, 253 Ala. 480.

Enforcement

Provision in zoning ordinance for enforcement by mayor or building inspector or other person delegated by mayor did not authorize an unlawful delegation of power to enforce.

Ala.—Walls v. City of Guntersville, supra.

23. Standards held sufficient

(1) Zoning statute, which details proper zoning purposes, provides for hearing on adequate notice to interested parties, and requires specific finding by administrative agency of extraordinary conditions or undue hardship or of specific reasons within contemplation of act and approval of municipal governing body before a variance can be granted, does not unconstitutionally delegate legislative power.

N.J.—Ward v. Scott, 93 A.2d 385, 11 N.J. 117.

(2) Where an ordinance or regulation implies that the board should act in accordance with the interest of public health, safety, morals, and general welfare of the community, such requirement has been held to be a sufficient standard or guide to meet a challenge that ordinance provisions are invalid as a delegation of legislative powers to the board.

Requirement of consent or approval of board or governing body. Unless they violate fundamental laws and property rights,²⁸ ordinances providing that the right to erect, alter, or maintain particular buildings or to use property for particular purposes depends on first obtaining the consent or approval of the governing body or some other municipal authority are generally valid,²⁹ except where they fail to provide any standards to guide and control the action of the body to which the power is delegated.³⁰ General standards for the guidance of the local authority in making its determination, however,

need not be formulated in order to render such an enactment valid, where the body whose approval is required is a legislative body and the matter involved is one which may endanger the safety of persons and property.³¹

§ 43. Requirement of Consent of Property Owners

Provisions requiring the consent of adjacent property owners, or a stated per cent of them, as a prerequisite to the right to construct or use property in a particular manner have been held invalid as an improper delegation of governmental powers to private citizens; but provisions permitting a zoning restriction to be waived or modified with the consent of designated property owners have been held valid.

In a number of cases, ordinances under which the right to construct or use property in a particu-

Conditional use permit

Provision authorizing granting of conditional use permits by commission to permit certain uses, of public concern in zones from which such uses would otherwise be excluded, when it be found that such uses were deemed essential or desirable to the public convenience or welfare, was not unconstitutional as an unlawful delegation of legislative power.

Cal.—Wheeler v. Gregg, 203 P.2d 37, 90 C.A.2d 348.

Subject to review

Of planning commission

Zoning ordinance which granted permit for housing development on condition that development be accomplished in accordance with general plan submitted and approved both by city plan commission and city council was not invalid as a delegation by council to plan commission of its legislative authority.

lar manner is dependent on obtaining the consent of adjacent property owners, or a stated per cent of them, have been held invalid³² as constituting an improper delegation of governmental power to private citizens³³ or as having the effect of permitting discrimination in behalf of certain individuals as against others entitled to equal rights.³⁴

In some of the cases, however, it has been held that not all such regulations are invalid, since there is a distinction between those which leave the enactment of law to individuals and those which are prohibitory in nature but which permit the prohibition to be waived or modified with the consent of the persons who are to be most affected by such modification.³⁵ According to this view, a municipal corporation may adopt zoning ordinances of the latter description which, within reasonable limits, require the consent of designated property owners,³⁶ the requirement of such consents not constituting an invalid delegation of legislative power;³⁷ but if the

ordinance permits a certain percentage of the property owners to impose or create a restriction on their neighbors' property by the device of consent provisions, such limitation constitutes an invalid delegation of legislative power.³⁸

The requirement of the consent of a certain percent of the adjoining or neighboring owners as a prerequisite to the allowance of a particular use not authorized by the general zoning regulations has been held proper and not unconstitutional with respect to a potentially dangerous or offensive use or structure,³⁹ such as the operation and maintenance of saloons, billboards, garages,⁴⁰ and gasoline filling or service stations.⁴¹ On the other hand, provisions requiring such consent have been held invalid with respect to uses clearly in furtherance of the health, safety, morals, and general welfare of the community.⁴² Under this view, ordinances requiring the consent of property owners for the erection of a community store,⁴³ commercial build-

ings,⁴⁴ a church,⁴⁵ an educational building,⁴⁶ or a philanthropic home for children,⁴⁷ in a residential district have been declared void.

Ordinances have been held valid which provide that certain prohibited uses of property in a district may be permitted if a certain per cent of adjacent landowners consent, where, on such consent being obtained, the decision as to whether such permission shall be granted still rests in the discretion of the governing body.⁴⁸

Legislation authorizing a government official to zone an area as residential on consent given to him by written petition of the owners of more than half of the realty within the area to be zoned is not unconstitutional;⁴⁹ nor is it unconstitutional for a statute to provide that when two or more corners at an intersection are zoned in a certain way, the zoning authorities must rezone the other corners of the intersection in the same manner on written application from the owners thereof.⁵⁰

Where residential districts are established by

some rational general rule, there is no invalidity in a provision of an ordinance which enables a public board, in the exercise of its sound judgment, to relax the rigidity of the bounds of those districts if and when a designated per cent of the landowners of the immediate neighborhood as bounded by the ordinance so request.⁵¹

§ 44. Violation of, or Failure to Enforce, Regulations

The violation of, or failure to enforce, zoning laws and regulations does not invalidate or nullify them or estop the municipality or other local authority to assert their validity.

Generally, the violation by municipal or other local authorities of a zoning regulation or restriction, or their acquiescence in its violation, or failure to enforce it against a violator does not invalidate it or estop such authorities to assert its validity;⁵² nor does the fact that it was violated by other persons, or other uses, constitute grounds for having it

Manner of exercising zoning power generally see *supra* §§ 11-13.

Noncompliance with procedural requirements as affecting validity of temporary or emergency zoning regulation see *supra* § 19.

Approval by attorney general

To approve a town zoning bylaw, it was not necessary that attorney general personally approve a map separate and apart therefrom, or that it be physically before him or personally examined and boundaries of various zones traced by him, but it is sufficient that it was examined for him, with the bylaw, by one of his legal assistants, and that he approved bylaw on his own judgment after receiving assistant's report. Mass.—*Inhabitants of Town of West Springfield v. Mayo*, 163 N.E. 653, 265 Mass. 41.

Approval by property owners

Provision of county zoning law that no restriction shall become effective until approved by a majority of resident real property taxpayers in area involved, by their signing an appropriate document indicating their approval, was not violated by ordinance which required majority signatures plus the filing of the approval instrument for record before restrictions should become effective. Iowa.—*Gannett v. Cook*, 61 N.W.2d 703, 245 Iowa 750.

Council meeting outside boundaries; cure of defect

An alleged defect in a zoning ordinance because it was passed at a meeting of city council held outside boundaries of town may be cured by

valid where there has been a failure to comply with a statutory requirement that a zoning commission be appointed to make a preliminary report and hold public hearings;⁵⁹ and, on the other hand, the validity of various regulations has been upheld as against the objection that there was a failure to comply with a requirement that the zoning commission issue a preliminary report,⁶⁰ and that the preliminary report be submitted to the public.⁶¹ Public policy may forbid an attack based on informalities and irregularities in the procedure leading to the adoption of a zoning law or regulation when it has

been accepted as a valid enactment for a long period of time, and property owners affected by it have conformed to its provisions, and have fixed their status accordingly.⁶²

Title. A zoning law or regulation in order to be valid must comply with statutory and constitutional provisions with respect to titles of legislative acts and ordinances.⁶³ Under such provisions it has been held that the title of a zoning ordinance need not be an index of its provisions or a synopsis of its contents, but it is sufficient if it gives notice of the tenor of the ordinance to interested persons of a

a subsequently enacted validating statute.

Tex.—*Storm Bros. v. Town of Balcones Heights*, Civ.App., 239 S.W. 2d 842, refused no reversible error.

Failure to submit to committee; cure of defect

Where when zoning ordinance was adopted, no county zoning commission or coordinating committee had been appointed and none was appointed until after the ordinance was adopted but after the committee was appointed, the township submitted the ordinance to it and it was not disapproved, the ordinance was not invalid for failure to submit it to the nonexistent zoning coordinating committee and defect in any event was cured by subsequent action of committee.

Mich.—*Ritenour v. Dearborn Tp.*, 40 N.W.2d 137, 326 Mich. 242.

Introduction on date of passage

Where zoning ordinance was never introduced before the date on which it was passed and the unanimous consent of council members present was not given for immediate consideration of ordinance, ordinance was not legally adopted in view of violation of mandatory statutory provisions.

Ala.—*Thompson v. Wingard*, 34 So.2d 606, 250 Ala. 390.

Majority vote sufficient

Adoption by city council of ordinance providing that zoning ordinances may be adopted by majority vote of city council, even when more than twenty percent of owners of land immediately adjacent enter a protest, was within power granted under Home Rule Act and ordinance was valid, where it specifically provided that it superseded section of act of general assembly requiring three-fourths vote of members of city council if more than twenty percent of owners enter protest.

Pa.—*Bartle v. Zoning Bd. of Adjustment*, 137 A.2d 239, 391 Pa. 207.

Ordinance not affected by expiration of term of office

Where city charter provided that common council of city was a con-

tinuing body and that no measure before it abated or was discontinued by reason of expiration of term of office or removal of any of members thereof, fact that two councilmen, who were present at hearing when zoning ordinance was considered, were subsequently replaced by two newly elected councilmen, who voted for adoption of ordinance at subsequent meeting, did not render ordinance invalid.

N.Y.—*Halpern v. Dassler*, 135 N.Y.S. 2d 8.

Requirements inapplicable to regulation of liquor establishments

(1) In absence of express statement of intent, or of such a diametrical repugnance as to leave court no alternative, a special zoning law applicable only to City of Winter Haven did not require city to exercise power of regulating location of liquor establishment in a manner different from that previously followed under state Beverage Act, and, therefore, enactment by city of a zoning ordinance for that purpose was not required to follow procedural requirements of special zoning law.

Fla.—*Ellis v. City of Winter Haven*, 60 So.2d 620.

(2) City ordinance dividing city into business and residential areas and prohibiting retail sale of beer in residential area, which ordinance was passed pursuant to authority of Liquor Control Act and was not intended to be and was not in any sense a zoning ordinance, was not invalid because in passing ordinance procedure outlined in zoning law was not complied with.

59. Ky.—*City of Somerset v. Weise*, 263 S.W.2d 921.

Failure to provide for, or appoint board or commission as affecting, validity of regulation generally see supra § 41.

60. Documents constituting preliminary report

Maps in revised draft of proposed county zoning ordinance, tentatively

approved by county zoning commission, subject to further consideration at public hearing, and such ordinance, which county commissioners agreed to present with maps at such hearing, constituted preliminary report required by statute to be made by zoning commission to board of county commissioners.

Md.—*Walker v. Board of County Com'rs of Talbot County*, 116 A.2d 393, 208 Md. 72, certiorari denied 76 S.Ct. 180, 350 U.S. 902, 100 L.Ed. 792.

Sufficiency of recommendation

Fact that zoning commission merely recommended prohibition of erection of certain kinds of buildings, without recommending further proposed "regulations" did not invalidate ordinance passed pursuant to commission's report.

N.H.—*Stone v. Cray*, 200 A. 517, 89 N.H. 483.

61. **Advertisement of public hearing** on proposed county zoning ordinance before county board of commissioners in newspaper published at county seat once in each of four weeks before such hearing and reference therein to maps and draft of ordinance, which were open for public inspection at zoning commission's office, met statutory requirement that commission's preliminary report to board be submitted to public in that it was thus presented in usable written form and served as proper and adequate basis for discussion at public meeting.

Md.—*Walker v. Board of County Com'rs of Talbot County*, 116 A.2d 393, certiorari denied 76 S.Ct. 180, 350 U.S. 902, 100 L.Ed. 792.

reasonably inquiring state of mind and that as long as it indicates a general subject to which the provision involved is germane or incidental, the provision itself is sufficiently contained therein;⁶⁴ in short, that the title is not objectionable unless a substantive matter entirely disconnected therewith is included within the folds of the ordinance.⁶⁵

§ 46. — Notice and Hearing

A zoning law or regulation may be rendered invalid

by reason of failure to comply with statutory provisions requiring notice and hearing; and, apart from such statutory provisions, it is generally held that the constitutional prohibition against deprivation of property without due process of law demands that persons having interests or rights in property be given adequate notice and an opportunity for hearing before passage of zoning laws or regulations affecting their rights and interests.

A zoning law or regulation may be rendered invalid by reason of failure to comply with statutory provisions requiring notice⁶⁶ and by reason of failure to comply with statutory provisions requir-

64. Pa.—City of Harrisburg v. Pass, supra.

Sufficient compliance shown

Title describing zoning ordinance as providing for its own administration and enforcement, including payment of fees, was sufficient to put inquiring person on notice that a zoning permit was required prior to construction of building, and sufficiently complied with statutory and constitutional requirements relating to titles to legislative acts.

Pa.—Appeal of Myers, Co., 103 Pittsb. Leg.J. 310.

Sufficient notice

(1) An ordinance was valid and binding on objecting property owner as far as notice was concerned where zoning committee published an official notice of public hearing as to

ordinance to be held on specified date, and notice stated that meeting might be adjourned from time to time and ordinance was passed at a regular adjourned meeting.

Ill.—Jacobson v. Village of Wilmette, 85 N.E.2d 753, 403 Ill. 250.

(2) Similarly, a town zoning bylaw was not invalid because after hearing in which proposed bylaw delineated by reference to accompanying map was approved by planning board and before town meeting was held board held two more meetings, of which no public notice was given, which resulted in adding additional small parcels for business purposes, where board did not change identity of proposal.

Mass.—Town of Burlington v. Dunn, 61 N.E.2d 243, 318 Mass. 216, certiorari denied 66 S.Ct. 51, 326 U.S. 739, 90 L.Ed. 441.

(3) Even though an area was originally zoned residential by a general ordinance imposed without notice required by statute, in view of fact area in question was rezoned by a subsequent ordinance specifically made applicable to the area, passed after proper notice, owners of area in question had no ground for objection.

Ill.—Williams v. Village of Schiller Park, 138 N.E.2d 500, 9 Ill.2d 596.

(4) Vote at town meeting adopting zoning bylaw was not invalid because accompanying map differed from that inserted in warrant for meeting with respect to several small parcels, since statute does not require that warrant contain accurate forecast of precise action which meeting will take on subjects to be acted on.

Ill.—Town of Burlington v. Dunn, supra.

Cure of defects

(1) Defects in a zoning ordinance because of lack of proper notice may be cured by a subsequently enacted statute.

Tex.—Storm Bros. v. Town of Balcones Heights, Civ.App., 239 S.W.2d 842, refused no reversible error.

(2) A prior city zoning ordinance which was invalid for failure to give notice of time and place when such ordinance would be brought up

ing hearing.⁶⁷ Although there is authority apparently to the contrary,⁶⁸ apart from such statutory provisions, the constitutional prohibition against deprivation of property without due process of law demands that persons having interests or rights in property be given adequate notice and an opportunity for hearing before passage of zoning ordinances or regulations affecting their rights and interests.⁶⁹ Where a full hearing is accorded, due process does not require that provision be made for administra-

tive review.⁷⁰

§ 47. — Publication, Posting, Filing, and Indexing of Ordinance

Failure to comply with a statute requiring zoning ordinances to be published, posted, filed, and indexed may render the ordinance void.

A zoning ordinance or regulation may be rendered void by failure to comply with a statute requiring it to be published,⁷¹ or by failure to comply

for adoption did not become effective by passage as a revised city ordinance without giving of required notice and hearing thereon.
S.D.—*Dodds v. Bickle*, 85 N.W.2d 284.

(3) Original zoning ordinance was not void on ground of failure of city planning commission to give required notice of public hearings conducted by commission on ordinance preliminary to its enactment in compliance with requirement of governing body of city where such body duly gave timely notice thereof and ratified notice of public hearing afforded public by planning commission, and validity of proceedings on which ordinance as enacted was based and ordinance itself before it became effective were not attacked by interested parties.

Kan.—*Piper v. Moore*, 183 P.2d 965, 163 Kan. 565.

Presence at hearings rendering notice immaterial

In proceeding wherein validity of zoning ordinance was attacked, any failure to have proper publication with respect to enactment of ordinance was immaterial where persons attacking ordinance had been present at hearings on it before planning commission and council.

Number and extent of hearings

A public hearing on a change of zoning is not invalid because a large number of tracts of property are considered thereat or because persons other than petitioners or protestants are allowed to appear and testify, in view of the facts that statute does not limit extent of hearing or require a separate hearing for each tract of property affected, and zoning commission acts in legislative capacity, and is not subject to rules of procedure governing conduct of judicial hearings.

68. Self-prescribed limitation by city council

Even though ordinance prohibiting storage of new or secondhand lumber, empty packing boxes, or similar inflammable material on premises within fire limits, embracing business and industrial districts, except by special permission of common council after approval by building commissioner were a zoning ordinance, it would not be held void for want of public notice and hearing as provided in zoning ordinance adopted by common

council, since requirement of public notice and hearing was a self-prescribed limitation and could not serve as a delimitation of greater power vested in council by state.

Description of districts

Under law requiring publishing of every ordinance adopted, a zoning ordinance published without description in its text of use districts created, other than by reference to a map which was neither published, posted, included in ordinance as published, nor stated in publication to be on file in office of village clerk, was void.

N.Y.—*Village of Williston Park v. Israel*, 76 N.Y.S.2d 605, 191 Misc. 6, affirmed 94 N.Y.S.2d 921, 276 App.Div. 968, appeal denied 95 N.Y.S.2d 602, 276 App.Div. 1013, affirmed 95 N.E.2d 208, 301 N.Y. 713.

Proper publication shown

N.Y.—*Longo v. Eilers*, 93 N.Y.S.2d 517, 196 Misc. 909.

Invalidity of original zoning ordinance of village due to faulty publication did not invalidate subsequently adopted zoning ordinance which, although designated as an amendment to existing statutes, indicated a complete rewriting of zoning scheme and a repeal of everything

with statutes requiring it to be posted,⁷² filed,⁷³ and indexed.⁷⁴ Where a map is made a part of an ordinance, failure to include the map in the notice published or posted may render the ordinance invalid.⁷⁵ It has been held, however, that the failure to file a

copy of the zoning regulation in the clerk's office, if required by statute, does not invalidate the regulation as against a landowner who received actual notice of the regulation when he applied for a building permit.⁷⁶

3. REGULATIONS AS TO PARTICULAR MATTERS

§ 48. Architectural and Structural Designs

Generally, the zoning power may extend to the regulation of the architectural and structural designs of buildings within specified districts, including regulations with respect to yards, size of lots, area, and standards of construction; but the power must be exercised reasonably and within its scope.

A municipality may validly regulate the archi-

tectural and structural design of buildings within certain areas or districts⁷⁷ provided that the regulations are within the scope of its powers,⁷⁸ have a reasonable relation to the health, safety, general welfare, or other public interest to be served,⁷⁹ are reasonably definite and certain,⁸⁰ and nondiscrimina-

Facts in each case determinative

Question whether building restrictions in a zoning ordinance promote public health, safety, or welfare must be determined in each case on basis of facts involved.

Mich.—Frischkorn Const. Co. v. Lambert, 24 N.W.2d 209, 315 Mich. 556.

Fact that zoning board believes proposed building is unartistic or not aesthetic cannot by itself be basis of depriving a home owner of right to use his property as he wishes.

Ordinance not indefinite

A zoning ordinance prohibiting issuance of building permit, unless board finds that proposed structure's exterior architectural appeal and functional plan will not be so at variance with those of other structures in immediate neighborhood as to cause substantial depreciation in property values thereof, was not so indefinite or ambiguous as to subject applicants for building permits to

tory,⁸¹ and do not otherwise impair constitutional rights.⁸²

In accordance with the foregoing rules, municipalities may validly promulgate reasonable zoning regulations with respect to front and rear yards,⁸³ side yards between dwellings,⁸⁴ minimum area,⁸⁵

82. Protection of vested right

Where a property owner has in good faith expended money or incurred obligations, which are substantial in relation to proposed project, in reliance on existing conditions of a zoning ordinance, he has a vested right and is entitled to protection against a subsequently enacted amendment, regulating architectural and structural designs within specified districts, even though no building permit had been issued.

Ordinance permitting board to vary restrictions

Zoning ordinance, which classified area in which plaintiffs' property was located as a single-family dwelling district and which permitted board of zoning appeals to vary or modify restrictions where there are practical difficulties or unnecessary hardship in the way of carrying out the strict letter of ordinance, provided that such modification is in harmony with the general purpose and intent so that spirit of ordinance shall be observed, public safety secured, and substantial justice done, was valid on its face.

Mich.—*Hammond v. Kephart*, 50 N.W.2d 155, 331 Mich. 551.

House convertible into apartments

Where property was being used as a one-family residence at time ordinance limiting property to one-family homes was passed, owner who purchased home after passage of ordinance was charged with knowledge that section in which property was located had been zoned; and fact that construction and arrangement of house had been such that it could have been converted into apartments, did not remove property from one-family residence restrictions of zoning ordinances.

Ga.—*Tucker v. City of Atlanta*, 84 S.E.2d 362, 211 Ga. 157.

Relation to safety and welfare

(1) A single-family restriction is a valid zoning regulation since it bears substantial relation to the public safety and to the general welfare.

(2) Such relation to public safety and general welfare exists in that a regulation designed to decrease number of families in one house may reasonably be thought to diminish risk of fire.

N.H.—*Sullivan v. Anglo-American Inv. Trust*, 193 A. 225, 89 N.H. 112.

Alterations

Application of single-dwelling zoning ordinance to restrain alteration and "possible use" of building as double apartment for occupation by lessee with relatives and friends is authorized by statute which permits

establish residential districts restricted to single and two-family houses,²⁴ to the exclusion of flats, multiple dwellings, apartment houses,²⁵ and other types of buildings.²⁶ Such a regulation is not discriminatory or otherwise invalid as to particular property merely because of the use of some nearby property for multiple dwelling purposes²⁷ or because

some adjacent property is zoned for commercial use.²⁸

Regulations restricting certain areas to single-family dwellings or prohibiting the erection of apartment houses may, however, be invalid, either generally or as applied to particular property, under some circumstances,²⁹ as where such regulations are

prohibition of alterations to "provide" for use in manner substantially different from use to which put before alteration, since "provide," as used in statute, means to take measures in view of an expected or a possible need.

N.H.—Sullivan v. Anglo-American Inv. Trust, supra.

Deliberate violation

Where property owner deliberately violated zoning ordinance restricting area to single-family dwellings, by erecting multiple dwelling on property adjacent to small business zone within larger residential zone, finding that use of property for multiple dwelling purposes was in enjoyment of substantial property right of owner was an improper conclusion of law; finding that use of property for multiple dwelling purposes did not impede, hinder, or interfere with attainment of objectives of zoning ordinance did not authorize property owner so to use the property in absence of facts showing that ordinance was unreasonable or invalid as applying to owner's property.

Violations

Ill.—Cassidy v. Triebel, 85 N.E.2d 461, 337 Ill.App. 117.

Number of occupants

Fact that city zoning ordinance permitted a house which was occupied by a family consisting of eleven individuals to be converted into a duplex to house two families without any restriction as to the number of members of each family, but forbade the use of the house as a sorority house by ten girls and a house mother, did not deprive owners of house

29. N.Y.—Hyde v. Incorporated Village of Baxter Estates, 140 N.Y.S. 2d 890, affirmed 156 N.Y.S.2d 378, 2 A.D.2d 839.

Zoning ordinance not restricting number of people or families residing in a building, provided they live as one housekeeping unit, etc., and permitting the renting of one or more rooms in a private residence, was held unconstitutional when so applied as to prevent plaintiffs from completing and using their building as a two-family dwelling, where plaintiffs' lot was near two apartment buildings and a busy street, and was located in a small tract zoned for residential use, which was surrounded by property zoned for either commercial uses or apartments.

Ill.—Anderman v. City of Chicago, 40 N.E.2d 51, 379 Ill. 236.

Rezoning

(1) Enactment of zoning ordinance to rezone area to restrict its use to single-family homes could not deprive owner of realty of right to construct apartment houses, where owner had purchased the realty for purpose of erecting the apartment houses thereon and had expended over fifty thousand dollars for surveys, architectural services, fees, etc., in preparation for construction of apartment houses and had applied for permit prior to enactment of such ordinance.

Wis.—State ex rel. Schroedel v. Pagens, 43 N.W.2d 349, 257 Wis. 376.

(2) Fact that all of lot owners in area zoned for garden type apartments except owners of tract who proposed to construct that type of apartment desired amendment to zoning ordinance replacing the area in a zone for one and two-family dwellings did not authorize enactment of the amendment unless they were adversely affected by conditions which were planned.

N.J.—Ridgfield Terrace Realty Co. v. Borough of Ridgfield, 55 A.2d 812, 136 N.J.Law 811.

Regulation greatly impairing value of lot

Where a lot constituted the corner of less restricted zone, lot was separated on three sides by public park and on all four sides by a park or street or both, from all present and probable future housing, and owner's

beyond the authorized powers of the municipality,³⁰ confiscatory,³¹ or not a proper exercise of the police power;³² but a housing shortage does not justify a judgment voiding for all time the applicability to one owner's property of an ordinance prohibiting the use of the property for other than a single-family dwelling,³³ and even if an ordinance prohibiting the erection or use of multiple dwellings in a borough were shown to be invalid as to one owner's property, it could not be declared a nullity throughout the borough, or even throughout the district in which the parcel is situated.³⁴

In particular circumstances, regulations have been held invalid which prohibit in certain districts the erection of single-family dwellings separated only by party walls³⁵ of two-family houses,³⁶ or of multiple dwellings designed and used for more than a certain number of families.³⁷

Suspending operation of ordinance. A housing

shortage may justify a city in temporarily suspending the operation of a zoning ordinance restricting an area to single-family dwellings during the emergency.³⁸

§ 52. — House Trailers

A municipality may prohibit any but temporary use of trailers within its borders when they do not meet building code requirements, but a trailer may not validly be prohibited in a residential zone merely because of aesthetic considerations.

A zoning ordinance prohibiting the use of house trailers in residential districts has been upheld as valid,³⁹ and it has been held that a municipality may prohibit any but temporary use of trailers for living purposes within its borders when such trailers do not meet the minimum requirements of the building code.⁴⁰ However, a house trailer may not validly be prohibited in a residential zone merely because of aesthetic considerations where the health, morals, and safety of the community are not affected;⁴¹

proposed apartment building would accommodate many more people than single dwellings which might be built on the lot, and enforcement of zoning commission's order restricting lot to single dwellings would greatly impair value of lot and would not increase value of adjoining property, zoning order was properly set aside. D.C.—Wolpe v. Poretzky, 154 F.2d 330, 81 U.S.App.D.C. 67, certiorari denied 67 S.Ct. 69, 329 U.S. 724, 91 L.Ed. 627.

Ordinance establishing fraction only of city into district, and providing that no building intended to be used as dwelling should be erected therein, except as single or two-family dwelling, where district was shown to be in most healthful part of municipality in which to erect apartment houses, denied due process.

Ordinance held not authorized

(1) Ordinance prohibiting erection of apartment houses within particular district was not authorized by statute authorizing regulations by city for erection of buildings or by statute providing general plan of zoning, where city passed no general zoning ordinance.

Iowa.—Downey v. Sioux City, 227 N.

W. 125, 208 Iowa 1273, followed in Wolle v. Sioux City, 229 N.W. 214.

(2) A regulation providing that no buildings shall be erected, altered, or used as a residence for more than one family, but not regulating the size of the lot or specifying how far buildings shall be separated, was not authorized by statute authorizing municipalities to regulate the location of industries and buildings with a view to promoting the public health, safety, and general welfare. Minimum floor space

An ordinance providing that all dwellings should have a minimum of three hundred eighty-four square feet of space on the first floor and defining a house trailer as any vehicle used for living or sleeping purposes, and providing that if so used for over thirty days in any one year it should be considered as a single-family dwelling, was not discriminatory as to house trailers.

§ 53. — Provision for Off-Street Parking

Regulations requiring that provision be made for off-street parking in connection with a certain use of property must be related to the public health, safety, and general welfare, be within the scope of the enabling law, and be definite and certain in their terms.

The validity of regulations requiring that provision be made for off-street parking in connection with a certain use of property depends on

whether the regulations are properly related to the public health, safety, and general welfare,⁴³ are within the scope of the enabling law,⁴⁴ and are definite and certain in their terms.⁴⁵

§ 54. Use of Property

Zoning regulations may consist in regulating the use to which land in particular localities may be put, but power so to regulate the use of land is not unlimited and must be exercised within its scope and within the limitations imposed by statute or constitutional provision.

Zoning regulations enacted by a municipal corporation or other political subdivision may consist in regulating the use to which real estate, in particular localities may be put,⁴⁶ and such regulations

Statute barring limitations on religious or educational uses

Statute making invalid any ordinance which prohibits or limits use of land for any church or other religious purpose or for any educational purpose, whether public, religious, sectarian, or denominational, was applicable to municipal zoning ordinance enacted prior to enactment of the statute. Under such statute institute, which was nonprofit corporation for teaching of principles of science of accounting, was "public," the provision not being confined to publicly supported or maintained institutions or to "public schools;" and fact that nonprofit institution charged fees for its services would not destroy public character of its purpose, and absence of endowment of gifts to institution would not be

controlling in determining public character of its purpose.

Ordinance limiting annual number of permits

Zoning ordinance providing that no more than one hundred twelve residential building permits a year shall be issued for any land that town board shall declare to be within special residence district is invalid and void, both because it violates constitutional prohibition against taking property without just compensation and because no power to enact it was vested in town by law.

Test of general welfare

Whether a zoning regulation as to the use of property is for the general welfare of the municipality may be tested by considerations of stabilization, orderliness, and development in the forms, branches, and grouping of the elements of residence, business, and industry in community life.

N.H.—Kimball v. Blanchard, 7 A.2d 394, 90 N.H. 298—Stone v. Cray, 200 A. 517, 89 N.H. 483.

Building on lots not fronting on street

Zoning ordinance which prohibited building of residences on lots in city not fronting on a dedicated street, and which prohibited plaintiff owners of lot fronting on an undedicated street from constructing a single-dwelling house on their lot, was unconstitutional where use proposed by plaintiffs would not affect public health, safety, morals or welfare of village citizens.

Special group

Under statute authorizing municipi-

must be certain and definite.⁵³

Circumstances affecting validity of regulation. Whether or not a zoning restriction on the use of property is valid, as applied to particular property, depends, in the final analysis, largely on the facts and circumstances of the particular case.⁵⁴ In accordance with the general principles discussed supra §§ 24-47, among the facts to be taken into consideration in adjudging the validity of a given zoning restriction on the use of property are the size and physical characteristics of the land involved,⁵⁵ its location⁵⁶ or the character of the neighborhood,⁵⁷ existing uses and zoning of nearby property,⁵⁸ the effect of permitted uses on the surrounding area,⁵⁹ the effect of the restrictions on income from the property,⁶⁰ the amount by which property values are decreased,⁶¹ the extent to which this diminution

of value promotes the health, safety, morals, or general welfare of the public,⁶² the relative gain to the public as compared to the hardship imposed on the individual property owner,⁶³ the suitability of the property for the purpose for which it is zoned,⁶⁴ and the length of time under existing zoning that the property has remained unimproved, considered in the context of land development in the area.⁶⁵ No one factor is controlling, but each must receive due consideration.⁶⁶

A zoning regulation is not invalid merely because a district near complainant's property is one in which a use prohibited to complainant's property is permitted;⁶⁷ and the existence of nonconforming uses within a district does not affect the validity of the classification,⁶⁸ at least where such noncon-

pal corporations to adopt zoning ordinance, the exercise of property rights cannot be left to the caprice, whim, or aesthetic sense of a special group of individuals who may object to the use by property owner of the rights fixed by such ordinance or left unrestricted thereby. Ala.—Johnson v. City of Huntsville, 29 So.2d 342, 249 Ala. 36.

Zoning ordinance applied to pre-vent construction of jail on county premises in undeveloped part of city was without relation to public health, morals, safety, or welfare and invalid. Fla.—State v. Du Bose, 128 So. 4, 99 Fla. 812.

Zoning ordinance not defining with certainty location, boundaries, and areas into which municipality was divided is in violation of due process clause. Ohio.—Village of Westlake v. Elrick, App., 83 N.E.2d 646.

Ordinance sufficiently specific

Zoning ordinance prohibiting the use of premises for fabricating metals in such manner as would emit noises of a "disagreeable or annoying nature" is not unconstitutional as not being sufficiently specific, since the words "disagreeable" and "annoying" have an established meaning at common law in the definition of a common-law nuisance.

Whether zoning ordinance providing for penalty for violation was confiscatory and therefore unconstitutional would depend on facts developed on trial.

forming uses are few in number,⁶⁹ although it may be a factor to be considered.⁷⁰ So the fact that property located in a certain use district would be more valuable or suitable for a prohibited use does not by itself render the restriction invalid.⁷¹

A zoning regulation may be invalid, however, as

applied to particular property where such property is entirely unsuited to, or not usable for, the only purpose permitted by the regulation,⁷² or where the application of the regulation has the effect of completely depriving the owner of the beneficial use of his property by precluding all uses or the only use to which it is reasonably adapted.⁷³ Indeed, in order

Reduction of value of property

(1) The reduction of property in money value as an incidental effect of enactment of zoning regulations is not a compensable injury, rule of *damnum absque injuria* applying.

Va.—West Bros. Brick Co. v. City of Alexandria, 192 S.E. 881, 169 Va. 271, appeal dismissed 58 S.Ct. 369, 302 U.S. 658, 82 L.Ed. 508, rehearing denied 58 S.Ct. 480, 302 U.S. 781, 82 L.Ed. 603.

(2) Although a zoning ordinance operates to reduce value of property the use of which is restricted, such damage does not constitute the taking of private property within the constitutional inhibition, the owner sharing in the benefits resulting from the exercise of the police power.

Ark.—City of West Helena v. Bockman, 256 S.W.2d 40, 221 Ark. 677—City of Little Rock v. Sun Building & Developing Co., 134 S.W.2d 582, 199 Ark. 333.

(3) "The mere fact that the ordinance is harsh and seriously depreciates the value of the complainant's property is not enough to establish its invalidity."

U.S.—American Wood Products Co. v. City of Minneapolis, D.C.Minn., 21 F.2d 440, 444, affirmed, C.C.A., 35 F.2d 657.

(4) Reduction in values, shared by most, if not all, owners in a locality, because of the common effect on properties of the general scheme of a zoning ordinance, is not enough in itself to constitute a denial of due process of law.

to show the invalidity of a zoning regulation in a particular case, it may not be necessary to show that the zoned property is totally unsuitable for the purpose classified, but it may be sufficient to show that a substantial decrease in value results from a classification bearing no substantial relation to the public welfare.⁷⁴ Normally the question whether there is discrimination in the operation of a zoning ordinance cannot be determined by the question whether property can be acquired at an equitable price within the zone permitting a certain contemplated use.⁷⁵

Prohibition of legitimate use anywhere within municipal limits. It has been held that it is not a valid exercise of the zoning power to prohibit a legitimate use of property anywhere within the limits of the municipality.⁷⁶ So, a zoning ordinance which excludes churches⁷⁷ and schools⁷⁸ from the entire municipality is invalid. Under some circumstances, however, certain types of activities may be entirely excluded from a municipality,⁷⁹ and, accordingly, it has been held that some otherwise legitimate uses of property may be entirely excluded,

Prospective demand

The mere opinion or belief that prospective demand would develop for property for private estate purposes in not distant future, as weighed against concrete fact that it was unfit as it stood for purpose to which it was restricted, could not indefinitely serve as basis for continuation of zoning restriction, and was not sufficient to overcome owner's inherent right to appropriate locus to presently beneficial use he proposed.

Where there exists a small residential municipality the physical location and circumstances of which are such that it is best suited for continuing residential development and, separated therefrom but in the same geographical region, there is present a concentration of industry in an area peculiarly adapted to industrial development, the municipality may restrict its territory to residential purposes and such small businesses, trades, and light industries as are needed to serve its residents, and validly exclude heavy industry from its territory.

except for pre-existing nonconforming uses.⁸⁰ Whether a use may be wholly prohibited depends on its compatability with the circumstances of the particular municipality, judged in the light of the standards for zoning set forth in the controlling statute.⁸¹

Exemption of structures essential to public health, safety, or welfare. A municipality may exempt from the scope of a zoning ordinance buildings or structures essential to the performance of mandatory duties for the safety of all its inhabitants,⁸² or municipal buildings and structures deemed neces-

Regulations making classification effective

Since a legislative body has the power to establish residential districts, it has the power to make such classification really effective by adopting such reasonable regulations as will be conducive to the welfare, health, and safety of those desiring to live in such district and enjoy the benefits thereof.

Cal.—City of Los Angeles v. Gage, 274 P.2d 34, 127 C.A.2d 442.

Relation to public welfare

(1) Restriction, by zoning ordinance, of an area for residential use, has substantial relation to the public welfare, for by such regulation the property owners are protected from uses which reduce values and create hazards, such as undue vehicle traffic, noises, and the like.

Ill.—Miller Bros. Lumber Co. v. City of Chicago, 111 N.E.2d 149, 414 Ill. 162.

(2) Every intendment is in favor of validity of exercise of police power, and even though court might differ from determination of legislative body, if there is reasonable basis for belief that establishment of strictly residential district has substantial relation to public health, safety, morals, or general welfare, zoning measure will be within police power.

Cal.—Wilkins v. City of San Bernardino, 175 P.2d 542, 29 C.2d 332.

In absence of proof that property could not be used for residential purposes, court could not declare zoning ordinance unconstitutional and void in so far as it restricts property to a residential use.

N.Y.—Scuteri v. Incorporated Village of Bayville, 120 N.Y.S.2d 794.

Primary purpose of a residence district created by a zoning ordinance is the fostering of safe, healthful, and comfortable family life, rather than the development of commercial instincts and the pursuit of pecuniary profits.

Rezoning invalid as not based on uniform plan

Where under original ordinance, block was set aside as a business center permitting the erection of stores and offices, and under amending ordinance block was rezoned to a second residential zone, and property on which plaintiff sought a permit in the block, to erect a commercial building, was acquired previous to the passage of the amending ordinance, such ordinance was invalid as not based on a uniform or comprehensive scheme, although property surrounding the block was used for residential purposes.

Ordinance confiscatory as applied Where most of the value of plain-

ferred on the municipality.⁸⁹ The power to restrict certain districts to residential uses does not permit the restriction of such districts to a particular class of residents.⁹⁰ An ordinance creating a single residential zone or district in a city without taking account of other areas equally residential in character and without any comprehensive plan with a view to the general welfare of the inhabitants of the city as a whole may be invalid.⁹¹

The length of time during which a business has existed in a particular locality does not make its prohibition for the future unconstitutional;⁹² nor is the size of the territory affected by the ordinance a criterion by which to judge its validity;⁹³ nor does the fact that the occupation or business may never have been obnoxious or injurious in the past affect the validity of the regulation.⁹⁴ The fact that a person purchased property at the time free of restrictions with the intent to use it for business purposes does not invalidate a zoning ordinance subsequently adopted restricting the use of the property for residential purposes.⁹⁵

Zoning entire city as residential or preserving residential character of city. It has been held that

the residents of a city which is primarily a residential city by charter have a legal right, within constitutional limits, to keep the city a residential city by means of zoning regulations,⁹⁶ and that an ordinance placing an entire municipality in a residential district is not invalid as a matter of law.⁹⁷ So, an ordinance designed to preserve the residential character of a community and to limit business activities to the supply of demands within the community has been held upheld.⁹⁸ However, an ordinance zoning an entire municipality as residential is invalid when made without regard to differences existing in the area of the municipality and for an improper purpose.⁹⁹

Future development. A municipality in enacting a zoning regulation establishing a residence district may properly take into account the probable future development of the entire region.¹ So, the municipality in the interest of future growth may classify as a residence district land which is vacant² or sparsely settled.³ A more or less remote possibility that some time in the future, whether immediate or distant, there might be an opportunity to make residential use of property, is not sufficient, however,

tiff's property in lots was for business purposes and lots were restricted to that use both by restrictive covenants and the zoning ordinance then in effect, and subsequent zoning ordinances limiting use to one-family dwellings destroyed most of the value of plaintiff's property in the lots, the zoning ordinances as applied were confiscatory.

mit others within the district,¹⁹ although some regulations prohibiting the establishment or maintenance of retail business stores within residential districts have been held invalid,²⁰ as not being a proper exercise of the municipal police power.²¹

So, a municipality may create by regulation a limited residential district wherein quasi-commercial and multiple occupancy structures may be erected,²² and property may be zoned for residential income use as distinguished from private residential, business, and manufacturing uses.²³ Accordingly, a

city may permit in one class of residential district as distinguished from another customary home occupations engaged in by the occupants of the dwellings, including the office of a professional person when situated in the same dwelling used by such professional person as his private dwelling.²⁴

The permission to use property in a so-called residential district for some nonresidential uses but not others may be invalid where the classification is purely capricious and without relation to the public welfare.²⁵ It has been held that an ordinance which

Garage without stores in multiple family district

City ordinance permitting construction of a multiple level parking

garage in multiple family district, in which stores are prohibited, but excluding use of any part of garage building for stores, is a valid and constitutional exercise of police power of city, in absence of showing that such ordinance deprives landowner of the beneficial use of its property.

23. Cal.—Kort v. City of Los Angeles, 127 P.2d 66, 52 C.A.2d 804.

Discrimination

Under a general zoning ordinance which permitted the businesses of operating hotels and private clubs and rooming and boarding houses with signs advertising such places, but which prohibited plaintiff from maintaining a sign advertising plaintiff's business as a public accountant in front of plaintiff's dwelling house and from carrying on such business at that place, was not unreasonable and did not invalidate ordinance, where district in which house was located was zoned for residential income uses.

Excluding hotels but not rooming houses

Where borough contemplated exclusion of hotels, motels, and similar businesses from residential zones within borough without curbing right of dwelling house owners or occupants to use their premises for boarding or rooming house purposes, such classification would fall if it was without reasonable basis; but zoning ordinance, which permitted boarding and rooming houses in which not more than six persons not related to owner or occupant were lodged and boarded for compensation, but which prohibited hotels, motor courts, motor lodges, motor hotels, tourist camps, tourist courts, and structures of similar character intended for similar use, was not invalid.

N.J.—Pierro v. Baxendale, 118 A.2d 401, 20 N.J. 17.

Discrimination not shown

(1) The practice of profession of a physician in a block, in absence of a further showing, does not disturb residential character of block, so that presence of physician's office in block could not be relied on by property owner who had been denied permission to put his property to a business use, as an indication of discrimination.

(2) Provision in city zoning ordinance authorizing accessory uses and buildings and commercial activities in residential area, if carried on by members of owner's immediate family, and if not more than two employed persons are permitted, is not an unlawful discrimination.

N.C.—Kinney v. Sutton, 53 S.E.2d 306, 230 N.C. 404.

(3) Zoning ordinance confining use of premises in a restricted residential area, for a fraternity or sorority, to an area not more than six hundred feet from the lands occupied by the institution to which the fraternity or sorority is an incident, did not constitute a discrimination against rightful use of premises by a fraternity or resident located in restricted area

declares that no business can be conducted in the residential district of the municipality without any classification of businesses because of their nature or the necessary incidents of such business is invalid.²⁶

Uses by municipality. Despite the fact that they are located in a residence use district, a municipality or other political subdivision may store and maintain the vehicles necessarily used in performing governmental functions,²⁷ and may provide quarters for workers engaged in the performance of such functions.²⁸

Humanitarian noncommercial uses generally. Generally, the exclusion, either absolutely or subject to arbitrary conditions, of humanitarian noncommercial uses,²⁹ such as philanthropic homes for old people³⁰ or orphans,³¹ or schools,³² from residential districts is invalid as violating due process in the absence of an adequate showing that such exclusion is in furtherance of public health, safety, morals, or welfare. It may be invalid to permit public schools in a residential area but exclude private or parochial schools,³³ or to permit a church

school but prohibit a nonsectarian private boarding school,³⁴ or to admit schools but to exclude dormitories therefor.³⁵ On the other hand, a zoning ordinance which has the effect of permitting public and parochial schools to be maintained in a residential area, but which excludes schools of higher learning and specialty schools, has been held to be based on a reasonable classification and not in violation of the constitutional requirements of due process.³⁶ It has been held that a valid discrimination may be made between dormitories of a school for mentally deficient children which are excluded from a certain district and dormitories of other schools which are permitted.³⁷

Hospitals. A municipality may within reasonable limits regulate the location of hospitals within residential districts,³⁸ or exclude them from residential districts.³⁹ It has been held, however, that the exclusion from a residential district of a private hospital maintained in a private residence, which to all outward appearances is a residence, and in no sense a nuisance or offensive or annoying to anyone, can-

and ordinance was not an abuse of city's discretion.

Undertaking establishment

A zoning ordinance under which property in class B residential district therein defined might be used for a medical college containing a morgue, or for a hospital, farm, private club, hotel, or rooming house, was an invalid exercise of the police power as applied to lots in class B area on which owners were thereby prohibited from operating an undertaking establishment, because purely capricious and without relation to public welfare.

to the public health, comfort, morals, safety, and general welfare is not rendered invalid by the fact that a commercial or nonresidential use of some of the property within the district would not create a health, safety, or morals hazard.⁴⁷

The existence of nonconforming business or commercial uses, limited in number, or confined to a relatively small portion of an area reasonably and naturally comprising a residential area does not disable the municipality from classifying the whole as a residential area.⁴⁸ So, the fact that property in a residential district is located in close proximity or adjacent to property devoted to business or in-

dustrial uses will not of itself render the zoning line invalid,⁴⁹ or make the residential restriction discriminatory.⁵⁰ Thus a zoning ordinance is not rendered invalid, as applied to such territory, by the mere fact that residential territory under the ordinance is adjacent to railroad tracks⁵¹ or to a street on which there is heavy vehicular traffic.⁵²

A classification of certain property as residential is not invalid solely because such property is adaptable and suitable for business or industrial purposes and would be of greater value if used for such purposes,⁵³ or because such property has depreciated in value due to its designation as residential instead of

Circumstances considered in determining validity in general. In accordance with the general rules stated supra §§ 24-47, in determining the validity of a residential zoning restriction, the facts and circumstances to be considered include the character of the neighborhood,⁵⁶ the zoning classification and use of nearby property,⁵⁷ the extent to which property values are diminished by the restriction,⁵⁸ and the

Boundary dividing street. The zoning of one side of a street for business and the other side for residential uses may in certain circumstances be improper⁶³ as discriminatory;⁶⁴ and it has been held that the lines of zoning districts should be fixed in such a way as to avoid making one side of a main artery of travel purely residential where the opposite side of the street is already so uniformly used for business purposes as to have established its character in that regard.⁶⁵ A zoning regulation is not invalid, however, merely because it zones one side of a street for residential use and the other side for

business use;⁶⁶ and such division will be upheld where the matter is fairly debatable.⁶⁷

Ordinance unlawfully discriminating

(1) An amendatory zoning ordinance, creating modified commercial zone comprising only a certain manufacturing company's foundry property in residence zone created by original zoning ordinance, adopted after commencement of foundry's operation, was invalid as limited to purpose of enabling such company to continue indefinitely operation of foundry, as enlarged since adoption of first ordinance, as legally conforming use, thereby granting special exception or variance from restrictive residential regulation, and as not part of comprehensive plan, circumventing functions of borough board of adjustment, and unlawfully discriminating in favor of such company and against owners of property in neighborhood of foundry.

meeting statutory requirements, such as a requirement that it be in accordance with a comprehensive plan.⁷¹

In the exercise of the zoning power, particular businesses and industries may validly be classified for segregation in different districts,⁷² provided that the classification is reasonable and not discriminatory and bears a reasonable relation to the public health, safety, morals, and general welfare.⁷³ Gen-

Business "island"

(1) City may determine whether a business "island" permitted by a zoning ordinance in a residential district should be enlarged, and the mere fact that the owner may enjoy greater benefits or that his property will be enhanced in value if the size of the "island" is increased cannot entitle him to compel allowance of such increase in size.

(3) Where single corner lot which by zoning ordinance was transferred from residential classification to a restricted business district was situated in one of ten blocks in an area divided by a heavily traveled street, and having therein numerous business uses, the ordinance was not invalid as creating a "commercial island," and thereby amounting to spot zoning.

Restriction to heavy industrial uses

Where preventing construction of residences in industrial area appeared to have a relation to public health and safety, and there was no showing that land in question was not usable for industrial purposes within a reasonable time, county zoning ordinance restricting use of land to heavy industrial purposes, to exclusion of residential use, was not unconstitutional in its application to property in question.

Ordinance benefiting member of council

Alleged fact that member of city council procured passage of zoning ordinance changing certain area from a residential district to business dis-

building within a residential district may be placed in a business zone,⁸³ a single lot within a residential district may not ordinarily be placed in a business zone.⁸⁴

Limited or insufficient area for development. The mere fact that an ordinance zones only a small portion of the municipality for business does not make it invalid.⁸⁵ A municipality cannot, however, under the guise of regulating and segregating business establish business or commercial districts of a limited area where there is little unoccupied land for future development, and thereby grant a monopoly to existing business establishments in such districts;⁸⁶ but the fact that one of two business districts created by a zoning ordinance contains no vacant lots available for business buildings does not invalidate the ordinance where the other business district is only partly built up and where the ordinance creates

numerous small zones apparently unoccupied.⁸⁷ It is immaterial to the validity of the regulation whether property can be acquired within a business zone at an equitable price.⁸⁸

§ 59. — Gasoline Filling Stations, Public Garages, and Parking Lots

Zoning regulations may validly restrict to certain localities the erection of gasoline filling stations, public garages, and parking lots, where such exercise of power is within the scope of the authority delegated by statute and bears a substantial relation to public health, safety, morals, convenience, or welfare.

As a general rule, zoning regulations may validly restrict to certain localities the construction or maintenance of gasoline filling and automobile service stations,⁸⁹ public garages,⁹⁰ and parking lots,⁹¹ where such exercise of power is within the scope of the authority delegated by statute⁹² and bears a real

trict, so that such member could erect and maintain a filling station in that area, did not render the ordinance void under statute prohibiting a council member from contracting with the municipality for personal gain.

Ordinance not providing for statutory method of appeal

Ordinance prohibiting absolutely gasoline service stations in residential districts and in business districts without permission from municipal council and requiring fire and police departments to certify that such use will not create a fire hazard before issuance of a permit is invalid under

and substantial relation to public health, safety, morals, convenience, or welfare.⁹³ Such regulations, however, must be uniform⁹⁴ and not discriminatory,⁹⁵ and may not interfere with or impair vested rights.⁹⁶ A regulation applied so as to prohibit storage of automobiles, although allowing parking of automobiles, is not unconstitutional, in view of

the substantial difference between the use of land for storage and its use for parking.⁹⁷

It has been held that it is not within the scope of the zoning power to prohibit the use of land for a garage or gasoline filling station anywhere within the territorial limits of the municipality;⁹⁸ but such

zoning statute as not providing for statutory method of appeal to a board of adjustment.

Requiring discontinuance of station

Where gasoline service station was near state capitol, state supreme court building and several other state office buildings, and a public school, ordinance requiring discontinuance of station was justified as exercise of police power, and was not invalid as bearing no relation to safety and general welfare of community affected.

Excluding storage garages but not public garages

Zoning ordinance excluding all storage garages from business zones, open to private and public garages, was invalid as contravening constitutional precept and basic policy of zoning statute because of lack of uniformity and equality.

N.J.—Roselle v. Wright, *supra*.

Permitting garages in part of district

Under zoning statute providing that all regulations shall be uniform for each class or kind of buildings throughout each district, but that regulation in one district may differ from those in other districts, ordinance which authorized use of buildings on certain streets in designated district for a public garage while at same time prohibiting such use elsewhere in same district, is invalid.

(2) An ordinance which provides that it shall not be lawful for anyone to locate, build, construct, or maintain a public garage except subject to certain conditions is not void as discriminatory in favor of persons engaged in a like business at the time the ordinance became effective.

Prior use and improvement

(1) Where oil company purchased property in 1938, in a residential district at a time when service stations were permitted in such district, and constructed service station, and in 1939, area in which property was located was rezoned so as to place it in a business district and provision was made for discontinuance of service stations within district by 1949, and in 1948, area was again rezoned and placed in residential district and the provision requiring discontinuance of service stations in the area by 1949, was made applicable, enforcement of ordinance did not operate to deprive oil company of vested rights, where it appeared that service station was near state capitol, other state buildings, and a public school, and zoning ordinance was, under all circumstances, a legitimate exercise of police power.

U.S.—Standard Oil Co. v. City of Tallahassee, C.A.Fla., 183 F.2d 410, certiorari denied 71 S.Ct. 208, 340 U.S. 892, 95 L.Ed. 647.

(2) So, use of a lot for parking purposes contrary to provisions of zoning ordinance has been held unlawful even though such use had been established prior to adoption of ordinance.

N.Y.—Boardwalk & Seashore Corporation v. Murdock, 36 N.E.2d 678, 286 N.Y. 494, reargument denied 27 N.Y.S.2d 431, 261 App.Div. 972.

(3) This is true even though prior use was accompanied by an investment representing expense of grading lot for such purposes.

N.Y.—Bazinsky v. Kesbec, Inc., 19 N.Y.S.2d 716, 259 App.Div. 467, affirmed 36 N.E.2d 694, 286 N.Y. 655, remittitur amended 37 N.E.2d 456, 286 N.Y. 723.

(4) However, a property owner may, in some circumstances, be deemed to have acquired a vested right by completing work of a substantial character in construction of a station or garage, so that a change in zoning regulations may not prevent him from continuing such construction and use.

Failure specifically to permit in other districts

(1) Where zoning ordinance prohibited gasoline service stations in residential districts, court would not declare entire ordinance void merely because it failed specifically to mention and allow service stations in any zoning district since character of operation in a particular case was to be tested by reviewing enforcement of ordinance in each case.

N.J.—Lumund v. Board of Adjustment of Borough of Rutherford, 69 A.2d 361, 6 N.J.Super. 474, affirmed 73 A.2d 545, 4 N.J. 577.

(2) Fact that ordinance does not specifically permit gasoline service stations anywhere in municipality does not render invalid prohibition against stations in residential districts where ordinance permits in other districts "any retail store or stand where goods are sold or serv-

businesses may properly be excluded from a residential district.⁹⁹ So, garages and filling stations may sometimes be validly excluded from certain restricted business districts,¹ or from all districts ex-

cept those reserved for industrial uses.² On the other hand, it may be proper to permit filling and service stations and garages as a commercial use in business districts³ or to permit filling and service

ices rendered," such language being broad enough to embrace service stations.

Prohibition of parking places except as special exception

While ordinance prohibiting public parking places in any district except as a special exception by board of appeals was invalid as to portion granting board of appeals unlimited discretion, the portion prohibiting parking places in any district remained and did not leave municipality without authority to permit proper public parking places where ordinance had been amended to read "no public parking place shall be conducted in any district except as a special exception by the Town Board."

Commercial lot not adequate

Where when oil company purchased additional lot it was zoned for apartment or residential use and immediate neighborhood was devoted to such use and neighborhood since passage of zoning ordinance had not radically changed and all that company had shown was that original lot as now improved and which was zoned for commercial use was not adequate for conduct of a filling station and that if company were permitted to erect a modern station on both lots, assessed value thereof would be increased, application of zoning ordinance to additional lot was not invalid as denying due process but was proper exercise of police power.

U.S.—Sinclair Refining Co. v. City of Chicago, C.A.Ill., 178 F.2d 214.

Restriction invalid as applied

(1) A zoning ordinance which restricted use of plaintiff's lots to residential use and prevented erection of service station was invalid where property was located at intersection of busy highways, two other corners were used for service stations, and property was not suitable for residential purposes.

Mich.—Hering v. City of Royal Oak, 40 N.W.2d 133, 326 Mich. 232.

(2) So, where probability of use of property for residential purposes had been virtually destroyed by prior acquisitions for highway and utility purposes, and property was located at busily traveled intersection, both roads of which formed access highways to state turnpike, and two corners of intersection were used for gasoline filling stations as conforming uses, owners of property had clear legal right to erect gasoline filling station on premises, notwithstanding residential zoning classification.

Ohio.—State ex rel. Rosenthal v. City of Bedford, App., 134 N.E.2d 727.

(3) Where decision of board of zoning appeals denied owner a variance in use of residentially zoned property located on busy state highway so as to permit erection of filling station thereon, ordinance precluded owner's use of property for any purpose to which it was reasonably adapted and was unconstitutional as applied to owner.

stations and garages as a commercial use in commercial,⁴ industrial,⁵ or multiple family residential⁶ districts. An ordinance which prohibits the erection of further filling stations in a single block, where a specified number of such stations are already in operation, is invalid.⁷

In exercising its zoning power, a municipality may reserve the authority to control the location of garages and filling stations in parts of the city from which they are not excluded by the zoning ordinance.⁸ So, the municipality may validly prohibit the construction or maintenance of filling stations and garages within a specified distance of similar buildings and structures,⁹ or certain other buildings and structures such as schools, theatres, churches, or

§ 62. — Land Apart from Structures

A municipality in the exercise of its zoning powers may properly regulate the use of land apart from structures, provided that the regulation bears a substantial relationship to the public health, safety, morals, or general welfare, and may prohibit or restrict excavation operations, or the removal of soil, sand and gravel, stone or rock, and other uses of land.

A municipality in the exercise of its zoning powers may properly regulate the use of land apart from structures³⁴ provided that the regulation bears a substantial relationship to the public health, safety, morals, or general welfare.³⁵ It has been held that a zoning regulation may properly prohibit or restrict the use of land apart from structures for the purpose of excavation operations³⁶ in clay beds,³⁷ or its use for the removal of soil or loam,³⁸ sand and gravel,³⁹

residential area commonly left land almost valueless, that effect of such waste would permanently depress values of other lands in neighborhood, and that town must continue to maintain roads and public services past such blighted areas notwithstanding taxable values were destroyed and development retarded, concerned public welfare in sense of constitutional amendment in effect authorizing reasonable regulation of use of vacant lands for public welfare.

(2) In a fast growing community of millions of people greater care must be taken to protect health and welfare of individual than in areas less densely populated, and, therefore, a restriction on removal of top soil in a densely populated area may be a proper exercise of police power, although it might not be such in other areas.

Regulation of business

It is proper for a municipality, through a zoning ordinance, to regu-

or stone or rock,⁴⁰ or for drilling a water well;⁴¹ and a regulation may forbid the use of land in a certain district for a public or private dump.⁴²

On the other hand, it has been broadly stated that zoning may not be employed to prevent an owner from taking earth products from his land;⁴³ and regulations prohibiting or restricting excavation operations,⁴⁴ or the removal of top soil,⁴⁵ or sand and gravel⁴⁶ have, under particular circumstances, been held invalid. Thus, to the extent that the owner of subsurface minerals can effectively mine

them without any interference of any kind with normal surface uses and living, a zoning ordinance prohibiting subsurface mining has been held unconstitutional as not founded on any public need.⁴⁷

Oil production. The business of operating oil and gas wells may be prohibited,⁴⁸ or regulated and restricted,⁴⁹ within certain districts, if reason appears for so doing. However, regulations exceeding constitutional limitations and not reasonably necessary to promote the general welfare of the community have been held invalid.⁵⁰

Distance from "road"; validity of decision as to particular road

Under an ordinance permitting quarries in a limited industrial zone conditioned on issuance of permit and providing that no part of any of use shall be conducted within four hundred feet from nearest right of way "of any public road or highway now maintained by public authority," where a road was a mere paper way, and not a reality, municipality's decision that such road did not and would not need protection as a public road or highway maintained by public authority was unassailable.

§ 63. — Nonconforming Use

Zoning laws and regulations may validly provide for the continuance of existing buildings and uses not in conformity with the restrictions made applicable to the particular district, and, as a general rule, may not operate to restrict or remove nonconforming buildings and uses.

Zoning laws and regulations providing for the continuance of existing buildings and uses not in conformity with the restrictions made applicable to a particular district have been held not invalid,⁵¹ and alterations, enlargement, or replacement of such

buildings may properly be permitted.⁵² To exempt buildings and lands already devoted to a particular use from a prohibition against such use in a specified area is not an unlawful discrimination invalidating the law or regulation,⁵³ provided that there is a reasonable basis therefor.⁵⁴

Indeed, as a general rule, zoning laws and regulations may not operate to restrict or remove existing buildings and uses not in conformity with the restrictions applicable to the district,⁵⁵ at least

Amelioration of hardship

A city, given right by constitution to zone property in interest of public health, safety, convenience, comfort, and general welfare, may attach conditions ameliorating hardship arising on exercise of its rights and provide that property previously occupied for purposes conflicting with general view of community's welfare when zoning ordinance is passed may continue to be occupied for nonconforming use.

U.S.—Dennis v. Village of Tonka Bay, D.C.Minn., 64 F.Supp. 214, affirmed, C.C.A., 156 F.2d 672.

When right vests

(1) Right to utilize one's property to conduct a lawful business becomes entitled to constitutional protection against otherwise valid legislative restrictions as to locality by city's zoning ordinance, or becomes "vested" within full meaning of that term, when, prior to enactment of such restrictions, owner has in good faith substantially entered on performance of a series of acts necessary to accomplishment of end intended, and so where owner of residence had begun to convert his residence into a florist shop prior to enactment of zoning ordinance, he acquired a vested right.

Ky.—Darlington v. Board of Councilmen of City of Frankfort, 140 S.W. 2d 392, 282 Ky. 778.

(2) However, where at time of enactment of zoning ordinance proposed service station on land had not been constructed and one lease entered into with an oil company before enactment of ordinance was impossible of performance and a second lease entered into was after passage and effective date of ordinance, leases created no vested rights in landowners and ordinance as it applied did not violate due process of law.

Ind.—Lutz v. New Albany City Plan Commission, 101 N.E.2d 187, 230 Ind. 74.

existing use is not a nuisance or harmful to public health, safety, morals, or welfare.⁶¹

Necessary addition to, or a natural expansion of, a preëxisting use may also fall within the protection of the constitutional safeguards;⁶² and the fact that the law or regulation permits the continuance of the use of a building and merely bars the use of the land surrounding the building will not obviate the constitutional infirmity where the use of the surrounding land is essential to the conduct of the owner's business.⁶³

Under some circumstances, however, a zoning law or regulation may require the discontinuance of an existing nonconforming use.⁶⁴ Thus, enforcement of a zoning regulation against a prior nonconforming use or structure may be sustained where the

resulting loss to the owner is relatively slight and insubstantial.⁶⁵ This may be regarded as a corollary of the rule that an existing nonconforming use will be permitted to continue, if, and only if, enforcement of the ordinance would, by rendering valueless substantial improvements or businesses built up over the years, cause serious financial harm to the property owner.⁶⁶ This rule, with its emphasis on pecuniary and economic loss, is inapplicable to a purely incidental use of property for recreational or amusement purposes only.⁶⁷

Regulations providing for eventual liquidation or stoppage of expansion. Zoning laws and regulations have been held invalid and unconstitutional even though they do not call for the immediate liquidation of nonconforming uses but provide for their liquidation within a specified period of time.⁶⁸

Change of ownership

Provision of ordinance deeming any change of ownership of existing business in which pool, billiard, card, or dice game is played, or in which draft beer or liquor by the drink is sold, or in which any coin operated amusement device is maintained and operated, to be a new or additional business under other provisions prohibiting opening or operating within specified areas new businesses within ordinance, is unconstitutional as depriving owners of existing businesses of type involved in prohibited areas of property, without due process of law.

Extension after condemnation to property not condemned

Where state condemned property on which landowners maintained repair shop, provision of zoning ordinance prohibiting extension of nonconforming use on a greater area of land than that occupied at time of adoption of ordinance, in so far as its interpretation would deny landowners right to continue operation of their business on remainder of property not condemned was invalid as depriving landowners of property without due process of law, and could not be validated on ground that landowners might retain their business and good will by moving operations to a location where such activity was permitted, where landowners operated essentially a neighborhood business, value of which depended on its immediate location in neighborhood where customers resided.

Provision for termination after reasonable period

Zoning ordinance, which was passed while defendant was lawfully engaged in junk business and which provided that existing undesirable businesses could be ordered terminated after reasonable period, and ordinance which directed defendant to close junk business within one year, deprived defendant of his right to continued lawful use of property and of his right to due process of law.

However, it has been recognized that zoning laws and regulations may validly effect the eventual liquidation of nonconforming uses, provided the method of operation is not unreasonable or arbitrary.⁶⁹ To this end, provisions which prohibit or limit the extension or enlargement of such uses have been sustained as a valid exercise of the police power,⁷⁰ and so have provisions which prohibit or regulate a

change from one nonconforming use to another,⁷¹ forbid resumption of a use when terminated,⁷² or provide a reasonable time within which the use must cease.⁷³

When the nonconforming use relates to the existence of a type of structure, provisions which look to the elimination thereof through obsolescence or destruction have been approved.⁷⁴ So, it has been

Action violative of protective statute

Where statute provides that nonconforming use existing at time of passage of ordinance may be continued and serves to protect nonconforming uses under some circumstances, even though there has been a break in user for more than a year, municipality's attempt to foreclose all nonconforming uses, under all circumstances, because of such break was violative of such statute.

After discontinuance

A zoning ordinance providing that a nonconforming use which has been discontinued for more than a certain period of time shall not be resumed or replaced by another nonconforming use is valid and constitutional. Period commensurate with investment

Valid zoning legislation may provide for eventual liquidation of nonconforming uses within a prescribed period commensurate with investment involved.

Cal.—City of La Mesa v. Tweed & Gambrell Planing Mill, supra.

Liquidation within one year not invalid as applied

(1) A zoning ordinance establish-

ing a residential district and providing that all businesses then in operation within district should be liquidated within a year of passage of ordinance was not invalid as applied to a grocery business, no substantial reason having been shown why business could not be liquidated and closed out within a year.

La.—State ex rel. Dema Realty Co. v. McDonald, 121 So. 613, 168 La. 172, certiorari denied McDonald v. State of Louisiana ex rel. Dema Realty Co., 50 S.Ct. 16, 280 U.S. 556, 74 L.Ed. 612.

(2) Zoning ordinance requiring discontinuance of nonconforming uses of land within five-year period and discontinuance of nonconforming commercial and industrial uses of residential buildings in residential zones within same five-year period, was a constitutional exercise of police power in so far as it required discontinuance of wholesale and retail plumbing business, which had been established prior to enactment of ordinance, in residential district.

Cal.—City of Los Angeles v. Gage, 274 P.2d 34, 127 C.A.2d 442.

Ordinance invalid as conflicting with statute

Provision of zoning ordinance which required removal of nonconforming signs within two years of effective date of ordinance was invalid for conflicting with statute providing that any nonconforming use of structure existing at time of passage of an ordinance might be continued on lot or buildings so occupied.

Structural alterations prolonging life

(1) A zoning ordinance may properly limit use of an existing building to building as it was at time ordinance became effective and provide that any change therein which calls for a structural alteration thereof must be done in accordance with prescribed regulations.

held that regulations may validly provide that if nonconforming uses are discontinued or changed to a higher classification or to a conforming use they may not thereafter be changed to a use of lower classification.⁷⁵ However, an ordinance providing for continuance of nonconforming uses has been held invalid in so far as it prohibits a change to a higher grade nonconforming use in the same building.⁷⁶

§ 64. Density of Population

Zoning regulations which have their justification in the prevention of overcrowding of land and the avoidance of undue concentration of population bear a substantial relation to the public health, safety, morals, or general welfare.

Generally speaking, zoning regulations which have their justification in the prevention of overcrowding of land and the avoidance of undue concentration of population bear a substantial relation to the public health, safety, morals or general welfare.⁷⁷ Where statutory authority therefor exists, an ordinance regulating the density of population in a given

area is not invalid merely because an owner of property is deprived of a more beneficial use of his property than he would have without the restriction.⁷⁸ However, an ordinance regulating the density of population in a given area is void in the absence of statutory authority therefor,⁷⁹ and a zoning ordinance prohibiting dwellings accommodating more than fourteen families on any acre of land has been held invalid and discriminatory if applicable to flats.⁸⁰

§ 65. Permits and Certificates

Provisions governing the grant or denial of permits and certificates will generally be upheld if they are reasonable and within the general limitations on the exercise of municipal powers; and, generally, regulations must lay down a sufficiently definite norm or standard to guide and control the body or official authorized to grant or deny permits in the exercise of its or his power and discretion.

Pa.—A. J. Aberman, Inc. v. City of New Kensington, 105 A.2d 586, 377 Pa. 520.

Due process

(1) Provision of city zoning ordinance authorizing granting of conditional use permits to permit certain uses, of public concern in zones from which such uses would otherwise be excluded, when it be found that such uses were deemed essential or desirable to public convenience or welfare, was not unconstitutional, as a denial of due process.

Cal.—Wheeler v. Gregg, 203 P.2d 37, 90 C.A.2d 348.

(2) A permit is a reasonable requirement for a change from one nonconforming use to another nonconforming use regardless of whether applicant considers it to be within same class, and such requirement does not constitute an unconstitutional deprivation of owners' property and rights without due process of law. So, where there was considerable basis for dispute as to whether lawful nonconforming use was for a commercial and riding stable or for a public stable, and it was necessary to decide whether proposed change to a dance hall was to same or lower nonconforming use, and whether nonconforming use was proposed to

their adoption conforms to the rules governing the methods of adoption of ordinances, resolutions, and bylaws generally.⁸²

The grant or refusal of such permits must not be left to arbitrary discretion,⁸³ whether that discre-

tion is that of the council or governing body⁸⁴ or of some municipal board or official,⁸⁵ to permit an agency, in its uncontrolled discretion, to forbid a use of property in one block because it would create hazards from fire or disease, while permitting an

be expanded, application of zoning law to require permit for such change was reasonable and did not unconstitutionally deprive owners of their property and rights without due process of law.

Mo.—Women's Christian Ass'n of Kansas City v. Brown, 190 S.W.2d 900, 354 Mo. 700.

Provision for notice and hearing

Where an ordinance provides for a hearing by municipal council in event that administrative officials act unfavorably on an application for a building permit, it is not legally defective in failing to provide for notice and hearing by administrative officials.

Prohibition of issuance of permit

(1) Where garage owner had been denied a permit for a curb cut and driveway across sidewalk on a street, subsequently enacted ordinance providing that no permit shall be issued for construction of any curb cut or driveway leading onto certain portions of streets, including street on which garage was located, was valid as against garage owner and not retroactive.

General standards capable of reasonable application

Standards of zoning ordinance which, although stated in general terms, were capable of reasonable application and were sufficient to limit and define board of zoning appeals' discretionary powers, prevented zoning ordinance from being unconstitutional as applied to property on ground that no standards had been enacted to govern determination of board with respect to granting of permit for erection of gasoline filling station.

ably use the power so granted only for the public good.⁹⁰ Standards are provided, however, where, although stated in general terms, they are capable of a reasonable application and are sufficient to limit and define the board's discretion.⁹¹

It has been held that an ordinance is not invalidated by its failure to contain rules and regulations for the granting of permits, where the incorporation of such rules and regulations is permitted, but not required, by the statute authorizing the ordinance;⁹² and also that, if the governing body enacting the regulation has legislative power to prohibit the erection of a particular structure, or otherwise to regulate the use of property, it may retain the power to pass on each application for a permit under a particular regulation without setting forth the standards which will govern its decision.⁹³ So, exceptions to the general rule requiring the ordinance to prescribe definite standards exist where necessity requires the vesting of discretion in the officer charged with the enforcement of an ordinance,⁹⁴ as where it is impracticable or impossible to fix a definite rule or standard.⁹⁵

An ordinance requiring a person using property for a particular purpose to obtain a certificate of occupancy depends for its validity on the right of the municipality to prohibit such use;⁹⁶ hence, where

such prohibition in its application to particular property bears no substantial relationship to the public health, safety, or general welfare, the provision requiring a certificate of occupancy therefor is invalid.⁹⁷ It is within the power of a municipality to authorize the refusal of a permit for any house or structure deemed to be unsafe, obnoxious or detrimental to public welfare;⁹⁸ but it has been held that where a municipality determines that a district is suitable for general industrial use, it may not reserve the power to decide on individual application which industrial uses will be admitted.⁹⁹

Consent of adjacent property owners. In accordance with the rules stated supra § 43, provisions requiring as a condition to the granting of a permit that the consent of a stated percentage of adjacent property owners be obtained are generally held valid,¹ unless the area in which the property owners' consents must be obtained is unreasonably large.² It is, however, only as to buildings, the location of which a municipal corporation has power to direct, that it may require the consent of property owners as a condition of granting building permits.³ Moreover, provisions requiring the consent of property owners have been held void where they imposed restrictions or conditions on the granting of a permit

other than those contained in the law,⁴ or where the ordinance could not be construed as containing a prohibition.⁵ A provision requiring public hearings on an application for permission to conduct certain enterprises does not render an ordinance invalid as requiring a plebiscite of the neighborhood where there is nothing in the ordinance which makes the opinions expressed at such hearing binding on the board.⁶

Unauthorized delegation or reservation of power. An unauthorized delegation to, or reservation by, a particular body or official of power with respect to the granting or refusal of permits is invalid.⁷

Imposition of permit fee. Where the statute authorizing the adoption of the zoning ordinance does not specifically or impliedly provide for the imposition of an annual permit fee for license for the operation of a business or occupation, an ordinance provision is invalid which requires the operators of a specified business to pay annual permit fees.⁸

Provision as to appeal. An ordinance purporting to give to aggrieved adjoining landowners a remedy of appeal from the granting of a permit is

invalid where the town was not authorized by the statute to provide for such appeal.⁹ On the other hand, an ordinance expressly authorizing rehearings by the board of appeals has been held valid as wholly consistent with the broad discretion conferred by charter on the board in passing on a case on appeal.¹⁰

§ 66. Variances or Exceptions

Provisions vesting administrative bodies with power to grant a variance or exception are generally valid if they are reasonable and conform to the general limitations on the exercise of power by municipal corporations, but they must contain sufficiently definite standards to guide and control the action of the board.

Provisions vesting administrative bodies with power, within prescribed limits, to grant or deny particular property owners a right, generally termed a variance or exception, to use property in nonconformity with the regulations, where unnecessary hardships or practical difficulties would otherwise result, ordinarily will be held valid if they are reasonable and conform to the general limitation on the exercise of power by municipal corporations;¹¹ and it has even been held that a provision

(2) A provision in zoning ordinance, that planning commission finding that detriment or injury to neighborhood would not result from issuance of permit, could approve and transmit permit, together with complete report of commission's findings and recommendations to city council for approval and indorsement, was not a delegation of power or authority of city council to planning commission.

Power held not improperly reserved

Zoning ordinance, which uniformly provided that special uses may be made of land in a business district subject to consent of a town board,

was not objectionable on ground that power to create variance in zoning law is expressly given by legislature to zoning board of appeals and not to town board, since provision requiring approval of town board did not involve "variance."

for variances is frequently essential to the validity and constitutionality of the regulations themselves;¹² although there is some authority to the effect that the fact that the regulations contain no provisions for exceptions and variances other than for nonconforming uses is not fatal to their validity.¹³ As shown supra § 42, the power to authorize a variance from the terms of a zoning ordinance may be granted to an administrative board without violating the principle against the delegation of

legislative powers.

In order to be valid, provisions for the granting of variances or special exceptions must affect alike all persons in the same situations,¹⁴ must prescribe an adequate method of giving the parties affected due notice of the hearing before the board,¹⁵ and must contain sufficiently definite standards to guide and control the action of the board;¹⁶ and where such requirements are not satisfied the provision may be invalid.¹⁷ On the other hand, such provisions are

Provision for notice and hearing

Where zoning ordinance provided for hearing on application for variance by planning commission on notice and that planning commission should make recommendation as to action on application to city council, and due notice and full hearing was

accorded by commission, failure of ordinance to provide for second notice did not make action of council in refusing permit a taking of applicant's property without due process of law, but even though notice of proceedings before council was essential to due process, a provision in ordinance requiring council to pass on recommendations of commission at its next regular meeting after filing of recommendations was sufficient notice of hearing. Zoning ordinance, which provided for variances based on practical difficulty or unnecessary hardship, was ineffectual to empower zoning board of appeals to grant special exception use.

Church or school

A zoning ordinance prohibiting sale of intoxicating liquors within one thousand five hundred feet of any church or school is a valid exercise of police power.

Miss.—*Fanning v. Town of Hickory*, 30 So.2d 65, 201 Miss. 620.

Liquor outlet

(1) Zoning ordinance could properly impose one thousand five hundred foot limitation with respect to liquor outlets so as to prevent use of build-

places used for the sale of liquor within a zone.²⁴ On the other hand, zoning regulations as to various other particular matters have been held invalid.²⁵

The general rule, as discussed supra 17, that zon-

ing regulations must conform to the statutes under the authority of which they are enacted has been applied to regulations as to various particular matters.²⁶

B. REASONABLENESS

§ 68. In General

The zoning power must be exercised reasonably, not arbitrarily, and a zoning ordinance or regulation must be reasonable; on its reasonableness depend its validity and the validity of its application.

Zoning authorities may not, under the guise of police power, impose restrictions by way of zoning regulations if the restrictions are unreasonable and unnecessary.²⁷ The zoning power must be exercised reasonably,²⁸ and it is a well-settled principle of law

ing under unlimited liquor permit within one thousand five hundred feet of another building containing outlet operating under same kind of permit.

Conn.—Rudis v. Zoning Commission of the Town of Fairfield, 65 A.2d 579, 135 Conn. 410.

(2) Zoning ordinance forbidding use of building for sale of alcoholic liquor under full permit if located within one thousand five hundred feet of any other building used for sale of liquor under such permit, and prohibiting increase of limited liquor use already permitted on premises within one thousand five hundred feet of other unlimited uses, was a proper classification to regulate health and welfare of community.

Conn.—Miller v. Zoning Commission of City of Bridgeport, 65 A.2d 577, 135 Conn. 405.

(3) Adopters of zoning ordinance requiring all premises selling alcoholic liquors to be at least one thousand feet apart in business zone, with single exception of grocery stores selling beer under package store permit could reasonably distinguish between such grocery stores, and drug stores selling all kinds of liquor.

Conn.—State ex rel. Wise v. Turkington, 63 A.2d 596, 135 Conn. 276.

An ordinance permitting sale of beer and wine in a designated zone and prohibiting sale of hard liquors in same zone was not invalid as unlawfully discriminatory.

Fla.—State ex rel. Rimer v. City of Miami Beach, 27 So.2d 524, 158 Fla. 83.

Commercial area

Fact that sale of intoxicants is accompanied by objectionable features not common to other types of commercial enterprises, constitutes valid grounds for a separate classification or prohibition thereof in a given commercial area, for protection of health, morals, safety, peace, and convenience of public.

Tex.—Loudner v. Texas Liquor Control Bd., Civ.App., 214 S.W.2d 336, refused no reversible error.

Limitation to sale from package stores

Statute granting cities power to establish zoning ordinances restricting locations wherein retail liquor licensees may conduct their places of business authorizes cities to limit sales of liquor in particular zones to sales from package stores.

Fla.—Gross v. City of Miami, 62 So. 2d 418.

24. Conn.—Miller v. Zoning Commission of City of Bridgeport, 65 A.2d 577, 135 Conn. 405.

25. High-tension line

Zoning ordinance in so far as absolutely prohibiting electric power company from constructing and maintaining through village, a publicly needed high-tension electric line was invalid.

N.Y.—Consolidated Edison Co. of N. Y. v. Village of Briarcliff Manor, 144 N.Y.S.2d 379, 208 Misc. 295.

Prohibiting pipe line

Enforcement by municipal corporation of its zoning ordinance to prohibit pipe line company holding certificate of public convenience and necessity under Natural Gas Act from constructing its interstate transmission pipe line through municipality along route chosen by company could not be sustained as exercise of its police power, in absence of showing that pipe line would endanger health, safety, or welfare of residents of the municipality.

U.S.—Transcontinental Gas Pipe Line Corp. v. Borough of Milltown, Middlesex County, D.C.N.J., 93 F.Supp. 287.

26. Regulations as to enforcement

Provisions of zoning ordinance that inspector of buildings shall enforce provisions of ordinance, and, when he finds any violations, he shall at once issue order for removal are consistent with enabling statute providing for enforcement of such an ordinance by proper local authorities of municipality.

Decision reached prior to public hearing
 If public hearing was had by zoning commission merely to comply with statutory requirement that such a public hearing be held, and if commission had previously resolved that, regardless of what might be developed by those in attendance at public hearings, zones were to be established as previously determined, the action of the commission might well be classified as arbitrary.

pend its validity³¹ and the validity of its application.³²

A zoning regulation is legal or valid when it is reasonable,³³ or when it is reasonable in object and

not arbitrary in operation,³⁴ or if it is not arbitrary, and bears a reasonable and substantial relation to the public health, safety, comfort, morals, and general welfare,³⁵ and the means employed are reason-

"Zoning laws and regulations must be reasonable in their application to any particular condition or situation."

Unreasonableness as test of invalidity

One test of invalidity of a zoning ordinance is whether it is arbitrary or unreasonable.

Md.—Cassel v. Mayor and City Council of Baltimore, 73 A.2d 486, 195 Md. 348.

Arbitrary fiat

To hold an ordinance, which prohibits certain uses of property, invalid it must be found that prohibition passes beyond bounds of reason and assumes character of merely arbitrary fiat.

ably necessary for the accomplishment of its purpose.³⁶ An ordinance is not void because its enforcement might sometimes be arbitrary or discriminatory.³⁷

Zoning ordinances or regulations will not be declared unreasonable and arbitrary unless they are found to be plainly and palpably so,³⁸ or unless it is shown that if the ordinance is enforced the consequent restrictions will preclude the use of property for any purpose to which it is reasonably adapted.³⁹ Accordingly, where the reasonableness of a zoning ordinance is fairly debatable, it must be upheld.⁴⁰ A zoning ordinance is arbitrary and unreasonable

where it has no substantial relation to the public health, safety, morals, and general welfare,⁴¹ or where it does not bear a rational relation to the end to be served by zoning;⁴² but a city's action is not rendered arbitrary and unreasonable by the fact that it may have acted with the purpose of assisting the county zoning commission,⁴³ or by the fact that prior to annexation to the city, the property had been zoned differently by a different zoning authority.⁴⁴ Reasonableness is judged by its application to the particular circumstances of the case,⁴⁵ and each case must be determined on its own particular facts in deciding whether the regulation is reasonable.⁴⁶

Although there is some authority holding that reasonableness of an ordinance is to be tested by its general effect, and not by its effect on any particular property owner,⁴⁷ a zoning ordinance may be valid in its general aspects, and yet, as to a particular state of facts involving a particular parcel of real estate affected thereby, be so clearly arbitrary and unreasonable as to be invalid as applied thereto⁴⁸ and result in confiscation;⁴⁹ and a determination that the classification of a particular lot for zoning purposes is arbitrary and unreasonable does not affect the validity of the regulation as to other property the classification of which is not arbitrary,⁵⁰ at least where the provisions of the zoning regulation are by their express terms severable.⁵¹

Provisions invalid as applied to certain property because unreasonable and confiscatory are not made valid with respect thereto by the transfer of title from one owner to another.⁵²

§ 69. Considerations Involved in Determination

In determining whether a zoning regulation is reasonable, all the existing circumstances or contemporaneous conditions may or must be considered.

effect on the value of other property.⁶⁸

Matters not germane to the issue are not to be considered.⁶⁹ The fact that there may be a difference of opinion among expert witnesses does not require a finding that the reasonableness of an ordinance is debatable,⁷⁰ and it is not an appropriate test for determining the reasonableness of a zoning regulation that the regulation had the support of substantial public opinion in the municipality.⁷¹

Although a zoning ordinance which is reasonable today may at some future time by reason of changed conditions prove to be unreasonable, in which case it may then be set aside,⁷² the reasonableness of a zoning regulation must be determined as it applies to conditions presently existing,⁷³ or, it has been held, as of the time when the ordinance was adopted, considering the physical facts then existing.⁷⁴ The court will not foretell what will happen in the future to property subject to zoning regulations,⁷⁵ and the fact that in the future the area may change does not furnish an appropriate test for determining the reasonableness of the regulation.⁷⁶

Comprehensive plan. The requirement that a zoning regulation be in accordance with a comprehensive plan is intended to avoid an arbitrary and unreasonable exercise of the zoning power.⁷⁷ A zoning ordinance which is not formulated on a comprehensive plan is an unreasonable exercise of the police power, and, therefore, unconstitutional.⁷⁸

§ 70. — Boundary Lines

The fact that, when the line is drawn by a zoning regulation, situations immediately beyond it are affected, without more, will not render invalid the drawing of a line which otherwise cannot be said to be arbitrary; but the drawing of lines regardless of whether they cut through properties, or of the uses to which properties are put, is unreasonable.

The fact that when the line is drawn by a zoning regulation, situations immediately beyond it are affected, without more, will not render invalid the drawing of a line which otherwise cannot be said to be arbitrary.⁷⁹ The fixing of zoning lines with a different classification on either side of such boundary lines does not render limitation on use of the property near the boundary line in a more restricted district unreasonable and void.⁸⁰

A zoning ordinance which fixes zoning districts by reference to a map wherein divisional lines were drawn regardless of whether they cut through dwelling houses, industrial establishments, and other properties, or of the uses to which properties are put has been held not reasonable.⁸¹ A zoning ordinance is not arbitrary or unreasonable, however, because some boundary lines bisect a number of lots, as against a property owner whose lot is not so divided.⁸²

Adding isolated lot to distant district. An ordinance is an unreasonable exercise of the power to enact general zoning regulations where it does not create a district but merely undertakes to add an

§ 71. — Propriety of Classification

The classification of property for the imposition of different restrictions must rest on some rational basis.

The classification of property for the imposition of different restrictions must rest on some rational basis.⁸⁴ A zoning regulation creating a classification without a real and substantial relation to the considerations, one or more, to be advanced by zoning is arbitrary and unreasonable;⁸⁵ and a classification permanently restricting the enjoyment of property to such an extent that it cannot be utilized for any reasonable purpose is unreasonable and confiscatory.⁸⁶ The relative density of population in permissive and restricted districts is not a conclusive test of the classification effected by the zoning plan.⁸⁷ The final test must be whether the municipality is seeking to advance the community interest rather than some private or sectional advantage.⁸⁸

Uniformity of classification is necessary to avoid arbitrary action,⁸⁹ but dissimilar treatment does not

inevitably bespeak capriciousness.⁹⁰ Where the situation of a piece of property appears to be the same as that of surrounding property and no facts justifying its special treatment are apparent, placing it in a different classification from that of the surrounding territory will on its face appear arbitrary, capricious, and unreasonable;⁹¹ but, where the piece of property is by its situation distinguishable in character from the surrounding or adjoining property, there is no apparent unreasonableness in its different classification.⁹²

Spot zoning. An ordinance which provides for unreasonable spot zoning is invalid.⁹³

§ 72. — Hardship, Loss, or Benefit

A zoning regulation which renders property almost worthless is unreasonable and confiscatory; and, accordingly, in determining whether a regulation is reasonable, it is proper to consider the hardship and loss imposed on individuals, the extent to which property has been diminished by the regulation, and the gain to the public compared to the hardship imposed.

A zoning regulation which renders property almost worthless is unreasonable and confiscatory, and therefore illegal.⁹⁴ Accordingly, it has been held

Lot area. An ordinance fixing the minimum lot area in residence zones may be reasonable where related to the public health and welfare,¹⁵ and unreasonable where its requirements are not necessary for the health, safety, and well being of the occupants and public generally,¹⁶ or where use of the land in question for residential purposes in compliance with the ordinance was a physical impossibility.¹⁷

Floor area or cubic content. Local authorities may not legislate without reason or capriciously in fixing the amount of livable floor area to be devoted to each dwelling, but their regulations, to be valid, must be consonant with the character and needs of the community directly affected.¹⁸ Accordingly, a zoning regulation may not unreasonably provide for minimum requirements as to floor area¹⁹ or cubic feet of content,²⁰ and an ordinance providing for minimum floor area requirements may be

held unreasonable where a substantial number of the dwellings already erected do not come within the ordinance and a smaller floor area satisfies the requirements of public health, safety, and welfare.²¹ So a provision fixing the minimum floor area in each unit of a multiple dwelling may be unreasonable as applied to a motel in view of the purpose for which motels are constructed and operated.²² On the other hand, a restriction with respect to minimum floor space may be reasonable under the circumstances of the particular case.²³

An ordinance limiting the floor area in a business building to one and one-half times the area of the lot has been held not unreasonable or confiscatory.²⁴

Single-family or multiple dwellings. A zoning regulation may reasonably restrict residential districts to single and two-family houses²⁵ or permit the use of land for multiple dwelling purposes.²⁶ A regulation establishing residential districts restricted to single and two-family houses is not unreasonable or arbitrary merely because of the use of some nearby property for multiple dwelling purposes,²⁷ or because some adjacent property is zoned for commercial use.²⁸ On the other hand, regulations restricting certain areas to single-family dwellings or prohibiting the erection of apartment houses have, under the particular circumstances of the case, been held arbitrary and unreasonable.²⁹

strictions imposed by zoning regulations on the use of property are not reasonable unless fairly necessary for attainment of one or more of the intents set forth in the zoning statute.³⁵ A restriction must be regarded as arbitrary and unreasonable as to a property owner who is unable to use his property for any of the permitted purposes and is therefore deprived of all beneficial use thereof.³⁶

Every municipality need not provide for every use somewhere within its borders;³⁷ and a municipal zoning ordinance placing the entire area of the municipality into a single use district is not necessarily so arbitrary and unreasonable as to be invalid, if otherwise permitted by the state constitution and statutes.³⁸ A provision barring the use of accessory buildings for residence purposes except by the domestic employees of the tenant or owner of the premises is not arbitrary or unreasonable.³⁹

Use dependent on consent of adjacent property owners. A provision of a zoning regulation making the use of property for a particular purpose depend

on the consent of adjacent property owners is arbitrary and unreasonable.⁴⁰

Temporary or occasional use. In determining the reasonableness of a zoning regulation as applied to certain structures and uses of property, the permanency of the structure⁴¹ and its use⁴² must be considered, and a temporary or occasional use of one's property which is not of a permanent character cannot be prohibited.⁴³

Temporary office

A zoning ordinance restricting use of lots to "residence" purposes as applied to trailer placed on corner lot by owner for purpose of using trailer as temporary office to sell lots had no relation to the betterment of health, safety, or welfare of the public and could not be enforced against trailer owner, since restrictions contained in the ordinance were directed at the permanent use to which lots in zone were to be devoted and not to temporary use.

best use of the property is for business purposes does not conclusively show that the zoning ordinance is unreasonable.⁴⁵ Before an ordinance restricting the use of property in certain zones for residential purposes only can be declared unconstitutional, its provisions must be shown to be clearly arbitrary and unreasonable.⁴⁶ Arbitrary and unreasonable classification is not shown by the mere existence of some adjacent property devoted to other uses,⁴⁷ by the fact that three corners of an intersection are zoned for business and one for residence,⁴⁸ by the existence of a nonconforming busi-

ness use,⁴⁹ or by the fact that an interim ordinance had permitted use of the property as a shopping center;⁵⁰ the reasonableness of the regulation must be determined by whether the district in a larger view is better adapted to residential uses than to the business uses to which the adjoining lands are devoted.⁵¹

Notwithstanding the power may exist to segregate residences and businesses in particular districts, the classification of particular property as residential may be arbitrary and unreasonable under the circumstances;⁵² and placing of property in a resi-

dential district of a certain classification rather than in a residential district of a less restricted character in some cases may be unreasonable.⁵³

It may be improper to dedicate to residential use property which is beyond any reasonable doubt located in an actual business district,⁵⁴ or property on the boundary line between a residential and industrial district which is adjacent to a large factory and railroad operations,⁵⁵ or to a traveled highway on which numerous business establishments are located,⁵⁶ but heavy traffic on an adjoining street has been held insufficient to establish the unreasonableness of a residential classification.⁵⁷ Where

business is permitted on the front of a lot and the rear is restricted to residential use, the application of the regulation may be held to be unreasonable.⁵⁸

It has been held that, when a business district has been rightly established, owners of property adjacent thereto cannot be restricted so as to prevent them from using it as ordinary business property,⁵⁹ not hurtful to adjacent residence property,⁶⁰ except as it makes such property less desirable for residence uses.⁶¹ A municipality may not single out one lot within what is essentially a residential district and impose restrictions on this lot that are

Hotel

A zoning ordinance restricting use of property in certain zone to residential purposes was arbitrary and unenforceable as applied to property of an owner who had purchased property after agreement of town officials to remove zoning restrictions and issue a permit to build a hotel, where it appeared that owner was required to pay an ad valorem tax annually on property in sum of one thousand six hundred dollars on an assessed valuation of fifty thousand dollars, that area surrounding locus was business property, and that property was unusable for residential purposes.

Where parcel was surrounded immediately by district which had been used for many years for extensive industrial, commercial, and railroad operations and had been definitely separated by railroad right of way from property classified as "C" residential, application of "A" residential classification to such parcel could not be justified on theory that it might be required by the city in future enlargement of park.

less onerous than those imposed on the remaining portions of what is really the same zoning district.⁶²

Boundary dividing street. There is nothing arbitrary or unreasonable in the mere zoning of one side of a street for business and the other side for residential uses,⁶³ since the zoning of streets along the edges of residential districts for business and commercial purposes is a recognized method of zoning.⁶⁴ The zoning of one side of a street for business and the other side for residential uses should be made with reasonable consideration for the character of the district and its peculiar suitability for particular uses, however, and with a view to conserving the value of property and encouraging the most appropriate use of land throughout the municipality,⁶⁵ and such zoning may in certain circumstances be unreasonable.⁶⁶

Preservation of residential character of village.

It is not clearly arbitrary and unreasonable for a residential village to pass an ordinance preserving its residential character, as long as the business and industrial needs of its inhabitants are supplied by other accessible areas in the community at large,⁶⁷ and an ordinance which places into a residential district the entire area of a sparsely settled residential and agricultural village on the periphery of a large metropolitan center is not, as a matter of law, invalid as per se arbitrary and unreasonable.⁶⁸

Property not suited for residential use. be greatly enhanced in value if devoted to business or industrial purposes.⁷² The fact that vacant lots in a residential area have not enjoyed a brisk sale for use as private residences does not, however, establish that the zoning for residential use is unreasonable or arbitrary.⁷³

b. Classification of Uses Permitted

A zoning ordinance may reasonably permit the use of land in a residential district for nonresidential purposes such as schools, churches, hospitals, philanthropic institutions, and the like, and under some circumstances it may be arbitrary and unreasonable to prohibit such use, although as a general rule business uses may reasonably be excluded.

An ordinance may reasonably permit in a strictly residential zone public schools,⁷⁴ private or parochial schools,⁷⁵ houses of worship,⁷⁶ and Sunday schools,⁷⁷ and may permit the use of the land for agricultural purposes.⁷⁸ An ordinance permitting clubs, associations, or recreation rooms, including

youth centers, in an area theretofore zoned for residences, parks, playgrounds, recreation and field houses, churches, schools, hotels, business and professional offices, and hospitals, is not unreasonable or arbitrary.⁷⁹ A zoning ordinance is not unreasonable because it requires an applicant for the conduct of private school classes in a residential district to satisfy the board of appeals that such use will not be detrimental to the neighborhood or to the residents thereof, or create a hazard to health, safety, morals, or the general welfare.⁸⁰

It may be arbitrary and unreasonable to exclude from a residential district schools,⁸¹ churches,⁸² private hospitals,⁸³ or philanthropic homes.⁸⁴ An ordinance which excludes private schools while permitting public schools has been held unreasonable and arbitrary,⁸⁵ but there is also authority to the contrary.⁸⁶ An ordinance which permits use of property in the zoned area for grade school, high

residence restriction on triangular block, where property was valueless as residence property and all property around it was zoned for commercial use, was held unreasonable and void.

school, boarding school, vocational school, college, or university, but excludes use of the property for nursery school or prekindergarten school, is unreasonable.⁸⁷

On the other hand a zoning ordinance may be reasonable although excluding from some residential areas institutions⁸⁸ and churches;⁸⁹ and the ordinance may reasonably exclude, as constituting business uses, educational buildings,⁹⁰ seminaries,⁹¹ colleges,⁹² universities,⁹³ trade or professional schools,⁹⁴ or schools for the teaching of special arts, crafts, or social activities,⁹⁵ and may also reasonably exclude professional offices,⁹⁶ funeral homes or undertaking establishments,⁹⁷ junk yards,⁹⁸ and boarding houses for institutional patients or pa-roles.⁹⁹

Accessory uses. A provision limiting the use of premises in a residence district to accessory uses customarily incidental to permitted uses and not seriously detrimental to a residential neighborhood is a reasonable limitation or restriction.¹ A provision authorizing accessory uses and buildings and

Motels and trailer camps. An ordinance relating to the construction of motels in a residential district is not arbitrary or unreasonable merely because it permits³ or prohibits⁴ such construction. Although an ordinance restricting the use of property for trailer camps has been held arbitrary and unreasonable where it bears no relationship to present public health, safety, morals, or general welfare,⁵ or as applied to property adjacent to unzoned property within which the city maintains a trailer camp,⁶ under the circumstances of the particular case it has been held that an ordinance is not arbitrary or unreasonable where it prohibits the use for a trailer camp of property which lies within an area zoned for residential purposes,⁷ or where it not only prohibits trailer parks within the entire township, but fails to provide any district where they may be constructed or operated.⁸

§ 76. — Business, Commercial, and Industrial Districts

Foundries

City zoning ordinance which forbade foundries in first manufacturing district, but permitted other plants which had objectionable features as to smell, sight, noise, and smoke, of equal or greater degree than proposed foundry, was unreasonable and unenforceable as to builder of proposed foundry in restricted area.

Tex.—*City of Amarillo v. Stapf, Civ. App.*, 109 S.W.2d 258, error dismissed.

Theaters

(1) It would be clearly unreasonable, as matter of zoning, to prohibit all theaters outside city or town limits.

Iowa.—*Central States Theatre Corp. v. Sar*, 66 N.W.2d 450, 245 Iowa 1254.

(2) Where much of general area was vacant, swampland and unimproved, devoted in large measure to

change in ownership of an existing business to be a new business within another provision prohibiting the opening or operating of a new business within specified areas is an arbitrary and unreasonable exercise of the police power.¹⁸

A zoning regulation permitting business in a small area within a residence zone may fall within the scope of a comprehensive zoning plan and is not unlawful, unless unreasonable or arbitrary,¹⁹ and the fact that a zoning ordinance establishes here and there small commercial districts where stores may be maintained within comparatively short distances from residence districts does not make it irrational or discriminatory.²⁰

Exclusion of higher uses. It is not arbitrary or unreasonable in the abstract, as a matter of law, to

exclude the so-called higher uses, such as residential and commercial uses, from an industrial district,²¹ although under the facts of the particular case it has been held unreasonable to exclude commercial activity from a light industrial district.²²

§ 77. — Public Garages and Gasoline Filling Stations

Zoning regulations restricting to certain localities the construction or maintenance of public garages and gasoline filling stations must be reasonable and not arbitrary, and will be held valid as applied to particular property where the classification of such property for restricted use is reasonable.

Zoning regulations restricting to certain localities the construction or maintenance of public garages and gasoline filling stations must be reasonable and not arbitrary,²³ and will be held valid as applied to

industrial and business uses, and there was ample property in town for residences, ordinance prohibiting use of such land for drive-in theater was unreasonable and arbitrary. Conn.—Lakeside Realty Co. v. Town of Berlin, 129 A.2d 628, 20 Conn. Sup. 188.

(3) Where all territory surrounding tract on which it was desired to construct drive-in theater was, with few exceptions, either vacant, unimproved land or devoted to heavy industrial plants, and there was ample vacant property available for industrial development and residential use, zoning ordinance of village prohibiting construction of such theaters was unreasonable and arbitrary. Ill.—People ex rel. Trust Co. of Chicago v. Village of Skokie, 97 N.E. 2d 310, 408 Ill. 397.

Mich.—Bzovi v. City of Livonia, 87 N.W.2d 110, 350 Mich. 489.

Auction sales

Where conduct of auction sales was no more obnoxious than many other businesses conducted in BA business district, and unrestricted districts were either unsuitable or pre-empted, and enforcement of zoning ordinance would, in effect, suppress and prohibit conduct of auction sales in city, provisions of zoning ordinance prohibiting auction sales except in a certain portion of BB business district and in BC business district were unreasonable, arbitrary and void.

Fla.—City of Miami Beach v. Perell, 52 So.2d 906.

Retail liquor business

In any zoning district in which other retail businesses are allowed, it would probably be unreasonable and arbitrary to exclude the sale of liquor.

Test of reasonableness

(1) Question whether zoning ordinance permitting filling station on certain property was reasonable depended on previous use of property, use of near-by property, growth and

development of property in vicinity, and traffic on adjoining streets.

Kan.—Simmonds v. Meyn, 7 P.2d 506, 134 Kan. 419.

particular property where the classification of such property for restricted use is reasonable,²⁴ but not where it is unreasonable.²⁵

Exclusion of garages and gasoline filling stations from certain restricted business districts may be reasonable,²⁶ but in particular circumstances it has been held that the exclusion of such enterprises from a district zoned for commercial uses is unreasonable.²⁷ A regulation is not arbitrary or unreasonable because it permits the operation of a garage in a commercial zone,²⁸ but an ordinance which allows the establishment and operation of public garages in the business district while prohibiting a storage garage is unreasonable and arbitrary.²⁹

One who has been granted a variation permitting him to operate a new automobile agency in a re-

stricted zone may not complain that a restriction against the storage and sale of second-hand automobiles therein is arbitrary and capricious.³⁰

Use dependent on consent of adjacent property owners. Where the site for a proposed gasoline service station is within an area devoted to business purposes, an ordinance requiring consent of adjacent property owners before the property can be used for a gasoline service station is arbitrary and unreasonable.³¹ An ordinance requiring an applicant for a filling station permit to obtain the consents of a specified percentage of property owners has been held not an unreasonable restriction on the use of the property, however, where the question of variance is still left with the board of appeals.³²

(7) Ordinance which zoned property for residential purposes only and which had the effect of forbidding use of any twenty-foot lots for any purpose unless four lots were accumulated in one ownership, and amendment thereto which permitted construction of buildings for professional offices only on lots having a frontage more than fifty feet, as applied to oil company's seven contiguous twenty-foot lots, even though ordinance and amendment thereto had been adopted after oil company had brought mandamus to compel issuance of permits to build gasoline station in zoned area, where company had waived objections to the legal effect of adopting zoning ordinance and amendment thereto after company had filed petition.

§ 78. — Use of Land Apart from Structures

The validity of zoning regulations in their application to particular lands where, if valid, they would have the effect of preventing the removal of some natural product from the land must be determined with respect to their reasonableness under the circumstances.

The validity of zoning regulations in their application to particular lands where, if valid, they would have the effect of preventing the removal of some natural product from the land must be determined with respect to their reasonableness under the circumstances.³³ Thus under the circumstances of the particular cases, regulations forbidding excavation operations have been held reasonable³⁴ and unreasonable.³⁵

Drilling for oil. The classification of particular property as within or without a zone in which drilling for oil is permitted is not invalid where such classification has some reasonable basis,³⁶ and the fact that operations of an oil company are restricted in a zone where other businesses are permitted is not in itself a sufficient basis for holding that the zoning authorities have acted in an arbitrary or unreasonable manner;³⁷ but an ordinance prohibiting drilling operations within the territorial boundaries of a city without reference to the question of whether the drilling would be injurious or harmful is unreasonable and arbitrary.³⁸

§ 79. — Nonconforming Use

A provision exempting nonconforming structures and uses existing at the enactment of the zoning ordinance is not unreasonable, but an ordinance which prohibits the continuance of existing lawful businesses within a zoned area may be an unreasonable exercise of the police power.

A provision of a zoning ordinance exempting nonconforming structures and uses existing at the enactment of the ordinance is not unreasonable,³⁹ and neither is a provision permitting continuance of a nonconforming use existing on the effective date of the ordinance if a certificate of occupancy is applied for within one year after passage of the ordinance,⁴⁰ although a permitted continuance of a nonconforming use of neighboring property after passage of a zoning ordinance has been held to undermine the restrictions thereof as they apply to the immediate locality.⁴¹

An ordinance which prohibits the continuance of existing lawful businesses within a zoned area may be an unreasonable exercise of the police power,⁴² and any provision which takes away the right to a nonconforming use in an unreasonable manner is invalid.⁴³ An ordinance prohibiting the restoration of a commercial building in a residential area after the building has been destroyed to more than fifty per cent of its value is not an unreasonable exercise of the police power.⁴⁴

The stopping of expansion of a nonconforming use is not an arbitrary or unreasonable exercise of

governmental power,⁴⁵ but an ordinance providing for continuance of nonconforming uses has been held unreasonable in so far as it prohibits a change to a higher grade nonconforming use in the same building.⁴⁶

Requiring discontinuance after specified time. The constitutionality of a zoning ordinance which requires existing uses to stop after a reasonable time depends on its overall reasonableness and on the importance of the public gain in relation to the private loss.⁴⁷ It has been held that a provision requiring that businesses in an area zoned exclusively for residences be liquidated or discontinued within a specified time is not unreasonable;⁴⁸ but an ordinance which grants the city council discretion to discontinue and remove a lawful nonconforming use when in the council's opinion such nonconforming use has been permitted to continue for a reasonable time is unreasonable.⁴⁹ A zoning resolution providing that

the use of the land in a residential district must conform to the resolution after discontinuance of a nonconforming use for one year is not arbitrary or unreasonable.⁵⁰

A regulation of the density of population in a given area embodying a method which is not arbitrary or unreasonable may be valid.

A regulation of the density of population in a given area embodying a method which is not arbitrary or unreasonable may be valid under a statute conferring a broad and unrestricted power on a city to regulate such density in the reasonable exercise of its legislative power.⁵¹ A zoning ordinance prohibiting dwellings accommodating more than fourteen families on any acre of land is unreasonable if applicable to flats.⁵²

alterations of zoning regulations may be made in the exercise of the police power.⁵⁵

Accordingly, the zoning authority, or the governing or legislative body of the particular government-

al entity, notwithstanding it has enacted zoning ordinances, ordinarily is not precluded from changing the regulations in the future where the growth and progress of the municipality require it, or where it is for the general welfare of the municipality.⁵⁶ In-

Flexibility and stability

(1) Zoning does not remain static and thereby afford permanent rules and regulations for all times, but must be flexible.

N.Y.—Hyde v. Incorporated Village of Baxter Estates, 140 N.Y.S.2d 890, affirmed 156 N.Y.S.2d 378, 2 App.Div.2d 889, affirmed 145 N.E.2d 28, 3 N.Y.2d 873, 166 N.Y.S.2d 314.

(2) Zoning, like all restrictions and reforms in a free government, is a matter calling for reasonable stability without absolute rigidity and is not immutable.

Ohio.—Partain v. City of Brooklyn, Com.Pl., 138 N.E.2d 180, affirmed 133 N.E.2d 616, 101 Ohio App. 279.

Successive changes

(1) Zoning ordinance changing character of district held valid, in absence of evidence of illegality, although another ordinance was passed shortly after first ordinance became effective changing district back to its original character.

Wash.—State v. Superior Court of King County, 284 P. 93, 155 Wash. 244.

(2) Where property was returned to the zone in which it lay when purchased after it had been legally placed in a zone where less restricted uses were permitted, mere fact that, before second amendment of zoning ordinance, owner had removed some shrubbery and cut down a few trees and entered into negotiations to lease the property was not sufficient to entitle owner to continue preparation of property for use forbidden by second amendment.

Who may change, modify, or amend zoning regulations or rezone or reclassify property see *infra* § 82.

Amendment in various respects

Mayor and council of city of Atlanta could amend number of districts zoned, shape, boundary, or

deed, the failure or refusal to make such a change in the regulations may, under certain circumstances, constitute an arbitrary, unreasonable, and capricious exercise of power, without reasonable relation to the public health, safety, morals, or welfare.⁵⁷

A municipality has the power in the enactment of a zoning ordinance to continue the valid limitations of a preëxisting ordinance.⁵⁸

Nature of "rezoning." "Rezoning" has been defined or described as contemplating a change in existing zoning rules and regulations within a district, subdivision, or other comparatively large area in a given governmental unit, which theretofore has been uniformly zoned in its entirety.⁵⁹

area of zoned districts, and regulations applicable to any district or districts, but they had no power to spot zone by ordinance, or to remove a small tract for business or commercial purposes from a district zoned for residences.

Ga.—Orr v. Hapeville Realty Investments, 85 S.E.2d 20, 211 Ga. 235.

Character or use of district

A city is empowered to amend a zoning ordinance when character and use of district or surrounding territory have become so changed since original ordinance was enacted that public health, morals, safety, and welfare would be promoted if change were made in boundaries or in regulations prescribed for certain districts.

Mass.—Leahy v. Inspector of Buildings of City of New Bedford, 31 N.E.2d 436, 308 Mass. 128.

Zoning restrictions made inapplicable to municipal structures

Where board of adjustment refused to grant city's petition for an exception to zoning ordinance in order to permit erection of city fire station in residential district, city commission was authorized to amend zoning ordinance to provide that ordinance should not be applicable to municipal buildings and structures deemed necessary by board of commissioners for safety, health, and general welfare of public.

"Confiscation"

When property restricted to a de-

fined use by zoning ordinance changes its character from natural causes to extent that it is no longer adaptable to use for which it is zoned, it becomes duty of zoning authorities to relax their restrictions to prevent "confiscation" just as much as in case where regulation was invalid in first instance.

§ 82. — Who May Exercise Power

The authority to change, modify, or amend zoning regulations may and should be exercised only by the body on which it has been conferred, generally the legislative or governing body of the municipality or other governmental entity.

The authority to change, modify, or amend zoning regulations, as with respect to the boundaries of zoning districts and the regulations to be enforced therein, may and should be exercised only by the body on which it has been conferred;⁶⁰ and which body is so empowered depends on the provisions of the governing statute.⁶¹

In general, the power to modify or amend a zoning ordinance or regulation rests in the body which had the power to adopt it in the first instance,⁶²

County rural zoning commission
under statute is a recommending body which recommends to board of county commissioners plans for carrying out by board of county commissioners powers, purposes, and provisions as set forth in statute, and is not a separate and distinct commission with right to rezone particular areas as separate transactions.

Ohio.—Kreutz v. Lauderbaugh, Com. Pl., 136 N.E.2d 627.

Board's decision null and void

Where board of review had no jurisdiction over subject matter of petition for creation of new lots by subdivision, decision of board purporting to grant petition was null and void.

R.I.—Young v. Board of Review of City of Newport, 110 A.2d 436, 82 R.I. 408.

Power not delegable to boards

(1) City council had no authority to delegate legislative power to board of adjustment by enabling board to change zoning map of city and create business districts beyond those designated and established by city council.

Tex.—Harrington v. Board of Adjustment of City of Alamo Heights, Bexar County, Civ.App., 124 S.W.2d 401, error refused.

(2) Legislature, in enacting enabling act, authorizing a municipal council to amend zoning ordinances or to make substantial changes in lines of established zones, did not intend to authorize council to delegate to zoning boards of review legislative power conferred on it in such act.

R.I.—Adams v. Zoning Bd. of Review of City of Providence, 135 A.2d 357.

Amendment by grant of variance or exception

(1) Board of appeals or adjustment may not amend zoning ordinance under guise of variance.

(2) Zoning board of review, in granting an exception for construction of apartment houses in a one-family zone, improperly sought to effect a substantial change in lines of a zone through granting of such application, and in so doing invaded authority of city council, exceeded its authority, and abused its discretion.

R.I.—Adams v. Zoning Bd. of Review of City of Providence, 135 A.2d 357.

(3) However, action of town zoning board of review in granting an exception to permit construction of a combined funeral home and dwelling in a residential district was not objectionable as constituting an amendment of zoning ordinance.

R.I.—Lawson v. Zoning Bd. of Review of Town of North Providence, 125 A.2d 199.

(4) Where board of appeals acted under zoning ordinance permitting it to approve extension of a use or building into a more restricted district immediately adjacent thereto and granted permission for proposed forty by one hundred-foot addition to existing seventy by one hundred-foot braid factory so situated that after addition one lot and substantial portions of two lots out of four lots owned by factory would be unoccupied, board did not in effect amend zoning ordinance in violation of statute vesting that authority in city council.

sion may be vested with broad discretionary powers in this respect.⁶⁶ Where the power to make zoning changes is vested in a zoning commission exclusively, the commission cannot delegate such power to another body,⁶⁷ such as a town meeting;⁶⁸ and the commission cannot provide that no zoning change adopted by the commission shall become effective until approved by a town meeting.⁶⁹

Under some statutes a proposed change in zoning regulations by the planning commission becomes effective if not overruled by the city's governing body;⁷⁰ but, if the proposed change is objected to by a certain per cent of interested property owners, such change does not become effective unless approved by the city's governing body by unanimous vote.⁷¹ Under such a statute the city's governing body need not act on the proposed change within the period during which protests may be filed.⁷²

§ 83. Statutory Provisions and Limitations

Authority to modify or amend zoning regulations ex-

ists only by virtue of constitutional or statutory provisions. The action taken must be within the scope of the power, if any, so granted, and must conform to the limitations thereon, including limitations on the original zoning power.

The authority to modify or amend zoning ordinances or regulations exists only by virtue of constitutional or statutory provisions.⁷³ Thus, the action taken must be within the scope of the power so granted,⁷⁴ and a change or amendment which is clearly arbitrary and not authorized or contemplated by the zoning statute is invalid and of no effect.⁷⁵

No power to amend or modify. A county, municipality, or other governmental entity cannot amend or change its zoning regulations where it has been granted only the power to create or establish zones, and has not been granted the power, expressly or by implication, to supervise or control its action, or to amend or modify its zoning ordinances.⁷⁶

Town meeting

Sole authority to amend or repeal zoning regulations was vested by statute in zoning commission which any town was authorized to create, and although voters at a town meeting could repeal vote creating such commission and so do away with zoning, they could not repeal or prevent enforcement of regulations adopted by commission without abolishing commission.

68. Conn.—Olson v. Town of Avon, supra.

69. Not simply manner of exercising power

Zoning enabling statute providing that commission should provide for manner in which regulations and boundaries would be established or changed did not validate regulations adopted by commission requiring approval of town meeting as condition precedent to zoning change on any theory that such approval merely provided for manner in which regulation should be changed.

Conn.—Olson v. Town of Avon, supra.

Lack of approval by town meeting immaterial

In view of fact that Avon zoning regulations requiring as condition precedent to approval of zoning change approval of town meeting was in contravention of statutes, action of a town meeting purporting to withhold approval for such change was a nullity.

Final determination

Power to determine finally whether proposed change of zoning resolution shall become effective resides in board of estimate, hence any change in zoning resolution, while it may have its inception in city planning commission as an administrative agency, is, when finally consummated, a legislative function performed by board.

Prior ordinance still in effect

If amendment to city ordinance, permitting construction of colleges and libraries only on issuance of special permit after application, notice, and hearing was invalid, ordinance, as it existed prior to amendment, authorizing construction of libraries, colleges, etc., in residential areas without issuance of any special permit, was still in effect.

Limited powers of certain counties

(1) Statutory authority given to a particular class of counties may differ from that granted various other

Limitations on original zoning power. A change or amendment must be enacted in conformity to the grant of power and the enabling statute to the same extent as an original zoning ordinance.⁷⁷ Thus, the rules as to the limitations on the zoning power apply to an amendatory ordinance or regulation as well as to an original zoning ordinance or regulation;⁷⁸ and amendments may be enacted to accomplish any of the purposes for which such an ordinance could originally be enacted.⁷⁹ Accordingly, the validity of an amendatory zoning ordinance must be determined by the same rules and tests as those applied in ascertaining the validity of original zoning ordinances.⁸⁰

Time limitation. While under some statutes the

authorized body, if the conditions prescribed in the statute are met, may rezone an area at any time,⁸¹ under other statutes, where the municipality takes final action on a proposed regulation, such action, as affecting certain property, may not be reviewed or changed by the municipality within a specified period of time.⁸²

§ 84. Reasonableness and Uniformity

A zoning regulation or classification may be changed or amended only when such action is reasonable and uniform; and a modifying regulation may be invalid where it is arbitrary and unreasonable or discriminatory.

A zoning regulation or classification may be changed or amended when, and only when, such action is reasonable.⁸³ Hence, an amendatory regula-

(2) An amendment of a statute so as to permit "unzoning" of a district or zone previously zoned does not grant authority to amend a previously adopted valid zoning ordinance by rezoning an isolated strip so as to permit it to be used for a purpose prohibited by provisions of prior general zoning ordinance covering area.

Acceptance of dedication

Where dedication of private way and its acceptance by city were for public purpose, action of city in accepting dedication after suit had been brought to enjoin use of private way in violation of city zoning ordinances, was not arbitrary and capricious, and did not constitute an amendment of zoning ordinances without notice and hearing, in view of discretion vested in municipal authorities in such matters.

Land not in substantial use

An otherwise valid amendatory zoning ordinance, reclassifying uses to which land may be put is, as to vacant land, and land not thereto put to a substantial permitted use, subject only to same tests of constitutionality as an original comprehensive zoning ordinance.

Ohio.—Curtiss v. City of Cleveland, 144 N.E.2d 177, 166 Ohio St. 509.

Particular provisions or amendment held not invalid

(1) Fact that village zoning ordinance amendments providing for garden apartment zones called for separate legislative authorization for each project presented no obstacle or drawback to validity of ordinance; nor did fact that village zoning ordinance required that applicant own plot of at least ten acres render amendments void, and choice of ten

acres as minimum plot was well within range of unassailable legislative judgment.

Reclassification held not discriminatory

(1) Where property situated across a street from that of plaintiffs was a vacant triangle of some two and one-half acres bounded by busy streets on which a residential development could not logically be expected and it appeared that location and characteristics of two and one-half-acre segment were such that its reclassification from residential to commercial would expose neighboring residential areas to a minimum of commercial encroachment, and where plaintiffs' property was not similarly situated, differentiation by Zoning Commission of District of Columbia in refusing to change clas-

sification of plaintiffs' property from residential to commercial was not discriminatory so as to render commission's action arbitrary per se. D.C.—Lewis v. District of Columbia, 190 F.2d 25, 89 U.S.App.D.C. 72.

(2) Where amendatory zoning ordinance applied to all land in area of which owner's premises were only a part and classification suited area, owner could not claim ordinance invalid as special legislation directed at particular property.

Pa.—Shender v. Zoning Bd. of Adjustment, 131 A.2d 90, 388 Pa. 265.

Violation of due process clause

If intent and effect of legislation are arbitrarily to discriminate, rather than to promote general welfare, act is an arbitrary and improper exercise of legislative power and offends due process clause.

(1) Where property, originally zoned "Agricultural," was rezoned "Cottage Residential" on application of owner, rezoning of such property, six months later, on owner's application, to "Heavy Commercial," was improper, and null and void, in absence of any evidence of change in character of neighborhood after first rezoning to "Cottage Residential," or evidence of error in such first rezoning.

original zoning is invalid,⁹⁴ or it appears that the original zoning was erroneous, unwise, or unjust.⁹⁵

On the other hand, it has been held in some instances that it is not necessary or controlling that there shall have been a substantial change in the locus to support a change in its zoning classification,⁹⁶ since the municipality may provide for what the future welfare of the city may reasonably be thought to require.⁹⁷

Authorize changes "from time to time." Under a statute governing zoning in certain cities and authorizing amendments or changes "from time to time" to correct or adjust improper classifications, changes or amendments may be made even though there has been no change of conditions in the area since the adoption of the original ordinance.⁹⁸

§ 87. Master or Comprehensive Plan

A zoning ordinance is amendable even though it con-

stitutes a master or comprehensive plan; but the change should conform to, or bear some reasonable relation to, the basic zoning scheme.

While a zoning regulation or classification may be changed when, and only when, such action is in furtherance of the design of the zoning statute,⁹⁹ a zoning ordinance is mutable or amendable even though it constitutes a master or comprehensive plan,¹ when the public good demands such change,² as where events prove that the plan does not fully or correctly meet or anticipate the needs of the total community;³ and if the ordinance, as thus amended, reveals a comprehensive plan, it is of no moment that the new plan so revealed differs from the original one.⁴

On the other hand, under some charter or statutory provisions, a zoning change or amendment may not permit a use in any area which is contrary to the general land use established for such area by the master plan.⁵ Moreover, under statutes so pro-

viding, the power to amend a zoning ordinance must be exercised in accordance with a comprehensive zoning plan;⁶ and, in accordance with the rules governing zoning regulations generally, discussed supra § 30, reclassifications or zoning changes representing a departure from a comprehensive zoning plan should not be made on a piece-meal basis, but as the result of a general survey.⁷

Since the amendment to a comprehensive zoning ordinance or plan itself becomes part of the existing comprehensive ordinance or plan,⁸ it is not necessary that the amendment itself should be comprehensive in its nature;⁹ nor is a rezoning invalid merely because such action was taken before the adoption of a full, complete, and comprehensive zoning plan.¹⁰ All that is required to comply with a requirement of the enabling statute that zoning regulations be enacted in accordance with a comprehensive plan is that a change of classification bear some reasonable relation to the zoning scheme adopted in the basic ordinance.¹¹

A statute providing for the change of the master plan of zoning within a territory does not authorize, under the guise of an amendment, the transfer to the municipality of rights in private property.¹²

Absence of plan. The mere fact that a town does not have a town plan does not prevent the making of a change in zoning regulations or boundaries.¹³

Additional encroachment

Refusal by municipal governing body to permit still another encroachment to do violence to an existing zoning ordinance is not arbitrary where it is grounded in a determination to adhere to and to further an approved and adopted zoning program essential to larger plan for physical development of municipality and reasonably adapted to promote public health, safety, morals, and general welfare of city.

§ 88. Contracts for Amendments; Conditions

In general a municipality does not have authority to enter into a contract with a property owner for the reclassification or rezoning of property or the enactment of amendments to the zoning law.

A municipality does not have authority to enter into a contract with a property owner for the reclassification or rezoning of property or the enactment of amendments to the zoning law,¹⁴ such a contract being in contravention of public policy incorporated in the constitutional and statutory provisions relating to zoning;¹⁵ and such an agreement is ultra vires, illegal, and void.¹⁶ Similarly, a municipality does not have authority to enter into a private contract with a property owner for the amendment of a zoning ordinance subject to various covenants and restrictions in a collateral deed or agreement to be executed between the city and the property owner.¹⁷

Grant of change on conditions or agreements. While it has been held that the granting of a zoning change on conditions or agreements, or subject to the recording of restrictive covenants, is an unauthorized exercise of the police power delegated to the municipality,¹⁸ it has also been held that a rezoning amendment may be passed subject to the

and were not only in accord with sound zoning principles but complied with every requirement of law and were accomplished in proper, careful, and reasonable manner.

The right to attach conditions to privilege of building under plans filed prior to amendment is discussed *infra* § 90.

§ 89. Rights of Property Owners

While property owners have no vested rights in the continuance of zoning regulations, and the doctrine of estoppel is ordinarily not applicable to preclude zoning changes, persons owning or purchasing property have a right to rely on the rule that a general classification will not be changed unless required for the public good.

Property owners ordinarily have no vested rights by reason of the enactment of a zoning regulation so as to preclude a change in such regulation.²⁰

since zoning regulations are not contracts made by a county, city, or other governmental entity with the landowner, and therefore may be modified by such entity,²¹ and the use of the land is subordinate to the valid exercise by a municipality of its power to zone and control the land used within its boundaries for the public good.²² Similarly the doctrine of estoppel is ordinarily not applicable to prevent the enactment or enforcement of a change in zoning regulations.²³

On the other hand, persons owning or purchasing property in an area classified under a zoning ordinance have a right to rely on the rule that a general classification will not be changed unless required for the public good,²⁴ and the doctrine of estoppel may

Interim ordinance

Enactment of an interim zoning ordinance permitting use of plaintiff's property as a shopping center did not estop municipality subsequently to rezone property for residential use only where no building permit was issued so that no vested right had been created and plaintiffs waited until interim ordinance was in process of repeal before filing their application for a building permit.

Professional offices of doctors and dentists

Where dentist, who, together with two other doctors, officed in dentist's house, had applied for and obtained building permit for, and had substantially completed, extension on house for additional office space, which he rented to three more doctors, when town board amended zoning ordinance authorizing professional office of doctor or dentist if located in dwelling meeting floor area requirements, so as to limit use of residences by doctors and dentists to houses in which practitioner resided and to practice of no more than one profession or specialty thereof, amendment was ineffective with respect to dentist's premises.

Exemption of nonconforming uses

(1) Property users' rights, as existing under prevailing zoning conditions at time of adoption of rezoning ordinance, are protected, so that provision exempting existing nonconforming uses is ordinarily included in such an ordinance because of hardship and doubtful constitutionality of compelling immediate discontinuance of such uses.

Cal.—*Livingston Rock & Gravel Co. v. Los Angeles County*, 272 P.2d 4, 43 C.2d 121.

(2) Where prior to enactment of original zoning ordinances tracts involved were used as sand and gravel pits in a town, ordinance as amended, requiring removal of structures and improvements on such land at termination of approval period provided for in ordinance as applied to owners' substantial investment in lands, plants and structures was unconstitutional as depriving owners of a "vested" right and seeking to relegate them to position of seeking permission to do that which they had a legal right to do.

N.Y.—*Town of Somers v. Camarco*, 127 N.E.2d 327, 308 N.Y. 537.

(3) An amendment of zoning ordinance creating a new "Motor Hotel (Motel) District" permitting motels as a "special use" after public hearing and subject to specified conditions and restrictions was inapplicable

this rule has been embodied in some legislative action, such as a resolution.²⁷ The validity of a zoning change is not affected by the fact that the district line bisects the property of one who purchased the property after the enactment of such change.²⁸

Sufficiency of work done. In order to invoke the rule rendering a zoning change or amendment ineffective as to certain property owners, the owner must have commenced work of a substantial character, so as to impose serious loss on him, prior to such change or amendment.²⁹ So, also, substantial

construction must have been performed in order to invoke a provision or regulation that construction, which does not conform to regulations as changed after its start, may proceed under stated conditions.³⁰

Application for permit; filing of plan. A mere application for a permit, or the mere fact that the purchaser of property has filed a plot plan in accordance with the former zoning plan, does not render ineffective a zoning amendment otherwise valid.³¹

ble to a motel which was a permitted use under ordinance prior to its amendment, where vested rights had been created by work commenced, expenditures made, and obligations incurred after permit was issued and before effective date of amendment. N.Y.—Downey v. Incorporated Village of Ardsley, 158 N.Y.S.2d 306, 3 A.D.2d 668.

Rights not affected

Vitiation of contract between township and parties granted permit by township building inspector for erection of garden apartment buildings in compliance with amended zoning ordinance would not affect builders' rights under such permit or validity of amended ordinance.

Intent of resolution

Obvious intent of New York City Zoning Resolution pertaining to effect of zoning change after construction has been started is to protect against hardship a property owner who, in good faith and in reliance on existing zoning laws, has commenced to erect a structure which would have been legal under those laws but which would be forbidden under changed zoning restrictions.

N.Y.—Rosenzweig v. Crinnion, 139 N.Y.S.2d 172, appeal dismissed 148 N.Y.S.2d 912, 286 App.Div. 1066—Rosenzweig v. Crinnion, 126 N.Y.S.2d 692.

29. N.Y.—Miller v. Dassler, 155 N.Y.S.2d 975.

Relative extent of expenditure

Amendment to zoning ordinance was not enforceable against an individual property owner who had commenced work on his property prior to such amendment where owner had made an expenditure of \$4,000 of a contemplated expenditure of from \$25,000 to \$30,000, which work was all performed almost a month before amendment.

N.Y.—Miller v. Dassler, supra.

Gasoline or service station

(1) Where county planning commission approved plans submitted for construction of gasoline station on corner of property, county building inspector issued permit to landowners and petroleum corporation, and, immediately after permit was issued, contractor was employed to clean surface and level off high places in reliance on permit, action, of county board in thereafter rezoning landowners' property from light industrial to one-family residence and in instructing county building inspector to revoke permit amounted to a discriminatory, arbitrary, capricious, confiscatory, and oppressive use of police power.

Cal.—Griffin v. Marin County, App., 321 P.2d 148.

(2) Where amount of work done toward construction of service station under building permit was of small consequence, permittee acquired no vested right to complete construction of such building, and permittee having acquired no vested right, board of supervisors had power to rezone property, changing its classification from commercial to residential.

Ariz.—Verner v. Redman, 271 P.2d 468, 77 Ariz. 310.

Drive-in theater

A board of county commissioners' rescission of its resolution, changing classification of certain land from agricultural zone to zone wherein construction of drive-in theater thereon was specifically authorized, after owner of land made large expenditures in preparing land for construction of theater and buying sound equipment and accessories in reliance on resolution, was illegal and void under principles of equitable estoppel.

Showing held insufficient

Where there was no showing by landowners that there had been substantial construction by them in reliance on old zoning ordinance or that they had incurred substantial lia-

bilities, they had no vested right in continuance of old ordinance, and new zoning ordinance, which superseded old ordinance after action was instituted, was effective to regulate use of landowners' property.

30. N.Y.—Astor Village Taxpayers v. Board of Standards and Appeals of City of New York, 134 N.Y.S.2d 5.

Sufficiency of construction to invoke rule

(1) Under zoning regulation that, if regulations are changed after construction not in conformance with change has lawfully been started, construction may proceed within one year as authorized in permit and that, if substantial work is done during year, such construction may be completed within five years, operations must be commenced prior to effective date of zoning change, substantial work above foundations must be performed within one year after zoning change and completion must occur within five years.

N.Y.—Astor Village Taxpayers v. Board of Standards and Appeals of City of New York, supra.

(2) Where there had been some excavation and one foundation wall had been completed before effective date of change in zoning regulations, construction was in compliance with regulation even though owner had commenced work prior to obtaining permit.

N.Y.—Astor Village Taxpayers v. Board of Standards and Appeals of City of New York, supra.

(3) However, mere clearing of site prior to issuance of permit does not constitute a commencement of "operations" within contemplation and intent of such resolution.

except in so far as the amendment makes provision therefor, on certain conditions, as discussed below.

Conditions on acting under plans filed prior to amendment. Where an amendment changing a zoning ordinance extends, to owners who had filed plans prior to such amendment, the privilege of acting under the plans, the enacting body may attach to the privilege any conditions which in its judgment it deems proper,³² such as that the construction under the plans be begun within a specified period of time.³³

§ 91. Spot Zoning

A change or amendment of regulations involving only

a single or very few properties, and removing therefrom restrictions imposed on surrounding property, may be improper spot zoning except where the change is reasonably related to the public welfare.

Quoted in: *Neb.—Weber v. City of Grand Island*, 87 N.W.2d 575, 579, 165 Neb. 827.

Spot zoning, by which a specific parcel of property is placed in a different zone from that of neighboring property, frequently is accomplished by amendment of a general zoning ordinance,³⁴ or by other change or modification of zoning laws or regulations;³⁵ and such an amendment or change is improper where the change in the regulations is unreasonable and discriminatory.³⁶

Extension of time to begin construction

Amendments to zoning ordinance, increasing time, after grant of a permit, within which construction was to begin, first to one hundred fifty and then to two hundred ten days, in order to be exempt from provisions thereof, were not unconstitutional, but valid exercises of city's power to amend its zoning ordinance.

Validity of spot zoning generally see supra § 34.

Close scrutiny

(1) A zoning ordinance, or amendment thereof, creating a small zone of inconsistent use within a larger zone, is commonly designated as "spot zoning", and such ordinance is closely scrutinized by court and sustained only when facts and circumstances indicate a valid exercise of zoning power.

Mich.—*Penning v. Owens*, 65 N.W.2d 831, 340 Mich. 355.

(2) Attempt to wrench single small lot from its environment and give it new rating that disturbs tenor of neighborhood should receive close scrutiny of courts lest zoning enactments be diverted from their true objectives.

N.J.—*Linden M. E. Church v. City of Linden*, 173 A. 593, 113 N.J. Law 188.

Particular changes held improper

(1) In general.

Neb.—*Weber v. City of Grand Island*, 87 N.W.2d 575, 165 Neb. 827.

(2) Fact that lot zoned by city ordinance as in residential district is advantageous site for filling station profitable to owner is not sufficient reason for excepting it from operation of such ordinance.

Md.—*Ellicott v. Mayor and City Council of Baltimore*, 23 A.2d 649, 180 Md. 176.

(3) Where planning and zoning board rezoned a hundred-foot square parcel of land in a large industrial zone in order to make it available for business use as a package liquor store, and such action was not part

volving a single or a very few properties should be made only where new or additional facts, such as a change in conditions, or other considerations materially affecting the merits have intervened since the adoption of the regulations;³⁷ and whether such a change will be permitted depends on whether the change is reasonably related to the public welfare,³⁸

and is in accord with the statutory purposes or the general scheme of a comprehensive zoning plan.³⁹

As a general rule, a municipality is without authority to single out one or a few lots in an amendatory regulation and arbitrarily remove therefrom restrictions imposed on the remaining portions of the same zoning district.⁴⁰ Accordingly, a re-

of any comprehensive plan of zoning, it constituted "spot zoning" and board of zoning appeals acted illegally, and arbitrarily, and abused its discretion in refusing to nullify such change in zoning.

Conn.—Zuckerman v. Board of Zoning Appeals of Town of Stratford, 128 A.2d 325, 144 Conn. 160.

Discrimination not shown

(1) Proof of three instances of spot zoning for commercial use within residential districts did not establish discrimination against petitioner in his application for a spot zone to use his property for operation of a grocery store, where first instance a block from petitioner's property, while technically zoned as commercial, use was actually residential in appearance, second instance, across street, was actually within terms of ordinance for surrounding residential district, and third instance was in an altogether different neighborhood.

Cal.—Safeway Stores v. City Council of City of San Mateo, 194 P.2d 720, 86 C.A.2d 277.

(2) An amendatory township zoning ordinance, permitting landscaped administrative offices and research laboratories as special uses in residential districts, treated all similarly circumstanced property alike and hence was not invalid as constituting spot zoning.

Tenn.—Grant v. McCullough, 270 S.W.2d 817, 196 Tenn. 671.

Corners of intersection

A zoning body could not reasonably vote to change property at all four corners of intersection from business zone to residential zone where there had been no substantial change in neighborhood since adoption of original zoning regulation, and plaintiffs' property would thereby be diminished seventy per cent and public welfare would not be promoted.

Riparian lots

Zoning ordinance, which changed residential area composed of about three city blocks, from multiple dwelling zone to one-family and two-family zone, although surrounded by area zoned for multiple dwellings and business establishments, and even though neighborhood remained unchanged, was spot zoning and was invalid as to pencil shaped lots having riparian position on river, in absence of showing that public health, safety, or welfare required rezoning.

No change of conditions

A spot zoning ordinance permitting one lot in two-family residential district to be used for a four-family apartment house was arbitrary, unreasonable, and discriminatory and without substantial relation to public welfare, so as to be invalid, where there was no substantial change of conditions in the district warranting change of classification of one lot alone.

Addition to business zone

N.J.—Conlon v. Board of Public Works of City of Paterson, 94 A.2d 660, 11 N.J. 363.

(2) Action of board of public works in adopting ordinance, which removed a single lot from Residence A Zone and constituted it Business 3 Zone, to relieve lot of difficulties special to it under zoning ordinance and permit construction of branch bank as not inharmonious with residential character of the district, constituted an unlawful usurpation of jurisdiction exclusively reserved by Zoning Act to local board of adjustment to grant or recommend to governing body grant of a variance.

classification of only the lot or lots of a single person from a residential to a business, commercial, or industrial district, without lawful basis and without reference to the public welfare, is improper spot zoning.⁴¹ An application for such a change should be regarded with suspicion and should be denied unless the change requested will conform to a comprehensive plan and serve one or more of the purposes enumerated in the zoning statute.⁴²

On the other hand, the mere fact that an amendment to a zoning regulation zones a small area at the request of a single owner does not of itself make the result improper spot zoning,⁴³ since the municipal legislative or governing body generally has the legislative power to rezone, or amend with respect to, a small area, as long as such action is not arbitrary or unreasonable;⁴⁴ and whether an amendment relating to a small area is improper spot zoning depends on the circumstances of each case,⁴⁵

Substantive question

Issue of whether change in zoning constituted spot zoning was a substantive question and not a procedural question.

Pa.—Wynne v. Lower Merion Tp., 124 A.2d 487, 181 Pa.Super. 524.

Difference of surrounding property

There must be substantial and reasonable grounds or basis for discrimination when one lot or tract is singled out in amendatory ordinance removing therefrom restrictions imposed on remaining portions of same zoning district, and when tract is shown to be clearly different in character or use from those around it, discrimination may be legally justified.

Particular reclassifications held not spot zoning

(1) Changing zoning of a five-acre tract which was useless for residential purposes for which it was zoned, where all of surrounding property was in either a business or an industrial zone.

Conn.—Del Buono v. Board of Zoning Appeals of Town of Stratford, 124 A.2d 915, 143 Conn. 673.

(2) Where proposed zoning change was from one residential use to another and there was already considerable amount of property adjoining subject property or in its immediate vicinity falling within proposed classification and there was also considerable amount of other property close by at such lower classification.

Md.—Hedin v. Board of County Comrs of Prince Georges County, 120 A.2d 663, 209 Md. 224.

(3) Where a sixty-one-acre parcel of land immediately contiguous to a thirty-one-acre parcel of land zoned industrial in a neighboring city and bounded on its northern border by railroad tracks was rezoned by municipality from dwelling house district to industrial district.

Ohio.—Partain v. City of Brooklyn, 133 N.E.2d 616, 101 Ohio App. 279.

(4) Village's rezoning from commercial use to single-family use of one of eight tracts which were widely scattered through village, in view of fact that rezoning brought rezoned and adjacent property under a similar use classification, without prejudice to, or preference of, property rezoned.

such as the relative size and nature of the areas involved.⁴⁶

Where the zoning amendment is part of a comprehensive plan it is not spot zoning;⁴⁷ and considerations of public health, safety, and welfare may sometimes justify such a change as part of a comprehensive, well-considered plan in the public interest.⁴⁸ So, a municipality may sometimes have power to relieve a particular lot from a restriction applicable to a general district if the peculiar conditions of such lot or the public good so requires, as in the case of special hardship caused by the prohibition of the only or best use of which the lot is susceptible;⁴⁹ and the refusal so to rezone the property may be arbitrary, discriminatory, confiscatory, and an abuse of discretion.⁵⁰

It has been held that an amendatory zoning ordinance placing nearby properties in a lower classification, and to that extent freeing such property from the burden of the original ordinance, deprives owners of other property of no legal rights, since the amendatory ordinance took nothing from them on which they had a right to insist.⁵¹

Property subject to nonconforming use. The reclassification of certain property for a use different from that of the surrounding area is not improper spot zoning where such property was subject to a nonconforming use, the effect of which was the same as though the property had been originally classified for the use to which it was subsequently changed.⁵²

46. Relative size as determining factor

Determining factor of whether rezoning is spot rezoning and illegal and invalid is not merely size of lot rezoned but rather size of rezoned area in comparison with size of other zoned areas within municipality as represented by zoning plan.

Self-integrated tract

Where city amended zoning ordinance so that a tract was changed from a second-residential district to a third-residential district, thereby making lawful erection of multiple dwelling houses and apartment houses, and amendment affected a territory of forty-seven acres composed of thirty-two acres on which it was proposed to erect apartment houses, and thirty-two acre tract was self-integrated and unrelated to adjoining property, change in zone applying to whole of forty-seven acres was not spot zoning and action of city commission in amending ordinance was not arbitrary or capricious.

Relation to public welfare as essential element of spot zoning

A reclassification of realty can be considered as improper spot zoning only when it fails to bear a substantial relation to public health, safety, morals, and general welfare, and is out of harmony and in conflict with comprehensive zoning ordinance.

Electric plant

Where public utility intended to construct steam generating plants on land which was unfit for any other purpose because of floodwaters, amendment rezoning land from residential district to heavy industrial area in order to permit construction of steam electric generating plants was not void as spot zoning or violative of due process clause of state or federal Constitution.

Within spirit of comprehensive scheme

Spirit of comprehensive city zoning ordinance is not violated, nor is it inconsistent with ordinance to grant a just and reasonable exception by amendment based on character and use of property not similar to other property in district, but which is now and was distinguishable before adoption of ordinance.

Mortuaries or funeral homes. The rule against spot zoning has been applied to zoning amendments which created a special district of a small area in order to permit the operation of a funeral home or mortuary.⁵³

§ 92. Other Circumstances and Conditions to Be Considered

The necessity or advisability of changes in zoning regulations must be determined after consideration of all relevant circumstances and conditions.

The necessity or advisability of making a change or amendment in zoning regulations,⁵⁴ and the propriety thereof,⁵⁵ must be determined in the light of,

and after consideration of, all relevant circumstances and conditions, existing at the time of its enactment.⁵⁶ Since, as discussed above, § 83, the power to change or amend zoning regulations is subject to the same limitations as the original zoning power, matters which are required to be considered in making the original zoning regulations must also be considered in making changes in such regulations.⁵⁷ It is appropriate, in considering a zoning change, to view the municipality as a whole and to plan for the future.⁵⁸

On the other hand, various matters have been held not to be entitled to substantial consideration,⁵⁹ or

Absence of objections

Where city zoning ordinance prohibited use of property in residential use district for funeral home, and amendment which created separate commercial district of a single lot located in residential use district to enable operation of a funeral home thereon was spot zoning notwithstanding no objections were raised prior to its enactment.

Md.—Cassel v. Mayor and City Council of Baltimore, *supra*.

Enlargement of existing mortuary

Where mortuary, which was located in residential district, was sought to be enlarged but building permit was refused, whereupon a spot zone ordinance was passed amending the general zoning ordinance by classifying the mortuary premises as being in a commercial district instead of residential, leaving the premises surrounded by residential district, such classification was arbitrary, without substantial reason, and void.

Eccency of last consideration or action

Where town plan and zoning commission refused to grant application to change comprehensive plan and to

change zone of certain land from agricultural to business to permit establishment of local shopping center because, among other things, major portion of land was subject to flooding and zoned business areas were adequate for local needs for a number of years, commission acted illegally and arbitrarily and abused its discretion in two months later granting an application for change of zone from agricultural to business for use as regional shopping area.

Conn.—Mills v. Town Plan and Zoning Commission of Town of Windsor, 140 A.2d 871, 145 Conn. 237.

Circumstances held not to establish invalidity

Facts, if true, that it did not occur to council to change zoning ordinance until landowner filed petition for change, that council did not have idea what sort of enterprise owner intended to conduct on rezoned land, that borough did not need additional commercial land but had critical shortage of residential land, that plans to raze buildings and erect new ones in original commercial districts were being interfered with by threat of shopping center on rezoned tract, that amended zoning ordinance did not adhere to zoning plan, and that business facilities should be placed in geographical center of borough were not sufficient to show that amended zoning ordinance was not in conformity with enabling statute.

at least not to constitute a conclusive consideration,⁶⁰ or to preclude rezoning.⁶¹

Motive for initiation of proceeding. The validity of a proceeding to change zoning regulations is not affected by the motive of the commission in initiating the proceeding.⁶²

Efficient or best use of property. A change in the zoning plan should not be made in order to preclude an efficient and economic use of particular lands.⁶³ On the other hand, a zoning change or amendment is not invalid as to a property owner because such change does not permit the best possible use of his property.⁶⁴

Increase in municipality's tax yield. The fact that an amendment or rezoning might operate to increase the tax yield to the town or municipality is not, of itself, sufficient to sustain the change.⁶⁵

A city is not required to lessen its zoning standards because of increased demands for homesites in a community and such demands cannot be a foundation for a claim that reasonable administration of the zoning laws requires a reduction of zoning classifications to make way for a greater concentration of population. uses,⁷⁰ and the style and attractiveness of the existing buildings.⁷¹

§ 94. — Property Values

The extent to which the value of property is affected by a zoning amendment will be considered in determining its validity, although incidental benefit or detriment is of no direct consequence and is not controlling.

In determining the validity of a zoning amendment, the extent to which the value of property is affected thereby will be considered.⁷² Nevertheless, incidental benefit or detriment to the owners, either of the re-zoned property or of neighborhood property, is generally of no direct consequence in determining the validity of rezoning legislation,⁷³ and certainly is not controlling;⁷⁴ and where a change in a zoning regulation is reasonable and proper in other respects, it is not rendered invalid

because of the adverse effect of such change on certain properties.⁷⁵

Accordingly, regulations should not be changed or amended merely because certain individuals desire a change⁷⁶ or because economic gain would accrue to some property owners.⁷⁷ Conversely, the zoning authority is not deprived of power to make a proper change, nor should it refuse to make it, by the fact that the change may be detrimental to, and opposed by, numerous property owners and residents of the area, where the change is for the general welfare of the municipality.⁷⁸

§ 95. — Traffic Conditions

Traffic conditions in an area involved in a zoning change, and the effect of such change on traffic conditions, must be considered.

Legislative discretion

A municipal legislative body can determine whether business island permitted by zoning ordinance in res-

Property capable of full use

Economic gain to landowner is insufficient reason for invoking amending power of township board to rezone landowner's property, when such property is capable of full use within limitations for which it is zoned.

Traffic conditions in an area involved in an amendment or change in zoning regulations or classification, and the effect of such change on the traffic conditions, must be given consideration;⁷⁹ and consideration with respect to traffic conditions may properly be given not only to the welfare of the inhabitants of the municipality, but also to the convenience and welfare of the traveling public.⁸⁰ Thus, an increased volume of traffic may be such a change of condition as to constitute a reasonable basis for rezoning property nearby,⁸¹ although it has also been held that the changing of zoning districts merely because of traffic conditions is improper and destroys the stability of zoning.⁸² In any event, a rezoning is not invalidated by the mere fact that it may result in an increase of traffic congestion.⁸³

§ 96. — Apartment Houses

In passing on the advisability of zoning changes with respect to the construction of apartment houses, consideration should be given to all relevant circumstances and conditions.

In passing on the advisability of changes of zoning laws with respect to the construction of apartment houses, consideration may and should be given to all relevant circumstances and conditions.⁸⁴ Thus, consideration may be given to the fact that apartment houses are not inherently benign, but, on the contrary, present problems and congestion and may have deleterious impact on other uses,⁸⁵ so that even

though apartment houses were initially deemed desirable, the municipality may later conclude that more of them would be inimicable to its total welfare, and may change the zoning laws to prohibit the erection of more of them.⁸⁶

Need of county as affecting borough. The fact that the county in which a borough is situated needs more apartment houses is not such a consideration as will oblige the borough to leave its area open for them,⁸⁷ in the absence of a showing of extraordinary need, as that the county has so developed that the borough is the last hope for the solution of its problem.⁸⁸

Vacant land. In determining the advisability of a zoning change to permit the construction of apartment houses, the fact that the land involved was a large tract mostly vacant may be considered as relevant if other relevant factors permit such use.⁸⁹

§ 97. Regulations As to Particular Uses or Restrictions

Particular amendments and changes have been considered, including changes effecting a rezoning of property from residential to business, commercial, or industrial use, and vice versa.

Where an amendment or change in the regulations is reasonable under the circumstances and justified by considerations of the public welfare, property may be rezoned with respect to various uses or restrictions,⁹⁰ such as from residential to business or

80. After construction of arterial highway

In changing zoning classification of territory after construction of main arterial highway, city council could properly consider not only welfare of inhabitants of city, but convenience and welfare of traveling public using such highway.

81. Result of street widening

Tremendously increased volume of traffic ensuing since widening of street was such change of condition as constituted reasonable basis for rezoning property facing road from residential to apartment use.

83. Presumption of improvement in roads

City ordinance rezoning of vacant land, which had previously been zoned for agricultural uses, to light industrial uses, was not invalid, on ground that industrial uses would create intolerable congestion of traffic and inadequacy of sewer service, where contention that such situation would result presupposed that roads and sewers would remain in their present limited capacity, rather than that they would be improved in proportion to increasing public demands.

cumstances, a change from a suburban to a business use,⁷ or from waterfront to suburban use,⁸ or from agricultural to business or commercial use.⁹ So, also, it may be improper to impose certain restrictions on the kinds of businesses which may be conducted,¹⁰ or to make a change in the height of buildings permitted within a certain zone.¹¹ It may be improper to rezone certain property from a multiple dwelling to a commercial classification,¹² or from a business zone to a multiple dwelling zone¹³ or industrial zone,¹⁴ or to change certain property from one class of business zone to another.¹⁵

The fact that an area has been widely used for industrial purposes in violation of zoning regulations does not preclude the zoning authorities from refusing to rezone the area to permit such activity.¹⁶

or to make a change in the number of family occupancy units in a block.²³

Single-family dwellings or multiple dwellings. Under the circumstances of particular cases, it has been held that an area may properly be rezoned from a single-family dwelling district to a multiple-dwelling district,²⁴ or from a multi-family dwelling district into a single-family dwelling district;²⁵ or apartment houses may be prohibited.²⁶ On the other hand, it may be improper to change an area zoned for garden apartments to one restricted to one- and two-family dwellings²⁷ or from apartment use generally to single-family residence use.²⁸ Un-

20. N.J.—Greenway Homes v. Borough of River Edge, 60 A.2d 811, 137 N.J.Law 453.

Facts not invalidating change

Amendment to zoning ordinance increasing frontage requirement was not invalid merely because of facts that most lots in municipality were built on shorter frontage, that permit was granted to another builder whose plan of development involved curved street and circles to proceed without strict compliance with frontage requirement, that builder objecting to amendment would suffer some loss of anticipated profits, or that increased municipal revenue or reduced municipal costs were considerations in adoption of amendment.

N.J.—Greenway Homes v. Borough of River Edge, *supra*.

21. Effect on pre-existing lots

Amended village zoning ordinance, allowing issuance of building permits only for lots with frontage of at least one hundred feet, or for lots which existed and were shown on village records at time of amendment with frontage of at least eighty-five feet, was discriminatory and not a reasonable use of police power as it affected a fifty-eight foot lot which existed and appeared on village records at time of amendment.

N.Y.—Lengel v. Pirnie, 123 N.Y.S.2d 490.

22. Pendency of permit proceeding

Where plaintiff's irregularly shaped tract met requirements of zoning ordinance establishing minimum area on which a residence might be built, trustees of Village of Sands Point had no power to deprive plaintiff of this permitted use by enacting, during pendency of proceeding on plaintiff's application for permit to build residence, an amendatory ordinance excluding from computation of necessary area any area within a right of way or any area less than seventy-five feet in width.

N.Y.—Weissmantel v. Village of Sands Point, 129 N.Y.S.2d 640.

23. Change designed to permit apartment houses

City rezoning ordinance actually designed to permit erection of apartment houses containing more than four hundred apartments in a block in city in which previous zoning ordinance permitted a maximum of thirty-family occupancy units was an unreasonable and arbitrary exercise of zoning power under record and rezoning ordinance was void.

Dispute between experts

Where there was reasonable dispute between real estate experts as to adaptability of property in residential zone to apartment house use, zoning ordinance amendment permitting apartment house use was valid.

Tex.—Ciesi v. Northwest Dallas Imp. Ass'n, Civ.App., 263 S.W.2d 820, error refused no reversible error.

Method of rezoning

Where area originally classified as single-family residential district was rezoned into an apartment house district because area was unsuitable for single-family residences, rezoning was not invalid on ground that apartment house district was entirely surrounded by single-family residence district, where rezoning by method adopted was the only way of protecting rights which council was required to recognize.

Wis.—Eggebeen v. Sennenburg, 1 N.W.2d 84, 239 Wis. 213, 138 A.L.R. 495.

Refusal to reclassify held improper

If land is not susceptible of use or development for one-family residences as restricted by zoning ordinance

and development and use thereof for one and two-story, two-, three-, and four-family apartment buildings will not adversely affect value and use of other residential property in neighborhood, rejection of application for reclassification of property as an apartment district would be unreasonable and arbitrary in that it would unlawfully deprive owners of use of their property.

Effect of prior amendments

Fact that zoning ordinance had been amended in several instances before to permit erection of apartments and multi-dwellings in residential zones before adoption of present program did not make refusal to permit further erection of apartments in a residential zone arbitrary and capricious.

Building in surrounding area

Fact that, surrounding area zoned for garden type apartments, attractive single-family houses had been built did not authorize change in zoning ordinance in order to preclude use of tract of land in area by constructing garden type apartment thereon.

der some circumstances, the refusal to relax a zoning restriction limiting the use of property to single-family dwellings may constitute an abuse of discretion.²⁹

§ 99. — Shopping Centers

The propriety and validity of amendments of zoning regulations, or reclassification or rezoning of property, in order to permit the use of property for a shopping center depends on whether, under the circumstances, such action is reasonable and justified by considerations of public policy.

Where such action is reasonable under the circumstances and justified by considerations of public policy, a zoning regulation may be properly amended, or a rezoning or reclassification may be made, to permit the use of property for a shopping center,³⁰ as where the property so rezoned touches other commercial zones and merely extends existing commercial zones,³¹ the size, shape, and location of the

area make it undesirable for residential purposes,³² there is a need for a shopping center at the proposed location,³³ the change would result in a lessening of traffic congestion in the downtown areas,³⁴ and the change is in accordance with a comprehensive plan or policy.³⁵ Indeed, under certain circumstances the refusal to rezone property or amend the regulations to permit such use may be unreasonable, arbitrary, and capricious.³⁶

On the other hand, under some circumstances the amendment of zoning regulations, or the rezoning or reclassification of property, in order to permit the use of property as a shopping center may be arbitrary and unreasonable and in violation of statutory requirements,³⁷ as where the site is on a street already heavily traveled and inadequate to handle the existing volume of traffic and there are no plans for improving the street,³⁸ or the change is not in accordance with a comprehensive plan.³⁹

29. Location at corner of busy intersection

Denying rezoning of plaintiff's lots located at corner of a busy intersection for buildings other than single-family dwellings was an abuse of discretion where block in which plaintiff's property lay, was a veritable island and changes in neighborhood to commercial purposes required that the restrictions for single-family dwellings be relaxed. Discretion to permit erection of additional buildings

Where zoning ordinance provided for erection of shopping center subject to approval of board of trustees on landowner's application accompanied by plan of detailed specification of buildings, and additional buildings not shown in such plans could not be erected without similar application and approval, discretion was left to trustees to permit erection of additional buildings in established shopping center by amendment of ordinance.

Three corners occupied by filling stations

Where three of corners at intersection, at which shopping center was proposed for fourth corner, were occupied under special permits by filling stations, and there were other commercial establishments in immediate vicinity of that intersection, rezoning of such location from residential to commercial could not be considered piecemeal or spot zoning. Action of city zoning commission in changing classification of a lot from residential zone to a business zone in residential area where there was no shopping center within one mile, and only one house would be affected by change, pursuant to commission's policy to encourage decentralization of business to relieve traffic congestion was not improper as spot zoning.

36. Light industrial zone

A borough zoning ordinance

amendment, prohibiting use of lands or structures in light industrial zone for retail commercial purposes, was void with respect to proposed retail shopping center therein as unreasonable, arbitrary, and capricious and bearing no real and substantial relation to public health, safety, morals, comfort, convenience or general welfare, in violation of constitutional precepts and essential policy of zoning statute, such center and light industrial uses not being incompatible, but congruous, in absence of showing of overriding public interest.

Property suitable for residences

Where block which borough sought to change, by amendment to zoning ordinance, from residential zone to business district, in order to permit construction of shopping center, was suitable for construction of residences and could be used profitably for such purpose, and lay within an area which, as evidenced by comprehensive zoning plan, was intended to be maintained as residential zone, and proposed change would result in achievement of objectives which zoning was designed to prevent, proposed change did not promote any of statutory purposes relating to zoning and amendment, which in effect

2. MANNER OF EXERCISE OF POWER

§ 100. In General

Compliance with statutory procedure is a prerequisite to valid change in zoning boundaries or regulations in a municipality or other governmental entity.

Compliance with the procedure prescribed by statute is a prerequisite to any valid change in zonal boundaries or regulations in a municipality or other governmental entity.⁴⁰ Accordingly, where a commissioner or other official is authorized to change, modify, or amend a zoning plan, the statutory provisions prescribing the method and procedures to be followed in exercising such power must be complied with.⁴¹ Changes of uses and restrictions, and rezoning of use districts, can ordinarily be accomplished only through an amendment of a zoning ordinance.⁴²

In amending the zoning law, the official or body making the amendment is enacting law, binding on the public, and is not merely dealing with the rights of the owners of the particular property affected,⁴³ and the act is legislative and based on present facts, rather than judicial and dependent on past facts.⁴⁴

granted a zoning variance, would be set aside as constituting spot zoning. N.J.—*Borough of Cresskill v. Borough of Dumont*, 104 A.2d 441, 15 N.J. 238.

41. Order signed long after hearing

Under a provision that the commissioner of roads and revenues shall, on the recommendation of the planning commission, proceed on a set date to hear and determine the recommendation and dispose of the zone, where rezoning order had not been signed or issued by county commissioner of roads and revenues at public hearing held to consider petition for rezoning, and was not signed or issued on any subsequent date named by commissioner at time of the hearing, and hearing was not continued, commissioner was without power to sign and promulgate, ten months later, an amendment to the zoning resolution which had been passed at the hearing.

§ 101. By Town Meeting

Under some statutes zoning changes must be adopted by a vote of a town meeting and approved by the attorney general.

Under some statutes a change in zoning, as in the case of a change in a zoning bylaw, must or may be adopted by a vote of a town meeting;⁴⁵ and there must be a compliance with statutory requisites as to notice or warrant for such meeting.⁴⁶ The vote of the town meeting on an amendment to a zoning bylaw must be reasonably construed.⁴⁷

Approval of attorney general. Under a statute so providing, before a town bylaw making a zoning change takes effect it must be approved by the attorney general who, in the event of disapproval, must give his reasons therefor.⁴⁸

Advisory report of planning board. It has been held that the town meeting should be preceded by an advisory report by the planning board on the need for the proposed change.⁴⁹

Construction of vote

(1) Vote of town on amendment to zoning bylaw, referring to whole or any part of locus, immediately followed by specific description by metes and bounds of entire area so that thereafter the area, which had been located in residential district, should be used for business purposes, was to be reasonably construed, and every reasonable presumption was to be made in its favor. Mass.—*Caires v. Building Com'r of Hingham*, supra.

(2) Where only area mentioned in vote on zoning bylaw amendment was entire area which had been located in residential district, effect of vote, as expressly stated on its face, was to change bylaw so that thereafter area should be put in a business zone, and vote in favor of amendment was a vote in favor of placing entire area in business district, notwithstanding a reference to "the whole or any part of" the locus.

Mass.—*Caires v. Building Com'r of Hingham*, supra.

46. Mass.—*Fish v. Town of Canton*, 77 N.E.2d 231, 322 Mass. 219.

Warrant held insufficient

Where original article on which town's planning board held its hearing, and which was inserted in warrant for town meeting, sought to repeal town's zoning bylaw in its entirety, and warrant did not indicate with substantial certainty the nature

of the business to be acted on, amendment of zoning bylaw was invalid.

Mass.—*Fish v. Town of Canton*, supra.

Variance between warrant and actual change

Zoning bylaw could not be modified by establishing line between districts different from that proposed in warrant for town meeting; modification of zoning bylaw different from that proposed in warrant was not justified by words "or in any way act thereon" in warrant.

Mass.—*Nelson v. Town of Belmont*, 174 N.E. 320, 274 Mass. 35.

47. Mass.—*Caires v. Building Com'r of Hingham*, 83 N.E.2d 550, 323 Mass. 589.

48. Purpose of requirement; valid reasons for rejection

Requirement for statement of reasons for disapproval was to enable the determination in appropriate proceedings, whether the bylaw was rightfully ruled out, and the only valid reasons for rejection of the bylaw intended are those based on legal grounds, and not on matters of legislative policy in opposition to a unanimous vote of a town meeting to amend a zoning bylaw.

Mass.—*Town of Concord v. Attorney General*, 142 N.E.2d 360.

49. Mass.—*Caires v. Building Com'r of Hingham*, 83 N.E.2d 550, 323 Mass. 589.

§ 102. By Governing Body

The governing body of a municipality or other governmental entity having the power to modify or amend zoning regulations must exercise such power in the proper manner and comply with all statutory requirements. The power so exercised is generally a legislative one, and the proper procedure is generally the promulgation of an ordinance.

Where the power to modify or amend zoning regulations is vested in the governing body of the municipality or other governmental entity, such body must exercise its power in the proper manner and comply with all statutory requirements,⁵⁰ which, while usually the same as those governing the original enactment,⁵¹ may be different, and governed by different statutes, from those governing the adoption of an original zoning ordinance.⁵²

and a failure to observe the statutory requirements renders the amendment invalid.⁵³ However, the action of the governing body of a municipality in rezoning an area is not rendered invalid by the fact that it violates certain sections of the zoning ordinance,⁵⁴ since the rezoning action is in itself an amendment to the zoning ordinance.⁵⁵ In redistricting a city under some zoning statutes, the governing body will not be required to proceed, by separate resolution, to zone block by block.⁵⁶

Legislative function and discretion. The enactment by a municipal governing body of a rezoning ordinance, or of a modification or change in the zoning regulations, generally represents an exercise of a legislative function and legislative discretion;⁵⁷ and the governing body is vested with a

large measure of discretion to determine the effect on the public welfare of the exercise of its authority.⁵⁸ However, it has been held that where an ordinance changing zoning classifications is adopted to carry out the purposes of a comprehensive zoning ordinance such action is executive or administrative in character,⁵⁹ as distinguished from the legislative character of the action in embarking on the basic zoning policy.⁶⁰

The nature of the function exercised by a board or commission in making zoning changes is discussed infra § 116.

Amendment by ordinance or resolution. Usually the proper and necessary procedure for rezoning land or amending a zoning regulation is the promulgation of an ordinance,⁶¹ or, in some instances, a resolution,⁶² although it has been held that a mere resolution will not serve to modify a zoning ordinance;⁶³ and an amendment to the zoning ordinance must be proposed and adopted with the same formality as the original ordinance.⁶⁴

Provisions of amending ordinance. Under statutes so providing, the amending ordinance must suf-

ficiently identify the ordinance amended.⁶⁵ A city council's motion without an enacting clause to exclude certain land from a zoning ordinance has been held not to amend or otherwise affect such ordinance.⁶⁶ Where an amending ordinance does not purport to be a substitute for all the regulations originally adopted, it may be valid as against the objection that it does not contain a complete statement of the alterations made in the zoning regulations.⁶⁷ Where an original zoning ordinance was defective in part, an amending ordinance which sets out the complete ordinance with the exception of the penalty clause, which was declared to be the section provided in the original ordinance, has been held not invalid as not providing a penalty.⁶⁸

Necessity and sufficiency of map changes. The character of property as zoned for certain purposes on a city zoning map may not be changed merely by alterations of the map subsequent to the passage of the original zoning ordinance;⁶⁹ and in the absence of a provision to that effect, it is not essential that a new map be drawn in order to effect a change in zoning districts.⁷⁰

An ordinance which covered and perfected a previous defective ordinance is valid where its enactment was followed by publication and the formalities of an original act.

Wis.—*City of La Crosse v. Elbertson*, 237 N.W. 99, 205 Wis. 207.

Plurality of subjects

An ordinance with a title stating that it was an ordinance amending a numbered ordinance, relating to zoning by making extensions to a residence district, and repealing another numbered ordinance, was not void on ground that it conflicted with city charter providing that no bill should contain more than one subject which should be clearly expressed in its title.

Equally effective

A resolution indicating an intention to make an amendment to the zoning regulations has been held to be as effective as a formal ordinance would have been.

Form immaterial

Statute requiring that an ordinance revising or amending an ordinance shall specifically repeal the ordinance or section it amends or revises does not require that identification of amended ordinance be made in any particular language or form, and it is sufficient that identification be such that lawmakers and people be not left in doubt as to ordinance affected.

§ 103. — Initiation of Proceedings; Applications

In general, any citizen, or at least any property owner, may apply for an amendment to a zoning regulation, although the governing body of the municipality may also amend zoning regulations of its own motion.

In the absence of statutory restriction, any citizen acting in good faith,⁷¹ or at least, any property owner,⁷² may apply for an amendment to a zoning regulation, and may actively advocate the passage thereof;⁷³ and in so applying for a change the statutes must be followed.⁷⁴ Ordinarily, however, the governing body of the municipality may amend zoning regulations of its own motion without regard to any request or petition therefor by property owners.⁷⁵

Under a statute so providing, a change of zone proceeding may be instituted by a petition of a certain percentage of the owners affected by the pro-

posed change.⁷⁶

A landowner seeking a change in the zoning classification of his land is not required to state whether he intends to sell the land if the classification is changed or to use the land for some designated purpose which will be permitted if the classification is changed.⁷⁷

§ 104. — Successive Applications

Subject to statutory limitations, the action taken by a governing body on a previous application does not prevent it from reconsidering and entertaining another application.

Where there is no limitation on the time when a governing body may amend a zoning regulation, the action taken by such body on a previous application for rezoning does not prevent it from reconsidering the matter and entertaining another application;⁷⁸ but the rule may be otherwise where

Form of petition

"Interested property owners"

Owners of adjacent property held "interested property owners" within charter provision authorizing hearing on rezoning on application of interested property owner, where it was sought to have property rezoned from commercial to residential classification.

Statutory right of owner of "corner" Within zoning statute providing

that where two or more corners at intersection are restricted to a particular use, other corners must be rezoned in conformity on owners' application there were no "corners" along top of the "T" intersection, and owner of land in lower corner, whose land was zoned residential, was not entitled to have it rezoned for business uses, even though other corner and land along top of "T" were zoned for business.

Property subject to nonconforming use

Under zoning ordinance providing

for change of zone by city council on petition by owners of fifty per cent or more of affected area, railroad property, which was within boundaries of affected area as set by ordinance, and which represented a non-conforming use, less restrictive than that proposed by change, was part of affected area and could not be disregarded for purposes of changing part of zone from residential district to business district.

Or.—*Holt v. City of Salem*, supra.

Right of signers to withdraw names

(1) Under zoning ordinance providing for change of zone by city council on petition by owners of fifty per cent or more of affected area, unless prior to hearing, remonstrance in writing against change is made by over fifty per cent of owners of property in affected area, owners in affected area who were not induced to sign petition through misrepresentation of facts, undue influence or coercion, could not withdraw their names from the petition, and legality of petition was not affected by attempted withdrawals.

Or.—*Holt v. City of Salem*, supra.

(2) Persons who attempted but were not entitled to withdraw names from petition for change of zone by city council, which could make the change on petition by owners of fifty per cent or more of affected area, would have, with other persons particularly interested and general public, an opportunity to be heard before zoning commission and also before council previous to final action being taken on petition by council.

the zoning ordinance forbids further petitions to rezone property within a specified period after the rejection of a like petition concerning the same property.⁷⁹

Limitations on the time when zoning regulations may be amended are discussed *supra* § 83.

§ 105. — Report or Approval of Board or Commission

It is sometimes required that proposed changes or amendments to zoning regulations be submitted for report and recommendation to a board or commission prior to their adoption by the governing body of the municipality.

Where a statute so provides,⁸⁰ it is required, in

certain circumstances, that a governing body intending to change, modify, or amend zoning regulations obtain the advice,⁸¹ or the recommendation or concurrence⁸² of a zoning or planning board or commission prior to taking action, provided there is such a board or commission in the borough or municipality.⁸³

Accordingly, amendments to a zoning ordinance must be submitted to the local planning or zoning commission;⁸⁴ and a petition for a change submitted by interested persons should be referred to such board or commission.⁸⁵ In fact, it has been held to be immaterial whether the hearing by the planning board was held on the board's own initiative, or

79. Failure to act on petition distinguished

Failure to act on rezoning petition merely caused petition to expire with no adverse effect, and did not bring into operation provision of zoning ordinance forbidding further petitions to rezone property within six months after rejection of like petition concerning same property.

Statutory requirement as to variances only

Change in classification of certain property in order to carry out comprehensive plan created by original ordinance was proper subject for amendment by town council, and such change was not a variance which should first be referred to board of adjustment.

Pa.—Appeal of Bristol Tp. Zoning Ordinance, Quar.Sess., 7 Bucks Co. 51.

Statute held valid

Statute providing that a zoning ordinance may be amended on recommendation of or with concurrence of planning commission is not invalid as unconstitutional delegation of power to planning commission since limitation imposed by statute is not a delegation of power but a withholding of power, and powers of city commission are subject to such limitations as legislature sees fit to impose on it.

Wash.—Lauterbach v. City of Centralia, 304 P.2d 656, 49 Wash.2d 550.

Requirement imposed subsequent to ordinance or amendment

(1) Amendatory ordinance was not invalid because it was not referred to the city planning commission, where charter section requiring such reference did not go into effect until later date and showed no intention that it should operate retrospectively.

Md.—Chayt v. Maryland Jockey Club of Baltimore City, 18 A.2d 856, 179 Md. 390.

(2) Validity is not to be denied zoning ordinance to extent that it covers land lying within three hundred feet of boundary line between village and unincorporated town area on ground that 1951 enactment of village zoning ordinance was not submitted to, and approved by, county planning commission and town board, in view of fact that 1951 ordinance was merely an amendment to a 1933 ordinance which antedated County Government Law provision requiring such approval.

N.Y.—Incorporated Village of Upper Brookville v. Faraco, 125 N.Y.S.2d 214, 282 App.Div. 943, affirmed 120 N.E.2d 835, 307 N.Y. 642.

Statement of official

Statement of chairman of planning commission with respect to spot zoning could not bind city council, which was the granting authority with ref-

erence to rezoning, and could not even bind a future planning commission.

Cal.—Safeway Stores v. City Council of City of San Mateo, 194 P.2d 720, 86 C.A.2d 277.

Rule not affected by other statute

Statute providing that a council may not, by ordinance, bind itself or successors so as to prevent free legislation does not operate to allow council of municipality, which has adopted the Zoning Law which prevents such municipalities from changing zoning plans except on submission of changes for recommendation to planning board, to amend its zoning ordinance requiring a three-fourths vote to change zoning in certain instances, without submission of amended ordinance to planning board.

Ga.—Mayor and Council of Waynesboro v. McDowell, 99 S.E.2d 92, 213 Ga. 407.

Change by operation of law held not within rule

Where between election on proposed zoning regulations for unincorporated portion of township, and certification by township zoning commission of a plan including text and maps, to township trustees, a portion of unincorporated area of township was withdrawn by operation of law by the incorporation of a village in township, the incorporation was not a "change in or departure from the text or maps" within statute prohibiting such a change unless first submitted to commission.

on the petition of certain property owners, or was otherwise initiated.⁸⁶

The board or commission should submit its report and recommendations to the council or other governing body,⁸⁷ which body is not required to hear any evidence in order to accept the report of the

commission reclassifying property.⁸⁸ It has been held that the governing body cannot validly act without first receiving the report of the board or commission⁸⁹ and its recommendation,⁹⁰ although there is also some authority to the contrary where the recommendation of the planning commission is merely advisory.⁹¹

86. Suggestion of mayor

Rezoning amendment of city did not violate city ordinance making it the duty of the planning board, on petition of certain property owners, or on the planning board's own initiative, to hold a public hearing for consideration of any amendment to zoning ordinance, because of fact that planning board acted at suggestion of the mayor.

Unanimous vote

Statute permitting commission to recommend zoning alterations by unanimous vote of commission requires only unanimous vote of members present, if constituting quorum.

Ky.—Gumm v. City of Lexington, 56 S.W.2d 703, 247 Ky. 139.

Essential finding presumed

Finding by regional planning commission that proposed amendment of zoning ordinance, authorizing county officials to locate juvenile hall in single-family use residential zone, was necessary for general public welfare and interest may be presumed from commission's recommendation of such amendment to county board of supervisors.

Cal.—Bailey v. Los Angeles County, 293 P.2d 449, 146 C.2d 132.

Weight accorded recommendation

Under the statute with respect to the submission of proposed amendments to zoning ordinances to the planning board, legislative intent accords important, although not decisive, weight to the recommendations of the board concerning the zoning ordinance amendments when based on legitimate considerations of public interest and such reasonable supervision as may be essential for the common welfare.

Planning commission

Zoning ordinance adopted by city council on notice, hearing, and recommendation by city zoning commission after creation of a city planning commission was void, since all powers and duties of zoning commission were vested in city planning commission when city planning commission came into existence.

La.—Mills v. City of Baton Rouge, 28 So.2d 447, 210 La. 330.

90. Mass.—Whittemore v. Town Clerk of Falmouth, 12 N.E.2d 187, 299 Mass. 64.

What constitutes "recommendation"

(1) "Recommendation," as used in statute requiring submission of a final report "with recommendations" by the planning board before any

change may be made in zoning districts as established by by-law or ordinance, connotes advice based on information and enlightenment elicited at a public hearing and on study and reflection to ascertain the wisest course for the town to follow; a report submitted by a planning board that it was "unable at this time to make any recommendation" because of a tie vote, did not confer jurisdiction on town meeting to take up a consideration of the merits of the proposed change.

Mass.—Whittemore v. Town Clerk of Falmouth, supra.

(2) City planning commission's action in returning application for reclassifying certain property under zoning ordinance without recommendation was held tantamount to "recommendation" that application be denied.

Kan.—Simmonds v. Meyn, 7 P.2d 506, 134 Kan. 419.

(3) Opinion of city planning board sent to board of aldermen stating that planning board considered it inadvisable to recommend spot zone change, would be regarded as a final report with definite negative recommendations, notwithstanding allusion to continuing comprehensive consideration of subject of zoning, and therefore ordinance changing zoning classification after receipt by aldermen of such opinion was not invalid as being violative of such statute.

Mass.—Caputo v. Board of Appeals of Somerville, 111 N.E.2d 674, 330 Mass. 107.

(4) Where planning board reported that it recommended the passage of rezoning amendment for the best interest of the city, and stated that reasons in detail for report would be made to city council at a later date, and detailed reasons were sent by planning board to city council before hearing by city council, there was sufficient compliance with requirement of statute that planning board submit a final report with recommendations to the city council.

Mass.—Shannon v. Building Inspector of Woburn, 105 N.E.2d 192, 328 Mass. 633.

91. City commission not powerless

City plan commission acted merely in an advisory capacity in making recommendations to city council as to classification of property and matters pertaining to zoning, and fact that amended zoning ordinance was not

Except as statutes may otherwise provide, the governing body is under no duty to follow the decision of the planning commission.⁹² Thus, it has been held that the governing body is not limited to the acceptance or rejection of the report or recommendations of the board or commission;⁹³ and, where the commission recommended the rejection of an application for reclassification, the governing body could not merely reject the recommendation of the commission, but could grant the property owner's application.⁹⁴ However, under statutes so providing, a change must, in some circumstances, receive the approval of a planning commission.⁹⁵ Moreover, in other jurisdictions, while the governing body is not required to adopt the recommendation of the planning commission,⁹⁶ since it may reject such recommendation,⁹⁷ it cannot amend a zoning ordinance contrary to the recommendation, or without the concurrence, of the planning commission.⁹⁸

Under a statute so providing, the amendment made by the governing body to a master plan must

be returned to the planning commission for consideration,⁹⁹ and becomes effective at the expiration of a specified period, unless the planning commission makes its report sooner.¹

Requirement as statutory or by ordinance. Where the requirement is contained in the statute, an ordinance is void in so far as it purports to dispense with the necessity of the recommendation or concurrence of the planning commission in order to amend a prior zoning ordinance.² However, where the requirement is contained in a zoning ordinance, rather than in a statute, the failure to comply with it is not fatal to the amendment.³

Hearings and notice; voting by board. In so far as the statute may provide therefor, the board or commission to which the proposed change or amendment has been submitted for its report or recommendation may and should hold public hearings on the proposed amendment or change after proper notice;⁴ and the report or recommendation must be voted on by the members of the board or commission in accordance with statutory provisions.⁵

initially considered by city plan commission and fact that no recommendations were given by that body, did not render city commission powerless to grant change in classification by adoption of amended zoning ordinance.

Power to administer oaths and subpoena witnesses

Section of the Zoning Act empowering chairman of county board of appeals on hearing to administer oaths and compel attendance of witnesses does not create an absolute requirement as to all hearings; and where petition was presented to county board for rezoning of realty, and county board transmitted petition to board of appeals for hearing, and at

the hearing there was a discussion of merits and demerits of proposed resolution, and various groups presented their views which were duly registered with county board before county board passed ordinance amending zoning ordinance, there was adequate compliance with Zoning Act.

Ill.—*Village of Justice v. Jamieson*, 129 N.E.2d 269, 7 Ill.App.2d 113.

More change in amendment

Provision in proposed zoning ordinance amendment, recommended to county board of supervisors by regional planning commission, that property in any residential zone might be used for any governmental uses, was broad enough to encompass use of land in single-family use residential zone for county juvenile hall, so that board's ordinance authorizing such use was not a new ordinance initiated by board, but merely a change in amended ordinance proposed by commission, and no further public hearing was required before commission on its receipt or board's proposed change in amendment so recommended.

Cal.—*Bailey v. Los Angeles County*, 293 P.2d 449, 46 C.2d 132.

5. Disqualification of member of board

Under statute providing that no member of planning board shall be permitted to act on any matter in which he has either directly or indirectly any personal or financial interest, a member who operated horsemen's kitchen at race track had a "personal or financial interest" in

Irregularities. The failure to conform to requirements, in connection with the obtaining of the recommendation of the commission, which are not of the essence of the legislation will not necessarily invalidate the amendment.⁶

§ 106. — Consent of Property Owners

Under some statutes a zoning change may be made only after the filing of consent thereto of a certain per cent of the owners of realty within a certain distance of the realty affected.

Under a statute or ordinance so providing, as it may validly do,⁷ alteration in a zoning regulation may be made by the municipal governing body only after filing of consent thereto of a certain per cent of the owners of realty situated within a certain distance of the realty affected;⁸ and in determining the owners within the prescribed distance, the distance is to be measured from the outer perimeter

of the entire area of land affected by the zoning provision.⁹

Where an ordinance so provides, municipal authorities cannot establish a business district within a residential district except under a petition by all the property owners within the proposed business district.¹⁰

§ 107. — Initiative and Referendum

Under some statutes an amending or rezoning ordinance or resolution may be subject to initiative and referendum.

An amending or rezoning ordinance or resolution may be subject to initiative¹¹ and referendum¹² under the terms of some statutory provisions, and an amending ordinance subject to referendum after proper petition therefor does not become effective and remains suspended until a referendum is had.¹³

amendment to zoning ordinance which would permit enlargement of facilities at track and his interest vitiated board's approval of amendment; and fact that borough council voted in favor of amendment would not cure infirmity in planning board's action.

6. Time for recommendation

(1) Under statute and ordinance provisions pertaining to amendment of zoning ordinance, requirement that thirty days elapse before planning commission, board, or officer approve or disapprove proposed amendment is not of the essence of the legislation where rights of persons are not prejudiced.

Ohio.—Brow v. Sherwin-Williams Co., App., 109 N.E.2d 864.

(2) Under Maryland-Washington regional district act, providing that no amendment shall be passed until it be first submitted to commission for approval, disapproval, or suggestions, and providing that commission shall be allowed not less than six months for consideration and report, council's failure to hold application for six months did not invalidate rezoning where council received, before acting, a "suggestion" from the commission that application be held pending outcome of a proposed revised plan.

Effect of prior resolution

Agreement on part of city to co-operate with housing authority in certain respects and to plan or re-plan, zone or rezone, area in city, was merely a resolution to rezone and co-operate with the housing authority, and was not a rezoning ordinance, and hence a rezoning ordinance subsequently passed was not prevented from being subject to referendum under statute providing that a

referendum shall apply only to the first ordinance.

Ohio.—W. B. Gibson Co. v. Warren Metropolitan Housing Authority, 29 N.E.2d 236, 65 Ohio App. 84.

Amendment without protest by referendum

Statutes relating to zoning ordinance referendum and to zoning ordinance amendment will not be construed so as to give township board an opportunity to pass zoning ordinance acceptable to township residents and then after thirty days, without protest by referendum, to amend ordinance in such a way as to be unacceptable to majority of residents.

Mich.—Stadle v. Battle Creek Tp., 77 N.W.2d 329, 346 Mich. 64.

Statute held inapplicable

Resolution which was passed pursuant to statute giving cities power, when exercised in connection with housing projects, to rezone any part of their territory or to make exceptions to building regulations by resolution of their governing bodies, was not subject to referendum provisions of city charter of city which entered into agreement with housing authority, and city's action in rezoning, by resolution, one part of area, which had been first zoned after housing authority obtained approval for development, was valid, even though prior ordinance to same effect had been suspended by referendum.

Ohio.—State ex rel. Holmes v. Lauderdalebaugh, App., 149 N.E.2d 33—W. B. Gibson Co. v. Warren Metro-

However, a referendum may not be required in the absence of a valid statutory authorization thereof;¹⁴ and it has been held that where the referendum provisions of the statutes apply only to legislative acts and not to administrative or executive matters,¹⁵ they do not apply to an ordinance changing zoning classifications, adopted to carry out the purposes of a comprehensive zoning ordinance,¹⁶ since, as discussed supra § 102, such an action is executive or administrative in character.

An ordinance requiring two-thirds vote of the city council to rezone territory over the protests of a certain per cent of the owners of property in the area to be affected does not apply to direct legislation under the initiative and referendum.¹⁷

Compelling submission of question to voters. Since, where a proper petition for the submission to the electors of the question whether a zoning amendment should be adopted has been filed, the action to be taken by the governing body in submitting the question to the voters is purely administrative,¹⁸ a writ of mandamus will lie to compel the board

to certify such petition so that the question of rezoning can be placed on the ballot.¹⁹

Informal poll. While a municipal governing body may conduct an informal referendum, as by polling votes by letter, and may enact a zoning amendment pursuant to the consensus expressed, such poll or referendum has no binding effect and the full responsibility to enact proper zoning laws remains with the governing body.²⁰

§ 108. — Hearing and Notice

In general, compliance must be had with requirements as to hearing and notice prior to enactment of an amendment to zoning regulations.

Statutes authorizing the amendment by a city of its zoning regulations may contemplate the same careful, serious, and intelligent consideration of an amendment as is required in the preparation and enactment of an original zoning ordinance,²¹ and ordinarily compliance must be had with requirements as to hearing and notice prior to enactment of the amendment.²² In the sense that hearing and

Validity of temporary or emergency ordinance enacted without hearing see supra § 19.

Purpose of provision

(1) Statute requiring public hearing and notice thereof to property owners within two hundred feet of property which will be affected by proposed change in zoning ordinance is for protection of property owners and to safeguard them from arbitrary exercise of powers granted by law, and, in absence of such preliminary steps, there is no jurisdiction in governing body of municipality to enact change to zoning ordinance.

Tex.—Tonroy v. City of Lubbock, Civ. App., 242 S.W.2d 816, error refused no reversible error.

(2) Purpose of public hearing, after due advertisement, of proposed change in zoning ordinance is to give interested citizens an opportunity to enter their objections.

Ala.—Marshall v. City of Mobile, 35 So.2d 553, 250 Ala. 646.

Strict compliance

Changes in zoning ordinances affect property rights, and therefore provisions concerning notice of hearing of

notice are required, a proceeding for rezoning is quasi judicial in nature.²³

More specifically, the statutory provisions must be observed with respect to who may or must give

notice,²⁴ to whom it must be given²⁵ and in what manner,²⁶ the time notice must be given in relation to the hearing,²⁷ the time and place for the public hearing,²⁸ the nature and conduct of the hearing,²⁹

such changes must be strictly complied with.

Effect of notice

N.Y.—Maxwell v. Klaess, 82 N.Y.S.2d 588, 192 Misc. 939.

Particular ordinance held amendment within requirement

Ordinance whereby city rescinded prior zoning ordinance and established new districts and uses and boundaries throughout whole city purported to amend and change regulations and districts under prior ordinance, and public notice and hearing were required.

N.Y.—Sheffer v. City of Geneva, 147 N.Y.S.2d 401.

Reconsideration at special meeting without new notice

Where meeting of town board was called after notice of public hearing, and meeting was closed after defeat of resolution in favor of proposed amendments of zoning ordinances, and meeting was not adjourned to a further date, or to the call of the chair, reconsideration of proposed zoning amendments at special meeting on later date, without new notice of public hearing, was illegal.

N.Y.—Rabasco v. Town of Greenburgh, 137 N.Y.S.2d 802, 285 App. Div. 895, affirmed 128 N.E.2d 425, 309 N.Y. 735.

24. **No particular person designated**
Statute pertaining to notice to be given before amendment to county zoning ordinance is finally adopted does not require that the notice be given by county court clerk, by zoning commission, or by any other particular person.

R.I.—R. I. Home Builders v. Budlong Rose Co., 74 A.2d 237, 77 R.I. 147.

Pendency of suit on validity of prior act

Fact that municipality failed to give personal notice to trial court or to plaintiffs who had instituted suit attacking validity of amendment

to zoning ordinance did not affect powers of municipality to enact a new amendment.

Ill.—Bohan v. Village of Riverside, 138 N.E.2d 487, 9 Ill.2d 561.

Persons rendering property for taxes

Under statute relating to exercise by municipality of its power to enact zoning ordinances and requiring at least ten days' notice of public hearing on proposed change to owners of property within two hundred feet of property affected by change, or to person rendering property located within two hundred feet for taxes, fact that parties who owned property affected had not rendered their property for city taxes at time of enacting amendment to zoning ordinance did not obviate necessity for notice in view of fact that final date for rendering property for taxes for such year had not been reached and fact that there had been entire absence of notice.

Formal public notice

(1) Informal notice by word of mouth or by news article is not an adequate substitute for required formal public notice to affected owners of the change in zoning ordinance.
N.Y.—Sheffer v. City of Geneva, 147 N.Y.S.2d 401.

(2) Compliance with statutes relating to notice of amendment of zoning bylaw could not be had by informal advertisement in local newspaper and announcement by sound truck of possible reconsideration of zoning question at adjourned town meeting.

Mass.—Fish v. Town of Canton, 77 N.E.2d 231, 322 Mass. 219.

No personal service of notice on neighbor

Where part of defendant's plot previously in residence district was by resolution of city planning commission rezoned, amendment to zoning resolution was not invalidated by fact that notice of hearing was not personally served on neighboring owner of private dwelling.

Ill.—Braden v. Much, 87 N.E.2d 620, 403 Ill. 507.

Right to examine witnesses under oath

Where ordinance committee of city council held hearing to become informed of pertinent facts concerning proposed amendment to zoning ordinance, its action was not judicial or quasi judicial under enabling statute, and refusal to permit property owners, who opposed amendment, to examine witnesses under oath was not a denial of due process.
R.I.—Smith v. Brock, 118 A.2d 336.

Duty to hear objectors as well as proponents

In hearing on petition to board of county commissioners to rezone suburban land as business property, board did not abuse its discretion by

and, as discussed *infra* § 110, the nature of the proposed change.

§ 109. — — Requirements Imposed by Municipalities

Within statutory limits, municipalities may themselves prescribe details with respect to hearings and notice in the matter of amending zoning regulations which must be complied with, although some authorities hold that such requirements are directory and may be waived.

Within statutory limits laid down, municipalities themselves may prescribe details with respect to hearings and notice in the matter of amending zoning regulations;³⁰ and a statute authorizing cities to provide for notice of proposed zoning changes is mandatory and requires the adoption of such provisions.³¹ It has been held that an amendment, change, or rezoning not passed in accordance with the requirements of a previous ordinance with respect to notice and hearing is invalid.³²

On the other hand, it has also been held that a

zoning ordinance amendment is not invalid for want of public notice and hearing as provided in the original zoning ordinances, where the requirement of notice and hearing is a self-prescribed limitation which may not serve as a delimitation of the greater power vested in the city governing body by the state,³³ that such requirement is merely directory,³⁴ and that it may be waived by the municipal body, and is waived by its action in passing the amendment;³⁵ and a change or amendment is valid notwithstanding such failure, provided the notice prescribed in the enabling statutes is given.³⁶

§ 110. — — Nature of Change Proposed; Variance

The notice must apprise the public of the changes to be made, and the amendment must conform substantially to such proposed changes, although minor or formal variances are immaterial.

The notice must reasonably apprise the public of the essence of the regulations to be adopted, that is, the changes to be made.³⁷ Moreover, the power of

hearing the objectors as well as the proponents.

Wash.—Lillions v. Gibbs, 289 P.2d 203, 47 Wash.2d 629.

Duty to hear residents of adjoining boroughs

Where area embracing several boroughs was built up to such extent that dividing line between them was not noticeable, borough which sought to change a block which bordered on other boroughs from residential zone to business district owed a duty to hear any residents and taxpayers of the adjoining boroughs who might be adversely affected by the proposed zoning change, and to give as much consideration to their rights as it would give to those of its own residents and taxpayers.

N.J.—Borough of Cresskill v. Borough of Dumont, 104 A.2d 441, 15 N.J. 233.

Hearing by commission or committee

Under statute providing that no amendments of zoning ordinance shall be made without a hearing before some commission or committee designated by the corporate authorities, reference of amendments to a standing committee of the city council for hearings was sufficient.

Ill.—2700 Irving Park Bldg. Corp. v. City of Chicago, 69 N.E.2d 827, 395 Ill. 138.

Hearing prior to election of new members

Under provision of enabling statute requiring public hearing before adoption of amendment to zoning ordinance, fact that such hearing was held before election at which several new members of city council were elected did not render void

amendment which was finally adopted by new council after election.

Ordinance provisions held valid

(1) Rule that city cannot bind itself by ordinance not to do what it may do by ordinance is not violated by provision in city's original zoning ordinance that changes and amendments thereof may be made only after reasonable notice and hearing, since such provision neither prohibits nor unreasonably burdens, hinders, or delays future ordinance action by city board of commissioners.

(2) Ordinance prescribing that ordinance amending zoning ordinance shall not be offered for passage until ten days after presentation is not inconsistent with zoning statute and is not invalid as unreasonable.

Va.—Claffone v. Community Shopping Corp., 77 S.E.2d 817, 195 Va. 41.

(2) Notice which merely stated that certain property would be rezoned from one classification to another, rather than setting forth the specific zoning amendment itself, substantially complied with statute per-

the governing body to amend an ordinance is delimited by the purpose as stated in the notice of hearing;³⁸ and, while a slavish and technical adherence to the notice is not required,³⁹ there cannot be substantial and extensive deviations from the expressed objectives of the hearing.⁴⁰ Thus, in general, the amendment or change adopted must conform substantially to the proposal contained in the notice or warrant;⁴¹ and where there is a substantial variance between the notice and the actual change or amendment such change or amendment is invalid.⁴²

On the other hand, the validity of the amendment or change will not be affected where the variance is minor or merely formal,⁴³ or where the variance is a liberalization of the amendment rather than an enlarged restraint.⁴⁴ Thus, it has been held that requirements as to notice of hearing on the adoption of amendments to a zoning ordinance may be inapplicable to amendments made in the course of passage of an ordinance amending prior regulations;⁴⁵ and, under provisions to that effect, the municipal governing body may, after the hearing, adopt the proposed change, reject it, or amend it and adopt it as amended.⁴⁶

taining to notices of hearing on petition for amendment in county zoning regulations.

Tenn.—Clapp v. Knox County, 273 S. W.2d 694, 197 Tenn. 422.

(3) Where published notice of hearing on question of rezoning certain land, so as to authorize construction of drive-in theater thereon, clearly stated fact that hearing was to be held on an application to rezone land from agricultural to commercial light industrial district, notice was not invalid because it did not contain words "drive-in theater." Fla.—Bregar v. Britton, 75 So.2d 753, certiorari denied Brown v. Britton, 75 S.Ct. 534, 348 U.S. 972, 99 L.Ed. 757.

(4) Notice of a hearing to be had at regular meeting on a certain day sufficiently complied with statutory requirement that commissioners set a time (day and hour) for hearing and give notice thereof to public, notwithstanding given notice did not name the hour numerically. Ga.—Ellis v. Stokes, 61 S.E.2d 806, 207 Ga. 423.

(5) Where requirements for notice and hearing on proposed amendatory zoning ordinance of city were sufficient as to that ordinance, they were also sufficient as to subsequent amendatory zoning ordinance dealing with identical subject matter and correctly describing property which was not correctly described in first amendatory zoning ordinance.

Tex.—City of Waxahachie v. Watkins, 275 S.W.2d 477, 154 Tex. 206.

Notice held insufficient

(1) Where notice referred only to amending ordinance in relation to "applications and permits and permit fees," amendment which converted certain property owners' absolute right to use property as they had been using it to right conditioned on obtaining certificate of occupancy from building inspector was not validly enacted.

N.Y.—Village of Sands Point v. Sands Point Country Day School, 148 N.Y.S.2d 312, 2 Misc.2d 885,

(2) Where notice of public hearing on request for rezoning failed to specify name of municipality or place of hearing as required by statute making a lawful public hearing a condition precedent to the enactment of zoning regulations, and zoning ordinance was subsequently passed, there was fatal defect in notice of hearing which rendered ordinance void.

N.Y.—Callanan Road Imp. Co. v. Town of Newburgh, 167 N.Y.S.2d 780, 6 Misc.2d 1071.

(2) Amendment to town zoning ordinance providing that it would be unlawful to use any land in town for gasoline station purposes would be unlawful if notice of public hearing preliminary to enactment gave no clear notice that an amendment concerning gasoline and service stations would be considered but merely gave notice that town board would hold hearing in connection with an amendment to prohibit used car lots and other specified uses.

43. Iowa.—Brackett v. City of Des Moines, 67 N.W.2d 542, 246 Iowa 249.

Changes in amendment held not invalidating

(1) Where amendment to zoning ordinance creating restricted apartment districts was advertised for a public hearing thereon, fact that amendment as finally enacted by council had been further changed by increasing bulk requirements of individual properties did not render amendment invalid on ground that amendment as advertised was not passed.

Del.—Klaw v. Pau-Mar Const. Co., 135 A.2d 123.

(2) Fact that the description of rezoned land in resolution was different from that in published notice was not material, where description in such notice included property described in resolution.

(3) Fact that local commercial zone shown on map included in notice of public hearing on proposed amendment of county zoning ordinance differed from local commercial zone on maps included as part of amended ordinance did not invalidate amended ordinance.

Rezoning of part of tract described

Under provision of enabling statute, authorizing city council, after hearing, to adopt, reject, or amend and adopt proposed zoning ordinance, amendment to zoning ordinance which allegedly rezoned only part of

Where a zoning ordinance has been enacted with a change of use classification, amendments thereto which are germane to the subject matter and are in accordance with the recommendations of the planning commission may be added without further and additional advertisement and public hearing.⁴⁷

§ 111. — Failure to See Notice; Irregularities

The validity of a zoning amendment is not affected by the failure of property owners to see the notice; nor may a property owner object to defects therein where he had an opportunity to be heard; nor may he object to irregularities which did not affect him.

The validity of an amendment of zoning regulations is not affected by the failure of property owners to see the notice where everything required by statute with respect to notice was done;⁴⁸ and a property owner may not object to defects in the notice where he had an opportunity to be heard⁴⁹ and made no objection at the hearing to defects in the notice.⁵⁰

A property owner may not object to mere irregularities in the notice where he was not adversely affected thereby.⁵¹ Thus a published notice of the amendment of a zoning ordinance and of the time and place of the hearing thereon, which is otherwise in full compliance with the statutory requirements, is not invalid merely because there was included in the published notice an erroneous statement of the date on which the ordinance was adopted;⁵² nor is an amendment rendered invalid by the fact that

the statutory time was not allowed between the date of the notice and the date of the hearing, where the parties were not misled thereby to their hurt and injury.⁵³

§ 112. — Evidence

Original zones are presumed well planned, and the burden of proving the need for a change is on the proponents thereof. Action on a rezoning application must be based on, and supported by, competent and substantial evidence.

Since there is a presumption, in proceedings for a zoning change, that the zones established by the original zoning ordinance or regulation were well planned and arranged, and were intended to be permanent,⁵⁴ the proponents of a change in the zoning regulations have the burden of proof as to the need therefor.⁵⁵ Thus, before property is rezoned there should be proof either that there was some mistake in the original zoning or that the character of the neighborhood has changed to such an extent that the reclassification should be granted.⁵⁶

Competency and sufficiency of evidence. Under or apart from provisions to that effect, the action on an application for rezoning must be based on, and supported by, competent and substantial evidence.⁵⁷ The personal knowledge of the members of the body passing on the proposed amendment, or of other persons on whom they rely, cannot be considered as evidence as to whether there has been a change in conditions in the neighborhood or a need for reclassification.⁵⁸

§ 113. — Meetings; Number of Votes Required

There must be a compliance with statutes as to the meetings of the governing body to amend a zoning ordinance, the vote required, and related matters.

With respect to the meeting of the governing body of a municipality for the purpose of amending a zoning ordinance, statutes fixing the vote required and stating requirements as to related matters govern and must be complied with.⁵⁹ Thus, under statutes to that effect, a majority of the membership of the governing body constitutes a quorum.⁶⁰ Moreover, a zoning amendment may be invalid if the requisite vote is not obtained.⁶¹

The number of votes required for the exercise of the power to amend or modify a zoning regulation by a board or commission is discussed infra §§ 121, 122.

Distinction between grant and denial of amendment. Under some statutes there is a distinction in the vote requirements between the granting of a zoning amendment and the denial thereof, in that while the concurrence of a majority of the total membership is necessary to grant a zoning amendment,⁶² such a concurrence is not required to deny a

proposed amendment, a simple majority of those present being sufficient.⁶³

Personal interest of member of body or others. Since the enactment of a zoning change is a legislative act rather than merely quasi-judicial, the change will not be declared void because of the fact that one member of the body was instrumental in having the change passed because of his personal interest in the property,⁶⁴ or because an interested party was present at the deliberations of the authorized body;⁶⁵ but there is also some authority to the contrary.⁶⁶

§ 114. — More than Majority Required

Under some statutes it may be required that a zoning change be adopted by a specified vote of more than a majority, as where the requisite number of property owners have protested such change.

Under statutes so providing, it may be required that a zoning ordinance amendment be adopted by a specified vote of more than a majority,⁶⁷ as where statutes so provide with respect to cases where a certain per cent of the interested property owners have protested the proposed amendment.⁶⁸ Accordingly, where such a protest is filed, it may be neces-

board of county commissioners, apparently almost entirely on personal opinion of one of its members, without support for the opinion in evidence, was arbitrary action entitling petitioner to some form of relief in equity.

Different treatment from basic ordinances

Where statute authorizing villages and certain cities to enact comprehensive zoning ordinances provided that thereafter council could alter the regulations or plans, and that such alterations could only be made by two-thirds vote of all members of governing body, statute would be construed to manifest intent that alterations or amendments were to be treated differently from comprehensive zoning ordinances themselves.

Disqualified member not voting

Under statute requiring a favor-

able vote of three fourths of "all members of the legislative body" of the municipality for rezoning, quoted phrase means the same as members of the whole council, and hence where at hearing all five aldermen were present but one disqualified himself for interest, and three voted in favor of rezoning, the rezoning carried, since the statute required only three fourths of the four votes and not three fourths of the five.

Requirement held valid

Zoning ordinance providing that amendment thereto, if protested by owners of twenty per cent or more of frontage of certain affected property, shall become effective only on three-fourths vote of municipal legislative body is not unconstitutional as constituting an unlawful delegation of legislative power to private individuals.

Mich.—Northwood Properties Co. v. Perkins, 39 N.W.2d 25, 325 Mich. 419.

Strict construction

Statute providing that three-fourths vote of council shall be required to pass amendment of zoning regulations if protest duly signed and acknowledged by owners of twenty per cent or more of area of land included in proposed change be presented is a limitation on general legislative powers of the common council and must be strictly construed.

N.Y.—Viscusi v. City of Schenectady, 100 N.Y.S.2d 791, 198 Misc. 732.

Statutory requirement

(1) Statute authorizing zoning ordinances was held self-executing in so far as it provided for amendment of regulations by three-fourths vote of municipality's legislative body in case of protest by landowners, and hence amending ordinance, having been unanimously adopted, was properly enacted, notwithstanding invalid provision of original zoning ordinance purporting to authorize amendment by only majority vote of aldermen.

U.S.—Geneva Inv. Co. v. City of St.

Louis, C.C.A.Mo., 87 F.2d 83, certiorari denied 57 S.Ct. 795, 301 U. S. 692, 81 L.Ed. 1348.

(2) Statute providing that in case of protest an amendment to, or change in, a zoning regulation shall not become effective except by favorable vote of three fourths of all members of municipal legislative body was required to prevail over ordinance providing that in case of protest such an amendment or change shall become effective by favorable vote of a majority of all city commissioners.

N.C.—Eldridge v. Mangum, 5 S.E.2d 721, 216 N.C. 532.

Three fourths of all members

For purposes of statute requiring a three-fourths vote of municipal governing body as a prerequisite to effectiveness of zoning ordinance amendment when a protest complying with statute has been filed, an affirmative vote by three fourths of all members of governing body, rather than a mere three-fourths vote of a quorum of such governing body is required.

N.Y.—Fortieth St. & Park Ave. v. Walker, 234 N.Y.S. 703, 133 Misc. 907.

Legislative intent

Provision for unanimous action by a governing body like the board of estimate of the city of New York is extraordinary and it should only be invoked when demanded by a clear, unambiguous expression of legislative policy and intent.

N.Y.—431 Fifth Ave. Corp. v. City of New York, 55 N.Y.S.2d 203, 184 Misc. 1001, modified on other grounds 59 N.Y.S.2d 25, 270 App. Div. 241, affirmed 68 N.E.2d 877, 296 N.Y. 588.

73. Protest by insufficient percentage

Under statute requiring that amendment to building zone ordinance must be adopted by four members of town board if twenty per cent of owners of land in specified area protest amendment, vote of 3-1 was sufficient to adopt amendment rezoning area from residential to commercial, where protest was actually signed by less than twenty per cent of owners in surrounding area as result of one of owners signing protest only as individual and failing to indicate he was also attorney in fact for another property owner; and residential property owner could not supplement protest which had insufficient number of signatures by adding signature of another property owner whose power of attorney he held but use of which he had not indicated on protest.

N.Y.—Deligtisch v. Town of Greenburgh, 135 N.Y.S.2d 220.

74. Protest not acknowledged

Under the statute providing that common council may amend zoning laws by majority vote unless protest against proposed change duly signed and acknowledged by owners of twenty per cent or more of area of land included in proposed change be presented, and that in such event amendment must be passed by three-fourths vote, protest which was not acknowledged was insufficient, and majority vote was adequate to pass valid ordinance.

Protest filed after hearing

(1) Affected property owners' writ-

body.⁷⁶

The computation of the protesting per cent should be made in accordance with the provisions of the statute;⁷⁷ and under such provisions the property owners whose protests are to be considered may in-

clude those owning property within the area of land included in the proposed change,⁷⁸ or immediately adjacent,⁷⁹ or within a certain distance thereof,⁸⁰ or those owning frontage immediately in the rear of,⁸¹ or directly opposite to,⁸² the land involved or affected.⁸³

ten protest filed a week after date fixing for hearing on proposed zoning changes was not timely filed under statute requiring protest to be offered or presented before or at the time of the hearing.

S.C.—Central Realty Corp. v. Allison, 63 S.E.2d 153, 218 S.C. 435.

(2) However, under other statutes it was held not necessary that protest be filed on date fixed by notice for consideration of application for rezoning, and it was sufficient that protest had been before commissioner at time rezoning was approved.

"Streets"

Under city charter providing for amendment of zoning regulation, city has the right to base its computation of protesting per cent of property owners on "streets" as set forth on the city map and is not required to base computation on "public streets" or "streets in use" and hence could include a private street that did not appear on the city map during zoning proceedings, although it had appeared on a city map from 1895 to 1939.

N.Y.—Dole v. City of New York, 44 N.Y.S.2d 250, 182 Misc. 408.

Owners of twenty per cent of land, not twenty per cent of owners

Protest against amendment of village zoning ordinance by twenty per cent of owners of land in village adjacent to estate affected by amendment was insufficient to require unanimous vote of village board of trustees in favor of amendment, under Village Law, to render amendment legal, such protest not being within statutory specifications requiring signature of protest by owners of twenty per cent of land included in proposed change, immediately adjacent land, or land directly opposite rezoned land, in order to

require unanimous vote of trustees.

N.Y.—Hermann v. Incorporated Village of East Hills, 104 N.Y.S.2d 592, affirmed 109 N.Y.S.2d 182, 279 App.Div. 753, appeal denied 110 N.Y.S.2d 283, 279 App.Div. 799.

Separable areas

Where residential use districts and retail use districts were differently affected by amendment, they were separable areas in ascertaining area of land included in proposed change.

N.Y.—431 Fifth Ave. Corp. v. City of New York, supra.

Frontage

(1) Opposition to resolution of board of estimate and apportionment creating new retail district, to be effective, must be made by owners of twenty per cent of entire frontage of whole new district.

N.Y.—Morrill Realty Corporation v. Rayon Holding Corporation, 240 N.Y.S. 38, 135 Misc. 845, affirmed 241 N.Y.S. 918, 229 App.Div. 760, affirmed 172 N.E. 494, 254 N.Y. 268.

(2) The "frontage proposed to be altered" by adoption of amendatory ordinance did not embrace entire block on side of street on which lot was located, within statute authorizing a protest by owners of frontage proposed to be altered.

N.Y.—Bowen v. Hider, 37 N.Y.S.2d 76.

79. Separation by railroad right of way

Where the property of landowners who protested zoning change was separated from the land in question by a railroad right of way, the protestants' land was not "immediately adjacent" to the land in question, within statute providing that when sufficient landowners of immediately adjacent land protest change, zoning amendments must be passed by three-fourths vote of the board of commissioners.

80. N.Y.—Deligitsch v. Town of Greenburgh, 135 N.Y.S.2d 220.

Amendment of application to create buffer zones

(1) Where applicant for a zoning change amends application by creating buffer zones of one hundred feet between properties of protesting adjacent owners and property for

which change is sought, such action avoids that section of the township code and of the township zoning ordinance requiring a three-fourths vote in order to approve a requested change where twenty per cent or more of adjacent owners, whose property is within a distance of one hundred feet of the property proposed to be changed, file a protest.

Pa.—Appeal of Radnor, Ithan and St. David's Civic Ass'n, 5 Pa.Dist. & Co.2d 156, 41 Del.Co. 396.

(2) Creation of such buffer zones, although in fact an avoidance of the cited sections of the code and ordinance, is not an evasion thereof, and authorize the township commissioners to approve the change by a simple majority instead of a three-fourths vote.

Pa.—Appeal of Radnor, Ithan and St. David's Civic Ass'n, supra.

81. N.Y.—Bowen v. Hider, 37 N.Y.S.2d 76.

Property included

(1) "Frontage immediately in rear", within statute authorizing a protest against proposed amendment altering zoning district by owners of the frontage immediately in the rear of frontage proposed to be altered, embraces street frontage of those plots in single ownership which lie immediately outside of and adjoining boundary line of property which it is proposed should be altered.

N.Y.—Bowen v. Hider, supra.

(2) "Frontage immediately in rear" includes frontage of plot in single ownership adjoining boundary of property proposed to be altered, "frontage" denoting line of property on street.

N.Y.—Smidt v. McKee, 186 N.E. 869, 262 N.Y. 373.

Per cent of total rear frontages

Per cent that rear protesting frontages bear to total rear frontages and not to total frontages to be altered determines whether amendment altering zoning district must be passed by unanimous vote of board of estimate and apportionment.

N.Y.—Nichols v. O'Brien, 267 N.Y.S. 7, 149 Misc. 280.

82. N.Y.—Bowen v. Hider, 37 N.Y.S.2d 76.

83. Particular lots which may possibly be affected

Where zoning ordinance amendment permitting erection in a residential zone of parochial as well as public schools was general in nature and affected all residential property

Where numerous changes affecting different districts are made by different sections of an amendatory regulation, each of these separate sections should be considered as though it had been separately enacted with respect to the right of protest of property owners of a certain per cent of the area of land included in the proposed change;⁸⁴ and in such case it may not be urged that, since the regulation is comprehensive and city-wide, protests are required from the prescribed per cent of the area of the land in all of the districts affected by any provision of the amendment.⁸⁵

§ 115. — Filing and Publication

While under some statutes it is not required that a copy of the amendment be filed with the clerk after its adoption, or that notice be given to the property owner, under other statutes the amendment must be published and posted.

Under some statutes it is not required that a copy of the amendment or of the plan be filed in the clerk's office after adoption of the amendment,⁸⁶ and notice to the property owner of the enactment of the amendment is not necessary to make the amendment effective as to such property.⁸⁷

On the other hand, where requirements as to publication and posting of the ordinance are im-

posed by statute, they must be complied with,⁸⁸ where the statute is applicable;⁸⁹ and the amendment will not become effective until it is published.⁹⁰ However, under some statutes, it has been held that the ordinance is not rendered invalid by delayed publication, in the absence of a showing that someone was harmed thereby.⁹¹

Entire ordinance or amendment only. Where there has been a general amendment of the zoning ordinance, the entire ordinance must be published; but, if the amendment is not general, publication of the particular amendment only is sufficient.⁹²

§ 116. By Board or Commission

Where a board or commission is authorized to change or modify zoning regulations, statutory provisions prescribing the manner of exercising such power are the measure of the power of the board or commission to act and must be complied with, as with respect to the initiation of the proceeding, successive applications, the filing of the proposed change with the clerk, and the publication and posting of the adopted amendment.

Where a board or commission is authorized to change or modify zoning regulations, the method prescribed by statute for exercising such power is the measure of the power of the board or commission to act.⁹³ Thus, the board or commission must

within a village, and not merely two specific lots, in absence of proof of protest by the owners of twenty per cent of the total area affected, there was no necessity for adoption of the amendment to be unanimous despite protest of owners of twenty per cent of the land immediately adjacent or directly opposite to two certain lots which might be devoted to parochial purposes.

Sufficiency of publication prior to amendment in requirements

Where statute requiring that amendments to zoning ordinances must be published once a week for two consecutive weeks and be posted in six public places in town for not less than ten days was amended, on

July 1, 1952, by statute requiring a single publication and posting only on town clerk's sign board, amendment did not validate zoning ordinance amendments which were void for lack of proper publication prior to July 1, 1952.

Statute inapplicable to unincorporated village

N.Y.—O'Beirne v. Koehler, 83 N.Y.S.2d 140, 193 Misc. 101.

Nature of change

Under provisions to that effect, the statute applicable depends on whether the amendment involves broad basic changes of zoning or modifications of lesser degree.

N.Y.—North Shore Beach Property Owners Ass'n v. Town of Brookhaven, 129 N.Y.S.2d 697, affirmed 153 N.Y.S.2d 579, 1 A.D.2d 1043.

90. *Amendment as to grant of exceptions*

Amendment to building zone ordinance so as to provide that certain special exceptions formerly granted by board of appeals should be granted only by action of town board

would not become effective until published.

N.Y.—Gordon v. Town of Hempstead, 93 N.Y.S.2d 250, 196 Misc. 954.

91. *Validity not dependent on publication*

Where city charter specified no time for publication of city ordinance and did not provide that an ordinance would be invalid unless or until it was published, fact that amendatory zoning ordinance of city was not published until eight and one half months after ordinance was passed, did not render the ordinance invalid, in absence of showing that someone was harmed by the delay.

Jurisdictional prerequisites

Compliance with provisions of zoning regulations of town permitting change in zone was a prerequisite to any valid and effective change in zone boundaries, and failure to comply with required steps constituted a jurisdictional defect.

Conn.—Hutchison v. Board of Zoning

exercise its powers reasonably⁹⁴ and in accordance with the statutory procedures and requirements of law.⁹⁵

Nevertheless, the proceedings before the administrative body are essentially informal in their nature.⁹⁶

Nature of proceeding as legislative. While the modification of zoning regulations by a commission partakes of the nature of a legislative proceeding,⁹⁷ nevertheless it is not legislative in the broad sense but, on the contrary, the power emanates from a

specific grant and the manner of its exercise is limited.⁹⁸

Initiation of proceeding. In the absence of statutory restrictions, any property owner may apply to the zoning board or commission for an amendment or change of zoning regulations;⁹⁹ and, where the proceeding for a proposed change or amendment may be initiated by the petition of a property owner or by the commission itself on its own initiative, the fact that the petition of a property owner is defective or irregular will not affect the validity of the action taken by the commission.¹

Veto power of mayor

Under charter granting mayor veto power over every "resolution . . . adopted or passed" by city planning commission, veto power held not conferred where approval of rezoning application automatically resulted from commission's inaction; hence proceedings were not void for failure of commission to certify inaction to mayor.

Ascertainment of facts

Record; reasons for change

Where municipal zoning commission increased minimum size permissible for building lots in all various zones of municipality, and record of zoning commission showed that change was made in order to provide larger areas for sewage disposal and by so doing to lessen danger to residential water supply, commission's record set forth facts which were sufficient for compliance with statu-

tory requirement that its record shall state reason why such change is made.

Nature of "property" owned

In statute authorizing property owners to seek amendment of zoning regulations, "property" was used in embracive sense as including everything which is subject of ownership; and a corporation which did not own land in city, but owned long-term lease and considerable personal property, could apply as a "property owner" for amendment of zoning regulations.

Failure to object to overall plan

Where property owner was told by chairman of town plan and zoning commission that property owner's failure to object to overall plan of a proposed zoning ordinance would not prejudice his right to appear before commission on petition for change of zone of his property, such statement by chairman created no rights in property owner beyond those enjoyed by citizens at large.

Application disregarded as limiting time to act

Fact that request for rezoning was first brought to planning commission's attention by letter dated within time prescribed by New York City Charter for filing of applications for changes in resolutions or regulations did not require that the request be treated as a formal application under this section, which limits time within which commission may act, and commission could act under charter section authorizing it to adopt a resolution at any time.

Successive applications; effect of prior action. The action taken on a previous application for reclassification does not ordinarily prevent the zoning commission from entertaining another application after the lapse of a reasonable time.²

Filing of proposed change. Under a statute so providing, the zoning commission must file a copy of the proposed change of zonal boundaries in the office of the town clerk for public inspection at least a specified period of time before the public hearing;³ and a failure to do so will render the attempt to change the zonal boundaries invalid.⁴

Publication and posting. Statutory provisions as to publication and posting of the adopted amendment, or other provisions as to notice thereof, must be complied with.⁵

§ 117. — Submission of Changes to Other Bodies

Under some provisions the action taken by the board or commission in making zone changes must be submitted to the governing body for consideration or approval, or the proposed change must be submitted to the planning board before consideration by the local board.

Independent investigation by commission

Where property owners' petition to city planning commission concerning zoning change did not comply with procedure required under New York City charter, but commission made an independent investigation, determined that changes were needed, and made a use change in addition to area change sought by petition, such changes were valid in view of fact that charter elsewhere authorized commission to make such changes on its own initiative.

Under some provisions, the action taken by the commission in making zoning changes must be submitted to the municipal legislative or governing body for consideration or approval.⁶

Submission of changes to planning board. Under provisions to that effect, a proposed zoning amendment must be submitted to the planning board, which prepared and controls the master zoning plan, before it can be acted on by the local zoning board.⁷

§ 118. — Consent of Property Owners

Under some statutes, a provision requiring the consent of a specified per cent of certain owners of property is not a jurisdictional requirement on which the power of the amending body to act is dependent.

Under some statutes to that effect, such as a statute giving the zoning commission the privilege of instituting a zoning change either on its own motion or on the urging or petition of a person,⁸ a provision requiring the consent of a specified per cent of the owners of property within a certain distance of the proposed change is not a jurisdictional requirement on which the power of the amending body to act is dependent,⁹ but is a limitation on the right

Withdrawal of consents

Withdrawal of consent of any number of signatories from petition at any stage of proceeding has no effect on jurisdiction of either commission

of a person to have his petition for a zoning change heard by such body.¹⁰

§ 119. — Hearing and Notice

The board or commission must exercise its powers in accordance with statutory requirements with respect to hearings and notice thereof.

The board or commission authorized to change or modify zoning regulations must exercise its powers in accordance with statutory requirements with re-

spect to hearings¹¹ and notice thereof;¹² and the failure to comply with hearing and notice requirements renders invalid not only the particular change made, but also all subsequent zone changes dependent thereon.¹³

Contents of notice; sufficiency. The notice should be sufficient and clear to inform the public or parties interested of the proposed change;¹⁴ and where the notice is insufficient the amendment is invalid,¹⁵ unless the insufficiency is cured, as by sub-

Conn.—Strain v. Mims, 193 A. 754, 123 Conn. 275.

Time of hearing

Requirement of public hearing on petitions to amend zoning regulations is mandatory, but provision for such hearing within 60 days is merely directory and jurisdiction is not lost by delay.

Conn.—Winslow v. Zoning Bd. of City of Stamford, 122 A.2d 789, 143 Conn. 381.

Tentative action before hearing

Zoning commission of town, which was considering proposed change in zoning regulations, could, prior to public hearing required by statute, take tentative action affecting the proposed change; and where zoning commission of town held a public meeting to consider question of change in zoning regulations, and all persons present had an opportunity to speak against adoption of new zones, and commission did not register its official vote on the change until hearing had been held, change made by commission was not invalid on ground that commission voted to make the change before the hearing was held, even though meaning of minutes of meetings of commission might be stretched to support claim that members of commission had made up their minds before meeting was held.

Conn.—Couch v. Zoning Commission of Town of Washington, 106 A.2d 178, 141 Conn. 349.

Determination by zoning board of property owners affected by proposed change in zoning and entitled to notice is presumed to be proper.

Mass.—Godfrey v. Building Commissioner of City of Boston, 161 N.E. 819, 263 Mass. 589.

Ascertainment of correct addresses

Mass.—Co-Ray Realty Co. v. Board of Zoning Adjustment of Boston, 101 N.E.2d 888, 328 Mass. 103.

(2) Evidence established that the board of zoning adjustment complied with the statute in mailing notice of hearing of change of zoning to one of the owners of the property deemed by the board to be affected, where

Nonexistent classification

Where court of appeals held that creation of "B-3 Multi-Family Residence District" by city and county zoning commission was void for lack of proper notice, commission's order, changing the zoning of tract of land near city limits to such district from an "A One-Family Residence Area," was unauthorized as assigning tract to nonexistent classification.

Notice held sufficient

A notice of proposed zoning amendments which referred to everything on which the zoning board proposed to act and to which public attention was invited, and which fully and fairly advised affected persons of their opportunity to be heard on specific matters, was adequate although it indicated that amendment would apply to industrial zones without stating reasons for making such addition, since requirement that zoning board's reasons be incorporated in notice of zoning amendments, when board is proponent of change, is merely directory.

Erroneous statement of date of hearing

Publication of notice in one issue of newspaper that hearing would be had before Louisville and Jefferson

sequent publication correcting the omission.¹⁶

Variance. Where there is a substantial variance between the nature of the change proposed in the notice and the change actually enacted, such change is a nullity.¹⁷

§ 120. — Evidence

There is a presumption in a proceeding before a zoning board or commission that the original zones were well planned, and the proponents of a change have the burden of proof as to the need therefor. Action taken on a rezoning application must be based on competent and substantial evidence.

Since there is a presumption, in proceedings for a zoning change by a zoning board or commission, that the zones established by the original zoning ordinance or regulation were well planned and arranged and were intended to be permanent,¹⁸ the proponents of a change in such ordinances or regulations have the burden of proof as to the need therefor.¹⁹ Thus, there should be proof either that there was some mistake in the original zoning or that the character of the neighborhood has changed to such an extent that the reclassification should be granted.²⁰

Competency and sufficiency of evidence. The ac-

tion taken on an application for rezoning must be based on, and supported by, competent and substantial evidence.²¹ The personal knowledge of the members of the board or commission, or of other persons on whom they rely, may not be considered as evidence as to whether there has been a change in conditions in the neighborhood or a need for reclassification.²²

However, in view of the informal nature of the proceedings before the administrative body, as discussed supra § 116, evidential facts contained in a statement by counsel in a proceeding for a change in zone are properly before the commission for consideration.²³

§ 121. — Meetings; Number of Votes Required

In general, a zoning change may be made at a meeting at which a majority is present, and by a vote of a majority of those present.

In the absence of legislative restriction the commission generally can take valid action with respect to changes in zoning at a meeting of which all members have proper notice and at which a majority is present,²⁴ and a vote of a majority of those pres-

County Planning and Zoning Commission to adjust comprehensive zoning plan and to create new classification on certain day, which was legal holiday, and in next week's issue that hearing would be held on day following that originally stated, was insufficient as not conforming to law, and posting of placards, announcing postponement of hearing, at customary places on night before, or morning of, day specified in first notice, did not remedy defect.

Ky.—Louisville & Jefferson County Planning & Zoning Commission v. Ogden, 210 S.W.2d 771, 307 Ky. 362.

16. Availability of texts and maps

Where township zoning commission published notice of public hearing on proposed zoning change and such notice failed to state the availability of texts and maps for examination and the texts and maps were available and were inspected and a second hearing was held and prior to second hearing availability of maps and texts for inspection was advertised by publication, there was substantial compliance with statutory requirement specifying that notice must advertise availability of such texts and maps for examination.

17. Variance in zone classification

Where zoning regulations of town required publication of notice of pub-

lic hearing on question of whether zone boundaries should be changed, and petition for change of zone boundaries so that petitioner's property would be in light industrial zone rather than in residence zone was filed, and published notice and hearing related only to petition for change to light industrial zone, action of board in purporting to change zone boundaries so that part of petitioner's property was in a business instead of a residence zone was a nullity.

Quorum

The statute requiring that words giving authority to three or more public officers or other persons be construed as giving authority to majority thereof controls in determining whether quorum of administrative body, such as zoning commission, was present at time of vote on question before it, unless contrary intention is indicated in particular law by express words or clear implication; and commission's order changing zoning by vote of three of ten members of commission when only five members were present, was void, although commission's bylaw

ent is ordinarily sufficient.²⁵

Members of the board or commission who have an interest in the zoning change being considered are disqualified from voting thereon;²⁶ but the fact that one who may be so disqualified participated in the decision does not necessarily invalidate the action taken by the board or commission.²⁷

The number of votes required for the exercise of the power to amend or modify a zoning regulation by the governing body of a municipality or other governmental entity is discussed *supra* §§ 113, 114.

Number attending hearing. In some jurisdictions, a decision by the requisite number or percentage of votes is valid even though such number did not attend the hearing on the amendment and even though some of the members who did attend the hearing did not participate in the decision.²⁸

provided that quorum should consist of five members and zoning statute authorized commission to adopt rules and regulations for transaction of its business.

Ky.—Louisville & Jefferson County Planning & Zoning Commission v. Ogden, 210 S.W.2d 771, 307 Ky. 362.

Status of ex officio members

Ex officio members of public body are members for all purposes and must be counted in determining presence of quorum thereof.

Ky.—Louisville & Jefferson County Planning & Zoning Commission v. Ogden, *supra*.

Quorum as including one disqualified to vote

Where wife of mayor was owner of part of residential property to be rezoned, and mayor was wife's agent in attempted sale of property for business purposes, even if mayor were thereby disqualified to vote on question of rezoning to permit business uses, mayor was not disqualified to sit on zoning commission as a quorum member in view that his vote was not necessary under procedure under which property was rezoned, and resolution passed by vote of majority exclusive of mayor and with quorum present could legally rezone the property.

Ky.—Sims v. Bradley, 218 S.W.2d 641, 309 Ky. 626.

25. Ky.—Sims v. Bradley, *supra*.

26. Member of church affected

Under statute providing that no member of zoning planning board shall be permitted to act on any matter in which he has either directly or indirectly any personal or financial interest, reclassification of portion of property within block from residential to commercial by an ordinance

having as one of its prime purposes the enablement of a church located on such rezoned property to sell property for use by a bank was void, where member of planning board approving change and voting for adoption of ordinance was also member of church.

N.J.—Zell v. Borough of Roseland, 125 A.2d 890, 42 N.J.Super. 75.

27. Decision supported by other members

Alleged fact that one of the seven planning commissioners of county owned land near landowner's forty-acre tract, which landowner sought to have reclassified from rural residential and agricultural land to heavy industrial land, and such commissioner believed that reclassification of forty-acre tract would detrimentally affect his land, would not necessarily void actions of remaining members in denying reclassification and would not void action of county board of supervisors, which reconsidered action of planning commission and denied reclassification.

Cal.—Sladovich v. Fresno County, App., 322 P.2d 565.

28. Mass.—McHugh v. Board of Zoning Adjustment of Boston, 147 N.E.2d 761.

Four-fifths approval required

Where application to Board of Zoning Adjustment of Boston for extension of boundaries of zoning district was heard at meeting attended by nine of the twelve members of the board, and written record of board's decision was signed by ten members, including two who did not attend hearing, board's decision granting application was not invalid for want of participation of requisite number of its members as required

§ 122. — More than Majority Required

The board or commission may be required to act by a unanimous vote, or other specified vote of more than a majority, where a certain per cent of property owners protest the proposed change.

The board or commission may be required to act by unanimous vote, or other specified vote of more than a majority, where a certain per cent of the interested property owners object to the proposed change or modification of the regulations;²⁹ and, where it is required that changes be made by a unanimous vote of the commission, all members of the commission must vote for the change, and it is not sufficient that all members at a meeting at which a majority of the commission was present should so vote.³⁰ However, in determining the sufficiency of the vote and the proceedings, members of the commission who are disqualified, as by interest, must be excluded.³¹

by statute providing that no change of boundaries shall be made except by decision of not less than four fifths of members of board.

Mass.—McHugh v. Board of Zoning Adjustment of Boston, *supra*.

29. Conn.—Strain v. Mims, 193 A. 754, 123 Conn. 275.

Katona v. Town Plan and Zoning Commission of Town of Fairfield, 125 A.2d 75, 20 Conn.Sup. 77.

Purpose of statute requiring unanimous vote of zoning commission to rezone land in event twenty per cent of lots immediately adjacent protest the change was to define the protesting interest deemed sufficient to require unanimous action by commission.

Conn.—Parsons v. Town of Wethersfield, 60 A.2d 771, 135 Conn. 24.

30. Conn.—Strain v. Mims, 193 A. 754, 123 Conn. 275.

31. Conn.—Mills v. Town Plan and Zoning Commission of Town of Windsor, 134 A. 250, 144 Conn. 493.

Particular members held disqualified

(1) Member of town zoning commission could not properly vote on his wife's application for change of area in which her land was situated from residential to business zone, and commission's action in granting application by unanimous vote, including that of applicant's husband, was invalid.

Conn.—Low v. Town of Madison, 60 A.2d 774, 135 Conn. 1.

(2) Where one of commission members had acted as dummy in purchasing land proposed for industrial use on behalf of stockholder of corporation which was interested in developing a regional shopping center near property petitioners had sought to have rezoned for development of

It has been held that the statute requiring the approval of a zoning amendment by more than a majority vote in case of protests by certain property owners is not applicable where the zoning ordinance is not truly an amendment or rezoning, but is in effect the first zoning, as where the zoning previously passed was merely a general zoning and intended as a temporary measure until more adequate provisions were substituted therefor.³²

Sufficiency of protests. In order to invoke the statutory provisions requiring the approval of a zoning change by more than a majority vote in case of protests by certain property owners, the protests must be made by the requisite percentage of the property owners eligible to protest under the statute,³³ and must be timely made and filed.³⁴ Where a protest petition has been properly made, whether any of the protesters should be permitted to with-

draw their names therefrom is a matter for the discretion of the zoning commission.³⁵

§ 123. — Review by Board of Its Own Action

Under some statutes, the board having original jurisdiction to change zoning regulations has the power to review its own decisions.

Under some statutes the power to review its own decisions is conferred on the board having original jurisdiction to change zoning regulations;³⁶ and such review is in the nature of an appeal or rehearing³⁷ and is not to be construed with the statutory strictness required in a motion for a new trial.³⁸

When the appeal from the commission's order revising districts is to the commission or board itself, the commission or board is not confined in its deliberations to the reasons set forth in the appeal.³⁹

shopping center, and another commission member had discussed matter of reducing size of petitioners' shopping center with town planner so that it would not injure nearby shopping center, commission's action in denying petitioner's application to rezone for industrial use was invalid, since under statute commission members were disqualified.

Conn.—*Mills v. Town Plan and Zoning Commission of Town of Windsor*, 134 A.2d 250, 144 Conn. 493.

Duty of member to avoid conflicting interests

Public office is a trust conferred by public authority for a public purpose, and status of each member of a zoning commission forbids him from placing himself in a position where private interests conflict with his public duty.

Conn.—*Mills v. Town Plan and Zoning Commission of Town of Windsor*, supra.

32. Ky.—*Sims v. Bradley*, 218 S.W. 2d 641, 309 Ky. 626.

33. Conn.—*Katona v. Town Plan and Zoning Commission of Town of Fairfield*, 125 A.2d 75, 20 Conn. Sup. 77.

"Immediately adjacent" lots

Owners of houses and lots opposite property which was proposed to be rezoned were not "immediately adjacent" to such property so as to require such change to be by unanimous action of zoning commission in face of owners' protests, where railroad owned strip of land for its

tracks between houses and lots and the property sought to be rezoned. Conn.—*Parsons v. Town of Wethersfield*, 60 A.2d 771, 135 Conn. 24.

Percentage of area, not of lots

Under special act requiring unanimous vote of zoning commission for proposed zoning change if protest was filed by owners of twenty per cent of area of lots immediately adjacent in the rear of land included in proposed change, and extending one hundred feet therefrom, it is required that protest be filed by owners of at least twenty per cent of certain areas and not by owners of twenty per cent of lots; and, in determining total area within meaning of law, it was necessary to include portion of lot immediately adjacent to, or in rear of, lot included in proposed change, even though the entire lot did not fall within that description.

Conn.—*Park Regional Corp. v. Town Plan and Zoning Commission of Town of Windsor*, 136 A.2d 785, 144 Conn. 677.

34. Hearing at which protest filed

Under statute providing that if a protest is filed at a hearing, held pursuant to a request for a change of zone, with the zoning commission against such change, signed by the owners of twenty per cent or more of the area of the lots within five hundred feet of the proposed change, such change shall not be adopted except by a vote of three fourths of all the members of the zoning commission, the designation of "hearing" ap-

plied to the public hearing and not to hearing held by commission for final action on proposed change.

Conn.—*Katona v. Town Plan and Zoning Commission of Town of Fairfield*, 125 A.2d 75, 20 Conn. Sup. 77.

35. Refusal held not abuse of discretion

Refusal of zoning commission to permit the withdrawal of names from protest petition after the public hearing held pursuant to a request for a change of zone had adjourned, but before any action was taken on the proposed change by the commission, was not an abuse of discretion.

Conn.—*Katona v. Town Plan and Zoning Commission of Town of Fairfield*, 125 A.2d 75, 20 Conn. Sup. 77.

General notice

Under some statutes no notice of the hearing to the owners of adjacent or near-by property at whose instance an appeal from the commission's order has been made is required, the general notice and public hearing being sufficient.

B. REPEAL

§ 124. In General

The legislative body of a municipality ordinarily has the power to repeal previously adopted zoning regulations, but such power should be exercised reasonably.

Except where the county or municipal body is granted only the power to create or establish zones, and is not granted the power, expressly or by implication, to supervise, control, or repeal its zoning ordinances,⁴⁰ a municipality or other governmental entity may repeal a zoning ordinance or regulation,⁴¹ although such course cannot adversely affect rights theretofore acquired under the sanction of the ordinance.⁴² This power should be exercised reasonably.⁴³ An amendment is in some instances affected by repeal of the ordinance to be amended and enactment of the new ordinance.⁴⁴

Effect of repeal. The effect of a repeal of a zoning regulation or provisions thereof is to render the repealed regulation or provisions nonexistent,⁴⁵ ex-

cept in so far as there may be a saving clause.⁴⁶

When repeal effective. The time when the repeal becomes effective depends on the provisions of the repealer;⁴⁷ and where an ordinance was enacted which contained a repealer of a prior zoning ordinance, the repealer became effective simultaneously with the approval of the new ordinance.⁴⁸

§ 125. Who May Repeal

In general, the power to repeal a zoning regulation rests in the municipal body which had the power to adopt it in the first instance, generally the governing or legislative body.

In general, the power to repeal a zoning ordinance or regulation rests in the municipal body which had the power to adopt it in the first instance,⁴⁹ generally the governing or legislative body of the municipality,⁵⁰ and not in an administrative agency,⁵¹ such as the zoning board of appeals.⁵²

Binding successors in office

A decision holding invalid an attempt to repeal amended zoning ordinance does not do disruptive violence to established doctrine that city council cannot bind its successors in office in legislative matters, where ground of invalidity was that amended ordinance was arbitrary and unreasonable.

§ 126. Manner of Effecting Repeal

In repealing a zoning regulation, compliance must be had with statutory procedural requirements.

In repealing a zoning ordinance or regulation, compliance must be had with procedural requirements imposed by statute.⁵³

Initiative election. Under provisions to that effect, the repeal of a zoning ordinance may be effected by an initiative election.⁵⁴

Submission to commission. The requirement that a proposed zoning regulation be first submitted to a commission for report has been held not a prerequisite to the enactment of an ordinance eliminating a prior invalid zoning ordinance.⁵⁵

Invalidity of amendment containing repeal provisions. Where an amendment is invalid, the accompanying repealing provisions also fail.⁵⁶

Nonenforcement of regulation. The mere fact that a zoning regulation has not been enforced does not work its repeal.⁵⁷

Express preservation of consistent ordinances. Ordinances enacted under a statute are not repealed

by virtue of the repeal of such statute where the later enactment expressly preserves ordinances not inconsistent therewith.⁵⁸

§ 127. — Repeal by Implication

A zoning regulation may be repealed by implication by the adoption of a later enactment incompatible with the former one.

A zoning regulation may be impliedly repealed by the adoption of a later enactment which is so incompatible with, or repugnant to, the former one that both cannot stand together,⁵⁹ as where the later enactment is a comprehensive zoning ordinance intended to cover the entire subject matter of zoning;⁶⁰ and a repeal in this manner is certainly effected where the subsequent enactment contains a provision that all inconsistent ordinances or parts thereof are thereby repealed.⁶¹

On the other hand, a zoning ordinance will not be regarded as repealed by implication where there is no such inconsistency or repugnancy with the later enactment as to indicate a legislative intent to effect a repeal of the earlier ordinance.⁶²

N.J.—Stirling v. City of Plainfield, 53 A.2d 713, 136 N.J.Law 38.

Pendency of suit

Fact that municipality failed to give personal notice to trial court or to plaintiffs who had instituted suit attacking validity of amendment to zoning ordinance did not affect powers of municipality to repeal amendment and to enact a new amendment. Ill.—Bohan v. Village of Riverside, 138 N.E.2d 487, 9 Ill.2d 561.

54. Village ordinance held inapplicable

Petition of village electors for initiative election on ordinance to repeal certain zoning ordinance was not controlled by village ordinance which provided that proposed ordinance amendments concerning zoning first be referred to planning and zoning commission for report. Ohio.—Russell v. Linton, Com.Pl., 115 N.E.2d 429.

Proposed initiative ordinance held sufficient

Where proposed initiative ordinance calling for repeal of certain village zoning ordinance by its terms clearly indicated that its plain intention was to repeal such zoning ordinance and to place territory involved back into former zoning classification, and clearly presented such issue to voters, proposed ordinance was not void for failure to enable voters intel-

ligently to determine on what subject they were voting.

IV. CONSTRUCTION, OPERATION, AND EFFECT

A. IN GENERAL

§ 128. Construction of Zoning Regulations in General

A zoning regulation may be subject to construction, and general rules governing the construction of statutes and ordinances apply in the construction thereof.

A zoning ordinance or regulation may be subject to construction in order to ascertain its meaning and

effect,⁶³ and such construction under the facts ordinarily is a question of law.⁶⁴ The construction of zoning regulations ordinarily is governed by the general rules applicable to the construction of statutes and ordinances,⁶⁵ and the cardinal rule in such construction is to ascertain and give effect to the intention of the lawmaking body.⁶⁶

63. R.I.—Doherty v. Town Council of Town of South Kingstown, 200 A. 964, 61 R.I. 248.

Resort to previous ordinance

Where zoning ordinance was clear and unambiguous it was not necessary to resort to previous ordinance on the subject.

Mo.—Royal Meat Products Co. v. Kansas City, App., 214 S.W.2d 713.

Boundaries

Where one of the boundaries of restricted zone was not clearly described in town's ordinance, it was, therefore, open to interpretation.

R.I.—Doherty v. Town Council of Town of South Kingstown, 200 A. 964, 61 R.I. 248.

Provision as to construction

A provision of a zoning ordinance requiring that the provisions thereof be held to the minimum requirements for the promotion of the public safety and general welfare in interpreting and applying them is a mere rule of construction.

History and policy

In construing statute relative to control of zoning by local authorities, court would look to the wording of the statute, its history, and its basic policy, as they might be disclosed by preëxisting legislation and the circumstances that brought about the enactment of the statute.

Conn.—Jennings v. Connecticut Light & Power Co., 103 A.2d 535, 140 Conn. 650.

Circumstances at time of enactment

Court, when construing zoning ordinance enacted in 1922, would look to circumstances existing as of that time for enlightenment as to intent of municipal governing body as exhibited by the words used.

Major and minor regulations

Town Law §§ 264, 265, are intended to cover different situations, the former having application when districts are being established, restrictions are being instituted, and broad changes of zoning are being effected, while the provisions of latter section apply to modifications of a lesser degree, as well as to instances involving applications of individual property owners.

N.Y.—North Shore Beach Property Owners Ass'n v. Town of Brookhaven, 129 N.Y.S.2d 697, affirmed 153 N.Y.S.2d 579, 1 A.D.2d 1043.

S.D.—City of Sioux Falls v. Cleveland, 70 N.W.2d 62, 75 S.D. 548.

Conflict

(1) Apparent conflicts in the provisions of zoning ordinance were to be considered in the light of its policy to divide city into business and residence districts, and wherever necessary such policy was to be given effect as against any doubtful expression of intention apparently inconsistent therewith.

Minn.—Lowry v. City of Mankato, 42 N.W.2d 553, 231 Minn. 108.

(2) Where, in construction of a zoning ordinance, a literal interpretation of a phrase would create a conflict in the provisions of the ordinance, the conflict should be resolved, by adopting that construction carrying out the clear intention of the legislative body.

N.Y.—Seltzer v. City of Yonkers, 145 N.Y.S.2d 664, 286 App.Div. 557, affirmed 135 N.E.2d 588, 1 N.Y.2d 782, 153 N.Y.S.2d 51.

Homes excluded from industrial and manufacturing areas

Building zone ordinance of town, as amended, disclosed legislative intent to exclude places of habitation from all industrial and manufacturing areas and to permit them in business areas only conditionally, subject to enumerated controls and safeguards, in accordance with purposes stated in town law.

N.Y.—Hinna v. Board of Appeals of Town of Hempstead, 170 N.Y.S.2d 12.

Inadvertent provision

Paragraph relating to zoning headed "Conflict with other laws" was made a part of that section by inadvertence of codifiers when law was recodified so that paragraph should not be construed in connection with other paragraphs in section.

The court may not legislate in the guise of construction, and may not insert in a zoning regulation a provision not included by the legislative body.⁶⁷ Zoning regulations are construed in the light of their language and the purposes they are designed to serve.⁶⁸ The primary object of zoning is to promote health, safety, welfare, and prosperity of community, and the ultimate purpose is to confine certain classes of buildings and uses to certain localities, and zoning ordinances should be construed with such objects in mind.⁶⁹ Whenever the language of a zoning statute or ordinance is susceptible of more than one reasonable interpretation, that interpretation will be adopted which will best carry out its evident purpose.⁷⁰

That construction of a zoning regulation is to be adopted which will avoid conflict with the constitution.⁷¹ A zoning regulation should be so interpreted as to render it consistent and harmonious with the enabling statute as far as reasonably practicable,⁷² but the amendment of such a statute does not enlarge an existing zoning regulation in the absence of municipal action to that end.⁷³ Zoning and taxing statutes are separate and distinct, and those relating to taxation and exemptions therefrom have no relevancy in a zoning proceeding.⁷⁴

A zoning ordinance must be construed as a whole,⁷⁵ and in such manner as to reconcile⁷⁶ and give effect⁷⁷ to all of its provisions; no part of the ordinance is to be eliminated unless it is plainly and

Impeachment by parol evidence

Where county had zoned landowners' property for light industrial use, county, several years later and when landowners had contracted to sell portion of land for purposes of constructing gasoline service station, could not impeach unambiguous terms of its own zoning ordinance by parol evidence of intentions of the members of the board when they passed it.

Cal.—Griffin v. Marin County, App., 321 P.2d 148.

Land under water

Although ordinance indicated an intent to zone all land, including that under water, within city, such intent alone, without implementation, was not sufficient to bind any land; where zoning ordinance fixed boundaries of districts as shown on zoning map, zoning district lines were drawn on map at shore line, and land under water was not included in a district, land under water was not zoned and no permit was required from city for use of systems of floats and piles for mooring boats.

If two constructions of zoning ordinance were possible the supreme court would adopt the construction upholding the ordinance rather than the one which would defeat it.

Partial invalidity

Where use of property for filling station was permitted under zoning ordinance which provided that in case of conflict with any existing ordinance the most restrictive was to apply, but enforcement of existing ordinance would permit only part of property to be so used resulting in an arbitrary distinction between different kinds and classes of business where conditions were similar, and such provision was separable, the court would elide such provision so as to make the earlier act inapplicable and permit use of all the property for filling station purposes.

clearly ambiguous, or redundant, or contradictory, or impossible of application.⁷⁸ In construing a zoning ordinance, the court will not isolate one part of the ordinance and ignore the plain meaning and import of the other parts, but will give force and effect to all of the provisions of the ordinance germane to the subject involved.⁷⁹ Zoning regulations may not be dissected and considered as a multitude of ordinances having no relation to the general scheme of zoning.⁸⁰

Related regulations are to be read together.⁸¹ Where the building code and zoning ordinances of a municipality both deal with the construction and occupancy of new buildings, they are to be read together and harmonized, if possible, so that all of the provisions of each might be given effect.⁸²

Contemporaneous construction. It has been held that the courts must extend great and often controlling weight to the construction which those administering the regulation have uniformly given it throughout its history,⁸³ but the construction put on a zoning ordinance by city officials and by real estate men cannot alter its meaning.⁸⁴ The question of good faith or bad faith of a property owner in acting on his understanding of the meaning of the regulation cannot aid in the interpretation of the regulation.⁸⁵

Off-street parking. A provision that specified types of buildings hereafter erected afford adequate off-the-street parking facilities is to be reasonably construed.⁸⁶

Place of public assembly

(1) Under zoning ordinance requiring certain number of parking places in relation to number of persons present at one time when maximum functional use of church plant was being made be provided and requiring, in determining maximum functional use, that seating capacity of chapel, auditorium, sanctuary and classrooms, as well as capacity of areas devoted to education and recreational uses, be included, capacity of a cafeteria in church school need not be computed in total, in as much as a "cafeteria" should not be classified as an "area of recreation."

Mo.—McKinney v. Board of Zoning Adjustment of Kansas City, App., 308 S.W.2d 320.

(2) Parking requirements of zoning law are calculated on number of seats and not seating capacity, and, where requirements of zoning ordinance as to ratio of "off-street" parking to seats in defendant's theater were satisfied, use of building as theater was permissible, notwithstanding actual seating capacity may have been larger.

La.—City of New Orleans v. Leeco, Inc., 76 So.2d 387, 226 La. 335.

One-way driveway

Zoning ordinance requirement that there be furnished with multiple dwelling unit parking spaces with adequate "access" to street is not satisfied by driveway suitable only for one-way use, and "adequate" access involves probability that all clearly foreseeable traffic will be able to proceed with reasonable safety to and from parking area.

Cemeteries. The act of a town board in enacting zoning ordinances regulating the use of land for burial purposes is to be read in light of its expressed or apparent purpose in order to determine the meaning of the language used and to avoid thwarting the board's intention as expressed in that language,⁸⁷ and a particular ordinance has been held sufficient to regulate or restrict a cemetery corporation's land, although no listing of uses prohibited was set forth in detail.⁸⁸ Property owned by a cemetery association and reserved for future cemetery purposes is not exclusively residential property within an ordinance requiring fifty per cent of the owners

of such property within a radius of a specified number of feet to consent to the use of adjacent property for a used-auto parts business.⁸⁹

§ 129. — Strict or Liberal Construction

As a general rule, zoning ordinances are subject to strict construction and will not be extended by interpretation to cases not clearly within their scope and purpose.

Since zoning laws are in derogation of common-law rights to the use of property, as discussed *infra* § 131, it has been held that they are subject to strict construction⁹⁰ in favor of the right of a property

Intersecting street

Street which did not go through block in which church's proposed parking lot was located was not an "intersecting street" within zoning ordinance requirement that parking facilities located on opposite side of street from structures used for public assembly be within nearest intersecting streets.

when it is clearly found in the language used.⁹⁴

A zoning ordinance should be liberally construed to accomplish its plain purpose,⁹⁵ and should receive a reasonable and fair construction in the light of the subject dealt with and the manifest intention of the

legislation,⁹⁶ but a provision of such an ordinance for an exception to the general rule established therein must be strictly construed.⁹⁷ However, exceptions favoring property owners should be liberally construed in their favor.⁹⁸

Plain and natural meaning

In the interpretation of a zoning ordinance, words in common use must be given their plain and natural meaning in the absence of any showing that, in the enactment of such ordinance, words and expressions contained therein were used in any other than their usual and ordinary sense.

The courts are ordinarily bound by the express definition in a zoning ordinance of a term used therein.⁴ Where zoning statutes or ordinances contain definitions which require judicial interpretation, the court cannot by such interpretation supply what the legislative body might have provided but which the court by reasonable construction cannot say that such body did provide.⁵

Under the principle of ejusdem generis, general words following particular and specific words in a zoning ordinance are not given their natural and ordinary sense standing alone, but are confined to persons and things of the same kind or genus as those enumerated.⁶

"Public hazard"

Where a zoning ordinance specifically enumerates prohibited types of uses and in general terms prohibits a use which constitutes a "public hazard," the latter expression is interpreted to mean uses which are similar to those specifically enumerated.

Pa.—Tornetta v. Whitemarsh Tp., 67 Pa. Dist. & Co. 591, 65 Montg.Co. 49.

Institutions

As used in city zoning ordinance permitting hospitals, sanitariums, "eleemosynary and public institutions" in a residential district, provided buildings for such uses are at least seventy-five feet from any adjoining lot, quoted phrase must be construed under rule of ejusdem generis to mean institutions of the nature of hospitals or sanitariums.

Pa.—United Cerebral Palsy Ass'n of Philadelphia and Vicinity v. Zoning Bd. of Adjustment, 114 A.2d 331, 382 Pa. 67.

Store, shop, or office

Under doctrine of ejusdem generis, where village restrictions provided that no "store, shop, or permanent office" of any kind or "business of any kind" should be permitted on tract, only the conducting of such trades as that of store, shop, office, or some similar business would be prohibited, and provision could not be extended to include the conducting of a children's nursery and day school.

§ 131. Operation and Effect of Zoning Regulations Generally

Zoning regulations, when adopted pursuant to statutory authority, have the force and effect of legislative enactments necessitating compliance by property owners.

Zoning regulations are in derogation of common-law rights to the use of property.⁷ Zoning acts create rights unknown to the common law.⁸ Zoning restrictions do not constitute an "easement" on property, but they are merely a restraint on the

owner's use of property for the protection of the general well-being.⁹

Such regulations, when adopted pursuant to statutory authority, have the force and effect of legislative enactments,¹⁰ and they constitute the controlling authority as to what buildings may be erected and uses made of property in a given district.¹¹ Accordingly, owners of property subject to such regulations must comply therewith,¹² and the mere fact

- Violation not interfering with object of zoning ordinance**
- Where property owner deliberately violated zoning ordinance restricting area to single-family dwellings by erecting multiple dwelling on property adjacent to small business zone

that a certain business is lawful under the provisions of statute¹³ or that a person has been granted a license or permit by governmental authorities to engage in such business¹⁴ does not authorize him to conduct the business at a location in violation of zoning regulations.

Zoning ordinances are not a grant of power to the landowner; rather, they impose limitations on his rights.¹⁵ A property owner has the right to use his property in a manner permitted by the zoning laws,¹⁶ and, in the absence of establishment of a zoning regulation, there is no presumption that an owner of property is restricted or limited in the use of his property.¹⁷ However, a zoning regulation does not

grant legislative sanction to carry on in a district every kind of business that may not be expressly excluded therefrom, and, if there are reasons apart from the zoning law why a particular business may not legally be carried on in the district, the zoning law furnishes no protection to it.¹⁸ The fact that a zoning ordinance permits a certain use does not exempt the owner of the property from compliance with health ordinances¹⁹ or licensing requirements,²⁰ and a zoning ordinance does not ordinarily supersede building ordinances.²¹

A zoning ordinance or regulation must be applied in accordance with its letter and spirit,²² and the declared purpose of a zoning ordinance to promote

within larger residential zone, finding that use of property for multiple dwelling purposes did not impede, hinder, or interfere with attainment of objectives of zoning ordinance did not authorize property owner so to use the property in absence of facts showing that ordinance was unreasonable or invalid as applying to owner's property.

Location

In determining reasonable necessity and public convenience or welfare under statute permitting building, structure, or land of public service corporation to be exempt from zoning requirement if department of public utilities determines that present or proposed situation of building, structure, or land is reasonably necessary for convenience or welfare of public, it is immaterial whether location has been acquired by eminent domain or by purchase; and fact that proposed location was not the most economic and efficient one or that other sites were more available or that there were no efforts to purchase more suitable sites, in so far as such matters were pertinent at all, were merely matters of fact bearing

on the main question whether the proposed site was reasonably necessary for convenience or welfare of public.

§ 135. — Governmental Bodies

Ordinarily, a governmental body is not subject to zoning restrictions in its use of property for governmental purposes.

Adoption of prior status

City zoning ordinance providing, in effect, that on annexation of any property by city, such property should come into city with same zoning classification that it possessed under regulations of county planning and zoning commission until reclassified by board of aldermen in accordance with city zoning ordinances indicated no adoption of any procedural status that might exist at the time of annexation, and thus did not adopt proceedings pending before county zoning authorities and their action in refusing a special use permit for the annexed area, and did not entitle landowner to proceed in circuit court against city zoning authorities because of refusal of special use permit by county zoning authorities.

Ky.—Hawkins v. Louisville and Jefferson County Planning and Zoning Commission, 266 S.W.2d 314.

Liquor license

Zoning provision of city charter confining sale of alcoholic beverages to certain area in downtown business section applied to annexed areas without further action on part of city, and after annexation liquor control board properly refused to renew liquor licenses for stores located in annexed areas, notwithstanding alleged fact that annexed areas were business areas not suitable for residential purposes.

Water tank

(1) City had right to erect water tank in area zoned as residence zone by city zoning ordinances, since city was not bound by ordinances, and any damages caused to surrounding realty by reason of erection and maintenance of water tank were consequential in nature, and no recovery could be had therefor by owners of realty.

which the government may have from the prohibitions of a zoning ordinance do not extend to a private owner leasing the property for governmental purposes.⁵⁷

The effect of zoning ordinances on the exercise of the power of eminent domain is discussed *infra* § 137.

§ 136. — Collateral Operation and Effect of Zoning Laws

The operation and effect of zoning laws and ordinances on various collateral matters, such as the right to compensation for services as an architect or broker where a violation of the zoning laws is involved, have been the subject of judicial decisions.

The operation and effect of zoning laws and ordinances on various collateral matters have been the subject of judicial decisions.⁵⁸ The violation of a zoning ordinance is not negligence.⁵⁹ An indemnity company, giving bond for the completion of a building, is not relieved from liability where construction of the building is prevented by a zoning ordinance.⁶⁰

Architects. Where an architect is employed generally to draw the plans and specifications for a building of a given style and dimensions, he may

recover for his services on a compliance with the terms of his employment even though the building planned is one which the employer cannot erect at the place at which it was his purpose to erect it,⁶¹ but the rule is otherwise where the lot or place where the building is to be erected is made known to the architect.⁶²

Brokers. A broker is not entitled to a commission for his services in obtaining a lease where the lease is for a use not allowed by the zoning laws.⁶³

Contracts. Where a contract is made for a use of property which the zoning laws do not permit, the contract fails, and any consideration paid should be returned where neither party knew of the zoning law.⁶⁴ However, zoning laws will not vitiate a building contract unless performance of the contract without violating the zoning laws is impossible.⁶⁵

An agreement to convey property to a municipality if it relaxed its zoning regulations is invalid as contrary to public policy.⁶⁶

A conveyance in violation of zoning regulations is not void, but voidable.⁶⁷

Fraud and misrepresentation. Misrepresentations by the vendor⁶⁸ or by the broker⁶⁹ that the property

Permit

Contract to construct a building on a certain lot, which provides that the contractor is to apply for and obtain the necessary building permit, is not rendered an illegal contract within the meaning of the rule that a court will not enforce a remedy to a party who seeks to enforce an illegal contract, by reason of the fact that the construction called for was violative of an existing zoning ordinance so that a permit could not be obtained.

is usable for the purpose desired by the purchaser, when such use is forbidden by the zoning regulations, may support an action for damages for fraud. Failure of the vendor to disclose that the existing use of the premises violates the zoning laws has been held to be actionable fraud.⁷⁰

Intoxicating liquors. A license for the sale of intoxicating liquors may not be issued for a location where such sale is forbidden by the zoning laws.⁷¹

Mechanics' lien. It has been held that one furnishing materials to another to be used on certain realty is charged with knowledge of the existing zoning regulations relative to such realty and may not assert a lien based on such person's violation of the ordinances in building a structure with such materials.⁷²

Merchantable title. Restrictions imposed on property by zoning laws are not encumbrances such as render the title unmerchantable,⁷³ but the violation of such a restriction creates an encumbrance which affects the merchantability of the title to the property.⁷⁴ A nonconforming use which was in operation prior to the adoption of the zoning regulation is not an encumbrance where the zoning regulation permits the continuance of such uses.⁷⁵

Specific performance of a contract for the sale of realty has been refused where an unanticipated change in the zoning laws renders the property un-

usable for the purpose for which the purchaser intended to use it.⁷⁶

§ 137. — — — Eminent Domain

The power of eminent domain is not limited by zoning ordinances, but such regulations are a factor to be considered in determining the value of the property taken.

The power of eminent domain is not limited by zoning ordinances,⁷⁷ and the grant by the state of the power to establish zoning regulations is ineffective to limit the exercise of the right of eminent domain by the federal government or any of its constituted agencies, such as the Tennessee Valley Authority.⁷⁸ The propriety of a taking of property by eminent domain is not defeated by the fact that the purpose for which the property is taken is a use prohibited by the zoning regulations.⁷⁹ Thus it has been held that a town may take property for a use which its own zoning regulations forbid,⁸⁰ and a school district may condemn land for a school although the location of the proposed school is in conflict with the municipality's zoning ordinances.⁸¹

It has been held that the power of eminent domain granted by the state to a railroad takes precedence over the zoning power of a municipality, and that a municipal zoning ordinance may not prevent a railroad use of property.⁸² However, it has been held that a utility company having the power of eminent domain is subject to zoning regulations,⁸³ and that compliance with such regulations is a condition pre-

cedent to its exercise of the power of condemnation.⁸⁴ On the other hand, it has been held that even where the condemning body is amenable to the zoning regulations, its compliance therewith is not a condition precedent to its exercise of the power of condemnation.⁸⁵

Zoning regulations are a factor to be considered in determining the value of property taken in condemnation proceedings.⁸⁶

The applicability of zoning regulations to governmental bodies and public utilities generally is discussed supra § 135.

§ 138. — — — Landlord and Tenant

A lease which provides for a use not in conformity with the zoning regulations is not necessarily illegal where the regulations provide for variances and authorize the continuance of prior nonconforming uses.

A lease of premises to be used in a manner forbidden by the zoning laws may be void,⁸⁷ and is not validated by the landlord's agreement to seek a modification of the law and the tenant's agreement to pay rent while using the premises.⁸⁸ On the other hand, it has been held that a lease which provides for a use not in conformity with the zoning regulations is not necessarily illegal, where the regulations permit the continuance of prior nonconforming uses and provide for variances.⁸⁹ A lease to conduct a business, in a district where such business is prohibited by a zoning ordinance but may be authorized by permit from the local authorities, is enforceable in the absence of a showing of refusal of such authorities to issue the permits.⁹⁰ Similarly, a lease providing for its termination in the event that it is determined that the planned use is forbidden by the zoning laws is not illegal or against public

Va.—Kornegay v. City of Richmond, 41 S.E.2d 46, 185 Va. 1013.

Suitability for prohibited use

(1) Where zoning ordinances or other legal restrictions apply to property which is the subject of condemnation proceeding, whether consideration should be given to the use for which the property is reasonably suitable and adaptable, although prohibited by the zoning ordinance, for purpose of arriving at market value, is dependent on whether trial judge is satisfied from the evidence as a whole that there is reasonable probability that the zoning or other restrictions will be lifted within a reasonable time, in which event the evidence of other uses may be considered, but a contrary conclusion requires an exclusion of the evidence. Tex.—City of Austin v. Cannizzo, 267 S.W.2d 808, 153 Tex. 324.

(2) In city's proceeding to condemn land for site of National Guard armory, testimony offered by landowner to show that parts of lands were adaptable to uses not then permitted by city zoning regulations, such as construction of church or similar institution and modern medical clinic, and evidence that there was a large church across street from land and garden type apartment development in neighborhood thereof, were properly excluded. Mo.—In re Army Site in Kansas City, 282 S.W.2d 464.

(3) In suit by city to condemn a 4.57-acre piece of a larger tract owned by defendants, it was not error, under evidence as to probability of removal of zoning restrictions in the future, to permit a consideration of value of the 4.57 acres for commercial purposes in the face of contrary zoning restrictions.

Tex.—City of Austin v. Cannizzo, supra.

(4) In action by high school district to condemn realty formerly used as farm land but recently zoned by city as residential district, instructions were not prejudicially erroneous as limiting jury's consideration of value to use to which property might be put under existing zoning ordinance.

87. Lease for forbidden use not established

Where plaintiffs leased property to defendants to be occupied for eggs and poultry, wholesale only, evidence that defendants were ordered to discontinue use of premises as such premises were in district zoned com-

mercial and were later found guilty of violating zoning ordinance, and that their application to operate property for sale of eggs and poultry, wholesale only, was rejected, did not establish that plaintiffs had leased premises for a use prohibited by zoning ordinance, and defendants were liable under the lease.

Ill.—Strauss v. Boris, 89 N.E.2d 862, 339 Ill.App. 278.

Subsequent change in zoning law

Landlords were not entitled to terminate holdover tenancy of tenant because of fact that lease, at time of its execution, violated city zoning ordinance forbidding rooming houses, where, before effective date of termination notice, new zoning ordinance permitted use of premises as a rooming house.

policy⁹¹ and rent may be recovered for the period prior to the determination that the use is not permissible,⁹² but not for the subsequent period.⁹³ Where a lease is void under a zoning restriction, the tenant has been held to be entitled to recover rent paid.⁹⁴

Where a covenant by the lessor is made impossible of performance by the enactment of a zoning ordinance, the lessee may treat the lease as terminated,⁹⁵ and a use by a tenant which violates the zoning law gives the landlord the right to void the lease.⁹⁶ The use of housing accommodations in violation of the zoning laws is ground for the eviction of the tenant.⁹⁷ Where a tenancy violates the

zoning regulations, the tenant has been denied the right to regain possession although his eviction was illegal.⁹⁸

§ 139. — — — Nuisance

The fact that an activity is permitted by the zoning laws is not ordinarily conclusive that it is not a nuisance.

Under a statute providing that nothing done under the authority of a statute shall be deemed a nuisance, it has been held that an activity authorized by a zoning ordinance cannot be a nuisance.⁹⁹ Ordinarily, however, the fact an activity is permitted by the zoning law does not mean that it is not a nuisance,¹ but the fact that the activity is permitted

91. Mass.—Adamsky v. Mendes, 96 N.E.2d 236, 326 Mass. 603.

Lease conditioned on obtaining permit

Lease provision that, in event it were impossible to secure approval by zoning board of lessee's occupancy, advanced rent would be refunded and contract would be considered null and void, constituted a condition precedent, and lease was nullified when it was possible only to procure from zoning board a permit for use of premises for less than full term of lease.

Ohio.—Kallins v. Rex, Inc., App., 125 N.E.2d 371.

Revocation of zoning variance

In proceeding for declaratory relief to determine rights of parties under ambiguous lease, which provided for its termination on determination, by duly constituted authority, that operation of business specified in purpose clause was contrary to municipal zoning ordinance, evidence on question whether lease was terminated by revocation of zoning variance granted lessees was admissible to prove that event contemplated by parties had occurred.

Where municipal authorities, acting under city ordinance allegedly prohibiting rear-door deliveries, issued a cease and desist order forbidding lessee to make rear-door deliv-

eries to leased premises, the order, whether legal or merely under color of law, effectively interfered with lessee's right to rear-door deliveries, and lessee was under no obligation to contest the order in order to contend successfully in action for rent that there had been a breach by lessor of covenant in lease for rear-door delivery, so as to relieve lessee from liability for rent after moving from premises.

96. N.Y.—47 East 74th St. Corp. v. Simon, 69 N.Y.S.2d 746, 188 Misc. 885.

Trivial violation insufficient

Even if the having of gold lettering on windows of drug store amounted to violation of zoning ordinance prohibiting signs in that area, and as such was violation of covenant in lease, such violation was of a trivial and inconsequential nature, insufficient for forfeiture of long term lease.

N.Y.—Madison Stores, Inc. v. Enkay Sales Corp., 142 N.Y.S.2d 132, 207 Misc. 1091.

Waiver

Where exterior signs and window lettering had been used on leased premises for many years, and landlord and his predecessors, with knowledge of such use, had accepted rent without any objection that such use was violative of zoning resolutions, or covenants of lease, landlord waived alleged breach of covenant of lease that lessee would abide by such zoning resolutions, and should be estopped to maintain summary proceedings to recover possession of premises because of violation of zoning resolutions and covenant in lease requiring lessee to abide by such resolutions.

License

Where defendant occupied plaintiff's garage as a habitation under a license from plaintiff, and municipal authorities asserted that such occupancy violated zoning ordinance and demanded that plaintiff evict defendant under pain of criminal action, defendant's rights as licensee did not impose on plaintiff obligation of securing an adjudication nullifying demand of municipal authorities.

Where freight terminal was located in district zoned for business but was located on boundary near residential district, and employees at terminal worked all night loading and unloading trucks and sorting merchandise, making loud noises so as to interfere with sleep of persons in the area, there was a "nuisance" and operation of terminal would be enjoined between 8 P.M. and 7 A.M. under the zoning laws is to be considered in determining whether or not it is a nuisance.² It has been held that zoning laws are conclusive as to what is or is not a public nuisance, but that they are not conclusive on the question of private nuisance.³

The use of property in violation of a zoning law has been held to be a nuisance per se.⁴ The fact that the ordinance under which the use is prohibited is invalid does not mean that the activity may not

be treated as a nuisance.⁵

§ 140. — — — Restrictions Imposed by Act of Parties

An ordinance which allows establishment or maintenance of a funeral home or undertaking establishment in a district zoned either for residential or commercial purposes is permissive only, and not controlling as to whether such undertaking establishment would constitute a nuisance which might be enjoined by equity court.

Mich.—Rockenbach v. Apostle, 47 N. W.2d 636, 330 Mich. 338.

Use not authorized

Provision in city zoning ordinance that there should be excluded from industrial districts those uses which may be obnoxious or offensive by reason of emission of odor, dust, smoke, gas, noise, or vibration makes it unlawful for occupants of industrial districts to maintain such nuisances whether they affect industrial workers in other industries or residents of nearby residential districts.

La.—Ryan v. Louisiana Soc. for Prevention of Cruelty to Animals, App., 62 So.2d 296.

Manner of use

City, by granting privilege to operate "boiler works" in district zoned for heavy industrial use, did not imply that such works could be conducted in a way and manner to amount to a private nuisance.

La.—Ellis v. Blanchard, App., 45 So. 2d 100.

Spot zoning

Nature of the business of operating a private garbage dump is inherently obnoxious in a residential area, and spot rezoning of the area proposed to be used for the dump does not change residential character of the community in general or permit a nuisance in fact to exist.

Tex.—Witte v. Sebastian, Civ.App., 278 S.W.2d 200.

Change expressly negated

Without deciding whether such ordinance may lawfully change use of

ity of the covenant thereby affected.⁷ Thus, the action of the zoning authorities of a city declaring land in a restricted area to be a business district does not have the effect of destroying the restrictive covenants,⁸ or prevent enforcement thereof,⁹ although it may show, or be persuasive evidence of, the substantial transformation of the district into a

commercial district.¹⁰ On the other hand, the effect of the amendment of a zoning ordinance may be to wipe out, to all intents and purposes, restrictive covenants imposed by a deed by the city.¹¹

Private restrictions subsequent to valid zoning restrictions may be more, but not less, restrictive.¹²

B. ARCHITECTURAL AND STRUCTURAL DESIGNS

§ 141. In General

General rules apply in the construction and operation of zoning restrictions dealing with the architectural and structural design of buildings.

of zoning ordinances or regulations apply in the case of restrictions imposed with respect to the architectural and structural design of buildings in certain districts,¹³ such as the position of buildings with respect to the street,¹⁴ the number of rooms,¹⁵ floor space¹⁶ or area and cubic feet,¹⁷ and the mini-

property contrary to restriction in deed it was held that a zoning ordinance, designating street as business street, did not govern as against restrictions in deed, where ordinance expressly negated any attempt to annul or abrogate covenants or agreements.

Mich.—Long v. Norton Tp., Muskegon County, 42 N.W.2d 764, 327 Mich. 627.

17. "Principal building"

The proposed construction of a building, which did not meet zoning ordinance requirements with respect to area and cubic feet of a "principal building," was not violative of zoning ordinance, where the construction did not change the original building which had been in existence for many years but was confined to the construction of an addition thereto, and hence was not a principal building within the meaning of the ordinance.

Mich.—Hanson v. Huetter, 62 N.W.2d 663, 339 Mich. 130.

mum cost of buildings.¹⁸ An ordinance regulating the construction of buildings on lots applies to land under water, the word "land" including water.¹⁹

Height of buildings. Zoning provisions regulating the height of buildings are reasonably construed.²⁰ The "front wall" of a building within a zoning ordinance limiting the height of such wall is the one fronting on the street, and not the one designated as such by the builder, and the height of the "front" wall of a building must be measured from the street side of the building, notwithstanding the entrance is at the rear.²¹

An exception in a zoning ordinance limiting buildings to two and a half stories and a specified maximum height except in case of church steeples, chimneys, or flagpoles is to be read as containing words of exclusion having a generic rather than a specific connotation to avoid undue discrimination in relation to purposes to be served by the zoning.²² Where a single lot lay in a residential use district, in which apartment houses were permissible, the fact that the front part of the lot was in a one and one-half times height district, while the rear part was in a forty-foot height district, did not preclude

the use of the part of the lot in the forty-foot height district as the required rear yard for an apartment house to be erected entirely on the part of the lot in the one and one-half times height district.²³

Rear lot line. In determining what is the rear lot line for zoning purposes, the general location, the manner in which the lots have been laid out, the customs of surveyors in that respect, the uses to which the lot has been and will be put, the practices of public officers charged with duties with respect to it, and the pertinent fact touching the customs of the neighborhood may be considered; and in the light of such considerations, it was held not to have been established as a matter of law that the long side of a rectangular lot adjacent to plaintiff's lot was the "rear lot line" of another lot within a zoning ordinance creating a building restriction.²⁴

Word "alter," as used in a building ordinance making it unlawful to erect any new building or to rebuild or alter the front of any existing building without making it recede to a building line established by the ordinance, means a material or substantial change.

Pa.—Colonial Federal Sav. & Loan Ass'n v. Porreca, 59 Pa.Dist. & Co. 163.

First sentence not overriding last sentence of ordinance

The last sentence of a zoning ordinance, which provides that in no case shall a building be required to set back further than the maximum distance established for the zone in which it was situated, does not modify or override the first sentence of the same ordinance which provides that when fifty per cent or more of

as used in an ordinance with respect to setback of existing buildings within the same "block front," includes only realty located on and fronting on the particular street, and not realty on the square block,²⁶ and a court on which a proposed tenement fronted has been held not to be a "street" within a provision relating to setbacks.²⁷ The public's acquisition by user of rights for highway purposes over some land between a highway right of way and river's edge cannot properly be considered in fixing location of building line established by town ordinance prohibiting erection of buildings fronting on such highway within ninety feet from center of the right of way.²⁸

A canvas and wood awning supported by iron piping, in the absence of proof to the contrary, is not a part of a building, within the scope of an ordinance requiring a specified setback from street property line to nearest part of the building, so as to preclude the erection of such awning on a building extending to the setback line;²⁹ and a front porch of permanent construction with solid foundation and roofing and firmly attached to the house is a "building" within an ordinance prohibiting the extension of a building beyond the official building line.³⁰ Also, where building line was ten feet back from property line and vestibule was constructed between the two lines, vestibule was constructed in violation of setback requirement of zoning resolution.³¹ A zoning ordinance permitting "a bay win-

dow" to project into a yard within certain distance was held to permit a single bay window only.³²

A zoning ordinance provision requiring at least two hundred feet between property lines and farm structures used for customary incidental farming occupations, and enumerating certain uses, is intended to remove neighbors from conditions customarily surrounding farming occupation, and was applicable not only to types of farm buildings enumerated but to all those buildings whose uses were usual accessories to occupation of farming.³³ An ordinance which required all buildings and accessory buildings on corner lots to conform to front yard requirements on side street requires only the twenty feet setback imposed on the side street and did not require forty feet setback which existed on intersecting street.³⁴

§ 143. Single-Family or Multiple Dwellings

Whether a particular building or structure is proper or is in violation of restrictions imposed by a zoning regulation concerning the number of families for which structures may be built depends on a construction of the language used in the regulation and the nature of the proposed use.

"Single housekeeping unit"

(1) Where zoning ordinance definition of word "family" included one or more persons living as a "single housekeeping unit," quoted phrase was not in itself an exclusionary provision but merely declared negatively the interpretation that should be given to word "family," and the negative should not outweigh the positive; and use of residence as home for about twenty nurses, who would have their own rooms, either singly or in pairs, have joint use of parlor, have limited kitchen facilities for lunches if they furnished their own food, and have a matron or housemother in charge of housekeeping, constituted use of such home by a single "family" within zoning ordinance placing such home in a one family zone, since home was occupied by only one "housekeeping unit."

Ky.—Robertson v. Western Baptist Hospital, 267 S.W.2d 395.

(2) Zoning ordinance defining family as one or more individuals living, sleeping, cooking, or eating on premises as a single housekeeping unit was not intended to restrict use and occupancy to members of single family related within degrees of consanguinity or affinity; and group of priests and lay brothers merely living together in a single housekeeping unit constituted "family" within zoning ordinance restricting use of buildings to single-family dwelling and defining family as one or more individuals living, sleeping, cooking, or eating on premises as single housekeeping unit.

(3) A proposed use of college building as a residence for about sixty student members of religious order, which conducted the college, would not deprive the building of its character as a one-family dwelling for purposes of city zoning ordinance, and owner of such building would not be deprived of benefit of yard restrictions applicable to one-family dwellings under city zoning ordinance, even though the building in use might be accessory to the main structure or use.

N.Y.—Application of Laporte, 152 N.Y.S.2d 916, 2 A.D.2d 710.

(4) Under zoning ordinance, providing that no dwelling shall be

the word should not be construed, when not so defined in the ordinance itself, as limited in its meaning to individuals sleeping, cooking, and eating as a single housekeeping unit.⁴⁰

A motel primarily designed for temporary occupancy by transients is within the provision of an ordinance permitting erection of "multiple dwellings," where the quoted term was not defined by the ordinance which provided that undefined words should be construed as defined in the state housing code which classified hotels, lodging houses, boarding houses, furnished room houses and dwellings similarly occupied as multiple dwellings.⁴¹

§ 144. Area of Building Lots or Plots

Zoning restrictions as to the area of building lots or plots are construed in accordance with the language used, the purposes served, and the particular facts and circumstances of the case.

Zoning regulations as to the area of building lots or plots are construed in accordance with the language used, the purposes served, and the particular facts and circumstances of the case.⁴² The meaning of the word "plot" as used in an ordinance limiting intensity of use depends on the sense in which the legislative body used the word.⁴³ The word "lot" has been said to refer generically to any undefined parcels or units of land, identifiable by ownership or use, but without limitation or standardization in any degree as to shape, size, or manner of development except as further regulated by other express provisions of the ordinance in specific contexts.⁴⁴

A zoning ordinance providing in its definition section that a lot is a parcel of ground which is occupied by one principal building and accessories, but nowhere limiting a lot in a business district to only one building, does not prohibit a property owner from construction of a welding shop at the rear of his lot within a business district.⁴⁵ A zoning ordinance defining a lot as land occupied or to be occupied by a building and its accessory buildings together with required open spaces included a tract which was to be occupied by a building, even though the tract was not laid out as a lot but was the remainder of the subdivision after lots were laid out.⁴⁶ Under a zoning ordinance defining a lot as any parcel of ground under one ownership, a description of which was filed with building inspector, the owner of one lot, who acquired an adjoining lot but did not file the description mentioned in the ordinance, did not thereby cause a joinder of the two into a single "lot."⁴⁷

Where a house was placed partly on one lot owned by defendant and partly on the one half of an adjacent lot also owned by him, and the combined area of property owned exceeded fifteen thousand square feet, he was entitled to build another house on such property under a city ordinance providing that minimum site area should be one lot, or seven thousand five hundred square feet of lot area for each dwelling, notwithstanding that on the lot on which defendant proposed to construct a house, without including the area of the other one-half lot owned by him, there was not sufficient land to provide a seven

erected, altered, or used except as a one-family dwelling, and defining family as any number of individuals living and cooking together as a single housekeeping unit, test of whether any house is being used for a single-family dwelling house is whether it is being occupied by only one housekeeping unit not whether it is being occupied by one-family unit as the term might otherwise be defined; and where four families used a fourteen-room house together, two of them continuously and two of them only during the summer, but did not occupy separate quarters within the house and the lodging, cooking, and eating facilities were common to all, house was being used as a single-family dwelling within the ordinance prohibiting use of any building except as a one-family dwelling and defining family as any number of individuals living and cooking together as a single housekeeping unit.

Power of board

thousand five hundred square feet site.⁴⁸ A zoning ordinance limiting uses on one lot to principal dwelling and accessory uses, when read in connection with other ordinances which required, among other things, that lots be two acres in size, would not be construed to forbid two dwellings on a five and one-half acre parcel of land, where dwellings were so situated that they would not violate the two-acre lot requirement.⁴⁹ Although a landowner had acquired two adjoining tracts of slightly more than six thousand square feet each at different times from different sources, and although lots were recorded as separate lots, both lots, as one unit, became subject to zoning restrictions prohibiting the building of a new dwelling on a lot of less than twelve thousand square feet and the landowner could not after the conveyance of one of the lots on which a house was situated, erect a house on the other lot, in absence of a variance permit, although the ordinance provided that the restriction should not prevent the erection of a building on a lot containing a smaller area than twelve thousand square feet.⁵⁰

A lot containing a home and a detached garage with an apartment may not be divided where the division would result in a violation of a zoning provision requiring a minimum lot area of ten thousand square feet.⁵¹ A zoning ordinance, which referred to the lot area requirements as to single-family dwellings, two-family dwellings, and multiple dwellings was held to be without application to a mixed-use building where the ordinance was silent with respect thereto.⁵² Where a zoning ordinance expressly stated that the minimum lot area requirements were to be the same in a central business district as in a wholly residential area, the ordinance would apply to a building containing retail stores on the street floor and apartments in the upper two stories located in the central business district.⁵³

The term "any such family dwelling" within a township zoning ordinance providing that any lot of record on effective date of resolution may be used for any single-family dwelling irrespective of the area of said lot was held not to mean that only one single-family dwelling could be built on a given

lot.⁵⁴ Where a zoning ordinance provided that single-family dwellings could be erected on lots separately owned at the time of the passage of the ordinance, a contention that conveyances had been made in bad faith to comply with the ordinance could not defeat a claim of single separate ownership as against the recorded deed.⁵⁵ Where defendant's proposed structure would be a small frame building that would be from five to eight feet in front of the main building and the two structures would be connected at the foundations and at the roofs and there would be a concrete walkway between the two buildings, but there was no indication that there would be an opening in a division wall to permit passage from the new building to the old, the proposed structure would violate a zoning ordinance providing that only one building may be placed on a single lot.⁵⁶

Alley as part of lot. The bed of a nine foot alley at the rear of a lot could not be included in determining whether or not a lot met the area requirements of a zoning ordinance, notwithstanding the fact that the title to the bed of the alley was held by the lot owner.⁵⁷

Gravestones and monuments. Under a zoning ordinance provision that in any residence district, principal buildings shall not occupy more than fifty per cent of the area of the lot on which they are located, graves, gravestones, and similar monuments are properly excluded in determining the area of a lot occupied by a church, since they are not "buildings."⁵⁸

Separation by thoroughfare. Tracts of land, separated by a public thoroughfare, do not constitute a single lot.⁵⁹

An undivided twenty-three-acre tract on which were located interconnected buildings, including a cottage and barns, grouped around a cobbled court and formerly accessory to a mansion house located on larger tract and sold separately to others, was held to be a "lot" within the meaning of a township zoning ordinance and subject to prohibition therein against more than one dwelling on a lot ex-

§ 145. Yards

General rules of construction of statutes and ordinances apply in construing zoning ordinances containing provisions as to yards.

General rules apply as to the construction and operation of zoning regulations with respect to yard space.⁶¹ The provisions as to yards apply only to uses permitted by the ordinance and do not apply to a sewerage lift station.⁶² An ordinance, requiring a side yard between the building and the lot line from the street line to the rear yard, does not require a side yard where there is no rear yard.⁶³ A provision in zoning ordinance that for a building of accessory use or garage no yard except on a street frontage is required refers to accessory buildings which are separate and distinct from other structures, and a garage constructed as a part of a residence and architecturally in harmony with the house of which it is a part is not such an "accessory building."⁶⁴

A covered porch of a usual type at the front of a dwelling house cannot be counted in determining whether there is a yard of not less than twenty-five feet to front line of building, as required by zoning ordinance, where it also requires a yard of not less than fifteen feet to front line of open porch or paved terrace.⁶⁵ A requirement of a zoning ordinance that there be a front yard of not less than twenty-five feet from street property line to front line of building in residential district could not be avoided by construction of provision in ordinance for side yard of not less than five feet on each side

of building in such district as permitting lot owners to face building toward alley on one side of lot and consider space between building and street as side yard instead of front yard.⁶⁶ Where entrance of four-family dwelling proposed to be constructed on corner lot faced street on long side instead of short side of lot, "front line" of proposed building was on street which building faced and controlled application of zoning ordinance provisions with respect to front, rear, and side yards.⁶⁷

A provision that side yard regulations applicable to interior lots should apply to corner lots except in case of "reversed frontage" refers to the situation where a lot owner has caused the building to face what would otherwise be the side or intersecting street.⁶⁸

§ 146. House Trailers

A house trailer may become subject to zoning regulations when it is removed from the highway, connected with sanitary facilities and electricity, and used as living quarters.

A house trailer may be subject to zoning regulations with respect to architecture and structure when it is removed from the highway, attached to the soil, and occupied as living quarters.⁶⁹ A house trailer which has been placed on cinder-blocks and connected to the water and sewage systems of the area and to the power lines, is a dwelling within the purview of a zoning ordinance which limits residences to single-family detached dwellings and defines such a dwelling as "a detached building designed for or occupied by one family and having no party wall in common with an adjacent house."⁷⁰

A trailer need not be attached to the land by a permanent foundation to subject it to zoning regu-

lations;⁷¹ the connection of the trailer to sanitary facilities, including a septic tank and a well, and to an electrical source was held to affix the trailer to the land for zoning purposes.⁷² Similarly, it has been held that a trailer is a dwelling subject to the zoning laws where it is connected to the water mains, sewers, and electric lines.⁷³

An ordinance may fix a time limit after which a house trailer shall be deemed to have lost its mobility and become a dwelling.⁷⁴ Thus, a trailer occupied as living quarters at the same location for more than thirty days was held under such an ordinance to be a dwelling and subject to a provision prescribing a certain square foot area for single-family dwellings.⁷⁵ A provision in a zoning ordinance requiring a minimum lot area of two thousand four hundred square feet per family for a one-family dwelling may properly be enforced against house trailers brought into a trailer camp subsequent to the enactment of the ordinance.⁷⁶

A temporary and movable trailer on wheels was held not to be a "house" for purposes of a zoning bylaw permitting only one-family detached houses in a single residence district.⁷⁷ Where a property owner rented part of lots for parking and servicing of house trailers and automobiles at a certain rate per week, and each trailer was occupied by one family as living quarters, and trailers contained facilities for cooking, eating, and sleeping, and toilets and showers were provided by property owner in rear of area, and some trailers were detached from automobiles and placed on blocks, the trailers

were not one or two-family "dwellings" within a zoning ordinance.⁷⁸ On the other hand, trailer homes have been regarded as single-family dwellings the use of which is permissible in a residential district classified for "every use as a dwelling house, double house, or duplex house."⁷⁹

§ 147. Garden Type Apartments

A garden type apartment house, built like a row of individual houses, but operated, used, and owned as a single unit, may be taken as one, rather than a series of buildings, in so far as zoning requirements are concerned.

A garden type apartment house, built like a row of individual houses, but operated, used, and owned as one unit, may be taken as one, rather than as a series of buildings, in so far as some zoning requirements are concerned.⁸⁰ An ordinance prescribing that part of each lot should be devoted to a "yard," which is defined as "the clear unoccupied space on the same lot with the building," does not prevent the use of yards for parking spaces for automobiles,⁸¹ and the areas set aside for automobile parking space are to be regarded as open or unoccupied space in computing area, yard spaces, and density under zoning regulations.⁸²

A garden type apartment project covering less than five acres but providing separate lots for each of the three proposed buildings was not within a zoning ordinance permitting garden type apartments without providing a separate lot for each building, provided the area of such project should cover at least five acres of land.⁸³

Fair balance

Reasonable interpretation of zoning ordinance would require that

of the regulation as to the uses which are permitted or which are prohibited in particular districts will be interpreted according to the common and approved usages of language without enlargement or restriction.⁸⁵ The name by which a business or use is designated or called is not of controlling importance in determining whether the use comes within the terms of the ordinance, and the question is determined by the activities or character of the business or service.⁸⁶

A zoning law may limit the use of land as well as the use of buildings.⁸⁷ The erection of a building which is to be used in part for a permitted use and in part for a use not permitted is a violation of the zoning ordinance.⁸⁸ Unless the zoning regulation otherwise provides, a higher use, such as a

residential use, is permitted in a less restricted district, such as an industrial or commercial district.⁸⁹

Some provisions have been construed as excluding all uses not expressly permitted and as permitting only those uses for which definite provision is made,⁹⁰ even though the ordinance does not specify the prohibited uses or expressly provide that uses not permitted are prohibited.⁹¹ However, under other provisions certain uses not expressly mentioned have been held permissible in particular districts.⁹² The fact that a certain use is not expressly prohibited by a zoning ordinance does not render it permissible if it comes within the scope of other prohibited uses.⁹³ Where certain specific uses are named in a zoning regulation and then follows a general term, the rule of ejusdem generis may apply

court seek to achieve fair balance between purpose of preserving true character of neighborhood by excluding new uses and structures prejudicial to restricted purposes of area and gradual elimination of such existing structures and uses and purpose of protecting owner's property or existing residence, building, or industry from impairment which would result from enforced accommodation to new restrictions.

character does not necessarily constitute a violation of a zoning ordinance.³ So, the excavation of sand for property in a residential district and the erection of temporary structures thereon, used solely as adjuncts to such excavation, has been held not a violation of a zoning ordinance prohibiting the intrusion of business buildings in a residential district.⁴ It has also been held, however, that structures are not exempt from the prohibition of a zoning ordinance even though they are temporary in the sense that they can be removed and set up elsewhere.⁵

§ 149. Residential Districts

Provisions establishing residential districts are reasonably construed in the light of the language used, the purposes served, and the facts and circumstances of the particular case.

Provisions establishing residential districts or areas are to be reasonably construed in the light of the language used, the purposes served, and the facts and circumstances of the case.⁷ Particular uses of property have been held to be permissible or have been held to be excluded from such residential districts.⁸

The construction, operation, and maintenance of electric power transmission lines, in a residential district have been permitted.⁹ The incidental use of a dwelling by its occupant for business purposes, as by using a desk and telephone in his home or by keeping a light truck in a residence garage, is not

prohibited in a residential district,¹⁰ and the construction and use of a driveway on residential property as a means of access to and egress from adjoining business property has been permitted.¹¹ The maintenance of a little league baseball field is not the pursuit of a "trade" or "industry" within zoning ordinance prohibiting such pursuits in a residential zone.¹²

The removal of the top soil of land to a depth of approximately twelve inches is not a violation of an ordinance restricting the area to residential uses,¹³ and a construction company excavating gravel from its premises and using such gravel in performing a road construction contract requiring the company to furnish certain quantities of gravel and to do the work and to turn over to the commonwealth a completed highway, and providing that the company is to be paid for gravel at a certain price per cubic yard, does not violate a zoning ordinance forbidding the removal of gravel for sale, since the contract is for "work and labor" rather than for "purchase and sale of personalty."¹⁴ Where the purpose in removing sand and gravel from a hill located within a zoning district is primarily a commercial one, such use of the hill is not within the uses permitted by a zoning ordinance making the area a residential district.¹⁵

Where an area is zoned for residential purposes only, the use of a building for commercial purposes is illegal.¹⁶ The maintenance of a real estate office in a residential district is prohibited by a zoning ordinance which permits uses customarily incidental to and subordinate to residential use and not involving the maintenance of a store, shop, or commercial enterprise.¹⁷ The construction by the owner of a road across a lot zoned by the county for residential use is not a permitted use.¹⁸

Operating or storing commercial trucks and ve-

hicles on a vacant lot in a residential district and using the lot as an entrance to, or exit from, the adjoining premises, which are in a business district, and maintaining tanks for the storage of gasoline on the lot, are business or commercial uses not permitted.¹⁹ A proposed double garage for storing, servicing, and repairing feed grinders and motor trucks and for taking of orders for grinding, where fuel is to be stored in large tanks on premises, is a "business building" for business purposes within an ordinance prohibiting the erection of such a building in a residential district.²⁰ One using his yard in a one-family zone for the purpose of removing parts from automobiles and trucks and making racing cars which he drove as a hobby violates an ordinance providing that no land in such district shall be used except for one-family dwellings, churches, schools, and other specified uses not including such use of the yard.²¹

Where an area was previously zoned for one-family houses only, a provision permitting conversion into multiple dwellings provided that there is no major structural change in the exterior of the building impliedly prohibits the erection of apartment houses in such district.²² The proposed use of land in single residential district in one community as a rear yard and service entrance for an apartment house located in an adjoining city is violative of a zoning bylaw of the community, and the incidental presence of a lawn and shrubs, trees, and flowers does not transform the rear yard and service entrance into the permitted use of a "park" or "ornamental grounds."²³

Model homes. While the use of homes as model homes on a tract sought to be developed may not be violative of a zoning ordinance restricting such tract to residences only,²⁴ where homes are being used as model homes for purpose of inducing sale of other structures to be erected at another location

§ 150. — Apartment House Districts

Ordinances creating and regulating apartment house districts are to be reasonably construed.

Ordinances creating and regulating apartment house districts are to be reasonably construed.²⁶ A provision in a zoning ordinance permitting the conduct of specified types of business within the ground or street floor of apartment houses or buildings fronting on stated streets does not nullify prior provisions of the ordinance prohibiting the erection of buildings and the use of premises in the district for business.²⁷ A city ordinance authorizing in an apartment district uses customarily incident to enumerated uses when situated in the same dwelling, including home occupations such as the office of a physician, surgeon, dentist, musician, or artist, does not authorize operation of a one-chair beauty shop.²⁸ A freight terminal has been prohibited in an apartment house district.²⁹

§ 151. Business Districts

Under the provisions of particular ordinances, various uses have been permitted or prohibited in business districts.

Under the provisions of particular ordinances, various uses have been permitted or prohibited in

business districts.³⁰ Where the ordinances establish a business zone without defining the term "business," it will be construed to mean the barter, sale, or exchange of things of value.³¹ A zoning regulation prohibiting in a business district any kind of manufacturing or processing of products other than that incidental to the conduct of a retail business on the premises is ambiguous and is not to be extended to prohibit a use not clearly defined or fairly implied.³²

An ordinance creating a retail or local business district is intended to permit the conduct in the district of a retail business and of any local business not retail in character.³³ A print shop business is a local business and is permitted in such a district.³⁴

The fact that a use is permitted in an industrial district does not mean that it is prohibited in a business district.³⁵ Where a lot is adjacent to a residential district but located in a business district, the use of its back or side yards is governed by the regulations with respect to business districts and not by those dealing with residential districts.³⁶

a business district building to be used in whole or in part for any enterprise for profit or convenience and service of, and dealing directly with, and immediately accessible to, ultimate consumers, and not injurious to adjacent premises or occupants thereof, does not prohibit a combination candy factory and retail sales plant in the district.³⁹

A gasoline filling station has been excluded from a business district;⁴⁰ and where lunch wagons, gasoline filling stations, new or used car lots, garages, or automobile repair shops are prohibited in a business zone, property in the zone may not be used for the storage of moving trucks, vans, and trailers.⁴¹ Manufacturing, other than light manufacturing, may be prohibited in a business district.⁴²

Preparation and sale of doughnuts. The use of premises for the preparation and sale of doughnuts has been permitted in a business district whether such use is that of a retail store or a restaurant.⁴³ Under a zoning ordinance permitting in a business district a store for the conduct of a retail business and drive-in retail establishment and other similar uses, but not including any use specifically listed in a less restricted district, and permitting in a commercial district a plant for the manufacture of bakery products, a building for the baking and retail sale of doughnuts and other bakery goods on the premises may be constructed in a business district.⁴⁴

§ 152. Commercial Districts

Ambiguities and conflicts as to the uses permitted in a commercial district are to be resolved in favor of the owner's full use of his premises.

Where a zoning ordinance creates a commercial district, ambiguities and conflicts as to the uses permitted are to be resolved in favor of the landowner's full use of his premises.⁴⁵ An ordinance establishing a commercial district and specifying the uses permitted therein does not limit permitted uses to

such as will suffice for the needs of the residents of the neighborhood.⁴⁶ A use permitted in a manufacturing zone is not thereby excluded from a commercial zone.⁴⁷

Various uses have been permitted or prohibited in commercial districts.⁴⁸ A gas station,⁴⁹ a new-car salesroom,⁵⁰ and a truck distribution terminal⁵¹ have been permitted. The operation of a tire recapping plant may be permitted, although the ordinance excludes the manufacture of rubber goods and the manufacture or treatment of rubber from such area.⁵²

Under a zoning ordinance authorizing, in a commercial zone, the manufacturing of, inter alia, clay or glass products and products from bone celluloid, cloth cork, feathers, etc., premises in such district may be used for the manufacture of automobile parts.⁵³ The word "sale" as used in city zoning ordinance providing that property in a commercial district may be used for the sale or storage of goods, merchandise, or commodities in stores or showrooms, includes sales at wholesale as well as at retail.⁵⁴

A ready mixed or transit mixed concrete plant is an industrial plant which may not be maintained in a general commercial district created by county zoning ordinance which permits the manufacture or processing of concrete in heavy industrial districts, notwithstanding part of mixing may have taken place when trucks were in transit.⁵⁵ While a zoning ordinance provision that "other similar business, trades or uses which in the opinion of the council are not more obnoxious or detrimental to the welfare of the particular community than the businesses, trades or uses herein in this section enumerated" could be maintained in a commercial zone is too vague and uncertain to constitute valid legislation, a use, not one of those expressly permitted for such a zone, is not, because of the invalid provision, thereby authorized; and, until listed as a

permissible use, a bus-storage facility use is prohibited in such a commercial zone.⁵⁶

§ 153. Industrial Districts

Manufacturing is authorized in an industrial zone.

An ordinance establishing an industrial zone without defining the term "industrial" as used therein authorizes the use of property within the district for manufacturing.⁵⁷ Under a provision permitting industrial uses in an industrial zone as well as any use permitted in a residential or commercial district, except that the erection or operation of structures or uses for any purpose which constitutes a nuisance is not permitted, the use of a building as a labor camp is not a nuisance and is permitted in an industrial zone.⁵⁸ A provision in a zoning ordinance prohibiting the erection in an industrial area of any building for use so dangerous as to constitute a public hazard does not justify refusal to permit a truck terminal, even though the trucks may constitute a traffic hazard, but must be limited in its construction to such public menaces as fireworks factories, poison manufacturing plants, etc.⁵⁹ Au-

thorization for a "freight terminal" in an industrial district includes a railroad, waterway, and motor freight terminal.⁶⁰

Where land adjacent to land then owned by a light company was already purchased, or being purchased, by the company at the time of the enactment of a zoning ordinance putting property owned by a light company, and extensions thereof adjacent to and contiguous to company's existing buildings, in an industrial district, the land purchased is included within the industrial area.⁶¹

(1) Under zoning resolution prohibiting maintaining of a sign within two hundred feet of an arterial highway, advertising a business or service, terms "business" and "service" had a commercial meaning and related to an activity performed for

§ 155. Other Terms and Uses

In determining the operation and effect of zoning regulations as permitting or excluding particular uses of property, the courts have construed various provisions of, or terms in, such regulations.

In determining the operation and effect of zoning ordinances or regulations as permitting or excluding particular uses of property, the courts have construed various provisions of, or terms in, such regulations,⁶⁹ such as "cabana,"⁷⁰ "commercial enterprise,"⁷¹ "commercial purposes,"⁷² "contractor's

plant and storage therefor,"⁷³ "electric plants,"⁷⁴ "freight terminal,"⁷⁵ "frontage,"⁷⁶ "industrial establishment,"⁷⁷ "industrial process,"⁷⁸ "oil filling station,"⁷⁹ "public or semi-public buildings,"⁸⁰ "store, shop, or permanent office,"⁸¹ and "structure."⁸²

Accessory building

Building used as laundry, power house, and ambulance garage, in which gasoline and fuel were stored but no patients or staff members housed, was not a "hospital building" within zoning resolution establishing prohibited area within two hundred-foot radius of hospital buildings, and gasoline service station could therefore be properly extended to a point within two hundred feet thereof.

"*Neighborhood*" as used in a zoning ordinance prohibiting buildings whose architectural appeal and functional plan is so at variance with the other structures in the immediate neighborhood as to cause substantial depreciation in the property values thereof extends further than the adjoining property and varies according to the conditions.⁸⁵

"*Office*." The term "office" as used in a zoning ordinance is to be construed in accordance with its ordinary and generally accepted meaning.⁸⁶

"*Office building*." Under ordinance permitting use of premises for "office building," quoted phrase identifies a type of business enterprise in which the supplying of office space to tenants is the primary business conducted by the owner on the premises.⁸⁷

"*Profession*"; "*professional*." The words "profession" or "professional" may be used in different senses in zoning ordinances depending on the circumstances.⁸⁸ In a narrow and classic sense, the term "profession" should be confined to the so-called learned professions of theology, medicine, and law;⁸⁹ while in a broad sense, the term "profession" may be considered as including an occupation, if not purely commercial, mechanical, agricultural, or the like, to which one devotes oneself; a calling in which one professes to have acquired some special knowledge used by way either of instructing, guiding, or advising others, or of serving them in some art.⁹⁰

A radio mast seventy feet in height was not within a provision of a zoning ordinance permitting public utilities in a residential zone.⁹¹

"*Stoneyard*." The use of premises for the display and sale of finished monuments, which are neither fabricated nor lettered on the premises, does not constitute such premises a "stoneyard" within meaning of zoning ordinance prohibiting the use of property in a commercial district for a stoneyard or

monumental works, a stoneyard being defined in the ordinary sense as a yard in which stones are cut, shaped, broken, or the like.⁹²

§ 156. — Abattoir; Slaughterhouse; Stockyard

"Abattoir" and "slaughterhouse" will not be construed as synonymous where the zoning regulations treat them differently.

The fact that the dictionary regards "abattoir" and "slaughterhouse" as synonymous must be disregarded where the zoning regulations treat them differently.⁹³ A structure for the slaughter of animals used exclusively by the owner for his own purposes without making the facilities available to the public has been held to be a "slaughterhouse" and not an "abattoir" where the zoning ordinances impose greater restrictions on the use of property for an abattoir.⁹⁴ The killing and dressing of fowl by poultry raisers and dealers does not make the premises where such work is done an "abattoir" or "stockyard."⁹⁵

§ 157. — Agricultural Use; Farm; Nursery; Greenhouse

A provision exempting agricultural use from zoning regulations is to be construed in accordance with common and approved usage.

The term "agricultural use" in a provision exempting such use from the zoning regulations is to be construed in accordance with common and approved usage without enlargement or restriction and without regard to conceptions of expediency.⁹⁶ A use is within the exemption if it is agricultural, without regard to how detrimental such use may be to property in the neighborhood.⁹⁷ The storage of tobacco in a barn is within the protection of the provision that the zoning regulations shall not be deemed to prohibit the use of land for agricultural purposes or the construction or use of buildings

incident to the use of the land on which the buildings are located for agricultural purposes.⁹⁸

"Farming" as used in a zoning regulation permitting use as a farm in certain districts is the act or business of cultivating and using land and soil for the production of crops for the use of man and animals and incidental purposes, such as animal husbandry, stock-raising, or dairying;⁹⁹ and does not include the use of premises exclusively for the raising of hogs.¹ The erection of a building for the purpose of keeping swine before slaughtering violates a zoning provision prohibiting the erection of a building for any commercial purposes except farming.²

In determining whether a building sought to be erected and the use to which it was sought to be put constitutes a farm within a zoning ordinance permitting the operation of a farm in a residential district, consideration is required to be given to all of surrounding circumstances.³ It has been held that such a provision has as its purpose the promotion of an atmosphere of family life rather than the development of a commercial enterprise,⁴ and does not authorize the use of premises substantially solely for the raising of poultry.⁵

The test of whether or not a use not normally considered farming is "farming" is within a zon-

ing regulation permitting farming is whether such use is incidental to farming operations or is an independent or dominant enterprise.⁶ The production of a synthetic compost made of hay and corn-cobs and treated with cyanamid, potash, and gypsum and used as a manure in the growing of mushrooms has been held not to be a forbidden "manufacturing" but to be within the ambit of authorized "farming in all its branches."⁷ A use of premises for the sale and distribution of milk not produced on the premises,⁸ or the raising of racing dogs⁹ is not a farm use.

A provision in a zoning ordinance permitting the sale of farm products on farms from a roadside stand, provided the products sold are raised on the farm, authorizes the sale of milk, ice cream, and cheese where all the ingredients except the flavoring are produced on the farm;¹⁰ such a provision does not restrict the farmer to the sale of farm produce in its natural state and permits the sale of farm-manufactured products.¹¹

Nursery; greenhouse. Where the circumstances indicate that the term was used with such meaning, "farm" has been held to include gardening or horticulture, so as to permit the operation in a residential district of a nursery for the raising of plants.¹² The words "greenhouse" and "nursery"

Commonly understood significance

Word "farm" within town zoning bylaw, permitting use of lands in single residential district as farms, should be given its commonly understood significance as land used for production of crops, livestock grazing, raising of hay for cows to produce milk and other dairy products, raising of poultry and sale of chickens and eggs, or growing of fruit. Not incidental to use for agricultural purposes

Raising of pigs or other animals as a business, with their confinement all or most of time in buildings or pens occupying a small part of a large tract of land, with raising thereof not being incidental to use of tract for agricultural purposes, is not "farming" within meaning of zoning ordinance permitting such use.

as used in a zoning bylaw permitting such uses in residential districts are to be interpreted according to common and approved usage without enlargement or restriction.¹³ However, such terms must be construed with respect to the context,¹⁴ and a provision requiring a permit for the construction of a greenhouse does not apply as to a small conservatory located in the rear of a private residence, to be used to raise plants and flowers solely for the personal pleasure of the resident.¹⁵

A permitted greenhouse or nursery use includes the purchase and storage of plants until transplanted in season,¹⁶ but Christmas trees and wreaths, consisting of dead wood, are not incidental or accessory to the greenhouse or nursery business and the storage and sale of such articles is not authorized.¹⁷ A permitted nursery or greenhouse use does not authorize the sale, on the greenhouse premises, of tools and equipment for garden work; but does permit the sale, in connection with the sale of plants, of fungicides, insecticides, chemicals, peat moss, humus, mulches, and fertilizers to be used in preserving the life and health of the plants sold.¹⁸

The use of a soil sterilization plant, if limited to improving the soil of the nursery, is within the scope of a nursery or greenhouse use;¹⁹ but the right to sell the sterilized soil is subject to the restriction that such sales must be in conjunction with sales of plants from the nursery.²⁰ A zoning regulation permitting a nursery and greenhouse use in a residential district does not authorize the opera-

tors of such an establishment to engage in contract landscaping by using such premises as the headquarters for trucks and men in so far as such business does not concern the transplanting of the nursery or greenhouse stock.²¹

§ 158. — Billboard; Sign

A zoning regulation permitting certain advertising signs in a district prohibits advertising signs other than those specifically permitted.

General rules are applied in the construction of zoning regulations as to advertising billboards and signs.²² Thus, a zoning regulation permitting certain advertising signs in a district prohibits advertising signs other than those specifically permitted.²³ Gold-leaf letterings on the inside of the windows and door of a drug store are not "signs" within the meaning of a zoning resolution regulating signs.²⁴ The erection in a residential area of a sign advertising a business conducted outside the area has been held improper;²⁵ but an ordinance permitting the display of signs in a commercial district relating to the business conducted on the premises has been held not to prevent the maintenance of a sign referring to a business conducted in another section.²⁶ A zoning regulation prohibiting billboards, signboards, and advertising signs has been construed as limited to boards and signs used for general advertising purposes and does not forbid a sign designating the owner and user of a commercial building.²⁷

"Greenhouse" defined

Word "greenhouse" as used in municipal zoning bylaw authorizing such use in single residence district, refers to building principally constructed of glass wherein plants, flowers, and sometimes vegetables are raised for purposes of sale, and greenhouse business involves cultivation of these or similar products of soil and disposal of them to purchasers.

Mass.—Town of Needham v. Winslow Nurseries, Inc., supra.

"Nursery" defined

A "nursery," as that term is used in zoning bylaw permitting such use in single residential district is essentially a tree plantation, or place where trees, shrubs, plants, and the like, are propagated from seed or otherwise for transplanting, for use as stock for grafting, and for sale.

§ 159. — Boarding House; Hotel; Motel; Trailer Court

A zoning provision permitting the operation of a boarding house will be construed as referring to a residence occupied by a private family which accepts lodgers, unless the ordinance indicates that the term is not to be so limited.

A provision authorizing the operation of a boarding house will ordinarily be construed in accordance with its popular meaning as referring to a residence occupied as a private family which accepts permanent boarders or lodgers as a business undertaking;²⁸ but where the ordinance defines a boarding or lodging house as a dwelling other than a hotel where lodging for compensation is provided, it is not necessary that the house be occupied as a residence by a private family,²⁹ and the use of a building as a home for music students is authorized.³⁰ The propriety of the operation of a boarding house as accessory to a residential use of the property is discussed *infra* § 177, and the housing of hospital personnel in a dwelling as accessory to a hospital use and not within a prohibition of boarding houses is considered *infra* § 176.

The boarding of children has been held to be³¹ and not to be³² within a provision permitting the operation of a boarding house within a residential district. An ordinance, providing that in a dwelling or apartment occupied as a private residence one or more rooms may be rented or table board furnished, permits the use of an eight-room house to provide room and board to aged persons in connection with an arrangement of the welfare department to refer aged persons needing physical assistance, but not medical attention.³³ A zoning ordi-

nance permitting the operation of a boarding house in a residential district does not authorize the operation of a "health farm" primarily to furnish health and reducing treatments, with room and board being furnished as merely incidental thereto.³⁴ A convalescent home has been held within a zoning provision permitting boarding houses although a nurse is on the premises to render any necessary services.³⁵

Where the zoning regulations differentiate between hotels and boarding houses, the distinguishing characteristic of a hotel is the transitory nature of its patronage, its guests being entertained from day to day, whereas in a boarding house, the guest is ordinarily under an express contract at a certain rate for a certain time.³⁶ Where the zoning regulations permit boarding houses, but exclude hotels and inns, an establishment which furnishes board and lodging, but does not accept transient guests, is a boarding house and not a hotel or inn although it has accommodations for a hundred guests and is listed in the telephone directory as a hotel.³⁷

Under a zoning ordinance which requires that the use of a building in an apartment house district as well as the building shall conform to the requirements for a dwelling, the use of a building as a family hotel or a hotel for transients, and to furnish meals to its residents and their guests, but not to the general public, is proper.³⁸

Motel. Unless the zoning regulations specially define the term "hotel" so as to exclude motels and motor courts,³⁹ a motel or motor court is generally regarded as a hotel within the meaning of the zoning regulations,⁴⁰ despite its name, mode of con-

Under zoning ordinance creating single-family district and providing that as an accessory use rooms in main building could be rented, and table and board furnished for pay to not more than four persons for definite periods, comma after word "rented" did not create a right to use property in single-family district as a lodging house for more than four persons although no board was furnished.

Motel as an "inn"

Whether motel was an inn within meaning of town zoning ordinance permitting use of property in business district for a tearoom, boarding house, or inn depended on what members of town legislative body meant when they used word "inn" in ordinance.

N.Y.—Von Der Heide v. Zoning Bd. of Appeals of Town of Somers, Westchester County, 123 N.Y.S.2d 726, 204 Misc. 746, affirmed 126 N.Y.S.2d

struction, and the fact that food and drink are not available at the option of the guest.⁴¹ Thus a motel has been held to be a hotel within a zoning regulation permitting hotels and apartment houses within a designated area.⁴² A motel is not within a zoning provision permitting the operation of a boarding house or inn, where the ordinance is subsequently amended to provide that the terms "boarding house" and "inn" shall not include a motel or tourist camp.⁴³ A motor court has been permitted under a zoning ordinance permitting lodging houses in a multiple-residence district, where the ordinance defines "lodging house" as a dwelling other than a hotel providing lodging for at least a specified number of persons.⁴⁴

A motel has been permitted in a business district.⁴⁵ A zoning ordinance unqualifiedly excluding dwellings and tourist camps from light manufacturing districts, and expressly permitting motels only in business districts, discloses a legislative intent to treat motels as a variety of tourist camp and to exclude them from manufacturing and industrial areas.⁴⁶

General zoning regulations will not control, with respect to the construction of motels, over sections dealing directly with the construction of motels in residential districts.⁴⁷

A trailer camp is not permitted in a residential district restricted to dwellings, apartment houses and

hotels, and lodging houses and boarding houses.⁴⁸ Under a zoning ordinance prohibiting uses not expressly authorized, a house-trailer court is prohibited where it is not expressly mentioned.⁴⁹ The rental of lots for use by house trailers is a use of the premises for commercial and not for residential purposes within an ordinance zoning the area as residential.⁵⁰ An ordinance prohibiting the use of property within a commercial zone for a trailer camp, or the placing of trailers on land for occupancy as a place of temporary or permanent residence is violated by one in the business of repairing trailers who permits the owners of trailers being repaired to reside in trailers on his premises until the repair is finished.⁵¹ House trailers as subject to zoning regulations as to the architectural and structural design of dwellings is discussed supra § 146.

In construing the word "building" as used in a zoning ordinance or regulation, recourse must be had to the legislative purpose and to the particular facts and circumstances;⁵² but in the absence of anything to indicate that such construction is improper the word will be construed in accordance with its ordinary and popular meaning.⁵³ An open-air motion picture theater, having no roof and enclosed only by fences with the seats set on the

monly referred to as a "motel," was an apartment or hotel, and could be constructed in districts in which such uses were permitted.

§ 161. — Business

The word "business" as used in a zoning ordinance is a comprehensive term embracing everything at which a person may be employed.

The word "business" as used in zoning ordinances is a comprehensive term embracing everything at which a person may be employed, and means that which occupies the time, attention, and labor of men for the purpose of a livelihood or profit, and in its broad sense connotes the efforts of men, by dealing with each other, to improve their individual economic conditions.⁵⁶ The use of a building as an armory is not a "business" or "business use" within a zoning regulation prohibiting such uses.⁵⁷ The use of a room in the basement of a multiple dwelling as a depositary for a tailor shop located elsewhere has been held not to be a business use of the premises;⁵⁸ but where plaintiffs propose, not merely a basement room in a multi-family house to be used for the purpose of pick-up by any merchant of any tailoring and cleaning firm but a room equipped to operate as an integral part of a business of dry-cleaning to be systematically served by it and in effect to function as its inlet, the occupation constitutes a "business" within the prohibition of a zoning

ordinance excluding business from residential districts.⁵⁹ The use of a building for office purposes is within the prohibition of an ordinance forbidding the use of any structure in the area for business of any kind.⁶⁰

§ 162. — Club; Fraternity

In the absence of a definition of the word "club" in a zoning ordinance, it will be given its usual meaning as an organization or association of persons who meet or live together for social, educational, or similar purposes.

Where the term "club" as used in a zoning ordinance is not defined therein, it is to be construed as meaning an organization or association of persons who meet or live together for the purposes of social intercourse or the promotion of some common object such as the pursuit of literature, science, politics, or good fellowship.⁶¹ A nonprofit corporation organized to provide its members and their families swimming, recreational, and social facilities is a "club,"⁶² and a corporation whose members are the affiliated clubs and their members is a private club.⁶³

Where no provision of the zoning ordinances specifically restricts the right to use property as a clubhouse, the court will not resort to a strained construction of the ordinances to reach that result.⁶⁴ Where a zoning ordinance permits "clubhouses" and "dormitories" in a residential district, and the quoted terms are not defined in the ordinance, they are to

A college fraternity is within a zoning provision authorizing fraternities,⁶⁷ and a labor union maintaining premises for the use and entertainment of its members and to carry on the business of the union is a fraternity within such a provision.⁶⁸

§ 163. — Garage; Parking Lot; Used Car Lot

Garages, parking lots, and used car lots have been the subject of zoning regulations permitting or prohibiting their operation in particular use zones.

Garages have been permitted in areas zoned for commercial uses.⁶⁹ Under a building zone resolution prohibiting any garage on the portion of a street between two intersecting streets in which there is a public school entrance or exit, a garage may not be located on the same side of the street between the same intersections as a public school which has an entrance on such portion of the street, notwithstanding the entrance to the garage is located on an intersecting street.⁷⁰ A garage as a permitted accessory building is discussed *infra* § 179.

There have been decisions construing the term "garage" as used in a zoning ordinance or regulation,⁷¹ and a gasoline service station has been held to be a "garage" within such an ordinance or regulation.⁷² The use by the owner of a small garage

located in the rear yard adjoining his one-family home, located in a residential district, for the purpose of installation of reconditioned motor blocks in automobiles, for customers of a retail store which sold the motor blocks to them, was a use of the garage as a "public garage" within a zoning ordinance prohibiting such use in a residential district.⁷³ An ordinance prohibiting the erection of a garage for other than the private use of the owner or occupant of the premises on which it stands has been construed as not forbidding the building of a large number of individual garages for rental to car owners.⁷⁴

A provision authorizing garages for private use authorizes the construction of a garage by a business for the storage of its motor vehicles.⁷⁵ Similarly, a provision prohibiting public garages does not prohibit the owner of a fleet of taxicabs from maintaining a garage for the exclusive use of his taxicabs.⁷⁶ A parking lot maintained by a restaurant for the convenience of its patrons has been held not to be a garage within a zoning regulation forbidding such use.⁷⁷ A proposed parking lot adjacent and auxiliary to ice cream and frozen custard business premises does not constitute a "public garage" within municipal zoning ordinance defining that term as meaning any building or premises in which business, service, or industry connected with motor vehicles is conducted or rendered, including all premises used for motor vehicles either housed or unhoused.⁷⁸ A provision that property zoned as a business district may be used for retail business uses including a public or private garage does not authorize the use of property in the area as a storage place for moving

vans, trucks, and trailers used in the moving business.⁷⁹

The zoning of an area as residential has been held to bar the use of property in the area for commercial parking space;⁸⁰ but the use of premises for commercial parking space has been permitted in a business district.⁸¹

Where defendant owned a vacant lot in a residential district contiguous to a building on a separate lot lawfully operated as a business property under a variance, the use of the residential lot for the parking of automobiles for the occupants and employees of the abutting business property was unauthorized.⁸² Under a zoning ordinance prohibiting the use of a building or "premises" in business districts for "storage" of more than five motor vehicles, and a zoning resolution prohibiting the use of a building or premises in residential districts for use other than use specified therein which did not include use for commercial parking, the owner of a vacant plot abutting on a street in business district and on a street in a residential district was entitled to use the premises in the business district for commercial parking, but not the premises in the residential district.⁸³ In construing provision permitting the use of land as a parking lot, when the "best interests of the community" will thereby be served, the quoted phrase refers to the interests of the community at large rather than the interests of the immediate neighborhood.⁸⁴

A lot for the sale of used automobiles is not a "parking lot" within the meaning of a zoning ordinance.⁸⁵ The storage of new vehicles on a lot is a use of the lot for the storage of motor vehicles and not for parking, where the vehicles are not in condition for immediate use on the road.⁸⁶

A zoning ordinance forbidding used car lots in a business district prohibits a used car lot adjacent to, and conducted as an adjunct to, the owner's new car business.⁸⁷ A zoning ordinance relating to the use of "unimproved" lots for the sale of used cars is intended by the quoted word to distinguish a vacant lot from one with a building thereon, and, therefore, the fact that the lot has been leveled and paved and that retaining walls have been erected does not take the lot out of the "unimproved" category.⁸⁸ The business of buying and selling used automobiles and motor vehicles at retail does not constitute the business of conducting "a warehouse and storage yard" within the meaning of a zoning ordinance, where all of the vehicles kept on the lot are there on display for sale or exchange, even though the turnover may be slow.⁸⁹

Where an ordinance does not include the storage of used motor vehicles among the permitted uses of land located in residential districts, such use is prohibited by necessary implication although the ordinance does not specify the prohibited uses or expressly provide that any use not authorized is prohibited.⁹⁰

Special uses

Section of ordinance pertaining to special uses and commencing with phrase "subject to the rules set forth in this section" meant that special uses mentioned in section were subject only to rules contained in section and therefore other sections of ordinance imposing maximum limits on ground area and height of buildings were not applicable and did not prohibit a parking lot serving transients from being established in a district zoned for duplex residence use.

§ 164. — Hospital; Nursing Home

No distinction has been made between a private, public, or charitable hospital in construing a zoning regulation as to hospitals.

In construing a zoning provision as to hospitals, it has been held that no distinction is to be made between a private, public, or charitable hospital.⁹¹ A doctors' office building is not within a provision permitting a hospital in a residential area.⁹² A veterinary hospital has been excluded from a business district under a provision prohibiting the maintenance of a "nuisance."⁹³

A nursing home has been held to have the attributes of both a hospital and a boarding and lodging house so that such use is permissible in an area zoned for hospitals and boarding houses.⁹⁴ A nursing home has likewise been considered to be a hospital within an ordinance permitting hospitals,⁹⁵ and within a zoning ordinance prohibiting hospitals in a residential district.⁹⁶ On the other hand, a home for the aged has been deemed not to be a hospital within a provision prohibiting the building of a garage within a specified distance of a hospital.⁹⁷ The operation of a nursing home may be a business use forbidden in a residential district.⁹⁸

"Sanitarium" as used in a zoning ordinance, means a health center or retreat or an institution for the recuperation and treatment of persons suffering from physical or mental disease,⁹⁹ and does not include a residence occupied by a group of persons handicapped by cerebral palsy to whom no medical treatment is administered on the premises.¹

§ 165. — Institution

A shelter for housing animals has been held to be, or not to be, within a zoning provision as to philanthropic institutions.

An animal rescue league and its shelter for animals have been considered to be within the protection of a zoning provision permitting the construction and use in a residential district of a building for a public or semi-public institution of a philanthropic, charitable, or religious character;² but it has also been held that a provision permitting philanthropic or eleemosynary institutions related solely to such institutions for human beings and did not authorize a building for housing animals.³ The question of whether or not an institution is a correctional institution within a zoning regulation excluding correctional institutions from residential districts depends on the powers which the institution is lawfully authorized to exercise,⁴ and a home for girls, which does not detain them for reformatory purposes, but for observation and study, and to make recommendations as to their future, is not within the prohibition.⁵

§ 167. — Laundry; Dry Cleaning Establishment

A "launderette service" is not within the prohibition of a zoning ordinance forbidding steam or wet wash laundries.

A laundromat or "launderette service" is a retail self-service laundry making available to the general public individual coin operated washing machines, and is not within the prohibition of a zoning ordinance forbidding steam or wet wash laundries in certain districts,¹⁰ and the rule is the same where, in addition to washing machines, extractors and dryers are furnished.¹¹ Under a zoning resolution providing that in a business district, no building shall be used for a "steam or wet wash laundry other than in a hotel or hospital," a hotel may not operate a laundry to provide service for another separately owned and operated hotel;¹² but the operation by a hotel of a laundry on its premises for the cleaning of its own linen and that of another hotel under the same management is permissible as accessory to a hotel use of the premises and is not a commercial activity prohibited by the zoning ordinance where no laundry is done for guests or the general public.¹³

The terms of a zoning ordinance specifically excluding hand laundries from retail business districts

will not be construed as excluding a specialized mechanical laundry conducting the business of washing diapers which does no hand work.¹⁴ A laundry using electrically powered mechanical devices to perform its operations is not a "steam laundry."¹⁵ A zoning ordinance prohibiting "laundries or dyeing and cleaning works with capacity for more than ten employees" does not apply to an establishment employing fewer than ten employees.¹⁶ A dry cleaning and shirt laundering business is within a zoning provision prohibiting cleaning and dyeing establishments.¹⁷

Under a zoning ordinance permitting dry cleaning establishments to operate in retail districts provided the articles are delivered directly by the customer or collected directly from the customer, a dry cleaning establishment may maintain a chain of stores to collect articles and then transport them to the establishment for cleaning.¹⁸

The view has been taken that the term "manufacturing" as used in zoning ordinance prohibiting manufacturing, except light manufacturing, in a business district, includes laundries,¹⁹ but the view has also been taken that a cleaning establishment is not a "manufacturing plant" within the meaning of that term in an ordinance prohibiting manufacturing plants in a prescribed area.²⁰ The maintenance of the pick-up room in the basement of a multiple dwelling for the collection of garments as a "business" use of such premises is discussed *supra* § 161.

§ 168. — Manufacturing

A zoning regulation may be construed to forbid manufacturing within a designated area.

Stevedoring

The use of premises located in industrial zone of city for storage of scrap iron and steel preliminary to loading on vessels for shipment was not prohibited by ordinance, prohibiting operation of "junk yards" in city's industrial districts, such use being in nature of "stevedoring" rather than maintenance of junk yard, and, hence, license was required to be granted for use of the premises for such storage.

structural steel is "manufacturing" within the meaning of a zoning ordinance.²² The making of ready mixed or transit mixed concrete in its plastic state is "manufacture" as distinct from "commerce", and is included in "industrial" within the meaning of a zoning ordinance.²³

The operation of a laundry as manufacturing is discussed supra § 167.

§ 169. — Recreational Facility

A bathing beach is not within the terms "parks" and "playgrounds" as used in a zoning ordinance.

A bathing beach is not within the terms "parks" and "playgrounds" as used in a zoning ordinance.²⁴ The use of a tract for swimming, boating, and other recreational sports is authorized in an area zoned for public and private parks and recreational areas and resorts, even though such tract is not to be open to the public but is to be limited to a certain number of families paying an annual fee.²⁵ A children's playground wherein rides were to be operated at a charge may not be located in an area zoned for public parks, playgrounds, and recreational areas, but may be located in an area zoned for theatres, assembly halls, bowling alleys, and commercial public recreational uses.²⁶

An intention to authorize amusement parks among the permitted uses of zoned property should be plainly indicated by the zoning ordinance.²⁷ An essential attribute of an "amusement park" has been held to be the grouping together in one place of various amusements for pleasurable diversion,²⁸ so that a swimming pool with incidental bath houses, refreshment stands, and picnic areas is not barred by a zoning regulation prohibiting "amusement parks."²⁹

A nonprofit corporation engaged in the operation of a swimming pool and picnic ground for the benefit of its members is not engaged in the operation of a business within the meaning of the zoning regulations.³⁰ A provision permitting the location in any district of a state or municipal building, swimming pool, etc., does not authorize a private swimming pool.³¹

A *bowling alley* is a "place of amusement" within a zoning provision permitting such use.³²

A *skating rink* in a building is not a "similar amusement" within an ordinance providing that in business zones no building or premises shall be used for merry-go-rounds, Ferris wheels, or similar amusement.³³

§ 170. — Restaurant

A "restaurant," as used in a zoning regulation, includes a diner and a drive-in restaurant.

The term "restaurant" as used in zoning ordinances has been the subject of judicial construction.³⁴ A drive-in, self-service restaurant is a "restaurant" within the meaning of a zoning ordinance although the consumption of the food takes place in the automobiles.³⁵ A "diner" is included within the term "restaurant."³⁶ A restaurant having a permit for the retail sale of beer and cider on the premises in which hot meals are regularly served is subject to a zoning ordinance prohibiting taverns and grills in a business zone within a specified number of feet of a church.³⁷ A zoning ordinance forbidding a "lunch wagon" applies to a roadside diner.³⁸

The operation of a restaurant has been regarded as contrary to a resolution restricting the area for first-class residential purposes, although only per-

The operation of a parking lot as accessory to a restaurant is considered *infra* § 176.

§ 171. — Retail Store

Various stores have been held to be, or not to be, retail stores within a zoning regulation.

A store is not deprived of its status as a "retail store" permitted by a zoning ordinance, although most of its sales are to other stores rather than to consumers where each sale is in small quantities.⁴² A self-service food market is a retail store.⁴³ A poultry market has been held to be,⁴⁴ or not to be,⁴⁵ a retail store permitted by a zoning ordinance. As stated *infra* § 176, the killing, defeathering, and dressing of poultry has been held not to be permissible as accessory to a retail store use.

A drug store is within a zoning provision permitting "retail shops."⁴⁶

The phrase "retail enterprise", as used in provision of zoning ordinance describing retail business to include a retail enterprise for profit not specifically mentioned as permitted in a less restricted

use district, includes businesses which render service to, and deal directly with, ultimate consumers as well as businesses engaged in the sale of merchandise in small quantities.⁴⁷

§ 172. — School; Church; College; Educational Institution

Schools and churches are suitable for areas zoned as residential and the courts frown on efforts to exclude them.

Schools are suitable for an area zoned as residential,⁴⁸ and the courts have frowned on efforts to exclude schools from residential districts.⁴⁹ The use of property may be permitted or excluded as a "school."⁵⁰ Where the zoning ordinance permits the use of property within a residential district as a school, it has been deemed to be immaterial that the school is operated as a business;⁵¹ but the view has been taken that a music school is a business and is not a "private school" permitted by a zoning ordinance.⁵² A regulation permitting schools in an area restricted to one-family dwellings has been construed as limited to schools meeting the requirements of the state compulsory education law and as excluding schools of higher or specialized education.⁵³

A kindergarten or nursery although it may not be a "school" within the meaning of the education law is a "school" within the meaning of a zoning ordinance,⁵⁴ but such a school is not within the phrase

"Private elementary school"

Where operators of private pre-school or nursery school for children from two to five had a regular school schedule and rules and issued report cards and employed teachers to teach children singing, drawing, and other things, and employed a registered nurse to inspect children daily, school was a "private elementary school" within city zoning ordinance, which, among other uses, restricted area in which school was located to such schools, although none of teachers had a certificate to teach in public schools.

Iowa.—Livingston v. Davis, 50 N.W. 2d 592, 243 Iowa 26, 27 A.L.R.2d 1237.

Summer play school

Private institution for boys and

"grade school."⁵⁵ The operation of a nursery and day school in a private home is not within a provision forbidding any "store, shop, or permanent office."⁵⁶

A dancing school is not embraced in the term "educational institutions" as used in a zoning ordinance.⁵⁷ The words "dormitory of an educational institution" in a zoning ordinance authorizing a use for educational purposes including such a dormitory, but excluding accommodations for mentally deficient or abnormal persons, means a dormitory for normal students ordinarily attending the usual type of educational institution.⁵⁸ A convent for nuns who are to teach in an adjoining parochial school does not constitute a "school with living quarters maintained" within the prohibition of a zoning ordinance.⁵⁹ An ordinance permitting college buildings authorizes dormitories and student commons.⁶⁰

There have been decisions construing the word "church" as used in zoning ordinances,⁶¹ and churches are proper in residential areas.⁶² A zoning ordinance prohibiting the erection of buildings of a substantially different type or size from existing buildings in a residential district does not exclude churches from residential sections.⁶³ A zoning board may not refuse to permit the construction of a church or synagogue in an exclusive residential area on the basis of a finding that it would depreciate or tend to depreciate the value of property in

the neighborhood, and would be detrimental to the neighborhood and its residents;⁶⁴ in view of the high moral purposes and moral values of schools and churches, the possibility of pecuniary loss to a few should not bar their erection and use in residential areas.⁶⁵

"*Adjoining*," within municipal code provision permitting schools and churches in a family-residence district or duplex-residence district where such structures are on lots adjoining an apartment house, does not require that the lot actually touch the apartment house use, and a lot "adjoined" an apartment house lot even though the lots were separated by an alley which marked the zoning district boundary.⁶⁶

Riding academy. A provision permitting schools in a residential district unless a chief activity thereof is one customarily carried on as a gainful business does not permit the conduct of a riding academy for gain in such a district.⁶⁷ A "private school" may mean a purely academic school and not embrace a school for the teaching of horsemanship.⁶⁸

§ 173. — Trade; Industry

With respect to a zoning regulation, a "trade" is a mechanical employment or commercial enterprise, and an "industry" is that branch of a trade employing capital and labor.

The term "trade," within zoning regulation, means mechanical employment or commercial enterprises,

girls between ages of five and fourteen years devoted to teaching swimming, arts and crafts, boating, hiking, basketball, soft-ball, tetherball, volley-ball, badminton, horse-shoes, story telling, photography, croquet, fishing and free play for summer months, was a "school" within meaning of zoning ordinance permitting operation of schools within residential areas.

of those things broadly covered within field of education.

§ 174. — Undertaker; Funeral Home

A funeral home is properly classified as a business in determining the application of zoning regulations.

A funeral home is properly classified as a business in determining the application of zoning regulations,⁷² and is not to be regarded as a public or semi-public building.⁷³ The zoning ordinance may provide that an undertaking establishment may be located in any district provided the use in such location will, in the judgment of the zoning board, substantially serve the public convenience and welfare and will not substantially and permanently injure the appropriate use of the neighboring property.⁷⁴

The undertaking or funeral business as accessory to a residential use is considered infra § 177.

§ 175. — Warehouse; Storage

The use of premises for the storage of merchandise and supplies incidental to a permitted business is not a storage use or business forbidden by a zoning ordinance.

The use of premises for the storage of merchan-

dise and supplies as incidental to a permitted business is not a storage use or business in violation of a zoning ordinance.⁷⁵ Similarly, the use of land for the display and sale of finished monuments is not use as a "storage yard."⁷⁶ A zoning ordinance prohibiting a "warehouse or storage plant" does not forbid the use of a yard for tools and appliances and for supplies of brick, cement, and cinder blocks necessary for the conduct of the owner's business as a general contractor.⁷⁷

Premises used as a warehouse are not removed from the prohibition of a zoning ordinance forbidding warehouses by reason of the fact that the customers who have made purchases at the owner's stores sometimes pick up their purchases at the warehouse.⁷⁸ The use of land for the parking of trucks, whether or not the trucks are loaded, is not a use of the premises as a "commercial warehouse" forbidden by a zoning ordinance.⁷⁹ A plant operated for the cold storage and curing of meat is a "cold storage" plant.⁸⁰

A zoning ordinance which prohibits the storage of gasoline within a certain district except "in such amounts as may be necessary to supply retail trade at service stations" does not prevent the storage at one place within the district of sufficient gasoline to supply several service stations.⁸¹

Allowance of a primary use for a zoning ordinance generally authorizes all uses normally accessory, auxiliary, or incidental thereto.

which is not customarily incidental and subordinate to the authorized principal use.⁸³ Even though the ordinance is silent as to accessory uses, they will be permitted where they do not involve a departure from the purpose of the ordinance.⁸⁴

A use is "accessory" when it is customarily incidental to the main use,⁸⁵ or when it is so necessary or so commonly to be expected in connection with the main use that it cannot be supposed that the ordinance was intended to prevent it.⁸⁶ A zoning ordinance permitting, as accessory uses, uses customary with, or incidental to, the main use has been construed to require that the use be both incidental to, and customary with, the main use.⁸⁷

The view has been taken that the accessory use must be located on the same lot as the building to which it is accessory.⁸⁸ Accordingly, a residential lot may not be maintained as a parking lot incident to the use of adjacent business property, since such use is not accessory to a principal residential use.⁸⁹

A variety of uses have been permitted as accessory to a permitted or authorized use.⁹⁰ A provision permitting the erection of "school and college buildings" was held to authorize the erection of all buildings ordinarily part of a college plant,⁹¹ and an athletic stadium has been allowed as incidental to a permitted use of the property for a high school.⁹² The construction of a hotel with a banquet hall for five hundred people has been permitted under a provision allowing the construction of a hotel,⁹³ and the maintenance of a candy, tobacco, and newspaper counter by a hotel for the convenience of its guests has been regarded as a proper accessory use.⁹⁴ Auto races have been permitted as accessory to the use of property as a fairground.⁹⁵ The operation of a gasoline filling station in the basement garage of a large apartment building has been allowed as a use customarily incidental and necessary to the main use.⁹⁶ The owner of a farm may be permitted, as an accessory use, to sell farm produce on the premises.⁹⁷ Where a hospital, which

was a permitted use in a residential district, purchased adjoining dwellings for residential use by its personnel, such use was a permissible accessory use and was not a violation of the prohibition against the maintenance of lodging houses in such district.⁹⁸

On the other hand, certain uses have been held not permissible as accessory uses.⁹⁹ The maintenance of an animal hospital has been held not to be a use accessory to the practice of a veterinarian.¹ The use of the premises in connection with the business of a roofing contractor is not a use accessory to the principal use as a nursery.² The killing, defeathering, and dressing of poultry is not permissible as accessory to a retail store use.³

An ordinance authorizing the operation of a garage permits all operations incidental to the operation of a garage business.⁴ The operation of a "car wash" is a use customarily accessory and incidental to the operation of a garage, automobile repair shop, or gas or oil service station.⁵

The use of property for a parking lot has been allowed as incidental to a permitted use for a church,⁶ an apartment hotel,⁷ a clubhouse,⁸ a busi-

In determining what a one-family dwelling may necessarily be used for, as required in construing city zoning ordinance prohibiting use of property

§ 178. Accessory Buildings

Zoning ordinances permitting and regulating accessory buildings are to be reasonably construed.

Zoning ordinances permitting and regulating accessory buildings are to be reasonably construed.⁴⁹ The accessory building must be on the same premises as the main building, even though the ordinance does not expressly so provide.⁵⁰ The words "accessory," "subordinate," "incidental," and "main" when used in a zoning ordinance in connection with buildings, denote the relationship of one building

to another.⁵¹ An "accessory building" is a subordinate building, the use of which is incidental to the use of the main building.⁵² A "main building" is one to which other buildings are accessory or subordinate in use.⁵³

A chicken house may not be regarded as accessory to a dwelling where the ordinance defines an accessory building as one subordinate to the main building on the lot and used for purposes customarily incident to those of the main building.⁵⁴ An addition to a building, which is to be an integral part of the building, such as an enlargement of a dwelling to provide an additional bedroom and bath, may not be considered an accessory building.⁵⁵

Occupancy by servants. Under a zoning ordinance providing that nothing in the ordinance authorizes or will be construed to permit the occupancy or use of any accessory building as a place of abode or dwelling by any one other than a bona fide servant actually then regularly employed by the occupant of the main structure, the use of an accessory building as a place of abode is confined to bona fide servants employed by the main occupant of the premises, and the owners are precluded from making use of the quarters for independent occupancy.⁵⁶ A provision, regulating accessory buildings in a residential district and providing that an accessory building may not be used for residential purposes except by domestic servants of the occupant of the main dwelling, may not be evaded by a sale of a portion of the premises;⁵⁷ thus where there was erected on one lot a dwelling house and in the rear of the lot a garage with dwelling quarters, the conveyance of the rear of the lot together with

the adjoining vacant lot does not free the garage for general residential use.⁵⁸

An accessory building is not transformed into an independent building by its rental so as to avoid restrictions on its occupancy except by servants, even though the premises are large enough so that the property could be divided and each division be occupied by a dwelling without violating the zoning ordinances.⁵⁹ Where a tract on which were located a cottage and other buildings accessory to a mansion house was sold separately from the portion of the property on which the mansion house was located, and the cottage was used as a residence, the cottage became the main building within a provision that not more than one dwelling may be constructed on a lot, except that living quarters may be provided in accessory structures for persons employed in domestic service on the premises.⁶⁰

Rental of accessory building. The alteration of a four-car garage on the owner's premises so that the owner might rent part of it to other persons as living quarters does not constitute a customary "accessory use" within a zoning ordinance which permits use of residential lots only for a single-family detached dwelling and for "accessory use" customarily incidental to such dwelling.⁶¹ Where at time of enactment of zoning ordinance a parcel contained a main dwelling house and a carriage house and the latter over the years had been occupied independently either as servants quarters or guest accommodations, the carriage house may be occupied by a rent paying tenant, notwithstanding the zoning ordi-

nance prescribes a minimum area of 40,000 square feet for a family dwelling and the parcel does not contain 80,000 square feet and the ordinance provided that an accessory use shall not include an activity conducted for gain.⁶²

§ 179. — Garage

Ordinarily, a private garage is a proper accessory building to a permitted private residence.

A private garage ordinarily is a proper accessory building to a permitted private residence,⁶³ and unless so required by the zoning ordinance, the garage need not be on the same lot as the dwelling.⁶⁴ The maintenance of a six-car garage housing vehicles used for hire as cabs or omnibuses is not permissible as an accessory use or a use customary or incident to a one-family house.⁶⁵ A provision in a zoning ordinance authorizing the erection in a residential district of accessory buildings, including private garages, does not authorize the construction of a private garage in a residential district for use by a business located outside of the district.⁶⁶

A garage connected to the house by a breezeway has been held to be part of the main building so that it need not be constructed in accordance with a zoning ordinance governing the location of an accessory building.⁶⁷

The conversion of a garage on the rear of a hotel lot to use for living quarters for hotel guests transforms the building from an accessory to a principal building and may violate the rear yard requirements of the zoning ordinance.⁶⁸

V. NONCONFORMING USES

§ 180. General Rule

Zoning regulations sometimes expressly provide and are generally construed to permit the continuance of such uses of land and structures as were in existence at the time of the adoption of the regulations notwithstanding similar uses are not permitted by the regulations in the area in which the property so used is located.

The term "nonconforming uses," as used in the law of zoning, refers to uses of certain property which are permitted to continue notwithstanding the zoning regulations do not permit similar uses in the area in which the property so used is located,⁶⁹ although the term is sometimes used in its more general sense as referring to a use of a building or property that does not agree with the regulations of the use district in which it is situated.⁷⁰

As a general rule, zoning regulations do not limit the right of a landowner to continue such uses of land and structures as were in existence at the time of the adoption of the regulations,⁷¹ and it is sometimes expressly provided that nonconforming uses and structures may be continued,⁷² at least for a

specified period of time.⁷³ Under a provision that "nonconforming uses" may be continued, the quoted phrase comprehends both the physical structure on the land and the functional use of the land or structure.⁷⁴ Unless otherwise provided by the zoning ordinances, a permit is not required to continue a nonconforming use.⁷⁵ On the other hand, the fact that property formerly designated as commercial is later placed in a residential zone does not give the owner who used the land before the change the same rights as to use as if the property were still zoned as commercial.⁷⁶

A business existing at the time of the enactment of a zoning regulation forbidding such business may be continued,⁷⁷ and property used for business may continue in such use although the area in which the property is located is subsequently zoned as residential.⁷⁸ The continuation of particular uses which have been held not to be affected by the subsequent enactment of a zoning regulation prohibiting such use includes the operation of a carnival,⁷⁹ a cemetery,⁸⁰ a livery stable,⁸¹ a piggery,⁸² a rendering plant,⁸³ a sign hanging from an office building,⁸⁴ and a trailer camp.⁸⁵ Farming may be continued in a district subsequently zoned as residential,⁸⁶ and a

Traffic congestion

Fact that there was a great deal of congestion in traffic around corner where business was located would have no bearing on right to conduct business as a nonconforming use under zoning ordinance, traffic congestion being a matter for police regulation rather than a concern in enforcement of zoning ordinance. *N.Y.—City of Syracuse v. two-family or rooming house may be continued in a single-family house zone.⁸⁷

A provision of an ordinance requiring that every lot in multiple dwelling zones should have a certain minimum width and area will be assumed to have been enacted with the understanding that it would not be given effect in old settled districts developed under different standards where its application would oppress the owners of property and would not do any good.⁸⁸ Rear yard requirements imposed by a zoning ordinance do not apply as to existing buildings which do not comply therewith,⁸⁹ and plots existing at the time an ordinance is enacted may be excepted from the frontage requirements imposed by the ordinance.⁹⁰

The repeal of a provision excepting house trailers used in connection with the owner's dwelling from a requirement that trailer houses be kept only in licensed camp grounds has been held not to apply to one who had established such use at the time the repeal was enacted.⁹¹ Property used for commercial purposes under an ordinance rezoning it from residential to commercial use may be continued in such use under a subsequent ordinance repealing all prior zoning ordinances and zoning the area as residential, but excepting lawfully operated nonconforming uses.⁹²

Use of land apart from structures. The excavation of products of the soil may constitute an existing nonconforming use protected by a provision preserving the right to continue existing uses,⁹³

but some provisions merely preserve the use of existing buildings and structures and not the use of land on which there are no buildings.⁹⁴ Open areas in connection with an improvement existing at the time of enactment of a zoning ordinance are exempt from the restrictions of the ordinance under a provision permitting continuance of a nonconforming existing use, if the open areas were in use at the time of enactment of the ordinance.⁹⁵ The use of a vacant lot for the dismantling of automobiles is not affected by a subsequent amendment of the zoning ordinance prohibiting such use in the area.⁹⁶

Intoxicating liquor. A zoning ordinance prohibiting the sale of beer in residential areas has been construed as not preserving the right of a restaurant, doing business in a residential area as a nonconforming use, to continue to sell beer.⁹⁷

The right to apply for a variance does not preclude a claim of a nonconforming use.⁹⁸

§ 181. — Purpose of Rule

The continuation of nonconforming uses is permitted to avoid hardship and with the doubtful constitutionality of compelling the immediate cessation of existing uses in mind.

The granting of permission for continuation of a nonconforming use is designed to avoid the imposition of hardship on the owner of property already devoted to a proscribed use,⁹⁹ and has in mind the injustice and doubtful constitutionality of compelling the immediate removal of objectionable buildings and uses already in the district.¹

§ 182. — Strict Construction

Provisions for the continuation of nonconforming uses are strictly construed.

The spirit of the zoning ordinances and regulations is to restrict rather than to increase any nonconforming uses,² and to secure their gradual elimination.³ Accordingly, provisions of a zoning regulation for the continuation of such uses should be strictly construed,⁴ and provisions limiting nonconforming uses should be liberally construed.⁵ The right to continue a nonconforming use is not a perpetual easement to make a use of one's property detrimental to his neighbors and forbidden to them,⁶

and nonconforming uses will not be permitted to multiply⁷ when they are harmful or improper.⁸

It has also been held, however, that it is as much the purpose of a zoning ordinance to protect an owner's right to a lawful nonconforming use as it is to protect the rights of other property owners to prevent unlawful nonconforming uses.⁹

§ 183. — Persons Entitled to Maintain Nonconforming Use

The right to continue a nonconforming use is not limited to the owner of the property at the time the ordinance was enacted, but extends to subsequent purchasers.

An express or implied provision excepting existing nonconforming uses from the operation of a zoning regulation is directed to the use of the land and buildings at the time of the adoption of the ordinance and not to the persons occupying the land and buildings at that time.¹⁰ The right to continue a nonconforming use is not limited to the person who owned the property at the time the zoning ordinance or regulation was adopted¹¹ and such right passes to subsequent purchasers of the property.¹² Likewise, lessees have the right to use the premises for a nonconforming use to the extent of the prior use of the lessor.¹³

§ 184. What Constitutes Existing Use

The right of a landowner to continue a nonconforming use of property applies only to a nonconforming use which existed at the time of promulgation of the zoning ordinance or regulation prohibiting such uses.

The rule permitting a landowner to continue a

nonconforming use of property in a certain area applies only to a lawful nonconforming use which existed at the time of promulgation of the zoning ordinance or regulation.¹⁴ Normally the critical date is that on which the regulation prohibiting the use becomes effective rather than the date of its passage,¹⁵ and a warehouse erected after the passage of, but before the effective date of, an ordinance forbidding such use is protected as a nonconforming use.¹⁶ However, such a result may be avoided by a provision in the ordinance defining a nonconforming use as one in existence at the time of the initial passage of the ordinance.¹⁷

The phrase "existing use" means a utilization of premises so that they may be known in the neighborhood as being employed for a given purpose,¹⁸ and ordinarily an existing use for business combines two factors: (1) Construction or adaptability of a building or room for the purpose. (2) Employment

of the building or room or land within the purpose.¹⁹ So, the use for which premises were designed, arranged, or intended when the zoning ordinance became operative is an element in determining the nature of the existing use.²⁰ In this context, it has been held that "use" means what is customarily or habitually done or the subject of a common practice.²¹ Neither the extent, quantity, nor quality of the use which may be continued is prescribed by some provisions, but it is only required that the use must have existed,²² and in this connection it has been held that no particular number of acts or business transactions is necessary to constitute an "existing" use.²³ There need only be a use before the date of the ordinance, an intent to continue, and an effort made to effectuate the purpose.²⁴ Actual operation or visible use on the effective date of the ordinance is not necessary in the case of a nonconforming use which is seasonal in nature.²⁵

In particular cases, it has been held that a nonconforming use was established,²⁶ as that the premises were being used as a multi-family dwelling at the effective date of the ordinance,²⁷ that a garage

use was established,²⁸ that a trailer camp was in operation,²⁹ that the premises were used for funeral purposes,³⁰ or that a building had been operated without a rear yard.³¹

In other cases, it has been held that a nonconforming use was not established³² in the case of a claimed use as a junk yard,³³ as a multi-family dwelling,³⁴ as a rooming house,³⁵ as a quarry,³⁶ as a dog kennel,³⁷ as a place for the dismantling of used automobiles,³⁸ or as a place for the excavation of clay.³⁹

Where premises were used for a single-family dwelling before the adoption of the ordinance, it may not be urged that a nonconforming use for multiple dwelling purposes existed because the premises contained a kitchen and bathroom on each floor.⁴⁰ The fact that a fifteen-year-old schoolboy employed his spare time in making keys or by doing occasional repair work on batteries, radios, or automobiles did not give the premises on which the work was done, which were subsequently zoned as a residential zone, a "business status" within the

meaning of a zoning ordinance providing that a use not conforming to a use allowed under the ordinance may be continued if so used on the date the ordinance became effective.⁴¹

Gratuitous use. The use of an accessory building as a second single-family dwelling on a lot subsequently restricted to one single-family residence establishes a nonconforming use without regard to whether such use was gratuitous or for a valid consideration.⁴²

§ 185. — Contemplated or Intended Use

A use which was merely contemplated or intended but not realized at the effective date of the zoning regulation prohibiting such use is not protected as a nonconforming use.

Provisions preserving the right to continue an existing use do not apply in the case of a use of property which was merely contemplated for the future but unrealized at the effective date of the regulation.⁴³ The use must be actual,⁴⁴ as distinguished from the acquisition, setting apart, and dedication of property in contemplation of a future use.⁴⁵ The mere fact that property is purchased for

the purpose of devoting it to a use subsequently forbidden by the zoning regulations does not give the owner the right subsequently to devote the property to that use.⁴⁶

Mere intentions do not establish a nonconforming use,⁴⁷ and it is not enough that the plans for the proposed use have been put on paper.⁴⁸ Accordingly, the mere fact that ground has been purchased and plans made for the erection of a building before the adoption of a zoning ordinance prohibiting the kind of building contemplated does not exempt the property from the operation of the zoning ordinance.⁴⁹ Likewise, the change of the zoning ordinance to require residential lots to have a frontage of at least a hundred feet whereas only a fifty-foot frontage was formerly required does not entitle one having a lot with less than a hundred-foot frontage on which he intended to build to go ahead with his plans on the theory of a nonconforming use.⁵⁰

A new ordinance operates retroactively to require a denial of an application for or to nullify a permit already issued, provided the holder of the latter has not already engaged in construction or incurred

Stables for racetrack

Intention to use land, purchased prior to enactment of ordinance zoning area as a residential area, for erection of stables to be used in connection with existing enclosed racetrack was not an existing use within provision of ordinance permitting continuance of nonconforming existing use, notwithstanding holding of land for future expansion might be natural incident of racetrack business.

obligations directly in relation thereto, when such application or permit seeks or grants a use no longer permitted under the new ordinance.⁵¹ A zoning ordinance prohibiting the operation of gas stations in certain areas passed pending certiorari to review the action of the municipal authorities in denying a permit to erect and operate gas station is applicable to the case.⁵²

Cemetery. Where a cemetery corporation purchased realty under a permissive legislative enactment for the expressed and exclusive use as a cemetery or place for burial of the dead, and held the realty for that purpose and no other, it was not necessary that actual burials be made in order to evidence a nonconforming use by the corporation.⁵³ Where, however, land had been purchased by individuals and deeded to an association to be used as a cemetery and there had been no sales of burial lots and no interments, sufficient work had not been done to put the property into actual utilization as a cemetery so as to authorize its continuance as a nonconforming use, since the association was not irrevocably committed by an accepted dedication of the property to a cemetery use.⁵⁴

Clay beds. The owner of land containing clay beds, which had been bought for future use but had never been used, was not entitled to begin excavation operations after the enactment of a prospec-

tive zoning ordinance restricting the area to residential purposes, on the theory that the owner was simply continuing a use already in effect.⁵⁵ The mere making of borings to determine the presence of clay prior to the adoption of the ordinance did not establish a nonconforming use of the property for the excavation of clay.⁵⁶

§ 186. — Building or Use in Course of Construction

A structure or use in the course of construction at the time of the enactment of a zoning regulation prohibiting such use may be regarded as a nonconforming use.

A structure in the course of construction at the time of the enactment of the ordinance is protected as a nonconforming use,⁵⁷ but mere preliminary work which is not of a substantial nature does not constitute a nonconforming use.⁵⁸ It has been held that the fact that a building was erected before the ordinance took effect would not establish a use existing before the ordinance took effect, and that the protection to which the building was entitled would not extend to a use not then in existence,⁵⁹ but it has also been held that if a person commences to erect on his realty a building for the purpose of conducting light manufacturing and expends money in erection of such a building, or in partially erecting such a building, subsequent zoning regulations cannot prevent him from completing the building and

Mere laying of pipes and sewers, especially adapted for use by row houses, many years prior to adoption of zoning ordinance prohibiting row houses, did not bring plan for construction of row houses so near completion that lots could be used only for erection of row houses, so as to constitute a nonconforming use in existence prior to ordinance.

Pa.—Appeal of Dunlap, 87 A.2d 299, 370 Pa. 31.

Flatting

Tests for strip-mining

Where a coal company had leased land for strip-mining coal operations, but had not removed coal, although it had made tests to determine the advisability of beginning operations, which tests had not been completed, there was not an existing nonconforming use, and the ordinance effectively prohibited such operations.

Freight terminal

Even if building being used as a freight terminal, allegedly in violation of zoning ordinance, was erected before effective date of such ordinance and remained substantially unchanged thereafter, such fact would not render ordinance inapplicable, in absence of any evidence of actual use of building as freight terminal before ordinance took effect.

Mass.—City of Everett v. Capitol Motor Transp. Co., supra.

conducting light manufacturing therein.⁶⁰ Where a zoning law provides that structures not in conformity therewith, and started within the six months prior to its effective date, must be discontinued unless there has been substantial construction, a purported contract, which is in fact so vague as to be unenforceable, or a contract to do work consistent with the zoning ordinance, will not be considered as "substantial construction."⁶¹

If after a purchase or leasing of lands a permit is obtained to use lands for a use then permissible under the zoning ordinance and either substantial construction is made thereon, or substantial liabilities are incurred relating directly thereto, or both, before the permit is canceled or revoked, the right to such use has become established and vests as a permissive nonconforming use;⁶² but the expenditure of a small amount of money under a permit does not effect a nonconforming use.⁶³

Actual use prevented. A nonconforming use has been held not to exist where the institution of construction was prevented by an injunction obtained by adjoining landowners and in the interim, an ordinance forbidding such use was enacted;⁶⁴ but where actual construction had been started and would have proceeded further at the time of the enactment of the zoning ordinance had construction not been enjoined in an action later determined to be without merit, the view has been taken that a

nonconforming use was established.⁶⁵ One who, when an amendatory ordinance prohibiting the use of premises in a certain area for the purpose of conducting auction sales was adopted, had commenced to use the premises in the area as a place at which to conduct such sales, although prevented from actually conducting sales by unlawful actions of the municipality, is entitled to the benefit of the nonconforming use provision of the amended ordinance.⁶⁶

§ 187. — Prior Abandoned Use

A use which was abandoned or discontinued prior to the enactment of the restrictive ordinance is not protected as a nonconforming use.

A use which was abandoned or discontinued prior to the enactment of the restrictive ordinance is not protected as a nonconforming use.⁶⁷ Accordingly, a use at some remote period prior to the enactment of the ordinance does not establish a nonconforming use,⁶⁸ and where a commercial use of the property was discontinued by the owner prior to the zoning of the property as residential, the subsequent use of the property must conform to the ordinance.⁶⁹

The use for which property is adapted need not have been in actual operation at the time of adoption of the ordinance if the property was used for such purpose before such time and the attending circumstances connected with the property bear out the conclusion that the owner intended to resume

for construction of addition to machine shop at time when proposed zoning regulations were under consideration, and owners had knowledge of the fact, and after adoption of regulations, owners did some grading, dug footing trenches, drilled a well, and made certain electrical installations but did not commence building, small amount spent on property did not affect it with a nonconforming use.

the use of the property for that purpose.⁷⁰ Thus, where property is built or adapted for a particular use, the question of existing use is determined by the ascertainment as near as possible of the intention of the owner, in connection with the fact of a discontinuance or apparent abandonment of use, and is not to be determined by actual use on the date of the adoption of the zoning ordinance.⁷¹ Likewise, where a mining operation was suspended because of the plant's obsolescence, but it did not appear that the owner intended to abandon mining, he was entitled to resume active mining as a nonconforming use after the enactment of an ordinance prohibiting such use.⁷² Where, however, the use of land as a piggery was abandoned prior to the enactment of an ordinance prohibiting such use, it has been held that there was no nonconforming use although the owner may have intended again to use the property for such purpose.⁷³

The owners of buildings destroyed by a hurricane have been protected on the theory of nonconforming use from the restrictions of a subsequent zoning ordinance in so far as they may wish to rebuild or replace buildings or improvements of identical size and for the identical use.⁷⁴

§ 188. — Unlawful Use

A use which was unlawful at the time the ordinance prohibiting such use was enacted is not ordinarily regarded as a nonconforming use.

A landowner acquires no advantage from a nonconforming use previously enjoyed where it appears

that such use was surreptitiously and fraudulently effected,⁷⁵ or was unlawful at the time the zoning regulation took effect.⁷⁶ A use may be continued as a nonconforming use despite a subsequent zoning regulation forbidding such use where the use conformed to the zoning regulations in effect prior to such enactment,⁷⁷ but not where such use was in violation of the prior zoning regulations.⁷⁸

Where a garage business was conducted in violation of a zoning ordinance which classified the area as residential, a subsequent revision of the ordinance which does not change the classification of the area does not render the prior operation of the garage lawful so as to permit its continuance as a nonconforming use.⁷⁹ A use of realty, violative of prior zoning ordinance, was not rendered valid by enactment of subsequent ordinance, containing a repealer of the prior ordinance and exempting pre-existing nonconforming uses, defined as any use not complying with the subsequent ordinance and which was not in violation of any prior ordinance in effect at time of the enactment of the subsequent ordinance, since the purpose of the subsequent ordinance relating to conforming uses was to continue use restrictions embodied in the prior ordinance unless expressly excluded from, or modified by, the subsequent ordinance.⁸⁰

Where the use was unlawful and illegal because of the failure to secure a permit for use on Sundays and holidays, a nonconforming use was not established as against a subsequent ordinance prohibiting that use of the property.⁸¹ However, it has

been held that a parking lot was not deprived of its status as a nonconforming use by reason of the fact that the user had failed to renew the parking lot license at the time the ordinance forbidding such use was enacted.⁸² Persons building a dam and creating a lake without complying with the conservation law until after the effective date of a town zoning ordinance excluding commercial uses from district in which work was done may not assert that a small proportion of the work done before such date removed the construction from the effect of the ordinance.⁸³ Where an automobile wrecking business was conducted in violation of both licensing and fencing ordinances, but after such business was prohibited by a new zoning ordinance, the operators complied with the fencing ordinance and county officials with knowledge of the prior violations issued a license, the county may be estopped to complain of prior violations and may not refuse to issue a renewal license.⁸⁴

A use which violated a restrictive covenant is not

entitled to protection as a nonconforming use.⁸⁵

§ 189. Continuance or Change of Use

The rule as to the preservation of nonconforming uses protects the right of a landowner to continue only the same use of property as existed before the date of the zoning regulation, and he may not change to a different kind of nonconforming use except when such a change is permitted by the terms of the zoning regulation.

Generally, the rule as to the preservation of nonconforming uses protects the right of a landowner to continue only the same use of the property as existed before the date of the zoning regulation,⁸⁶ rather than another kind of nonconforming use⁸⁷ differing in quality or character,⁸⁸ unless the ordinance otherwise provides.⁸⁹

In other words, a lawful nonconforming use of land existing at the time of adoption of a zoning regulation which may be continued is substantially the same use which existed at the time of adoption of the regulation and not some other nonconforming use which the owner might subsequently find

profitable or advantageous,⁹⁰ or one substantially different;⁹¹ and a prohibited use cannot be substituted for a different prohibited use under the guise of continuance of a nonconforming use.⁹² A change to a narrower use within the scope of the prior use is protected as a continuation of the nonconforming use.⁹³

The use at the time of the enactment of the ordinance establishes the nonconforming use which the owner is entitled to continue,⁹⁴ and a mere intention to put the property to a different use at a future time is not material.⁹⁵ The fact that the new use is no more detrimental to the neighborhood than the original nonconforming use is of no consequence;⁹⁶ a different nonconforming use is not allowed even though such new use is less objectionable, less obnoxious, and less noisy than the

original nonconforming use.⁹⁷ The advantages that the owners of nonconforming property acquire by the enactment of a zoning ordinance are not to be subsequently augmented except as permitted by the ordinance.⁹⁸

Whether or not the use has been changed is a question of fact,⁹⁹ and in determining the question whether the nonconforming use was the same before and after the passage of the zoning ordinance, so as to be permissible, each case must stand on its own facts.¹ Where activities merely incidental to the nonconforming use are made the main use, there is a change of use.² The particular use and not the general classification governs the question of whether or not the use has been changed.³

In particular cases, it has been held that the use was not substantially changed.⁴ For example, a

right to a nonconforming use of the premises for the parking of one and one-half ton trucks is not unlawfully altered by the parking of six-ton trucks.⁵ An admitted nonconforming right to maintain an advertising sign is not limited strictly to the kind which existed prior to the relevant zoning ordinance in so far as material, lighting, legend, size, and location are concerned, provided the changes made are de minimis under all the circumstances, as where there has been a slight change in size and location and the substitution of a different type of lighting and material.⁶

In other cases, it has been held that the use was changed or that there was a substantial departure from the authorized nonconforming use.⁷ Accordingly, a prior use of a building for tinsmith and woodworking shops is not the same as its proposed use for the business of spraying paint and protective coatings on metal parts or fabrications manufactured elsewhere.⁸ Premises used as a dance hall before they were included within an apartment house district may not thereafter be used as a

restaurant or a store in which food is served or sold.⁹ The raising and selling of livestock as a nonconforming use do not authorize the operation of a dog kennel.¹⁰ A permissible nonconforming use of land for farming, with incidental use of horses in furtherance of farming, does not justify the conduct of a riding academy or stable.¹¹

The use of property for the operation of a garage is too great a change from the spare-time use of the property to make keys or to do occasional repair work for it to be considered as a continuation of the same nonconforming use.¹² The use of a building for the manufacture of syrup is not the continuation of a use for the manufacture of piano and organ supplies.¹³ The use of the premises for the manufacture and repair of industrial machinery is a new use and different from the storage and repair of delivery trucks.¹⁴

Likewise, a nonconforming use as a vocational school does not justify a lease of the premises to a woodworking firm, a truck-body painting and repair business, and a sheet metal works.¹⁵ A non-

conforming use as a nursery school has been held not to warrant the operation of a summer day camp for children.¹⁶

Further, a nonconforming use as a commercial garage does not authorize the use of the premises for the storage of food or other materials not connected with the garage business.¹⁷ Where, before passage of a zoning bylaw, building was used for repairing motor vehicles belonging to the owner as incidental to trucking business, the use of the building for the repair of automobiles for pay is not a continuation of the existing use.¹⁸ The owner of a lot located in an apartment district authorized to operate a row of stall garages as a nonconforming use is not entitled to demolish the stall garages and utilize substantially the same area for outdoor parking on the theory that the use of the premises as an outdoor parking lot is essentially the same and is a continuance of the prior nonconforming use.¹⁹ The fact that a dwelling house was used either as a doctor's office or tearoom at the time of the adoption of the zoning ordinance designating the district in which the building was located as residential does not permit the subsequent use of the building as a funeral home.²⁰

Under an ordinance fixing the minimum size of a lot in a residential district, but providing that

the provision should not apply as to nonconforming lots existing prior to the enactment, the owner of a nonconforming lot may build on it, but it has been held that he may not combine two or more nonconforming lots for the purpose of erecting a single-family dwelling thereon unless the combined lots conform to the ordinance.²¹ A nonconforming use as a rooming house does not warrant changing the house into three separate apartments.²²

Storage. A nonconforming use of a building for storage of certain articles ordinarily is not changed by a use of the building for storage of other articles,²³ but, where the nature of the thing stored is vastly different and in itself creates new problems, it will be considered a change of use.²⁴

§ 190. — Change Permitted by Regulations

Under some zoning ordinances, a nonconforming use may be changed to another use of the same or a more restricted classification.

The express provisions of some zoning regulations authorize a change from one nonconforming use to another, subject to certain limitations,²⁵ and, under such a provision, a nonconforming use of a building may be changed to another nonconforming use of the same or more restricted classification.²⁶

Change to higher classification as constituting abandonment or loss of right to resume less restricted use see *infra* § 200.

Purpose of zoning ordinance in permitting change from nonconforming use existent when ordinance took effect to another use, subject to limitation that latter shall be similar to the former, is that the change shall be to a use no more obnoxious than the present use, and when possible less obnoxious.

Thus it has been held permissible to use a garage for the storage of merchandise by a peddler,²⁷ and to change the use of a building from the storage and repair of the owner's delivery trucks to the operation of a machine shop.²⁸ A garage may be used for the sale of new cars or as a truck distribution center.²⁹ An ice factory may be used for the cold storage and curing of meat,³⁰ and a "store" may be used as a "restaurant."³¹

However, a change may not be made from a nonconforming use of a higher classification to one of a lower classification.³² Thus, premises used as an architect's and real estate operator's office may not be used as a tailor shop,³³ and the conversion of a public garage to a freight terminal is not authorized.³⁴

A provision that a nonconforming use of a building may be changed to another nonconforming use of the same or a more restricted classification applies only to the use of buildings erected before the enactment of the zoning ordinance and does not extend to the use of unimproved land.³⁵ If a nonconforming building is removed, every future use of the premises must be in conformity with the provisions of the ordinance.³⁶ A provision authoriz-

ing the continued use of nonconforming business premises for any business of substantially the same character has been held to relate only to approval of the use of premises theretofore used for one business purpose, for another business purpose, and it does not permit the use for business of a nonconforming building not previously used for business.³⁷ Under a provision permitting a nonconforming use to be extended by enlargement, reconstruction, or alteration on any tract of land held under one ownership, an abrupt departure from the prior use is not permissible.³⁸

Where a garage use was changed to another nonconforming use at a time when such change of use was legal, a subsequent amendment of the ordinance to prohibit the change of a nonconforming garage use to another nonconforming use will not be construed to operate retroactively.³⁹

§ 191. Enlargement or Extension of Use

A substantial enlargement or extension of a nonconforming use ordinarily is not permitted.

Under the rule preserving the right of a landowner to continue an existing nonconforming use, a substantial enlargement or extension of the prior nonconforming use usually is not permitted.⁴⁰

"Similar class"

Where a zoning ordinance provides that no premises devoted to a nonconforming use at the date of its passage shall be used for any other nonconforming use except one of a similar class, any use within the class of the nonconforming use, as classified by such ordinance, may be made of the premises, since the words "similar class" mean a class of use specified in the same zone in which such nonconforming use is listed.

except as authorized by the zoning regulations,⁴¹ and some provisions expressly prohibit the extension of a nonconforming use.⁴² This rule is designed to prevent any increase in nonconforming uses and eventually to lessen and do away with nonconforming uses.⁴³ The fact that adjacent landowners would not suffer any additional injury by reason of the enlargement of the nonconforming use does not warrant an extension of such use.⁴⁴

There is authority to the effect that the prohibition is only against new uses and imposes no restraint on broadening the scope of a nonconforming use,⁴⁵ and that reasonable accessory uses to the prior use may be permitted.⁴⁶ However, an ordinance

permitting the building of a garage as accessory to property in a residential district has been held not to apply to property devoted to a nonconforming use.⁴⁷

In determining whether or not an activity is within the scope of a permitted nonconforming use, each case must rest on its own particular facts, and the terms of the particular ordinance,⁴⁸ and an extension should not be allowed where there is doubt as to whether or not the extension is substantial.⁴⁹

Under the facts of particular cases, it has been held that a nonconforming use was unlawfully enlarged or extended.⁵⁰ For example, the fact that a

Additional machinery

Where retail lumber yard owner,

building which does not conform to current zoning requirements as to height, yard area, and design is permitted as a nonconforming use does not authorize the use of the building for a nonconforming use where it was not put to such use before the zoning ordinance became effective.⁵¹ The unlawful extension of a nonconforming use by the construction of a water tank and water mains to protect the plant in case of fire by providing necessary water for a new sprinkler system may not be justified on the ground that the fire-fighting equipment of the municipality affords insufficient protection.⁵²

Particular matters have been held not to constitute an unlawful extension or enlargement of a nonconforming use.⁵³ Accordingly, parking six-ton trucks is not an unlawful enlargement of a nonconforming use of the property for the parking of one and one-half ton trucks.⁵⁴ The erection of a neon sign on the building has been held not to be a prohibited expansion of the nonconforming use of the property.⁵⁵ A stadium used for football games and an occasional baseball game prior to the enactment of the restrictive ordinance may be regularly used for baseball games thereafter.⁵⁶

Change of use. The problem of enlargement or extension of use may involve the question of change of use, discussed supra § 189, since an enlarged or expanded use may in substance be a new or changed use.⁵⁷ Where enlargement of use changes its character from light industrial use to heavy industrial

use, such enlargement is improper.⁵⁸ A small existing nonconforming business may not be so enlarged as to be different in kind in its effect on the neighborhood.⁵⁹

Effect of improper extension. Certain uses of property constituting improper extensions of previously existing nonconforming uses do not work a loss of the other nonconforming uses, since violation of the ordinance pertains only to the improperly extended uses.⁶⁰ Where owner of a coal yard in a single-dwelling zone attempted to extend his yard to adjacent vacant land formerly owned by a traction company, itself a nonconforming user, and such land was to be used in conjunction with the presently owned yards and building of such owner, both premises were regarded as a unit and subject to the prevailing zoning restrictions.⁶¹

Garage. A nonconforming use of a garage for the incidental repair and maintenance of trucks used in a particular business is unlawfully extended where the garage is used to recondition automobiles for sale elsewhere.⁶² The use of a garage as a warehouse and place of storage is an unlawful extension of a nonconforming garage use.⁶³

On the other hand, where an automobile repair business had been conducted in the open on the premises for many years, the fact that, in connection with granting a right to erect a public garage on the premises as an exception or variance under a zoning ordinance, the applicant was to be permitted

prior to adoption of zoning ordinance placing premises in residence zone, used a five horsepower motor to operate a saw to cut lumber, and thereafter used a fifteen horsepower planer for dressing of rough lumber, such latter use did not constitute a permissible continuation of nonconforming use.

to use the street as a means of ingress and egress did not constitute an illegal extension of an existing nonconforming use, in view of hardship in providing a means of ingress to, and egress from, any other street.⁶⁴

Intoxicating liquors. The sale of distilled spirits is an extension and enlargement of a nonconforming use involving the sale of wine and beer.⁶⁵ The sale of beer is an unlawful extension of a nonconforming restaurant business;⁶⁶ a restaurant permitted to continue in a residential area as a nonconforming use may not expand its business to include the sale of beer even though it secures a license for such purpose.⁶⁷ A restaurant which sold beer in an area in which the operation of a restaurant and the sale of beer and liquor were subsequently forbidden could not expand its operations to include the sale of liquor.⁶⁸ The right to operate a bar and restaurant as a nonconforming use does not authorize music and dancing on the premises as an incident to such use.⁶⁹ A grocery store use may not be extended by the issuance of a retail beverage license.⁷⁰

Trailer park or court. The year around instead of the seasonal use of a trailer park has been considered an unlawful extension of a nonconforming use.⁷¹ Where a county zoning ordinance prohibited an increase in the number of trailers on property being used for a trailer court and prohibited any in-

crease in the size of buildings on the property, trailer court operators, in the absence of an exception, could not construct additional sanitary facilities.⁷²

§ 192. — Area of Use

As a general rule, the area of a nonconforming use may not be enlarged or extended, except as such enlargement or extension is permitted by the zoning ordinances.

Ordinarily, the area of a nonconforming use may not be enlarged or extended;⁷³ a nonconforming use may not be extended to land not so used at the time of the enactment of the restrictive regulation.⁷⁴ An ordinance forbidding the extension of a nonconforming use has been held to preclude an extension in area either vertically or horizontally.⁷⁵

The owner of property devoted to a nonconforming use may not expand it to adjoining lots owned by him,⁷⁶ particularly where the adjoining lots are acquired by him after the enactment of the restrictive ordinance;⁷⁷ and a nonconforming use may not be extended to an adjoining plot which was vacant at the time the restrictive ordinance was enacted.⁷⁸ Likewise, where one's land is bisected by a public highway and comprises two separate and distinct parcels, one of which had been used for a certain use before the enactment of a zoning resolution prohibiting that activity, the other parcel may not subsequently be devoted to the prohibited use.⁷⁹

Provision prohibiting new cemeteries, but permitting the extension of an existing cemetery, did not jus-

It is not essential that the use as exercised at the time the ordinance was enacted should have utilized the entire tract available therefor;⁸⁰ but the inception of a nonconforming use on a limited part of a plot does not necessarily constitute a preëmption of the entire plot for uses of that character, as against a later prohibitory zoning ordinance, and the criterion is whether the nature of the incipient nonconforming use, in light of its character and adaptability to the use of the entire parcel, manifestly implies an appropriation of the entirety to such use prior to the adoption of the restrictive ordinance.⁸¹ Where part of the lot on which a nonconforming business is conducted is taken by condemnation, the owner may not be prevented from removing the building from such portion of the plot and continuing the business on the remaining part of the lot.⁸²

In the case of uses which cannot be continued without expanding the area of activity, such as a gravel pit, it has been held that the area of activity may not be extended,⁸³ and that the stripping of topsoil from a portion of a tract prior to the date of the ordinance does not warrant a continuance of such stripping operations on other portions of the tract.⁸⁴ However, it has also been held that such uses may be extended to the entire area of the tract,⁸⁵ and that the fact that a person conducting an excavation business on land extended his operations in depth and area on such tract after the adoption of the ordinance did not bring the use

within the prohibition of the ordinance.⁸⁶

Where only part of a building is devoted to a nonconforming use, expansion of such use into another part of the building may not be permitted,⁸⁷ although it has been indicated that this rule would not necessarily apply if the building were one designed and intended for the nonconforming use.⁸⁸ Some regulations permit a nonconforming use to be extended throughout the building in which it is carried on provided no structural alterations, except such as may be required by law, are made.⁸⁹

Under some ordinances, an extension of the area of a nonconforming use is permitted subject to the restrictions and limitations imposed by the ordinance,⁹⁰ and a nonconforming use may not be extended without complying with a provision of the ordinance requiring that a certificate of occupancy be obtained as a basis for extending an established nonconforming use.⁹¹ A provision that a nonconforming building, which is nonconforming because of its area or height, may be extended in height does not permit an extension of a nonconforming building in area.⁹²

An ordinance permitting the extension of nonconforming buildings and uses provided the extension does not exceed a stated percentage of the area of the building has been construed as applicable to vacant land devoted to a nonconforming use, so as to permit the extension of a nonconforming use of land to the extent of the stated percentage of the area or tract already devoted to that use.⁹³ The

area of the building, for the purpose of calculating the permissible extension under such an ordinance, is the area of the building at the time of the enactment of the original restrictive ordinance without including additions permitted thereafter.⁹⁴ The word "area" as used in a zoning resolution, providing that a building or structure devoted to a nonconforming use at time resolution took effect may not be altered or enlarged so as to extend the nonconforming use more than ten per cent in "area," means ground area and not floor space.⁹⁵

Where the owners of property maintained an apartment on their premises with accommodations for three families at the time of the enactment of a zoning ordinance which restricted the area to one-family dwellings, and the ordinance allowed an extension of existing nonconforming uses when such could be accomplished without structural changes, and the building was partitioned into four apartments, and an ordinance was subsequently enacted which allowed a certificate of occupancy on the basis of nonconforming uses existing at the time of the enactment, the partitioning has been regarded as an enlargement of the nonconforming use by natural expansion and the owners were entitled to a certificate of occupancy under the new zoning or-

dinance.⁹⁶ Under a municipal zoning ordinance exempting farm enterprises and permitting the continuation of a farming operation to extent of reconstructing, enlarging, or erecting additional buildings in the normal course of such business, the erection of additional chicken houses on plaintiff's residential premises has been considered proper regardless of the amount of time plaintiff devoted to the chicken business.⁹⁷

§ 193. — Increase in Amount or Intensity of Use

The rule forbidding the extension or enlargement of a nonconforming use does not prevent an increase in the amount of use within the same area.

Generally speaking, the rule forbidding the enlargement or extension of a nonconforming use does not prevent an increase in the amount of use within the same area,⁹⁸ so that a nonconforming use may be not only continued but also increased in volume⁹⁹ and intensity.¹ A nonconforming use is not limited to the precise magnitude thereof which existed at the date of the ordinance, but may be increased by natural expansion,² and a nonconforming use is not unlawfully enlarged or extended although the number of employees has almost doubled.³ The natural growth of a business⁴ or an

increase in the amount of business done⁵ is not a change from the nonconforming use permitted by the zoning ordinances. A garage owner's nonconforming use of the open space in front of his garage for parking automobiles was regarded as merely intensified where he used such space to store new automobiles preliminary to their distribution to dealers.⁶

On the other hand, an abrupt departure from a former use may not be justified as a mere enlargement of that use.⁷ Also, a provision of the zoning ordinance forbidding the enlargement of extension of nonconforming uses has been construed to confine a nonconforming use to its scale of operations at the time of the enactment of the restrictive ordinance,⁸ and a provision forbidding the expansion of a nonconforming use has been construed to prohibit an extension or an increase in intensity of a nonconforming use.⁹

§ 194. Use of New Instrumentalities

The use of new and more effective instrumentalities to conduct a nonconforming use is not an unlawful change or enlargement of the use.

The fact that new and more effective instrumentalities are used in the business conducted on the property will not bring the business within the pro-

hibition of the ordinance as a change of use where such instrumentalities are ordinarily and reasonably adapted to the carrying on of the existing business;¹⁰ but the employment of new instrumentalities and methods may constitute an objectionable extension of a nonconforming use where they operate to change the original nature and purpose of the undertaking.¹¹ Accordingly, the use of machinery to replace work formerly done by hand,¹² the use of power shovels¹³ or a rock crusher¹⁴ in a sand or gravel pit, or a change from steam to internal combustion engines in a plant,¹⁵ has been permitted.

§ 195. Repair, Alteration, or Reconstruction of Buildings

While ordinary repairs and maintenance, and minor alterations and additions are permitted in the case of a building operated as a nonconforming use, substantial or structural alterations and additions are usually not permitted except within such limitations as the zoning ordinances may prescribe.

Thus, a substitution of aluminum for canvas on semi-permanent structures used in connection with a nonconforming carnival use was permitted.¹⁸ Similarly, the enclosing of a loading and unloading platform used in connection with a nonconforming dairy business was allowed.¹⁹ Likewise, a change in the location of the doors and the addition of modern toilet facilities is not an unlawful extension or enlargement of the nonconforming use of a building.²⁰

It has been broadly held that alterations or additions to an existing building may be made where they are in furtherance of an existing nonconforming use.²¹ On the other hand, it has been held that in the absence of authority derived from the zoning ordinance, an existing building may not be enlarged by alteration or addition,²² and some ordinances expressly forbid alterations or additions to buildings devoted to nonconforming uses.²³ A stat-

ute protecting nonconforming uses has been construed as not authorizing or protecting from zoning regulation extensions of existing buildings for nonconforming uses.²⁴ The restriction on the extension or enlargement of a nonconforming use, as discussed supra § 191, applies to structures as well as their use,²⁵ and a building or structure containing a nonconforming use may not be enlarged.²⁶ Under some provisions, an alteration or addition for a nonconforming use is permitted provided it does not exceed a specified percentage of the area of the building at the time the restrictive ordinance was enacted.²⁷

Mich.—Cole v. City of Battle Creek, supra.

"Structural alteration" shown

(1) Reflooring of fifty per cent of floor space of a multi-family dwelling in a single residential district, re-roofing fifty per cent of dwelling, making separate entrances and in-

stalling separate water, heating, and lighting systems was such a "structural" alteration to dwelling as to prolong indefinitely life of nonconforming use within a zoning ordinance.

Ala.—Board of Zoning Adjustment for City of Lanett v. Boykin, 92 So. 2d 906, 265 Ala. 504.

(2) Change of flat-roofed wooden building on concrete foundation, used for storage of construction materials at time of adoption of zoning ordinance, and located within short distance of adjacent lot line, into four-room dwelling with peaked roof at estimated cost of two thousand dollars, was prohibited by zoning ordinance providing that no building should be "structurally altered" except in conformity with regulations and limiting premises to one-family dwellings costing no less than four thousand dollars.

R.I.—Taft v. Zoning Bd. of Review of City of Warwick, 64 A.2d 200, 75 R.I. 117.

(3) The replacement of decayed wooden walls of a building, which was being used as a milk plant as a nonconforming use, by brick walls constituted a "structural alteration," within zoning ordinance prohibiting structural alterations of a building used for a nonconforming use.

(2) Where entire tract was used as veterinary clinic at time of enactment of ordinance, which did not permit such use, and one building was moved one hundred fifty feet and

joined to another at cost of fifteen thousand dollars, most of which covered improvements on inside of building, owner did not accomplish a "structural alteration" within ordinance provision that lawful nonconforming use of building might be continued if no structural alterations were made therein, and owner was entitled to an occupancy permit for veterinary clinic in building.

Proper test to determine what a "structural alteration" to a nonconforming use within a zoning ordinance is, is whether an existing nonconforming use is extended and life of existing nonconforming building prolonged, and not whether there is an increase or decrease in number of square feet utilized by nonconforming use.

tend the area of the existing use,³⁸ and he may be prevented from erecting additions to existing nonconforming buildings.³⁹

It has been held, however, that such provisions do not prohibit alterations not changing the form or character of the building, its general appearance, or structural quality.⁴⁰ A provision forbidding structural alterations has been construed to refer to such an alteration as would convert the structure into a different one and as not forbidding reasonable repairs necessitated by depreciation and deterioration.⁴¹

Under some provisions, structural alterations of

a specified value may be made in a building for the purpose of changing the nonconforming use provided the building is not enlarged.⁴²

§ 196. — New Buildings

Ordinarily, the right to continue a nonconforming use does not authorize the erection of a new building or the replacement of an existing building by another.

Ordinarily, and sometimes by express provision of the zoning ordinances, the right to continue a nonconforming use does not warrant the erection of a new building⁴³ or the replacement of the existing building by a substantially larger building.⁴⁴

Change or substitution

A building is enlarged, extended, reconstructed, or structurally altered within the prohibition of a zoning resolution relating to nonconforming uses only where there is a change or substitution in a substantial particular in the structure of the building itself or in one of its parts or by the addition of another structure to it so that there is an effective conversion of an existing building into a different structure.

N.Y.—440 East 102nd Street Corporation v. Murdock, 34 N.E.2d 329, 285 N.Y. 298.

Change of front and access

Where wall between two-story building of brick and frame construction and connecting one-story brick building had been removed, and store

occupied entire ground floor and had glass display windows and three doorways, buildings were held not "structurally altered" within zoning ordinance by proposed installation of modern plate-glass front across both buildings, with access into store through center door.

Mich.—Paye v. City of Grosse Pointe, 271 N.W. 826, 279 Mich. 254.

Milk plant

Enlargement of milk plant in four-family zoning district to enclose space for can-washing and by-products rooms to comply with health ordinance, not being a vital change of the building in its fundamental purpose, was not within zoning ordinance prohibiting structural alterations.

In New York

(1) Under ordinance providing that no building shall be erected or altered for other than conforming use and that nonconforming use shall not be changed unless changed to conforming use, application for permit to construct building within which to conduct nonconforming business should be denied.

N.Y.—Application of French v. Incorporated Village of North Haven, Suffolk County, 148 N.Y.S.2d 151, 1 A.D.2d 788.

(2) Protection of vested rights in nonconforming structure, existing or in process of erection at time of imposition of zoning restrictions, does not extend to subsequent new construction; and where roof over porch was not included in original plans for building which landowners were allowed to complete notwithstanding zoning change made after excavation work and foundation had been fully completed, landowners had no right to convert terrace into roofed porch.

N.Y.—Application of Rogers, 170 N. Y.S.2d 644, 5 A.D.2d 784.

(3) A landowner, however, has right to accommodate an increase in business and to erect buildings necessary thereto if business in essence is same as a nonconforming use existing prior to adoption of a zoning regulation.

44. Ill.—Gore v. City of Carlinville, 137 N.E.2d 368, 9 Ill.2d 296.

However, where a provision forbidding structural alterations of buildings devoted to nonconforming uses and one providing for the eventual termination of all nonconforming uses were repealed, the legislative purpose evidenced by these repeals has been held to warrant a construction of a provision permitting the continuance of nonconforming uses as allowing the owner of a building devoted to a nonconforming use to demolish the building and replace it by a larger one devoted to the same use.⁴⁵

An ordinance which prohibits structural alterations forbids the erection of a new building.⁴⁶ The fact that a building does not conform to rear yard and open area requirements of a zoning ordinance subsequently enacted does not entitle the owner to erect an additional nonconforming building on an adjoining lot subsequently purchased.⁴⁷

On the other hand, the replacement of a frame by a fireproof building has been allowed where the continued use of the frame building is in violation of other laws.⁴⁸ A new building has been permitted where it will enclose work previously done in the open, and will be less objectionable to the neighborhood than the existing situation,⁴⁹ and it has been broadly stated that unless prohibited by ordinance, a nonconforming use carried on in the open may be enclosed by a building.⁵⁰ On the other hand, the enclosure of a nonconforming use as a junk yard by a building was held to be in violation of an ordinance providing that a nonconforming use may not be extended or increased and that buildings may not be erected or extended on land used as a nonconforming use.⁵¹

Service station. The owner of a service station does not have such a vested right in the perpetuation of that use of the property as would compel the issuance of a building permit for a new and larger nonconforming building to make that use effective.⁵² Any right to a nonconforming use of a lot as it had been used for gasoline filling station purposes prior to the enactment of an ordinance prohibiting a filling station within a residential district does not entitle the owner or lessees of such lot to replace the existing station structures, occupying approximately one-half of the corner lot, by new and larger structures utilizing the entire lot and increasing the volume of gasoline to be stored and transferred.⁵³ Where a service station operated as a nonconforming use in a one-family residential zone became in need of modernization and repair, the proposed complete destruction of the existing structures and the construction of new and larger structures at different locations on the lot so that, inter alia, former outdoor activities, such as repair work and work done at outdoor grease pits, could be conducted indoors, constitutes an unlawful enlargement of the nonconforming use.⁵⁴

§ 197. — Restoration and Repair of Damaged or Destroyed Building

It would appear that where a building devoted to a nonconforming use is substantially destroyed, it may not be reconstructed; but repair and restoration are generally permitted in the case of partial damage or destruction.

It has been held that a nonconforming use which existed at the time of adoption of the regulation may

be continued to the extent of restoring, or making substantial repairs to, buildings in which such use existed,⁵⁵ where such buildings have been damaged or destroyed,⁵⁶ and the ordinance may provide for such repair and restoration,⁵⁷ but it has also been held that, even when a nonconforming building has been destroyed by an act of God, the owner should not be allowed to rebuild it as a matter of right.⁵⁸ The reconstruction of a nonconforming garage partially destroyed by fire has been allowed;⁵⁹ and a refinery operated as a nonconforming use in a residential area has been permitted to restore and repair the part of its plant destroyed by an explosion and fire.⁶⁰

Under some zoning ordinances, the restoration or reconstruction of a nonconforming building which

has been damaged or destroyed is expressly permitted within the limitations and conditions imposed by the ordinance,⁶¹ as where the damage or destruction does not exceed a specified percentage of the physical structure or financial value of the nonconforming building,⁶² and where the work of reconstruction is performed within the time limited by the ordinance.⁶³

A provision authorizing the restoration or repair of a nonconforming structure in the event of its partial destruction does not warrant its reconstruction where it is substantially destroyed.⁶⁴ An ordinance which permits the alteration or extension of a building which is being put to a nonconforming use does not authorize its reconstruction.⁶⁵ Under a provision that a building devoted to a noncon-

Determination of partial destruction

Under statute providing that a structure devoted to a nonconforming use may be restored or repaired in event of partial destruction, what constitutes partial destruction depends on facts of each case, and town zoning ordinance limiting right to restore to cases of destruction of less than seventy-five per cent of replacement value was not authorized. forming use may not be reconstructed or altered beyond a certain extent, and that a building destroyed by fire or other specified causes could be restored, a building which collapsed because it was completely worn out may not be rebuilt.⁶⁶

A provision permitting the reconstruction of a nonconforming building destroyed by fire should be construed in accordance with the intent of the zoning regulations to eliminate nonconforming uses as completely and speedily as possible,⁶⁷ and, while such provision does not require an exact reproduction of the old building, and permits minor variations in construction if a similar use of the building is intended,⁶⁸ a building constructed on a greater street frontage and substantially increasing the nonconformity is not permissible.⁶⁹

Demolition or removal of buildings. Demolition of the buildings on certain premises subject to a nonconforming use does not, of itself, remove the exemption where such exemption applies to the premises as well as to the buildings thereon, as long as there is no change or extension in use or structural alteration of any building in connection with such a change.⁷⁰ A building permitted in a

certain district as a nonconforming use retains its status as such only in its existing location, and it may not be removed into another district in which it does not conform to the zoning regulations.⁷¹

§ 198. Discontinuance or Abandonment

Where a nonconforming use existing at the date of promulgation of a zoning ordinance has been permanently discontinued or abandoned, the right to such use is lost and compliance must thereafter be had with the zoning regulations.

The right to resume a nonconforming use after a period of nonuse depends in most cases on the question of what amounts to an abandonment or discontinuance of the use, and on the effect of such abandonment or discontinuance under the zoning statute or ordinance.⁷² Where a nonconforming use of property existing at the date of promulgation of a zoning ordinance has been permanently discontinued or abandoned, the right to such use is lost and compliance must thereafter be had with the zoning regulations.⁷³ The abandonment of a nonconforming use prevents the subsequent reestablishment of such use;⁷⁴ once the abandonment is clearly indicated by intention and action, or failure of action for a suffi-

Open space in roof

Where portion of building used previously in city as a stable was covered by a roof that had in the center an opening ten feet by ten feet in size through which hay was lowered, and at time of destruction of roof by explosion, the stable was used to garage trucks, which was a nonconforming use, no variance was required under zoning to rebuild roof without leaving an open space ten feet by ten feet.

cient period of time, the owner has lost his right to the nonconforming use.⁷⁵

The word "discontinued," as used in a zoning ordinance provision that, if a nonconforming use is discontinued, any new use of the premises shall be in conformity with provisions of the ordinance, connotes a voluntary act and is synonymous with "abandoned,"⁷⁶ and the discontinuance of a nonconforming use results from the concurrence of the intent to abandon and some overt act or failure to act which carries the implication of abandonment.⁷⁷ However, it has been held that the court is not required to read into a zoning ordinance, providing that a nonconforming use existing on the date of the passage thereof may be continued until the aban-

donment of such use, the restriction, "with the intention to abandon," or similar intention precluding possible return, as modifying the word "abandonment."⁷⁸

The question of the abandonment of a nonconforming use is largely a matter of intention,⁷⁹ and is to be determined in the light of all of the facts and circumstances and the terms of the zoning ordinance.⁸⁰ An intention to go back into a business some day, which has been to all intents and purposes completely discontinued, is not sufficient to hold property in a nonconforming status.⁸¹

In some cases, the facts and circumstances have been held to establish an abandonment or discontinuance of the nonconforming use.⁸² For example,

Affirmative or negative act

In order to find that nonconforming use under city zoning ordinance has been discontinued there must be intent to abandon and voluntary conduct, whether affirmative or negative, which carries implication of abandonment, and lapse of time, although it is evidential, is not controlling factor.

Voluntary relinquishment of known right

Under rule that right of realty owner to continue a nonconforming use may be lost through abandonment of such use, abandonment is actual, voluntary, intentional relinquishment of a known right together with a concurring intention to abandon.

Substantial change

In order to constitute an abandonment of a nonconforming use, the change must be substantial and the evidence such as to afford a rational basis to support it.

Acts and words

In determining whether nonconforming use has been abandoned, case should turn primarily on acts and not on statements except in so far as words took form of action.

whatever right the owner had to maintain a shed as a nonconforming use in a residential district is lost by its voluntary demolition.⁸³ Where a house was operated as a rooming house by partners, but after the death of one of the partners, the roomers were asked to leave, and the house was closed for upwards of four years and no effort was made to continue the business there was no longer a nonconforming use.⁸⁴ Where realty owner had ceased using realty as a race track for five years, permitted the grand stand to deteriorate, and allowed the realty to be foreclosed for taxes, the right to continue to use the realty for a race track on the theory of a prior nonconforming use was abandoned.⁸⁵ Where a multiple-family dwelling permitted as a nonconforming use in a residential zone was converted to a single-family residence by the purchaser and was so used for many years, the fact that there were occasional boarders in the home did not show a continuation of the nonconforming use, where the ordinance permitted boarders in a single-family residence.⁸⁶

Under other particular facts and circumstances,

an abandonment or discontinuance of the nonconforming use has been held not to be established.⁸⁷ Thus, where a purchaser of a multiple-unit dwelling established as a nonconforming use under zoning ordinance providing for single-family residential area, made extensive improvements to units immediately on obtaining possession of the premises, there was no intention to abandon or loss of the nonconforming use of the dwelling as a multiple-unit dwelling.⁸⁸

§ 199. — Cessation of Use

Unless otherwise provided by the zoning ordinance, cessation of a nonconforming use does not of itself work an abandonment of the right to continue such use.

In the absence of a statute otherwise providing, cessation of use does not of itself work an abandonment,⁸⁹ but the duration of nonuse is an important factor in determining whether or not the nonconforming use has been abandoned.⁹⁰ Accordingly, unless so provided in the zoning ordinance, the cessation or discontinuance of a nonconforming use without the substitution of another use or without evidence of an intention to abandon the noncon-

forming use will not prevent a resumption of the nonconforming use.⁹¹ Abandonment of a nonconforming use is not to be assumed from the fact that a building is permitted to remain vacant⁹² and periods of interruption of use due to lack of demand, inability to get a tenant, and financial difficulty do not change the character of the use.⁹³

The repair or remodeling of a building shows an intention to continue rather than to abandon a nonconforming use,⁹⁴ and temporary nonoccupancy for the purpose of making repairs does not amount to a discontinuance of the use.⁹⁵ A nonconforming use is not abandoned by the owner through the taking of a part of the premises by the

city and the demolition of buildings thereon,⁹⁶ or by the destruction of a building by fire.⁹⁷

A discontinuance of a nonconforming use, in order to work an abandonment thereof, should be done voluntarily.⁹⁸ Thus, a discontinuance of a nonconforming use under the compulsion of an injunction cannot be regarded as an abandonment of the use,⁹⁹ and a similar conclusion has been reached where the discontinuance of the use was due to wartime restrictions.¹

Under some provisions, nonuse for a stated time is conclusively deemed an abandonment of the nonconforming use,² and nonuse for less than the stated

Failure to restore property

If owner, after fire, refused to restore property for use of junk shop which was a nonconforming use under zoning ordinance, refused to rent it for junk business and later rented part of it as a warehouse, and if neither owner nor his son ever made any other business use of rented or unrented part of property, nonconforming use was abandoned or changed to use of higher classification.

Wartime restrictions

Where village zoning ordinance prohibited resumption of nonconforming use after discontinuance for more than twelve months, owner of premises in residential zone which had been used for many years as gasoline service station was not entitled to resume such nonconforming use after discontinuance of such use for several years, although nonuse during at least part of period was due to wartime restrictions on gaso-

time ordinarily is not deemed an abandonment.³ Such a provision applies only to nonconforming uses and does not apply to a use permissible as an accessory to a conforming use.⁴

§ 200. — Change of Use

The general rule, sometimes expressly stated in the zoning ordinance, is that the right to continue a nonconforming use is lost or abandoned by the devotion of the property to a different use.

Ordinarily, and sometimes by express provision of the zoning ordinances, whenever a nonconforming use has been changed to a more restricted use or to a conforming use, the owner loses his right thereafter to devote the property to the original nonconforming use.⁵ A provision that nonuse of a nonconforming use for a stated period shall be deemed an abandonment of the use, as discussed supra § 199, has been held to apply where there is a change from the nonconforming use to another use.⁶ Under a provision prohibiting the resumption

of nonconforming uses which have been changed into conforming uses, the right to resume a nonconforming use is not terminated by a temporary interruption or suspension of a nonconforming use without the substitution of a conforming use, or without such definite and substantial departure from the previously existing conditions and uses as to signify an abandonment of the nonconforming uses.⁷ The right to resume a nonconforming use is not preserved by a change to a use not permitted under the zoning regulations.⁸

Where a building in a residential district used as restaurant when the zoning regulations were enacted was subsequently used as a residence, the subsequent resumption of a restaurant business therein was held not a continuation of the nonconforming use authorized by the regulations.⁹ Where a garage which projected over the set-back or building line as a nonconforming use was moved back part of the distance pursuant to a consent decree in an ac-

line and owner had not affirmatively abandoned such nonconforming use. N.Y.—Frammor Realty Corp. v. Le Boeuf, 109 N.Y.S.2d 525, 279 App. Div. 795, reargument and appeal denied 110 N.Y.S.2d 910, 279 App. Div. 874.

Subdivision into lots

While subdivision of land into lots for building of residences may constitute a "use" of land within meaning of a zoning ordinance, where such a use becomes a nonconforming one on passage of ordinance, its status as such is lost by abandonment when nothing is done to preserve it within one year after passage of ordinance, as required by ordinance in order to preserve a nonconforming right.

Change from stable to dance hall

Where owners made improvements costing thirty-five thousand dollars to change barn used as riding academy and public stable into modern dance hall with concrete floor and other modern facilities, such expansion into different use in same classification was sufficient to support finding that owner abandoned original nonconforming use as a public stable.

tion for its removal from the way, it was held to have lost its status as a nonconforming use and to be in violation of the ordinance.¹⁰ The owner does not preserve the right to return to a nonconforming use by a mere expression of an intention to return to such use in a lease of the premises for a substantial period for a conforming use.¹¹

However, a simple change from one local retail use to another in a residential district is not an abandonment of a nonconforming use.¹² The fact that the property is temporarily devoted to a conforming use with intent that the nonconforming use be resumed when opportunity therefor should arise has been held not to establish an abandonment of the nonconforming use.¹³ Where a nonconforming use as a multiple-unit dwelling had been estab-

lished prior to the effective date of a zoning ordinance providing for a single-family residential district, the leasing of the entire building to a single family, who occupied the premises without removal of fixtures to make it a one-family unit, is not conclusive of an intention to abandon the building for multiple-unit purposes.¹⁴

Provision for resumption of use. The ordinance may provide for the resumption of a discontinued nonconforming use.¹⁵ Under a provision that a nonconforming use when discontinued may be resumed, the nonconforming use sought to be resumed must be a use in existence at the time when the ordinance was adopted and not one discontinued before such time.¹⁶

VI. ADMINISTRATION IN GENERAL

A. ADMINISTRATIVE BODIES OR OFFICIALS GENERALLY

§ 201. Designation or Establishment

Particular persons or bodies are generally designated to administer zoning regulations, and in the administration thereof the purposes of such regulations must be given due consideration.

Particular persons or bodies are generally designated by statutes or ordinances, within stated limits, to take the necessary steps to carry into effect, and administer, zoning regulations;¹⁷ and it has been held that a township zoning board does not go out of existence so as to render its subsequent actions ineffective when the township adopts the provisions of a statute creating urban townships.¹⁸ The purposes of the zoning provisions are weighty elements to be considered in their administration.¹⁹

§ 202. Powers and Duties

The powers, duties, and authority of particular bodies or officials charged with the administration of the zoning regulations are such as are conferred on them by the controlling legislative provisions.

The powers, duties, and authority of particular bodies or officials charged with the administration of the zoning regulations are such as are conferred on them by the controlling legislative provisions.²⁰ The local legislative body may delegate to the administrative agency full authority to execute the legislative policy, controlled by specified rules of conduct, or it may clothe the administrative authority with recommendatory power merely, reserving to itself superintendency of such affirmative discretionary action guided by the same standards.²¹

Alteration of premises

21. N.J.—Schmidt v. Board of Adjustment of City of Newark, 88 A.2d 607, 9 N.J. 405.

Administrative authorities are properly concerned with questions of compliance with the zoning ordinance, not with its wisdom.²² In the absence of any statutory authority, they have no power to entertain an application for a change from one nonconforming use in a residential district to a different nonconforming use,²³ and a denial of such an application under the circumstances is a nullity in law.²⁴ On the other hand, it has been held that an official empowered to administer and enforce the zoning ordinance is authorized to determine that a particular business constitutes a continuation of an existing nonconforming use.²⁵ No administrative officer may pick or choose as to who may or may not, in a particular way, use with area coverage the property classified by the city as within a certain height and area district.²⁶

A zoning inspector has no general injunctive powers; if there is merely a threatened violation of a zoning ordinance, the remedy is to apply to the courts.²⁷ A provision of a zoning ordinance empowering the inspector to cause any building or premises to be inspected and to order the remedying of any condition there found to exist in violation of the ordinance, and declaring violation of such an order to be a misdemeanor, does not authorize the inspector to issue a cease and desist order directing the owner permanently to discontinue the alleged unlawful use of the premises, or to refrain from a threatened sale of the property for a

use violating the ordinance where there is no present use, improvement, or building operation in violation of the ordinance.²⁸

§ 203. — Exercise of Powers

A commission authorized to revoke automatic exceptions of existing uses from zoning restrictions exercises quasi-judicial powers in a proceeding to revoke such exception; and an administrative official acts within his powers in ordering the operator of a business to cease work excluded from a business zone.

A commission authorized to revoke automatic exceptions of existing uses from zoning restrictions for specified reasons is a local board exercising quasi-judicial powers in a proceeding to revoke such exception.²⁹ When a zoning regulation excludes from a business zone any business or service detrimental to the neighborhood because of noise, vibration, smoke, dust, odor, or fumes, an administrative official acts within his powers in ordering the operator of a business to cease particular work within the zone because of disturbance caused by noise and vibration, if in fact there is such disturbance.³⁰ A court may not exercise as a matter of original jurisdiction a function committed by a zoning act to the sound discretion and experienced judgment of the board.³¹

Conclusiveness of determination. A decision which an administrative official is empowered to make is conclusive in the absence of an appeal.³²

B. BOARDS OF APPEALS OR ADJUSTMENT

§ 204. In General

Boards of appeals or adjustment are creatures of statute entrusted with the enforcement of zoning ordinances in the interests of the public.

vided that concurring vote of three members of five-member board was necessary to reverse any order, requirement, decision, or determination of any such administrative officer, and that concurring vote of four members was required to decide in favor of applicant on any matter within discretion of board, indicated legislative intent that board should at all times consist of five participating members.

Auxiliary members

(1) Amendment to general enabling act authorizing cities and towns to pass zoning ordinances and regulating certain procedures thereunder, which gave mayor or town council right to name an auxiliary or sixth member of board of review of such city or town, who would sit as an active member on request of chairman of board when and if a member thereof was unable to serve at any hearing, indicated legislative intent that five members of board would always be available to sit at hearing, and thus make up number which general assembly deemed necessary in order to have a legal hearing by a board.

§ 207. Powers and Duties

The powers vested in boards of appeals or adjustment in the administration of zoning regulations are broad and should be liberally construed, but they are limited to such as are conferred expressly or by implication.

It has been said that in the administration of zoning regulations the powers of boards of appeals or adjustment are broad,⁵⁶ and that the authority vested

in them is to be liberally construed.⁵⁷ As a general rule, however, their powers are such, and only such, as are conferred on them either expressly or by implication,⁵⁸ and are governed and controlled by the terms of the statute creating them,⁵⁹ which must be strictly construed and pursued;⁶⁰ and such powers may not be circumscribed, altered, or extended by the municipal governing body.⁶¹ The inclusion in a zoning ordinance of a word for word recital of the statutory powers of the board would be superfluous.⁶²

Adoption of procedural rules. A statute providing that the board shall adopt procedural rules in accordance with the provisions of the zoning ordinances means merely that any rules adopted must

conform to such ordinances, not that the ordinances themselves must provide specifically for such rules.⁶³

Employment of assistants. The board of adjustment may be authorized to employ an attorney and clerical personnel necessary to fulfill its function.⁶⁴

§ 208. — Legislative Power

Zoning boards of appeals or adjustment have no legislative power.

In view of the fact that boards of appeals or adjustment are not legislative bodies, as discussed supra § 205, they do not exercise legislative power,⁶⁵ and may not be invested with a valid exercise of such power on behalf of the municipality.⁶⁶ It follows that they are without power to modify, amend, or repeal the general rules and regulations of a zoning ordinance,⁶⁷ although, as shown infra § 278, they generally have power to grant variances or exceptions.

Progressive planning for a city is not the function of a zoning board of review.⁶⁸

§ 209. — Judicial or Quasi-Judicial Power

Zoning boards of appeals or adjustment may not pass

on the validity of the act or ordinance under which they are authorized to act, and in the absence of provisions conferring such power they have no power to determine the status of the use of property or to issue injunctions, although they perform quasi-judicial functions and act in a quasi-judicial capacity.

Since, as discussed supra § 205, zoning boards of appeals or adjustment, are not courts, they may not pass on the constitutionality or validity of the act or ordinance under which they are authorized to act;⁶⁹ and, in the absence of provisions expressly or impliedly conferring such power, they have no power to determine the status of the use of property,⁷⁰ as that certain property enjoyed a nonconforming use status,⁷¹ and possess no original jurisdiction to act on an application for a change from one nonconforming use in a residential district to a different nonconforming use.⁷² Furthermore, they do not have general injunctive power, the remedy in case of a threatened violation being to apply to the courts.⁷³

In accordance, however, with the rule discussed supra § 205, that such boards are regarded as quasi-judicial bodies, it has been held that they exercise or perform quasi-judicial functions⁷⁴ and act in a

quasi-judicial capacity.⁷⁵ So, they may be vested with original jurisdiction in certain proceedings,⁷⁶ and may be empowered to hear and rule on a petition requesting interpretation and enforcement of a provision of the zoning ordinance.⁷⁷

Subpoena. The chairman of a zoning board may have the power to issue subpoenas for the attendance of witnesses,⁷⁸ and the production of records.⁷⁹

Administration of oath. The chairman of the board has power, under some regulations, to administer oaths at the hearing before the board.⁸⁰

§ 210. — Appellate Jurisdiction

Boards of appeal or adjustment may have jurisdiction under the zoning laws to hear and decide appeals from orders or determinations made by zoning officials.

Boards of appeal or adjustment may have appellate jurisdiction;⁸¹ and under some zoning laws such a board is empowered to hear and decide appeals from any order, requirement, or determination made by zoning officials pursuant to statutes authorizing them to amend, modify, and rezone property.⁸² Where, however, the zoning act confers on the board the power to hear and decide appeals from orders

of an administrative official or agency in the enforcement of the zoning ordinance, the board has no power to review an action of a city planning board in overruling objections to a tentative zoning ordinance, which is part of the legislative process in the enactment of the ordinance and not an administrative act.⁸³

A board of appeals has no jurisdiction to entertain an application to review a ruling made for the purpose of obtaining an opinion which would be essentially of an advisory nature.⁸⁴ Moreover, appellate jurisdiction cannot be exercised unless the officer from whose decision the appeal was taken had the authority in law to entertain and act on the particular application under consideration;⁸⁵ but a decision, made by an administrative official empowered to make it, that a particular business constitutes a continuation of a nonconforming use is reviewable by the board of adjustment.⁸⁶

The board, on appeal from an order of a zoning inspector, has power to reverse or affirm, wholly or partly, or to modify the order of the inspector,⁸⁷ and has all the powers possessed by the inspector

§ 211. — Exercise of Powers

The powers of zoning boards of appeals or adjustment must be exercised within their proper limits; but in the exercise thereof, such boards are endowed with wide and liberal discretion.

The powers of zoning boards of appeals or adjustment must be exercised within their proper limits,⁸⁹ and any action taken by them beyond their authority is void and subject to attack for want of jurisdiction at any time an attempt is made to enforce claims founded on such action.⁹⁰ Thus, the board may not prohibit a use of property permissible in the absence of an ordinance and equally permissible under the terms of an ordinance.⁹¹

Discretion in exercise of power. In the exercise of their powers boards of appeals or adjustment are endowed with wide and liberal discretion,⁹² which must be soundly exercised,⁹³ and which may not be abused.⁹⁴ So, if the construction by the board of a zoning ordinance as applied to a particular piece of property and a particular set of facts is so arbitrary and unreasonable as to result in an invasion of property rights, the action of the board thereunder will be invalidated.⁹⁵

§ 212. Procedure

The proceedings before a board of appeals and adjustment are informal, but they must substantially conform to requirements imposed by statute and ordinance.

Proceedings before a zoning board of appeals or adjustment are informal,⁹⁶ and the rules of practice should not be rigidly applied,⁹⁷ but the proceedings

Where guides prescribed

In exercising its discretion under zoning ordinance which requires board of appeals to approve plan and location of operation of certain enterprises and which provides, in its preamble, guides for exercise of discretion in accordance with objective of zoning ordinance, board must consider every factor in plan of operation which would have bearing on purposes for which ordinance was enacted, and must determine whether particular proposed plan will not conflict with those purposes.

must substantially follow the provisions of the statute or ordinance.⁹⁸ The rule-making power given the board contemplates that certain standards of guidance will be promulgated to insure an orderly hearing, but a rigid formality is neither practical nor necessary.⁹⁹ The only requirement is that the conduct of the hearing shall not violate the fundamentals of natural justice.¹

Petition or notice of appeal. Ordinarily, the board acts on the presentation of a petition or notice of appeal,² sufficiently stating the grounds of complaint,³ made by any person or persons aggrieved.⁴

Time for appeal. When authorized to do so, the board may, and should, fix a reasonable time within which it will entertain appeals.⁵ In particular cases where justice requires it, the board has power to extend the time of appeal.⁶ Failure properly to object that the appeal was not taken in time is a waiver of such objection.⁷

§ 213. — Notice, Hearing, and Evidence

There must be compliance with statutory requirements as to notice and hearing.

In the absence of statute the board may, in a proper case, exercise its judgment and discretion without the hearing of witnesses.⁸ Ordinarily, however, it is necessary to give due notice of hearings before the board⁹ to all persons interested,¹⁰ as well as to the public.¹¹ An insufficiency of a notice of hearing is waived by appearance.¹²

Pursuant to the required notice, a hearing is generally had,¹³ at which any proper party may appear in person¹⁴ or by attorney;¹⁵ and, under statutes and ordinances so requiring, meetings of the board must be open to the public,¹⁶ and a non-public meeting at the home of the chairman of the board held for the purpose of completely discussing, prior to the public meeting, what the law is and any other factors which might come up is improper.¹⁷

Where no particular method of procedure for the conduct of hearings is prescribed, the hearings

"Executive session"

(1) An "executive session" of a public board is one from which public is excluded and at which only such selected persons as board may invite are permitted to be present.

N.Y.—Blum v. Board of Zoning and Appeals of Town of North Hempstead, 149 N.Y.S.2d 5, 1 Misc.2d 668.

must be governed by established rules of procedure applicable generally to administrative tribunals.¹⁸ Although proceedings before the board are not carried out under the strict rules of evidence,¹⁹ one may not be deprived of the right to produce relevant evidence,²⁰ or be fairly apprised of the facts on which the board is asked to act.²¹ Under a statute to such effect, all witnesses appearing before the board are required to be sworn,²² but under others it has been held that the swearing of witnesses is not necessary,²³ or may be waived.²⁴ A stenographic record of the hearing is not required in the absence of an express provision to that effect.²⁵

Parties appearing before a zoning board are entitled to cross-examination of witnesses;²⁶ and the board may not control proceedings before it by requiring that attorneys desiring to cross-examine witnesses ask their questions through the board.²⁷

The board must weigh the evidence presented to it,²⁸ but it has the right to disregard and disbelieve evidence which in its judgment is not credible, although there is no countervailing evidence to dispute or contradict it.²⁹ Statements of counsel made in the hearing, where they are subject to contradiction from the opposition, are entitled to such weight and

credence as the board deems them worthy to receive.³⁰

§ 214. — Determination

The decision of the board should be based on properly established facts, and be assented to by the required number of members of the board.

The board of appeals or adjustment must determine the facts.³¹ Unless otherwise required by statute, the board is not required to make findings of fact on which it bases its action,³² although disclosure in its minutes of the reasons for its decision is highly desirable;³³ but under some statutes the board is required to render findings of fact and conclusions of law.³⁴ The determination of the board should be governed by the law as it exists at the time the matter is heard.³⁵

According to some decisions, the findings or determination of the board should be based only on facts established by evidence in a proper hearing before it.³⁶ On the other hand it has been held that the board may act on facts known to it although they are not produced at the hearing,³⁷ or may make its own survey,³⁸ but it may not acquire evidence outside of a hearing room in the absence of the parties and their attorneys and then base its determination, even in part, on such information.³⁹

The number of members of the board whose assent is required for a decision of the board may be governed by statutory provisions,⁴⁰ and the vote of the board adopting a resolution should show that the required number of members voted in favor of the resolution.⁴¹ In order to be the action of the board, the action must be that of the board as such and not merely the action of the individual members thereof or even of a majority of the members.⁴²

§ 215. — — — Form and Requisites

When so required by statute, the decision of the board should be in writing, and, as far as practicable, in the form of a general statement or resolution; and it should state the grounds on which it is based.

When so required by statute, the decision should be in writing,⁴³ and, as far as practicable, in the form of a general statement or resolution⁴⁴ which shall be applicable to cases similar to, or falling within, the principles passed on.⁴⁵ In the absence of direct requirement, the power may be exercised by resolution.⁴⁶ The decision of the board should, it has been held, state the grounds on which it is based;⁴⁷ but it is not necessary that the decision use the precise language of the statute.⁴⁸

§ 216. — — — Filing, Publication, or Service

There should be a compliance with legislative provisions as to the filing and publication of the decision of

a board of appeals or adjustment; but in the absence of a provision therefor, personal service of a decision is not required.

Under some statutes or ordinances, the decision of a board of appeals or adjustment may be required to be filed in a designated place or with a designated officer⁴⁹ or published in an official publication;⁵⁰ and, in the absence of a provision therefor, personal service of a decision is not required.⁵¹ The board should promulgate its own decisions that they may be accessible to the public;⁵² and must comply with a peremptory statutory requirement that it shall make a detailed record of all its proceedings, and set forth therein the reasons for its decisions.⁵³

§ 217. — — — Conclusiveness

Decisions of the board of adjustment are not subject to collateral attack; but a provision making the decision final as far as it involves discretion or the finding of facts does not make the decision final as to matters of law.

Decisions of the board of adjustment are not subject to collateral attack.⁵⁴ A provision making the decision of the board final as far as it involves discretion or the finding of facts does not make its decision final as to matters of law,⁵⁵ such as the construction of a zoning ordinance.⁵⁶

Matters not essential to decision. Findings on matters not essential to the decision are not conclusive.⁵⁷

§ 218. ——— Reconsideration

A board has inherent power to review its own decisions, but it should not, in the absence of mistake or fraud, reopen a matter which has once been terminated and rehear it on the same facts.

The power of a zoning board to review its own decision has frequently been before the courts.⁵⁸ While such a board may be said to have inherent power to review its own decision in a proper case,⁵⁹ and to be vested with a liberal discretion in deciding whether to do so,⁶⁰ such discretion must be reasonably and legally exercised⁶¹ and is subject to review in the courts.⁶²

As a general rule, a board of appeal and adjustment should not reopen a matter which has once

been terminated and rehear it on the same facts,⁶³ at least in the absence of fraud, surprise, or mistake in the prior proceedings,⁶⁴ but the board may entertain an application for reconsideration if new facts materially changing the aspects of the case are presented,⁶⁵ and the determination of whether there are such substantial changes is primarily a matter for the board.⁶⁶ A petition for rehearing must be timely filed.⁶⁷

Amendment of records. In a proper case a zoning board may amend its own records,⁶⁸ but in so doing it is bound by the rule that controls all such proceedings, and its power in this respect is limited and must be exercised with caution and meticulous attention to fundamental requirements of justice.⁶⁹

VII. PERMITS AND CERTIFICATES

A. IN GENERAL

§ 219. Requirement in General

Although such permits or certificates are not necessary in the absence of provisions of statutes or ordinances requiring them, municipalities may, in the proper exercise of their police power, require that permits or certificates be obtained as a prerequisite to the erection,

alteration, improvement, or use of buildings or other property in a particular manner or in a particular area.

In the absence of any statute or ordinance imposing such a requirement, a building or other structure may be erected, altered, or used in a particular manner without a permit.⁷⁰ Nevertheless, municipal cor-

§ 220. Statutes, Ordinances, and Regulations

Provisions of zoning acts or regulations governing the grant or denial of building permits are subject to the usual rules of construction.

Provisions of zoning acts, ordinances, or regulations governing the grant or denial of zoning permits are subject to the usual rules of construction,⁷⁸ and the meaning of words used therein must be determined in the light of the provisions of the ordinance or regulation as a whole and its intended purposes.⁷⁹ The provisions cannot clothe the official, whose duty it is to grant or refuse the permits, with greater power than that authorized by the statute

which enabled their enactment.⁸⁰ A statute relating to the procedure for the granting of permits, being derogatory of the common law, must be strictly construed.⁸¹

§ 221. — Retroactive Operation

Property is not exempt from subsequent regulations with respect to permits unless the owner has acquired a vested right to use the property in a particular manner.

Unless a property owner has acquired a vested right to use his property in the manner in question, his property is not exempt from the operation of subsequent regulations and ordinances with respect to permits properly enacted by a municipal corporation in the exercise of its police power.⁸²

Reconstruction or alteration of building and change of use

Buildings which were designed and used as lodging house and meeting hall for many years prior to adoption of zoning ordinance could be reconstructed, structurally altered, and their use changed, provided there was compliance with restrictions of zoning ordinance, without any approval by zoning board of appeals.

Newly annexed area

Under city's temporary zoning ordinance providing that persons constructing buildings incomplete at time land on which they are situated is annexed shall apply for a permit before proceeding further and requiring that applications for non-dwelling uses should be passed on by city council, plaintiff who had commenced work on foundations of commercial buildings after annexation petition had been presented held such property and property on which commercial buildings were contemplated subject to city's police regulations when plaintiff's area was subsequently annexed.

Tex.—*City of Dallas v. Meserole Bros.*, Civ.App., 164 S.W.2d 564, error refused.

Purchase in contemplation of ordinance

One who purchases property at a time when proceedings to adopt zoning regulations are under way does so in contemplation of the forthcoming regulations and is bound by them when adopted as respects his right to a permit.

Colo.—*Colby v. Board of Adjustment*, 255 P. 443, 81 Colo. 344.

According to some authorities, where, after the making of an application for a permit but before a decision thereon, the regulations applicable to the subject matter of the permit sought are changed, the application is governed by the regulations as changed,⁸³ and a municipality may properly refuse a building permit for a land use repugnant to a pending and later-enacted zoning ordinance even though the application for the permit is made when the intended use conforms to existing regulations, provided that no permit has been issued and relied on in good faith to the substantial detriment of the holder of the permit.⁸⁴

This rule, however, will not be applied where applicant has met every requirement for the granting of the permit but decision on his application is improperly delayed for a considerable time until a zoning ordinance is enacted prohibiting the use sought;⁸⁵ the right to a permit which was wrongfully withheld is not affected by a subsequent ordinance, especially where it preserves the rights of holders of permits issued before its passage.⁸⁶

It has been held, on the other hand, that an owner of property has the right to rely on zoning acts and ordinances existing at the time of his application,⁸⁷ and that his right to put his property to a

permissible use as provided for by prevailing zoning ordinances accrues at the time an application for a building permit is made.⁸⁸ Accordingly, there is authority to the effect that an application for a permit should not be affected by an amendatory ordinance enacted after the application was filed when the ordinance does not upgrade land use.⁸⁹ It has also been held that municipal authorities cannot by emergency legislation make provisions of a pending ordinance applicable to an application for a permit filed before the enactment of such ordinance,⁹⁰ although there is authority to the contrary.⁹¹

Existing projects for which permits had been theretofore obtained may be expressly excepted from the operation of a subsequently enacted zoning regulation,⁹² and in the absence of any revocation or cancellation of the permit a construction in accordance therewith does not constitute a violation of a subsequently enacted regulation.⁹³

§ 222. Power to Grant

A valid permit may not be granted by a body or official not authorized or empowered to grant it, the power to grant or deny a permit being in the body or official designated.

A valid permit may not be granted by a body or official not authorized or empowered to grant it.⁹⁴

Statute curing invalid ordinance

Building superintendent's refusal of permit for erection of apartment house in district restricted under invalid zoning ordinance would be sustained under subsequent curative statute validating the ordinance.

Limited to application of zoning ordinance

N.Y.—J. L. Hennessy Associates, Inc. v. Griffin, 155 N.Y.S.2d 378.

Restricted to enforcement of zoning ordinance as enacted

R.I.—Ajootian v. Zoning Bd. of Review of City of Providence, 132 A. 2d 836.

Standards specified in ordinance

Board in exercising its discretion to grant permit to use land for religious purposes was limited to applying the rules and standards as specified in the ordinance authorizing the use of property for church or school purposes.

N.Y.—Titus St. Paul Property Owners Ass'n v. Board of Zoning Appeals of Town of Irondequoit, 132 N.Y.S.2d 148, 205 Misc. 1083.

No inherent power

Board does not have the inherent power regardless of terms of zoning ordinance to grant permit.

Cal.—Johnston v. Board of Sup'rs of Marin County, 187 P.2d 686, 31 C. 2d 66.

Bound by terms of ordinance

In granting permits under zoning ordinance, board is bound by terms of ordinance, until ordinance is amended through proper legislative procedure.

Cal.—Johnston v. Board of Sup'rs of Marin County, supra.

Public convenience and welfare

Word "public" in village ordinance authorizing inspector of building, with consent of council, to issue special permit for erection of a church in residence zone if such church would serve public convenience and welfare and would not substantially and permanently injure appropriate use of neighboring property, refers to people generally and not just to citizens of village.

on an application for a permit acts as a special agency of the state.³

Estoppel. Since the acts of a municipality relative to the issuance of permits under zoning ordinances fall within its governmental rather than proprietary functions, estoppel will not lie against it for its acts performed in connection therewith.⁴

§ 224. — Discretion in Exercise of Power

The grant or refusal of a permit is to a certain ex-

tent within the sound discretion of the board or official authorized to issue it, but the discretion must be exercised reasonably, and if an applicant meets all the requirements of the zoning regulations and there is no valid ground for denial of the application, the permit should be issued.

Under some statutes or ordinances the grant or refusal of a permit is to a certain extent within the sound discretion of the board or official authorized to issue it;⁵ but the discretion must be exercised reasonably and not arbitrarily,⁶ and, if an

Municipality held not estopped

(1) Where town planning commission was established under special law providing that before exercise of powers, commission should adopt regulations governing subdivision of land, and regulations adopted required all lots to be of size required by zoning regulations, commission was without power to approve revised map of lots for residential use, which did not comply with zoning regulations, and such erroneous action could not, in absence of large expenditures incurred in reliance on approval of map, establish such an estoppel as would compel building commission to grant landowner's applications for permits to erect houses on such lots.

Conn.—State ex rel. La Voie v. Building Commission of Town of Trumbull, 65 A.2d 165, 135 Conn. 415.

(2) Where owners acquired first lot and built a house thereon, and thereafter they discovered that, due to error in surveying, a portion of house was actually on second lot, and they purchased second lot, giving them a total frontage of 126.83 feet, and borough adopted a zoning ordinance requiring building lots in district to have minimum street frontage of 100 feet, and owners then purchased third lot having a frontage of 50 feet and applied to planning board for realignment of lot lines to give first lot a frontage of 50 feet, second lot a frontage of 64.83 feet, and third lot a frontage of 62 feet, and application was granted, with proviso that no building permit be issued for third lot without further referral to planning board, owners could not meritoriously assert an estoppel, which would preclude borough

from denying a permit for building of a house on third lot.

N.J.—Ardolino v. Board of Adjustment of Borough of Florham Park, Morris County, 125 A.2d 543, 41 N.J.Super. 582.

(3) Fact that construction of a building constituting a nonconforming use was in progress openly and notoriously so that town officials knew or should have known of the work does not estop a town building inspector to order a work stoppage for failure to obtain a required permit.

Conn.—Pallman v. Town of East Haven, 67 A.2d 580, 135 Conn. 593.

(4) Prosecution of owner for violation of zoning ordinance by maintaining nonconforming use did not estop superintendent of buildings and city from questioning maintenance of nonconforming use and failure to object to other use of premises in violation of zoning ordinance did not estop building superintendent to refuse to issue permit to alter premises.

Under express provision of ordinance
N.J.—Rinhart v. Wright, 44 A.2d 385, 133 N.J.Law 374.

Irregularities in adoption, and indefiniteness, of zoning ordinance
Irregularities of town in proceedings for adoption of zoning ordinance and the indefiniteness thereof constituted no basis for denial of right to building permit to which property owner was entitled under the ordinance.

S.C.—Kerr v. City of Columbia, 102 S.E.2d 364.

Private restrictions

(1) A building permit may not be refused on the ground that the building involved would be in violation of private restrictions or restrictive covenants.

Miss.—City of Jackson v. Ashley, 199 So. 91, 189 Miss. 818.

N.J.—Green v. Jones, 135 A. 802, 5 N.J.Misc. 188.

(2) Covenant in original deed subjecting property to subsequent ordinances was not ground for denial of application for a building permit, notwithstanding subsequent adoption of ordinance making lot substandard.
N.Y.—Macchia v. Board of Appeals of Incorporated Village of Kings Point, 164 N.Y.S.2d 463, 7 Misc.2d 763.

(3) A municipal building commissioner has no authority to determine whether private restrictions of record are valid, but only a court of competent jurisdiction may do so.
Mo.—State ex rel. Folkers v. Welsch, 124 S.W.2d 636, 235 Mo.App. 15.

Requirements for variance inapplicable

(1) Where a variance is not asked for or the provisions relating thereto invoked, the requirements for the granting of a variance should not be considered.

(2) A request for permission to make an alteration which is necessary in order to preserve owner's original right under an automatic exception to a county zoning ordinance cannot be subject to limitations under which the board may grant an exception, allow a structure to be altered so as to enlarge the original use, or directly or indirectly extend life of structure.

Cal.—Ricciardi v. Los Angeles County, 252 P.2d 773, 115 C.A.2d 569.

Unauthorized condition

(1) Where board imposed unauthorized condition on granting of a permit, applicant was entitled to the permit without such condition as a matter of right.

N.Y.—Titus St. Paul Property Owners Ass'n v. Board of Zoning Appeals of Town of Irondequoit, 132 N.Y.S.2d 148, 205 Misc. 1083.

(2) Effect of unauthorized condition generally see *infra* § 234.

Liability for delay

Building inspector, who, relying on validity of municipal zoning ordinance, refused to issue building permit, and who appealed to supreme court from order of circuit court to issue permit but who complied with order of supreme court to issue permit, was not liable to applicant for damages due to delay in issuing permit.

Mo.—Kramer v. City of Jefferson, 124 S.W.2d 525, 233 Mo.App. 685.

Annexation of town improperly refusing permit

(1) Where property owner was equitably entitled to obtain from town a permit to build for business purposes, and town was thereafter annexed to city, equity and good conscience required that city stand in town's shoes with respect to property owner's right to permit.

S.C.—Kerr v. City of Columbia, 102 S.E.2d 364.

(2) Equitable maxim that court will regard as done that which ought to have been done governed, and right to building permit from city which had annexed the area was to be considered as if council of town which had been annexed had issued the permit when first applied for.

in such case is held to be arbitrary and unreasonable.⁸

The board or official has no discretion to refuse the permit for improper reasons.⁹ Thus, a building

S.C.—Kerr v. City of Columbia, supra.

(3) Where property owner had had an equitable right to permit from town to build for business purposes, but permit was denied prior to annexation of town by city, city's delay in promulgation of comprehensive plan of zoning of area of former town constituted an additional equity in favor of property owner's right to obtain permit from city.

S.C.—Kerr v. City of Columbia, supra.

N.Y.—De Angelis v. Minor, 166 N.Y.S.2d 568, 8 Misc.2d 994.

Factors considered in determining legitimacy of exercise of power

In determining whether action of town mayor and council in denying permit for operation of junk yard was legitimate exercise of police power delegated to town, fact that applicant's property was located in area zoned heavy industrial and zoning permitted operation of junk yards were factors to be considered.

Md.—Mayor and Council, Town of Bladenburg, Inc. v. Berg, 139 A.2d 703.

Denial of due process

Owner of large tract in a residential zone in which zoning ordinance permitted conduct of schools by churches was entitled to a certificate of occupancy to use such premises as a nonsectarian private boarding school for boys, and refusal to permit such use of the premises was arbitrary, and a denial of due process of law.

43 C.J. p 346 note 21.

Effect of contemplated ordinance

(1) The granting of permits may, under some circumstances, be suspended pending the adoption of zon-

ing regulations by a municipal corporation.

N.J.—Horowitz v. Rath, 153 A. 250, 9 N.J.Misc. 203—Deerfield Realty Co. v. Hague, 151 A. 373, 8 N.J. Misc. 637—Butvinik v. Mayor and Aldermen of Jersey City, 142 A. 759, 6 N.J.Misc. 803.

(2) However, where the passage of the proposed zoning ordinance is inexcusably delayed for an unreasonable period, the application for a permit may not be denied.

N.J.—Mongiello Bros. v. Board of Com'rs of Jersey City, 158 A. 325, 10 N.J.Misc. 131—Deerfield Realty Co. v. Hague, 151 A. 373, 8 N.J. Misc. 637.

(3) A building inspector was required to issue permit for ice plant, where there was no law or ordinance forbidding it, but merely possible conflict with ordinance introduced but not yet passed.

Ohio.—State v. Kreuzweiser, 166 N. E. 228, 120 Ohio St. 352.

(4) Where there was no zoning ordinance affecting the area either at date of formal application for a building permit or at time of judgment, the fact that zoning of the area was being contemplated was not pertinent to question of mayor's authority to refuse building permit.

La.—State ex rel. Romero v. Viator, 46 So.2d 256, 217 La. 239.

(5) Refusal of permit repugnant to zoning ordinance enacted after making of application see supra § 221.

(6) Retroactive operation of regulations see supra § 221.

Independent violation by owner

A lot owner's failure to remove obstruction, declared unlawful by courts, from lot, is no ground for refusal of permit for construction of lawful building thereon.

Pa.—Miller v. Seaman, 8 A.2d 415, 137 Pa.Super. 24.

Loss of tax revenue

(1) In view of provision of constitution that real or personal property used exclusively for religious, educational, or charitable purposes shall be exempt from taxation, denial of a permit for erection of a school and church cannot be justified on the ground that there will be a loss of tax revenue and such a loss would not be in the furtherance of the general welfare.

N.Y.—Diocese of Rochester v. Planning Bd. of Town of Brighton, supra.

(2) No municipal corporation can justly refuse a permit to build a church only because the property will no longer be subject to taxation.

N.Y.—Diocese of Rochester v. Planning Bd. of Town of Brighton, supra.

Ohio.—State ex rel. Anshe Chesed

Congregation v. Bruggemeier, 115 N.E.2d 65, 97 Ohio App. 67.

Inconvenience

(1) Mere inconvenience to neighbors is not a valid reason for denying church permit to construct church in residential district; maintenance of churches is such valuable right that their existence will not be denied because of such inconvenience.

Tex. — Congregation Committee, North Fort Worth Congregation, Jehovah's Witnesses v. City Council of Haltom City, Civ.App., 287 S.W.2d 700.

(2) Noise and other inconveniences are not sufficient grounds on which to deny a building permit to a church.

N.Y.—Diocese of Rochester v. Planning Bd. of Town of Brighton, 136 N.E.2d 827, 1 N.Y.S.2d 508, 154 N. Y.S.2d 849.

Size of lot or open space

(1) Size of lot is not sufficient ground for refusal to permit construction of church in residential area where, under zoning ordinance, lot size was not material if building would not materially injure neighboring property for residential purposes, and there was no claim that lot size accomplished injury, or that lot size had any substantial relation to health, morals, safety, or general welfare of community.

Tex. — Congregation Committee, North Fort Worth Congregation, Jehovah's Witnesses v. City Council of Haltom City, Civ.App., 287 S.W.2d 700.

(2) Board improperly refused to grant a use registration permit for the use of premises on the ground that such use would violate statute which requires that there be space to the rear or the side of a tenement of at least twenty per cent of the area or the lot, and at least eight feet in width throughout its entire length, where premises consists of two adjacent buildings with a frontage of thirty-two feet, the westward half having no rear yard but occupying the full ninety feet depth, and the eastward half having a rear yard twenty-one and a half feet deep.

Pa.—Shore v. Zoning Bd. of Adjustment, Com.Pl., 3 Pa.Dist. & Co.2d 14.

Inadequacy of site and parking accommodations

(1) Lack of parking accommodations is not sufficient grounds for refusal to permit construction of church in residential area where church showed substantial compliance with zoning regulation relating to availability of parking facilities.

Tex. — Congregation Committee, North Fort Worth Congregation, Jehovah's Witnesses v. City Council of Haltom City, Civ.App., 287 S.W.2d 700.

(2) Where only limitations prescribed by zoning ordinance on use of any premises for church purposes were in respect to adequacy of off-street parking and suitability and adequacy of site, board did not have authority to determine whether or not church might be established on petitioner's property, in sense of having power to decide that church could or could not be established at particular location chosen by petitioner; board could only determine whether provision had been made for adequate off-street parking, and whether site was suitable and adequate for church purposes.

N.Y.—Application of Garden City Jewish Center, 155 N.Y.S.2d 523, 2 Misc.2d 1009.

(3) Where off-street parking facilities were presently adequate, board could not refuse to permit construction of synagogue on ground that possible growth in church membership would make those facilities inadequate in future.

N.Y.—Application of Garden City Jewish Center, supra.

(4) On application of synagogue for permission to construct church, under zoning ordinance permitting use of any premises for church purposes as long as off-street parking and site were adequate, function of board is only to make determination on questions of adequacy of off-street parking and suitability and adequacy of site for intended use of premises for church purposes.

N.Y.—Application of Garden City Jewish Center, supra.

Change in character of use and enjoyment of area

Where municipal ordinance provided that churches and schools might be erected and used in residential districts by special permit, planning board could not properly justify denial of a permit to erect a church or school in a residence area on ground granting of permit would change the character of the residential use and enjoyment of the area.

N.Y.—Diocese of Rochester v. Planning Bd. of Town of Brighton, 136 N.E.2d 827, 1 N.Y.2d 508, 154 N.Y. S.2d 849.

Possible depreciation in value of surrounding property

(1) Fact that building a residence on a substandard lot might depreciate the value of neighboring properties was no ground for denying a building permit if the property had continued in single and separate ownership for a period commencing prior to the zoning ordinance making it substandard.

N.Y.—Macchia v. Board of Appeals of Incorporated Village of Kings Point, 164 N.Y.S.2d 463, 7 Misc.2d 763.

permit cannot be denied merely because applicant intends to put the building to an illegal use,¹⁰ or will be in a position to do so,¹¹ or because the permit will be useless to applicant because injunctive relief might be granted to prevent the use of the building for the purpose,¹² or because applicant has not yet obtained a license to operate the business which he proposes to conduct in the building for which the permit is sought,¹³ or because the use

of a right of way on which the property is located would endanger the safety of children and pedestrians,¹⁴ or because of objections by adjacent property owners,¹⁵ or solely because another than applicant claims the title to the premises.¹⁶

On the other hand, a permit or certificate may not and should not be issued for the construction, alteration, or use of property in violation of a building or zoning regulation,¹⁷ or for a change in the

(2) Possible depreciation in value of surrounding property is not sufficient ground for refusal to allow construction of church in residential area.

N.Y.—Application of Garden City Jewish Center, 155 N.Y.S.2d 523, 2 Misc.2d 1009.

Tex.—Congregation Committee, North Fort Worth Congregation, Jehovah's Witnesses v. City Council of Haltom City, Civ.App., 287 S.W.2d 700.

Noncompliance with building code is not proper ground for refusal of zoning board to permit use of religious building in residence district where it is the function of the board of trustees of the village, and not of the zoning board, to pass on the matter of compliance with the building code.

N.Y.—Application of Garden City Jewish Center, 155 N.Y.S.2d 523, 2 Misc.2d 1009.

Failure to secure approval of state traffic commission.

City building inspector could not withhold issuance of permit for erection of a concession building in connection with open-air drive-in theater because applicant had failed first to secure certificate of approval of location from state traffic commission as required by statute, where there is no language in the statute or in the city charter, ordinances, or building code indicating intent that approval of location must precede all else.

Conn.—Loew v. Falsey, 127 A.2d 67, 144 Conn. 67.

Refusal of reasonable offer for substandard property from an adjoining property owner was an improper ground for denying application for a building permit, because no administrative board may compel a property owner either to sell his property or to purchase additional property, and every form of coercion used to accomplish this aim is a violation of his constitutional rights.

§ 225. — Permits for Nonconforming Uses

A permit or certificate for the use of premises or for

the construction or alteration of a building in nonconformity with the zoning regulations may be issued under the authority of some provisions which may specify the conditions for such issuance or place the matter within the discretion of a designated board or official.

Although, as shown supra § 219, a permit to continue a nonconforming use is not required in the absence of specific provisions to that effect, and although there is some authority holding that after the adoption of a zoning regulation excluding a particular type of business from a district the issuance of a new permit for a nonconforming use would be void,²³ provision is sometimes made for the issuance under specified conditions of a permit or certificate for the use of premises, or for the construction or alteration of a building, in nonconformity with zoning regulations.²⁴

On an application for a permit to make an alteration in a structure pursuant to a right to continue a nonconforming use thereof, the question whether such alteration is a mere continuance of the nonconforming use or constitutes an extension thereof is for the determination of the board.³³

Abandonment of nonconforming use. Under a provision that no premises wherein or whereon a nonconforming usage is discontinued for a stated period shall again be devoted to any use prohibited by the regulation, no power to issue a permit for a nonconforming use which has been discontinued for the specified period exists.³⁴

§ 226. Who May Procure

Only a person having a right to erect the structure

or use the property in the manner for which a permit is sought is entitled thereto, but the application need not necessarily be made by the absolute owner of the property.

Only a person having a right to erect the structure or use the property in the particular manner for which a permit is sought is entitled thereto,³⁵ but the application need not be made by the absolute owner of the property, it being sufficient if it is made by one who holds the legal title,³⁶ as for instance, a joint owner³⁷ or a lessee,³⁸ or by an owner of the legal title to only a portion of the property who was in possession of, and operating and managing, all of it.³⁹ Furthermore, in the absence of such a requirement in the zoning ordinance, it has been held that the applicant need not be the legal owner of the property.⁴⁰

In a proper case application may be made by a person having only a contract to purchase the property⁴¹ if he has the consent and approval of the owner,⁴² but not, it has been held, where the prospective purchaser has no present right to erect

(3) Permit to add to a storehouse, which was a nonconforming use, a storeroom onto one side of it, and to inclose a shed attached to it, and then to remove interior walls to make one large storeroom, where zoning ordinance authorizes pre-existing nonconforming use but precludes structural alterations therein. *Miss.—Mayor and Bd. of Aldermen of City of Pontotoc v. the structure.⁴³ The application may be made by one acting in the capacity of agent for the owner,⁴⁴ but a stranger who has no interest whatever in the property is not entitled to a permit.⁴⁵

Waiver of right. The fact that an applicant had erroneous recourse to an application for a variance does not bar him from seeking a certificate of conformance in respect of the use of property on the theory that he was entitled thereto as a consequence of a vested right which made a variance unnecessary.⁴⁶ So a property owner not subject to exclusion from a residential zone, and hence under no legal compulsion to seek a variance in order to erect an extension of his present structure in a residential zone does not, by applying for a variance, waive his right to issuance of a building permit.⁴⁷

§ 227. Proceedings to Procure

There must be a substantial compliance with all procedural requirements and conditions precedent before a valid permit may be issued.

In general, the rules applicable to the obtaining of municipal permits generally, as discussed in Municipal Corporations § 170, apply to proceedings to procure a permit or certificate under the zoning laws,⁴⁸ and it is necessary and sufficient that there

be a substantial compliance with all procedural requirements and conditions precedent before a valid permit may be issued.⁴⁹ Where a specific proceeding is provided in case exceptions need to be made or conditions imposed, a different method of procedure may not be adopted.⁵⁰

Mere neglect of the official issuing the permit to do certain required things may not prejudice the rights of the person receiving a permit to which he would otherwise be entitled.⁵¹

The enactment of a zoning ordinance forbidding the excavation of rock, sand, and gravel in a certain area will not estop the municipality thereafter to grant a conditional use permit to excavate rock, sand, and gravel therein.⁵²

*The allowance of a variance carries with it the right to any permits authorized under the variance.*⁵³

§ 228. — Application

In general, a proper application must be filed in order to secure a zoning or building permit or certificate.

formation,⁵⁷ and such application is required to be filed with the board or officer authorized to grant the permit.⁵⁸ Sometimes it is required that the petition be verified by affidavit,⁵⁹ in which case the cost of such verification, in the absence of legislation putting that duty on the corporation, is on applicant.⁶⁰

Substantial compliance with the requirements as to the application is sufficient.⁶¹ The validity of the permit is not affected by an irregularity in the application not amounting to a jurisdictional defect⁶² or by an immaterial discrepancy in the application,⁶³ nor is such discrepancy ground for refusal of the permit.⁶⁴

In the absence of legislative or judicial expression limiting the time within which a building permit may be issued following the grant of a variance, a delay in making application therefor will not cause it

to be denied.⁶⁵

Under some zoning ordinances or other acts a permit may not be issued before application has been made for a certificate of occupancy.⁶⁶

Waiver of defects. Defects in the application may be waived,⁶⁷ as, for instance, by granting the permit,⁶⁸ or by a consideration of the application on its merits.⁶⁹

Reasonableness of requirements

Building code requirements for submission of both front and side elevations of proposed structure with

spects complying with building regulations,⁷¹ and it also may be required that such plans and specifications be approved by designated municipal officials.⁷² Although substantial compliance with the requirement is sufficient,⁷³ failure to file the required plans and specifications has been held to be more than a mere informality,⁷⁴ and where they are insufficient, the applicant, for that reason, will not be entitled to the issuance of a permit.⁷⁵ The mere approval of the plans does not authorize the builder to disregard zoning ordinances or entitle him to a permit to construct a building in accordance with the plans and specifications where such building will violate zoning regulations.⁷⁶

§ 230. — Consents to Erection, Alteration, or Use of Property

Under some zoning acts the consent or approval of a

designated governing body or other municipal authority is required as a prerequisite to the issuance of a zoning or building permit.

Under some zoning ordinances or acts, a permit or certificate to erect, alter, or maintain particular buildings or to use property for particular purposes cannot be granted until after it has received the consent or approval of a designated governing body or other municipal authority.⁷⁷ Such approval is not required in situations not contemplated by the provision in question.⁷⁸

In approving or disapproving a project the municipal or local board or authority must act reasonably,⁷⁹ and not in an arbitrary or discriminatory manner.⁸⁰ An application under such a provision is distinguishable from an application for a variance

application for permit were reasonable.

§ 231. — — — Adjacent Property Owners

Under some zoning regulations the consent of a specified per cent of the adjacent or neighboring landowners is necessary before a nonconforming use of the property can be permitted.

Under the provisions of some zoning regulations, the validity of which is discussed supra § 43, the consent of a specified per cent of the adjacent or neighboring landowners is necessary before a nonconforming use of the property can be permitted,⁸² and such provisions are held specifically to limit the authority of the administrative officials to permit such use.⁸³ This principle has been frequently applied in cases involving permits for the construction of, or use of property for, garages or service stations, as discussed infra § 256. A similar requirement, found in some zoning provisions relating to the granting of variances or exceptions, is treated infra § 298.

§ 232. — — — Notice

There must be a substantial compliance with the re-

quirements as to notice in order to render proceedings for zoning or building permits or certificates valid.

As a general rule, notice must be given of applications for zoning or building permits or certificates,⁸⁴ in some public manner, or to persons who may be interested in contesting the application, or whose property rights may be adversely affected,⁸⁵ and failure to comply substantially with the requirements of statute or other enactment as to notice renders the proceedings invalid.⁸⁶ Mere informalities in the notice, however, do not affect the validity of the permit or certificate,⁸⁷ and one who received notice of the hearing, attended it, and participated therein cannot be heard to complain of alleged insufficiency of the notice.⁸⁸ Where no notice is required by an ordinance applicable to building permits or municipal permits generally, a permit issued without notice is not invalid.⁸⁹

§ 233. — — — Hearing and Evidence

Depending on the controlling regulations, a public hearing on an application involving a permit may or may not be necessary, or it may be left to the discretion of the body or official passing on it; and if a hearing is held it may be more or less informal.

Under some provisions, a proper hearing on an application relating to a permit must be had,⁹⁰ but

Where, however, the application is for a permit under a zoning ordinance permitting all legal uses except certain specified ones, the burden is on those objecting to the permit to show that one of the excepted uses is intended.⁹⁸

Official investigation or examination of premises. In the absence of a provision to the contrary, the body or official passing on the application may make any desired investigation and act on any facts coming to its knowledge.⁹⁹ Under some acts and ordinances, before a certificate of occupancy can issue, a building inspector is obliged to view and examine the premises to determine conformity with all appropriate regulations.¹

§ 234. — Determination

An application for a permit or certificate should be decided primarily on the evidence offered at the hearing when a hearing is required; and the determination or decision should be within the authority granted.

The members of a zoning commission should decide an application for a permit or certificate primarily on the evidence offered at the hearing, when a hearing is required, although they may take into consideration personal knowledge properly acquired.² The determination or decision must be within

the authority granted,³ but the granting of a permit may be accomplished by resolution rather than by ordinance without violating a municipal charter provision requiring all legislative power to be exercised by ordinance.⁴ The denial of a gaming license to an applicant desiring to operate in an area where the zoning laws permit such businesses to operate does not amount to a change in the zoning ordinances without the taking of the prescribed procedural steps therefor.⁵

Notice of action and reasons therefor. Applicants for permits and certificates are entitled, under some zoning regulations, to notice of the action taken thereon with the reasons therefor.⁶ Thus, it is good practice for the body or official making the decision to state the reasons for refusing an application for a permit or certificate,⁷ and failure to show the basis of the decision has been held sufficient to invalidate it.⁸ It has been held, however, that, in the absence of a statute so requiring, it is not necessary that the reasons for the decision be set forth.⁹

Statement or findings of fact. Under a statute to such effect, the board in its return must make a statement of fact based on the evidence sufficient to show that a judicially exercised discretion justified the action taken,¹⁰ or the board, in making any

stantially the same proposal may not be acted on until after a specified period of time from the date of the last disapproval;²⁸ after the lapse of the time specified, a zoning board or commission may consider and act on a new application for a permit previously denied, but it may properly grant it only if there has been a substantial change in conditions.²⁹ Provisions of a zoning ordinance prohibiting a zoning board from considering and acting on a new application for a permit previously denied, until after the lapse of a specified period of time, do not dispense with the rule of *res judicata* resulting from a court decision.³⁰

§ 237. — Fee

A reasonable fee may ordinarily be charged for issuing a zoning permit or other license or certificate issuable under the zoning laws.

In general, applicant for a building or zoning permit or other license or certificate may be charged a reasonable fee for issuing it,³¹ and for the examination of the premises by a building inspector as a pre-

requisite to the issuance of a certificate of occupancy.³² Under some acts the amount of the fee may be fixed by the zoning board or commission³³ which should be commensurate with the amount of work and study required of it.³⁴

signee,³⁹ and does not bind the municipality in any respect,⁴⁰ even though the permittee may have commenced building operations, or otherwise incurred expenses or obligations thereunder.⁴¹ Thus, a permit is invalid where it does not contain the limitations and restrictions specified by the zoning board in granting the variance under which the permit was issued,⁴² or where it is based on a void zoning ordinance,⁴³ or on the unauthorized attempt of a zoning board to rezone an entire block.⁴⁴ An unauthorized permit does not constitute a basis for an estoppel,⁴⁵ or prejudice or destroy the rights of the public to require the enforcement of zoning laws valid on their face.⁴⁶

Irregularities; discrepancy between application and permit. While mere irregularities in a building permit will not vitiate it,⁴⁷ there should be no serious discrepancy between the application for the

permit and the permission granted.⁴⁸

Signing and delivery. Mere manual signing of a building permit by the official authorized to issue it is not an issuance of the permit;⁴⁹ in order to complete the issuance there must be a delivery thereof.⁵⁰

Use permit held personal

Where board of appeals' decision recited that petitioner requested per-

not be, an adjudication of rights in and to property⁵⁴ or of the mutual rights of property owners who are not parties to the proceeding.⁵⁵

Although there is authority to the contrary,⁵⁶ it is generally held that a building permit has none of the elements of a contract.⁵⁷ It has accordingly been held that a permit does not require the owner to erect the building but merely permits him to do so;⁵⁸ and, even though the owner has started erection of the building, he may stop before its completion and cannot be compelled to go on.⁵⁹

The function of a zoning or building permit or certificate is to evidence the permittee's compliance with the ordinances and regulations and that the structure or use is permissible in the light thereof.⁶⁰ It can confer no greater rights on the permittee than the ordinance or act under which it was issued.⁶¹ Its issuance does not alter or amend the building or zoning codes or ordinances,⁶² and it will not confer on the permittee the right to erect buildings in violation of, or not in conformity with, a zoning act or code.⁶³

The granting of a special use permit extending an area previously zoned for a particular use so as to embrace adjacent property zoned for a different use does not constitute spot zoning,⁶⁴ nor does the

grant of a special permit for a specific purpose, as authorized by the zoning ordinance or law constitute spot zoning.⁶⁵ So, the granting of a permit authorizing the construction and operation of a particular type of building, as authorized by the zoning laws or ordinances, does not constitute a rezoning or the granting of a variance.⁶⁶

A zoning permit or certificate duly issued by an administrative body or official of a municipality is binding on all agencies thereof until set aside by a proper authority or by the courts,⁶⁷ and it may not be collaterally attacked.⁶⁸ Where, however, the permit was illegally issued, as where it clearly was not authorized by, or in compliance with, the zoning enactments, it may be collaterally attacked.⁶⁹ The rights which a permittee has under a preliminary permit issued to him are not waived by his application for a final permit.⁷⁰

§ 240. — Time for Exercise of Privilege

The time for starting or completing the work under a zoning or building permit or certificate may be limited; where no time is fixed for the exercise of the privilege granted under a permit, it must be exercised within a reasonable time.

The time within which work under a zoning or building permit must start, or be completed, or a

mit, that extension of existing permit was not detrimental, and that grant of permit did not contemplate expansion beyond owner's existing bounds, but there was no finding that statutory requirement for granting of variance had been met, even though decision stated that board authorized variance and that variance ran only to petitioner, a permit and not a variance was granted, permit was personal, and there was no existing grant which was available to any other occupant of petitioner's land.

Where the permit is revocable only for cause, if the construction begins within a stated period of time, and the permit is arbitrarily withheld until issued in obedience to a final judgment in mandamus, applicant is entitled to an extension of time from the final determination of the mandamus suit within which to begin construction of the building;⁷⁵ such period of extension is the same as that specified by the building regulation under which construc-

§ 241. — Construction; Privileges Embraced

The privileges granted by a zoning or building permit or certificate is determined by the application, the decision thereon, and the language of the permit itself; a permit cannot be extended to privileges not embraced by it; nor can a building permit authorize violation of a zoning ordinance.

The privilege granted by a zoning or building permit is determined by the application and the decision thereon, and by the language of the permit.⁷⁷ Generally, plain and unambiguous words in a permit must be construed in their ordinary sense.⁷⁸ Prima facie, a permit or certificate authorizes the person to whom it is issued to construct, alter, or use the property in the manner specified therein,⁷⁹ but it must be strictly confined thereto and does not confer the right to exercise or pursue other distinct privileges or acts,⁸⁰ or authorize the construction of a build-

ing which does not conform therewith.⁸¹

A building permit obtained for building a structure to use for a particular purpose does not permit the use of the structure for another purpose without the permission of the authorized official or board,⁸² but the fact that the owner at the time of applying for the permit entertained, and later executed, an intent to use the structure for a forbidden purpose does not preclude him from using it for permissible purposes as long as the permit is in effect.⁸³ Permission to remove a building does not authorize alterations thereof without obtaining a permit;⁸⁴ nor does it authorize the permittee to locate it in a position unlawful under an ordinance.⁸⁵

With respect to the privilege intended to be conferred by the permit, the permittee is chargeable with knowledge of existing zoning ordinances at

the time of issuance and of the fact that city officers and agents have no authority to disregard them.⁸⁶ A building permit or certificate of occupancy issued by an administrative official or body cannot authorize, condone, or afford immunity for the violation of a zoning ordinance,⁸⁷ and a person does not acquire any rights under a permit which goes beyond the authority contained in the zoning ordinance or act under which it was issued.⁸⁸

The question whether certain conditions were attached to the granting of a permit cannot always be determined solely from the terms of the permit; and, in a proper case, extraneous evidence may be considered.⁸⁹ The fact that a building permit requires the owner to build a certain number of feet from the sidewalk does not give the owner any right to have other lots similarly restricted, and the owner is not damaged by the abandonment of such line.⁹⁰

No estoppel

Generally, a municipality is not precluded from enforcing a zoning or fire limit regulation by fact that one or more of its officers or servants has exceeded his authority by issuing a permit contravening terms of such regulation, notwithstanding permit holder has proceeded thereunder to his detriment before municipality seeks to enforce regulation against him.

§ 242. — Transfer of Rights

In so far as the right conferred by a zoning or building permit or certificate is a personal privilege it is not assignable, but to the extent that it is a grant which attaches to the land, it runs with the land and passes as an incident thereto on a conveyance thereof.

A zoning or building permit, in so far as it is a personal privilege, as discussed supra § 239, is not assignable,⁹¹ and it must be exercised by the grantee.⁹² To the extent that it is a grant, however, it attaches to the land when exercised,⁹³ runs with the land,⁹⁴ and passes as an incident thereto on a conveyance of the land.⁹⁵ Under this rule, the successor in title to an owner who has a vested right based on substantial construction or work which took place prior to the amendment of a zoning act or ordinance succeeds to that right.⁹⁶

Special use permits under zoning ordinances or

other enactments run with the land,⁹⁷ and a permittee's interest in the permit may be assigned to the owner of the property.⁹⁸ Similarly, a certificate of occupancy permitting the use of a building for a particular purpose inures to the benefit of a purchaser.⁹⁹

§ 243. — Vested or Property Rights

The mere issuance of a zoning or building permit or certificate gives no vested or property rights to the permittee, but after he has acted on the faith of a permit validly issued, and incurred expenses or obligations in reliance thereon, he acquires a vested or property right.

The mere issuance of a permit gives no vested rights to the permittee,¹ nor does he acquire a property right in the permit.² The mere fact that a permit has been issued does not exempt the property from the operation of subsequent ordinances and regulations legally enacted,³ where the permittee

Day before annexation by village

Building permit issued by county day before annexation of area to a

has not commenced to operate thereunder, made substantial expenditures, or incurred substantial obligations in reliance thereon.⁴

Where, however, the proper authorities grant a zoning or building permit or certificate, after the permittee has acted on the faith of the permit and made contracts and incurred expenses or obligations in reliance thereon, he acquires a property or vested right⁵ on which he is entitled to protection,⁶ even though, by reason of subsequent changes in the zoning acts or ordinances, the privilege or use granted

becomes a prohibited or nonconforming privilege or use.⁷

§ 244. Revocation, Nullification, or Change

In general, a permit or certificate under the zoning laws is subject to revocation or to the operation of subsequent ordinances or regulations where the permittee has not acquired any vested right thereunder; but where he has acquired such right, the permit may not be revoked.

It is generally held that a permit or certificate under the zoning laws may be changed or entirely revoked⁸ if it becomes necessary so to change or revoke it in the exercise of the police power,⁹ even
